Top 100 put record $10.3 billion in ads

P&G holds onto No. 1 spot, while retailers go national in big way

BY KATHRYN SEDERBERG

CHICAGO—Retail advertising is no longer local. It's moved onto the national scene in a big way.

That's the story told by the ad spending figures of the 100 largest U.S. advertisers in 1978, a year that saw their total national advertising investment surge to $10.3 billion, up 17% over the 1977 total.

Procter & Gamble, the perennial leader, topped the list with $554,000,000 in total measured and unmeasured advertising.

But following closely behind was giant retailer Sears, Roebuck & Co. (No. 2, with $417,935,000 in national advertising). If local advertising were included in the tabulations, Sears would be far and away the leader, with a total ad investment of $725,000,000.

Sears' move into the No. 2 spot—it was No. 4 in 1977—was fueled by an advertising increase of 14%. K mart, which appeared on the list for the first time last year, held onto fifth place with an ad investment of $250,000,000, up 20%.

Other retailers on the list of top national advertisers are J. C. Penney Co., No. 27 with ad spending of $125,000,000, and Mobil Corp., No. 15 at $163,000,000, a large portion of which goes to support subsidiary Montgomery Ward.

▪ Despite fears of a looming recession, 1978 appeared to be a good year for the 100 leaders. Virtually everyone (98) reported a sales increase (only 93 gained in 1977), although for some, the increase barely kept up with inflation. Earnings increases were reported by 86, compared with 76 the previous year.

Advertising was hiked by 87 companies, while three others held ad spending more or less even. This tops the 82 who increased advertising in 1977, but does not match the 96 who boosted ad spending the previous year.

▪ Leader P&G, which held ad spending virtually constant in 1977, hiked its investment by some 20% in 1978, paced by a heavy commitment to new products—six went national in 1978 and early 1979, and nine went into test or expanded distribution.

Among the heavily supported established products were Folger's coffee (all forms), $31,351,800 in measured media; Crest toothpaste, $23,055,700; Pampers, $18,636,000; Downy fabric softener, $17,519,100; Tide, $16,475,400, and Cheer, $14,974,000.

General Foods held onto its No. 3 position with an estimated ad outlay of $340,000,000, while General Motors Corp. slipped to No. 4 with $266,300,000; it had been second the previous year.

Philip Morris moved up two places to sixth, with an ad investment of $236,800,000, fueled by expenditures not only for its tobacco products, but also for subsidiaries Miller Brewing and Seven-Up.

Advertising and marketing reports on 100 leading national advertisers

Presented here is ADVERTISING AGE'S unique annual collection of facts about the marketing operations of the nation's advertising giants—what they spend on advertising, how they're doing in sales and profits, how their leading product lines and brands rank nationally, what share of the market they hold—and many other vital details. The profiles include listings of each company's marketing executives, the agency lineup and a rundown of account personnel serving the various product lines. Much of the material has never been published before, including estimates of total advertising and promotion expenditures for the 100 advertisers covered, and sales figures for privately owned companies.

ABC Inc.

	1978	1977
Sales	$1,783,985,000	$1,535,667,000
Earnings ...	135,575,000	109,795,000
Advertising	35,854,400	26,800,000

ABC Inc., New York, boosted its 1978 advertising budget 33%, or $9,354,400, to an estimated $35,854,400 and in the process became the 87th largest national advertiser.

In its 10-K report, ABC said it spent $48,777,000 on advertising in 1978. However, amounts reported in 10-K's usually include a number of items not considered advertising or promotion by AA.

The biggest corporate advertising and promotion spender was the tv network which had $10,160,900 in measured media alone. The lion's share of that amount went into magazines, $9,786,800, with network radio and outdoor also getting some network ad dollars.

ABC Radio Stations and the ABC radio network placed more than $4,000,000 in measured media while ABC made-for-tv-movies were backed with $2,265,500, primarily in magazines.

- Other subsidiaries and their measured ad expenditures are: ABC Leisure Attractions (Silver Springs and Weeki Wachee Florida resorts), $485,000 and Word Books, Records and Book Club, $125,000.

In its 26th year of business, ABC Inc. posted a revenue gain of 16% with earnings up 19%. Broadcasting accounted for 87% of corporate revenues in 1978 compared to 83% in 1977.

The ABC tv network was the largest single source of these gains as its prime time and day time program schedules continued to attract the highest number of tv viewers and the corresponding placement of advertiser dollars.

ABC's publishing units also did well, as did the leisure attractions. But after several years of large operating losses, the company finally wrapped up the sale of ABC Records to MCA Records. MCA reportedly paid about $18,000,000 for the problem-plagued unit which has few big name recording stars but has depth in country & western.

ABC also sold off its Historic Towne of Smithville tourist attraction. At the same time, it announced that it will get back into the production of theatrical movies. In addition, the corporation has formed an ABC Video Enterprises division to develop and market programing for the emerging new communication forms like cable, pay cable and videodisc.

- Moreover, the conglomerate's thrust into the publishing business took another major step forward when ABC announced early in 1979 that it had agreed to acquire Chilton Co., a Pennsylvania-based book publishing, magazine and printing company.

ABC Publishing already owns ABC Leisure Magazines, Farm Progress Publications, NILS Publishing, religious publisher Word Inc., *Los Angeles*, Miller Publishing, Hitchcock Publishing and another early 1979 acquisition, R.L. White Co.

In television, ABC continued its prime time Nielsen ratings dominance this year and overhauled CBS to become the leader in daytime tv. It continues to be the dominant network in sports broadcasting.

Meanwhile its early morning program, "Good Morning America," has continued to eat away at its "Today" rival while ABC News' "World News Tonight," has begun paying viewer dividends after a complete overhaul and format restructuring.

The first network to introduce long form programing with the likes of "QB VII," "Washington: Behind Closed Doors" and the highest rated tv show ever, "Roots," ABC brought "Roots: The Next Generations" out in February of 1979 and promptly made it the second most popular program in tv history. Millions of dollars in advertising and promotion backed the series, but it was money well spent as ABC earned about $120,000 per 30-second commercial.

- Nielsen ratings had the series averaging a 30.1 rating and 45 share for the multiparter. The February sweep period was also notable for the network battle of Feb. 11, a night observers have called the most expensive night in television history.

With its made-for-tv movie "Elvis," a tribute to the late king of rock and roll, ABC beat CBS-TV's airing of "Gone With The Wind" and NBC-TV's counter of "One Flew Over the Cuckoo's Nest."

Prime time triumphs like these combined with ABC's regular series fare to give the network another first for the 1978-79 season.

ABC's 21.1 rating for the 31-week season was 2.5 points ahead of CBS and 4.1 points over NBC. Longtime network standard bearers like "Laverne & Shirley," "Three's Company," "Happy Days" and "Charlie's Angels" were joined in the top ten by the season's smash, "Mork and Mindy." Other newcomers like "Angie" and "Taxi" further strengthened ABC's No. 1 network ranking.

- As a result of its prime time preeminence, ABC stands to collect about 40% of the approximate $1.6 billion advertisers are spending for upfront buys in the 1978-79 season. The ABC fall schedule includes six hours of new programing, all nicely placed in and around current hits. One show, "Benson," is widely seen as one of the few authentic hits that will emerge from the new season.

Meanwhile, Frederick Pierce, president of ABC Television, was named exec vp, ABC Inc., earlier in 1979. The move puts him third in the company hierarchy behind chairman Leonard Goldenson and president Elton Rule.

- Besides ABC-TV's notable prime time, sports and other daypart triumphs, last year was also significant for a string of tv station affiliates the No. 1 network snatched away from its rivals.

In most cases, ABC replaced a weak uhf signal station with a strong vhf signal. Moreover, the stations ABC added to its stable of affiliates had strong local news operations, providing better lead-ins for "World News Tonight."

A year after its introduction, the network news program has managed to beat NBC on several occasions, but it remains in third place, though now a challenger.

The "World News Tonight" ad account was originally handled by Case & McGrath, but conflicts led to a parting of the ways, with McCaffrey & McCall, the tv network's agency, adding the news account, worth over $2,000,000.

- Elsewhere in the corporation, ABC moved to create two new units, ABC Motion Pictures and ABC Video Enterprises. Both are designed to enlarge the company's role as a software supplier for all of the new entertainment technologies.

Brandon Stoddard, formerly the ABC exec responsible for its long form programing, was picked to head the motion pictures division. It will produce and distribute theatrical movies that can be peddled to a variety of mediums.

The newest unit is ABC Video Enterprises, with former ABC sports exec Herbert Granath on hand to direct ABC's entry as a programing supplier for emerging new video forms.

Although 1978 was a year of continued growth for the radio industry as a whole and for all of ABC's radio units in particular, it was not a year without turmoil in the radio division.

- The radio network's four-network service completed its 11th year with an affiliate lineup of 1,596 stations. Revenues were higher, but profits were a shade behind the levels attained in 1977. Although ABC still says that its owned am and fm stations are the most listened to group in the U.S., there were a number of problems in both units this past year.

Moreover, well over 50 upper level jobs have changed hands

ABP

RED TAG

ANPA

within ABC Radio starting from the top where long time ABC Radio president Hal Neal was replaced by Ben Hoberman, out of KABC, Los Angeles. Under Mr. Hoberman's direction, KABC attained a solid grip on first place in the nation's largest radio market.

In 1978, security analysts estimate that ABC-owned tv stations accounted for 19% of ABC's $1.5 billion in broadcast revenues and nearly 40% of the broadcast group's pretax profits. Moreover, the profit margin for ABC stations is about 27% compared to the tv network's profit margin of about 16%.

- Ad sales for the stations were bolstered by ABC's prime time and daytime ratings as well as the stations' leadership role in local news.

ABC's latest acquisition is the San Diego based Travel Network, a two-year-old franchise organization of 140 travel agencies. ABC's long-term goal, in addition to being "the One" in the travel agency business, is to expand the operation to 2,500 franchises nationally.

Reportedly ABC paid $5,000,000 for the travel agency business, whose first serious advertising campaign is in the works at Ed Libov Associates, New York and Los Angeles offices. The Libov Agency takes on only heavy broadcast users; its media breakdown is 95% tv, 5% radio.

In entering the booming travel field, ABC plans to use other ABC owned resources like Silver Springs and Weeki Wachee as part of tour packages, even tying in with ABC sporting events.

Alberto-Culver Co.

	1978	1977
Sales	$172,537,684	$152,116,777
Earnings ...	3,008,000	2,043,000
Advertising	32,391,372	29,231,020

Alberto-Culver Co., Melrose Park, Ill., the 96th largest national advertiser, reported advertising and promotion expenditures of $39,391,372 in 1978 and rejoined the top 100 U.S. advertisers for the first time since 1974, when it was the nation's 57th largest advertiser with advertising and promotion expenditures of $40,000,000.

According to measured media figures compiled by Leading National Advertisers, Alberto's advertising resurgence was lead by Alberto VO5 hair spray (up to $5,500,000 from $4,500,000); Alberto VO5 Hot Oil Treatment (up to $3,800,000 from $1,700,000); Beyond preshampoo conditioner (up to $3,700,000 from $700,000), Alberto VO5 conditioning hair dressing (up to $2,100,000 from $1,500,000); SugarTwin low-calorie sugar substitute (up to $1,700,000 from $700,000), and FDS feminine deodorant spray mist (up to $1,100,000 from $552,000).

Among its leading brands, only Alberto Light & Fresh Balsam rinse/conditioner (down to $2,400,000 from $2,900,000) and Static Guard for apparel (down to $1,700,000 from $2,100,000) showed declines.

Alberto's advertising continued to appear almost entirely on spot and network television.

The rise in advertising was reflected in the company's operating results which featured a 13% increase in sales and a 47% increase in net earnings over the previous year. The company's strong showing has continued into 1979, with net sales through June 30 up 9% over the same period last year and net earnings up 21%.

Alberto-Culver's bottom line will be further enhanced by a $4,250,000 out-of-court settlement of a lawsuit the company had filed in 1974 against Gillette and J. Walter Thompson Co. The suit sought compensation for lost profits and punitive damages caused by a commercial for Gillette's Tame that ran for seven months in 1974.

Alberto maintained that the ad disparaged Alberto Balsam creme rinse/conditioner and ultimately destroyed the brand. The settlement was reached in mid-March, 1979, midway into the second week of the trial.

Alberto-Culver's increased advertising activity marks the end of a period of retrenchment that came after a number of calamities struck the company in the early 1970s.

Government regulations on substances such as hexachlorophene (which was an ingredient in FDS feminine deodorant spray) and saccharin (SugarTwin) hurt sales and, in the case of FDS, necessitated reformulation.

In 1974, not only did Gillette's Tame take after Alberto's successful Balsam rinse/conditioner, but the recession and oil shortage also hit the company particularly hard, with Alberto's heavy reliance on petroleum-based products and the unexpected jump in oil prices putting the company in a very vulnerable position.

Reeling from these blows, the company slashed its advertising outlays. According to LNA figures, Alberto-Culver measured media expenditures went from $19,200,000 in 1974 to $12,600,000 in 1976 before rising to $15,800,000 in 1977 and $23,300,000 last year.

Among the new products introduced during the resurgence of the last two years are Beyond preshampoo conditioner (fall 1977) and Static Guard spray-on static remover (winter 1977).

Though the products have not had the impact of some of the company's earlier ventures such as Alberto VO5 hair dressing and the Alberto Balsam line, company officials say that the products have been selling "quite well."

- To deal with the possibility of government limitations on the use of saccharin, the company has prepared a saccharin-free version of its successful SugarTwin low-calorie sweetener.

In October, 1977, Alberto-Culver acquired the Massachusetts-based John A. Frye Show Co., a manufacturer of high-quality leather boots.

Boosted ad spending of over $5,000,000 for Alberto hair spray helped Alberto-Culver regain a spot in the top 100 advertisers. Commercials for hair spray feature personality Rula Lenska.

Alberto officials describe the Frye effort as an attempt to apply "a package goods approach to shoes and boots," and are enthusiastic about the response received by the new products.

New Frye products also are being developed but will not be introduced until sufficient production capacity has been added.

Alberto's other recent new product efforts include Previews, a hot appetizer mix containing onions, mushrooms, seafood and cheese that is spread on bread rounds or crackers and put in the oven (began test-marketing October, 1978); and Baker's Joy, an aerosol-propelled product made of flour and cooking oil and designed to "grease" baking pans (began test-marketing January, 1979). Company officials said that it was still too early to pass judgment on the tests.

According to company officials, Alberto also has "more new products in various stages of development than we've ever had before," especially in the toiletry, household, and food areas.

Corrected rankings

Rankings for several of the top advertisers are incorrectly stated in their profiles. Correct rankings are as follows: Gillette Co. (39); Revlon Inc. (40); Consolidated Foods Corp. (41); SmithKline Corp. (42); Ralston Purina Co. (43); Nabisco Inc. (44); Eastman Kodak Co. (45) and Chesebrough-Pond's (46). Warner Communications is reranked to No. 75; Kellogg Co. through Borden Inc. each move up one position in ranking.

WHERE AA GOT ITS DATA

The data on "measured media expenditures" in this report on the 100 leading national advertisers come from various statistical services and associations.

These include Leading National Advertisers, the Publishers Information Bureau, Radio Advertising Bureau, Radio Expenditure Reports, Agricultural Marketing Information Service (Agricom), LNA-Broadcast Advertisers Reports, Media Records, Institute of Outdoor Advertising and the Outdoor Advertising Assn. of America.

All of the estimated expenditures are estimated by ADVERTISING AGE.

American Airlines

	1978	1977
Sales	$2,735,508,000	$2,379,117,000
Earnings	134,396,000	70,710,000
Advertising*	29,000,000	28,875,000

*AA estimate

American Airlines, New York, the 97th largest national advertiser, held its advertising about even in 1978 at $29,000,000, while sales increased 15% to $2,735,508,000 and earnings increased 90% to $134,396,000, the highest in the company's history.

Albert V. Casey, the airline's chairman and president, said that a number of factors contributed to this being the best year in history for American. Among these he cited that the economy was healthy, corporations were profitable and travel for business purposes grew at a healthy rate. People were willing to spend money on travel because personal income was strong and consumer sentiment was favorable to air transportation.

American offered attractive prices and promoted its fares effectively and extensively. The result was a surge in traffic that, Mr. Casey said, exceeded all expectations and set records for the company and the industry as a whole.

- Super Saver discount fares, first introduced on a limited number of routes by American in 1977, were extended to nearly all American passenger flights early in 1978. The discount-fare program offered reductions on coach seats of as much as 45%.

American's revenue passenger miles in 1978 were up 17.7% over those of 1977—the highest year-over-year gain in more than three decades. This enabled American to maintain its first place domestic passenger load factor ranking. (The passenger load factor is the percentage of seats occupied by paying passengers.) American's load factor of 63.7% was the highest since 1960.

Passenger business to and from points outside the U.S. mainland also turned in a healthy performance. Caribbean passenger traffic rose 15.7% over 1977 to produce a load factor of 67.7%. Mexico traffic increased 31.9%; the load factor was 73%.

The airline's freight traffic rose 5.4% to 626,000,000 ton miles. It was the first time American ever exceeded 600,000,000 ton miles in a single year. Freight revenues also exceeded the earlier high of $199,437,000 (excluding mail and express) in 1977 to reach $225,700,000 in 1978.

- The use of 20-foot-long cargo containers, first introduced in 1977, was extended in 1978. These containers are interchangeable among airplanes and truck, rail and ocean vehicles.

The airline also has over 4,000 containers in a variety of sizes, shapes and capacities to meet individual shipping requirements. Their movement throughout the American route system is monitored by a control center on a round-the-clock basis to ensure that units are available when and where they are needed.

American introduced jet freighter service to Detroit and San Juan, and increased the level of jet freighter service to Haiti and Santo Domingo.

Passenger service was also expanded as nine cities were added to the company's route system, increasing to 74 the number of airports served by the airline. Most of the additions were acquired under the dormant provisions of the Airline Deregulation Act of 1978.

This act allows airlines to add routes in three ways: (1) By filing applications that the Civil Aeronautics Board must process more speedily than has been typical in the past; (2) by picking up the dormant, or unused, authorities of other airlines, and (3) by a limited amount of "automatic" route expansions that will occur once a year.

- Sky Chefs, American's airline catering, restaurant and gift shop subsidiary, earned a pre-tax profit of $8,500,000 in 1978, an improvement of 13.8% over the previous year. Six airlines joined the list of inflight food service customers during the year, including major European carriers at Boston, Los Angeles and San Francisco.

This brings to 36 the number of airlines, other than American, catered by Sky Chefs. Catering revenues from airlines, not including American, rose 27.9% over 1977.

Americana hotels, another American subsidiary, moved into the black in 1978, reporting pre-tax earnings of $1,600,000 before a gain on the sale of the majority leasehold interest in two New York City properties, the Americana of New York and the Americana City Squire.

The occupancy rate for Americana hotels—especially strong in Mexico, Hawaii, Korea and New York City—rose to 80.4% from 76.7% in 1977. It was ahead of the 73% average for the industry as a whole. Increased pleasure travel, attributed to discount air fares and favorable currency rates, resulted in a consistent needs for hotel space at Americana's major properties.

In their first full year of operation as American Airlines subsidiaries, AA Development Corp. and AA Energy Corp. participated in exploration and development drilling activities involving 54 oil and gas wells, 36 of them productive.

The subsidiaries produced approximately 1,300,000 barrels of oil during 1978 and found, developed and acquired the equivalent of 700,000 barrels of proven reserves.

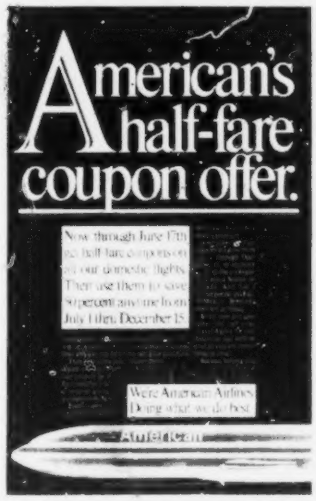
American's headquarters will be moved from New York to the Dallas/Fort Worth area in 1979. The new location was chosen because of its easy access to most points on American's route system and because it is an important connecting center between the east-west and north-south flights.

- The airline said it was expecting delivery in 1979 of nine Boeing 727s and 10 more in 1980, as well as four McDonnell Douglas DC-10s in 1979 and three in 1980 at a total cost of more than $400,000,000. American also has ordered 30 transcontinental Boeing 767 aircraft with an option to purchase an additional 20 at a cost, subject to escalation, of $25,000,000 per airplane.

One of several factors influencing the decision to purchase the Boeing 767s was the Federal Aviation Administration's order in December, 1976, that all airlines retire or modify by given dates in the early 1980s all large commercial jet aircraft that do not comply with federal noise regulations.

American's automated airport passenger processing system was extended to all of the U.S. mainland airports that the airline serves during 1978. The system uses computers and high speed ticket and boarding pass printers to reduce the time required for passenger check-in.

The automated system has made it possible for American to introduce a number of related service advantages for the passengers, such as check-in at city ticket offices, round trip check-in, preflight reserved seating and one-time issuance of boarding passes for connecting flights.



American's half-fare coupon offer.
American

Now through June 17th get half-fare coupons on all our domestic flights. Then use them to save 50 percent anytime from July 1 thru December 15.

We're American Airlines. Doing what we do best.

Half-fare coupons was one of several discount fare attractions that American Airlines used this year.

- The company's leadership position in the industry was heavily promoted through newspaper, radio, spot tv and magazine advertising that emphasized the people of American, "whose courtesy and professionalism were largely responsible for the company's 'No. 1' position in the industry."

The "No. 1" campaign was chosen by the American Marketing Assn., as an outstanding example of effective advertising.

A substantial portion of American's $8,000,000 fourth quarter advertising budget in 1978 went to promoting a special "business class" fare that provided segregated seating, higher-priority check-in and beefed-up meal choice and service.

The theme, "You get what you pay for at American Airlines" was promoted through ads in the business press and by spot tv and radio commercials. But lack of enthusiastic reception by customers led the airline to discontinue the service in December.

American also initiated a heavy promotion campaign in the spring of 1979, following the end of the 55-day United Airlines strike, to announce a new concept in air fares—discount coupons. The air-fare deal, redeemable for half-off any first class or coach flight from July 1 to Dec. 15, ran for a month.

American Brands

	1978	1977
Sales	$5,176,700,000	$4,616,390,000
Earnings	211,539,000	156,359,000
Advertising	77,270,500	83,921,350

American Brands, New York, the 53rd largest national advertiser decreased its advertising expenditures by 8% in 1978 to an estimated $77,270,500. Sales of the highly diversified company increased 12% over the previous year, while earnings jumped 35%.

Currency translations increased earnings by $1,430,000 in 1978, compared with a 1977 loss of $20,227,000.

Three distinct entities are involved in American Brands' substantial tobacco sales: Gallaher Ltd. is the international arm, while domestically, American Tobacco sells cigarets and American Cigar produces cigars and smoking tobacco.

Domestic tobacco sales accounted for 21% of total American Brands sales. International tobacco sales increased their contribution by 1.5% to 42% of total sales. All told, tobacco products recorded a sales volume of $3.25 billion and accounted for nearly 66% of operating income.

- American Tobacco continues as the fourth largest cigaret company, trailing R. J. Reynolds, Philip Morris and Brown & Williamson. It is ahead of Loews' Lorillard division and Liggett Group. American Tobacco's production dropped from 75.62 billion in 1977 to 72.47 billion units domestically last year, resulting in its market share slipping 0.7% to 11.7%.

Industry analyst John C. Maxwell Jr. estimates that unit volume for the entire industry increased by 0.3% in 1978, continuing a five-year trend of declining growth rates. Low-tar cigarets presently account for one-third of domestic consumption, and are continuing to increase in sales.

American Tobacco has four major product lines: Carlton, Pall Mall, Silva Thins and Tareyton. Unit volume of American Tobacco's largest selling brand, Pall Mall, dropped to 37.3 billion units in 1978, from 40.29 billion.

Tareyton sales declined by 1.54 billion units to 13.38 billion, though Tareyton's low-tar entry, Tareyton Long Lights 100s, new in 1978, recorded sales of 1.18 billion units. Sales of Silva Thins were down to 1.82 billion, from 2.23 billion.

Carlton, the industry's pioneer low-tar brand, was the fastest growing brand among the top 20 cigarets. Carlton increased its volume to 10.09 billion, from 7.93 billion, paced by Carlton Filter 100s, which garnered 0.5% of the total market, up from 0.1%, as unit sales climbed to 2.90 billion, from 72,000,000.

- American Tobacco reports that by the end of the year, low-tar brands represented 75% of the division's filter cigaret volume. The low-tar line includes five styles of Carlton—soft pack, menthol, box in king size, 100s and menthol 100s—in addition to various low-tar styles for other brands.

American Tobacco backed its cigarets with nearly $41,000,000 in measured advertising last year. Carlton was the big spender, putting $5,845,000 into newspapers in the top 30 markets and $8,065,000 into magazines. Added to expenditures in other media, this gave Carlton a total of $17,573,600.

Tareyton allocated $3,786,550 to newspapers, and $5,066,200 to magazines; in magazines, Tareyton Lights and Long Lights received

Vopan voice pitch analysis research. A progress report.

It is now four years since Glen A. Brickman founded Vopan Marketing Research to apply, commercially, the voice pitch analysis research technique he developed with Dr. Philip Lieberman and a team at Brown University. What progress has been made and what experience has been gained?

Vopan® Research Programs

Vopan has now refined the technique and applied it to TV pre and post testing, print testing, advertising strategy testing, new product research and brand usage prediction. All these programs are now tested, proven and can be conducted in any city, nationwide.

Vopan Research Experience

Over 30 major national advertisers and many more regional and local clients now use Vopan's voice pitch analysis technique in their research programs. The product and service areas in which Vopan has considerable experience include: Analgesics, Automobiles, Banks, Cereals, Do-It-Yourself Products, Fast Foods, Frozen Foods and other Food Products, Health & Beauty Aids, Household Products, Liquors, Prescription Drugs, Pet Foods, Retail Chains, Soap, Soft Drinks, Sporting Goods, Tobacco, Toys and Games, T.V. Station and Program Promotion.

How and Why Does Vopan Work?

All interviews are tape recorded. Later the tapes are re-played and a computer analyzes the respondents' voice pitch during the interviews.

It is a simple fact that anyone's voice pitch changes, uncontrollably if there is emotional commitment behind their answer. The computer detects committed and valid answers from those that are just 'lip service' or confused. It removes subjectivity. Vopan has been effective for the many clients who have used it in diverse fields over the past four years because it adds accuracy and sensitivity to their research programs.

32-Page Vopan Report

If you would like a free copy of a 32-page Report describing the Vopan technique and programs in detail, please call or write to Glen A. Brickman or Larry Ramsey at Vopan Marketing Research, 264 Beacon Street, Boston, MA 02116, (617) 247-2363.

VOPAN
MARKETING RESEARCH

MARKETING PROFILES

80% of the budget. Tareyton spent $13,131,300 in all media.

Pall Mall spent $9,011,300, including $969,100 in newspapers and $7,002,200 in magazines. Pall Mall Lights 100s, introduced in August, 1978, sold 55,000,000 units, for a little more than 0.1% of the total cigaret market. The entry was backed by $2,734,800 in advertising, excluding newspapers. Silva Thins' support totaled $1,240,600.

▪ American Tobacco uses a fee system to compensate its agencies, instead of the standard commission approach. The fee system guarantees an agency profits up to a certain percentage of billings, as well as providing for client/agency sharing of profits in excess of a certain percentage of billings, according to American Tobacco.

In its annual report, American Brands said the fee system resulted in savings of $2,395,000 in 1978, for a total savings of $25,189,000 over the 14 years that this system has been employed.

American Brands' British subsidiary, Gallaher Ltd., accounted for $109,897,000 in operating income in 1978, an increase of $35,542,000. Sales were ≠1.52 billion, of which 26% came from Gallaher's nontobacco operations—optical, engineering, retailing and wholesaling.

Benson & Hedges Special Filter is now the largest selling cigaret brand in the U.K., with Silk Cut claiming to be the largest selling low-tar brand, having captured over 50% of that market.

Gallaher's Park Drive leads the field as No. 1 in the plain cigaret market. Among cigars, Gallaher's market share increased from 38% to 39%, as its total sales were up 5% in a market that absorbed 1% more cigars.

Gallaher's leading entry is Hamlet, which witnessed a 10% rise in sales and continued in its position as the most popular brand in the U.K., including imports. The No. 2 brand is Gallaher's Manikin.

American Brands' third tobacco unit is American Cigar, whose sales in 1978 were $45,196,000, down $4,677,000, resulting in lower operating income of $4,751,000 compared with prior year's record of $7,190,000.

Part of the decline in operating income was explained by expenses incurred in consolidating all cigar production operations in Mountaintop, Pa., a move which is expected to increase profit margins.

▪ As unit sales for the domestic cigar industry declined for the eighth consecutive year, all brands within the division suffered similarly.

Antonio y Cleopatra, American Cigar's leading volume and profit producer which accounts for more than half of dollar sales and operating income, had the smallest decline. This brand was supported by $300,300 in magazine advertising.

American Cigar expanded its line of imported Dutch smoking tobaccos in 1978 with the introduction of Flying Dutchman Dutch Black which, together with another Dutch import, Sail, received $127,800 in media backing.

James B. Beam Distilling Co. subsidiary reported record sales of $186,184,000, up $20,366,000, and record operating income, up 22% to $22,943,000. Jim Beam bourbon continued as the highest volume bourbon, increasing its three-gallon case sales to 3,350,000 up 2.6%.

For the first time in many years, industrywide sales of bourbon increased. Beam bourbon accounted for 76% of the division's sales and 87% of its operating income.

The bourbon received $1,578,400 in advertising support. Among all brands of spirits, Jim Beam ranks No. 6, according to John C. Maxwell Jr., an industry observer.

The company has pared down its representation in the scotch market to one entry, Spey Royal, which received $72,800 in media backing. Beam sour mash bourbon whisky received $572,400 in ad support. The company's line of imported wines was discontinued when the James B. Beam Import Co. was phased out of existence last March 1.

▪ Sunshine Biscuits posted sales gains of 6% to $311,246,000, as operating income rose 9%. Sunshine Cheez-It crackers reached its highest share of the market, outselling all other cheese cracker brands. Media spending: Sunshine crackers, $800,600; Bell Brand and Blue Bell potato chips, $597,300; Sunshine cookies, $562,200, and Hydrox cookies, $78,700.

In early 1979, Sunshine shifted its advertising east of the Rockies to Marsteller Inc., New York. The account was formerly at SSC&B. Ogilvy & Mather, Los Angeles, continues as Sunshine's agency in western states.

Duffy-Mott sales remained stable, despite the discontinuance of a prune-packing arrangement that contributed nearly $9,000,000 to sales in 1977. This year's operating income stepped up 38% to $3,709,600.

Sales of Clamato were up, particularly in Canada, with the help of $245,800 in magazine spending and $45,100 for outdoor.

Mott's apple sauce line now commands a 26.4% piece of the market, with natural style Mott's apple sauce contributing importantly to the market share gain. Apple juice sales were up, spurred by the introduction of natural style Mott's apple juice.

▪ Andrew Jergen Co.'s operating income dropped slightly to $6,949,000 as sales increased by $7,270,000 to $88,613,000. The loss is attributable to highly competitive markets in skin care and shampoo products.

Jergens launched an ambitious new product program in 1974. New entries since then now account for 42% of domestic sales. Gee, Your Hair Smells Terrific, on the market for four years, experienced a slowdown last year, caused by the plethora of new shampoos reaching the public. The product was supported with $1,308,600 in media, three-quarters of that amount going into network tv.

Gentle Touch, a new bath soap with baby oil, had its first year on the national market, and achieved sales in excess of $8,000,000. Of its $1,557,200 advertising budget, $1,376,700 was devoted to spot tv. Jergens lotion was a major media spender with $1,388,000.

Acushnet Co., acquired in April,

When it comes to in-school sampling, GIFT-PAX is in a class by itself.

CUNY - Hunter College

Just ask over 8 million college, high school, and junior high school students

For over twenty years, Gift-Pax has led the way in product sampling to students. And when you consider that the median age of a college student is 20.9, high school 16, and junior high 13.3, that's an extremely important present and future market.

Gift-Pax has the unique ability to give you geographical selectivity in reaching these prospects, product exclusivity, and the "trusted touch"—personal delivery that makes a Gift-Pax sample something special.

We pass the test in colleges.

Gift-Pax is distributed on over 2500 campuses, supervised by the registrar during registration or orientation. Your product can be offered selectively to male or female, freshman or upper-classman, with maximum penetration to dorm and off-campus students.

And to ensure even tighter control, signed receipt cards are collected from each student sampled.

No wonder Gift-Pax gets top honors in college sampling.

The "trusted touch" for younger students.

Gift-Pax gets good marks in sampling to younger profiles, too. In 6500 high schools and 5000 junior highs, your product can be hand-delivered by the students' teacher, selectively to either male or female.

So if your product has a younger skew, give Gift-Pax a call. Take a look at the research, the histories of satisfied clients.

You'll find that when it comes to making student sampling work for you, we've done our homework.

Gift-Pax, Inc.
25 Hempstead Gardens Drive
West Hempstead, N.Y. 11552
(516) 485-0660

GIFT PAX INCORPORATED

The first name in sampling for over 30 years.

1976, is expanding its Gold Club line with two more products in 1979. Clubs received $223,400 for advertising last year; golf balls, including Titleist, received $1,523,900.

- Swingline Inc. sales were up 11% to $158,813,000, although operating income was down slightly due to a loss of $4,667,000 by Marvel Lighting, manufacturer of long-life incandescent lamps.

Leading National Advertisers reports that the segment's $458,300 ad budget was divided between $177,400 for Case Cutlery, and Swingline, which spent $83,500 on a new electric staplegun, and $170,600 on the Swingline staplegun. The new gun had sales of more than 250,000 units.

Master Lock's operating income broke a record for the 13th consecutive year, reaching $22,710,000 on sales of $62,381,000. Media spending was $249,000 in 1978.

American Cyanamid Co.

	1978	1977
Sales	$2,745,745,000	$2,412,311,000
Earnings ...	155,000,000	76,500,000
Advertising*	115,000,000	96,000,000

*AA estimate

American Cyanamid Co., Wayne, N.J., the 35th largest U.S. advertiser, increased its advertising for 1978 by 20% with estimated total expenditures of $115,000,000.

Worldwide, Cyanamid invested $161,200,000 in advertising, up 16% from $138,900,000 in 1977.

Worldwide sales increased 13.8% from $2,412,311,000 to $2,745,745,000. Net earnings worldwide were $155,900,000, up 102%. Operating earnings were $310,000,000, up 12.3% for the year.

Only the consumer products businesses posted lower earnings than last year. The company attributes this to increased competition in the shampoo business, and building programs for new and existing products undertaken during the year. Specialty chemicals and medical products had the highest gains.

The consumer products group was reorganized once again and now consists of four separate divisions: Shulton Inc. Toiletries division, Household Products division, Jacqueline Cochran Inc. and Shulton Inc., International Division.

Sales for the group were $357,000,000, an increase of 13%, but operating earnings declined 10% because of several new product introductions.

- The Formica division posted sales of $396,000,000, up 25% from last year. Operating earnings increased 18%.

Sales in the Agriculture division rose 10% to $611,000,000, while operating earnings advanced 4%. Three recently introduced products played a major role in the upturn—Counter soil insecticide, and Prowl and Avenge herbicides.

Medical sales climbed 16% to $560,000,000. Operating earnings were 22% above those of 1977. Increased sales of Minocin, an antibiotic; Dexon, the first synthetic absorbable suture, and Orimune, the first oral polio vaccine in trivalent form, all contributed to the advance.

Sales of specialty chemicals were up 12% to $22,000,000, with operating earnings advancing by 21%. Structural adhesives and other products for the aeronautics industry were behind the sales growth.

- Measured media spending at Cyanamid last year totaled $37,559,800, up from last year's measured expenditures of $34,925,700. The Old Spice line replaced the Breck hair products line as the most heavily backed product group.

Total spending on Old Spice products was $8,295,600, all but $762,500 of that in network and spot tv. Old Spice Cologne, backed by $4,407,000 in measured media, was the most heavily supported product in that line. In 1977, Cyanamid spent $7,023,000 on Old Spice.

Breck Gold Liquid Formula shampoo continued to be the company's most heavily advertised brand with $6,052,600 in measured media backing it. The entire Breck line got $7,439,538 in measured media, a decrease of about 28%.

Despite the reduction in over-all spending on the Breck line, expenditures for Breck Gold Liquid Formula shampoo were increased about 20%. But the Breck share of the shampoo business continued to slide to about 4% of the category.

About 80% of Cyanamid's measured media spending went in support of consumer products. The second most heavily advertised brand was Pine-Sol cleaner with total measured media spending of $4,903,200—all in network or spot tv. Cie perfume got $4,756,200 in measured media support—all but $494,900 in network and spot tv.

- From Lederle Labs, Stresstabs was the most heavily advertised product with $2,727,200 in measured media—almost twice last year's outlay and the majority

How will you bridge the gap between the television set and the checkout counter?

Or, what are you doing about the other half of the marketing mix?

No matter how good your advertising is, it stops short of the final sale.

A long and perilous gap separates the television screen and the magazine page from the checkout counter.

Often, what happens in between can tip the balance. Your message can be drowned by distractions. Or it can gain new selling force.

That's where we come in.

At Elliot J. Axelrod Associates, Inc., we provide **the other half of the marketing mix.** Ideas and materials that close the gap between where your consumer advertising leaves off and the sale begins.

We motivate your salesmen to sell better, help the trade to merchandise better, create excitement and heighten consumer trial at the point of sale.

Our services include promotional programs, packaging, audio/visual presentations, sales aids, creative premiums, point of sale material, and incentive programs.

We believe these services are too important to be handled piecemeal. They deserve the same caliber of creative thought, the same degree of marketing insight that characterizes your advertising.

At Elliot J. Axelrod Associates, that's what they get. And it all gets some pretty outstanding results for our clients.

To learn more about us, call Elliot Axelrod, Ken Marden or Peggy O'Brien at **212-889-5553.**

MARKETING PROFILES

of it in magazines. The division also introduced Centrum, a high potency vitamin and mineral supplement, with the promise of major ad support.

The Breck shampoo and cream rinse accounts were transferred from BBDO to Ted Bates, where a new campaign, "hats off," signaled a break from the long-established "Breck girls" theme.

The fragrance segment of the consumer products group saw substantial advertising and promotion activity. L'Air du Temps, at Sacks & Rosen, shifted its focus during the holiday season to include male gift givers, as well as women purchasing perfume for themselves.

The fragrance, which does about $50,000,000 in retail sales, will get tv spots, some with store tie-ins, in 11 markets. The program will be expanded to include 20 markets for the coming Christmas season.

Emphasis in all the Jacqueline Cochran fragrance brands will be on the woman as self-purchaser. Cie will continue to be heavily promoted with Candice Bergen as spokeswoman.

In men's fragrances, Dancer Fitzgerald plans a spot tv campaign in three states to test Tabac, a line priced lower than the top-selling Pierre Cardin.

Other important advertising efforts in 1978 included the test marketing of Lemon-Sol, a new household cleaner, assigned to Bozell & Jacobs; a Norman, Craig & Kummel tv campaign for Old Spice stick deodorant featuring the NY Giants, and Pine-Sol's Star Wars promotion.

Ads, prepared by Richardson, Myers & Donofrio, were run in the *New York Times* and the *Washington Post* in response to criticism on the use of antibiotics in animal feed.

American Cyanamid also faced a court fight with the Federal Trade Commission over the use of Formica as a trademark. The FTC is seeking to deny the company the trademark on the grounds that Formica has become a generic term.

A number of new products are in development or testing stages. Two of the more promising, according to the company, are an anti-anxiety agent without the usual sedative effect of tranquilizers and an analgesic without codeine's addictive characteristics.

American Express Co.

	1978	1977
Sales	$4,084,500,000	$3,446,229,000
Earnings	308,000,000	262,123,000
Advertising*	62,000,000	46,000,000

*Estimated by AA

American Express Co., New York, the 64th largest national advertiser, increased its U.S. advertising 35% to an estimated $62,000,000 in 1978.

The company reported a world ad total of $126,900,000, up 51.4% from $83,800,000 in 1977.

Sales topped $4 billion in 1978, while earnings rose to $308,000,000. The revenue breakdown: Travel-related services, $933,300,000, up 25.4%; international banking services, $515,500,000, up 35.5%; insurance services, $2.56 billion, up 13.9%, and other services $10,800,000, down 48%.

American Express card revenues grew in 1978, as the number of card members increased 10.2% to 9,500,000 from 8,600,000 the previous year. Charge volume on the card rose 26%.

Also contributing to improved card revenues was the $5 increase in the U.S. card membership fee instituted in April, 1978.

■ While the American Express card continued to dominate the upper income, luxury-purchase segment of the card industry, both Master Charge and Visa planned more aggressive advertising to procure more of the card business.

Some 250 financial institutions joined American Express' Gold Bank Card program in 1978, bringing the total number to 1,298, while the number of Gold Bank Card members exceeded 800,000. The gold card costs $30 annually and provides all the services of American Express as well as certain additional credit features from the issuing bank.

The company's emergency card replacement service was expanded to include more than 300 travel service offices where a lost or stolen card can be replaced within a single working day, according to American Express. Local currency cards were also made available in Hong Kong and Spain in 1978, bringing the total number of cards in all currencies to 19.

In 1978, American Express backed its card with $19,024,700 in measured media, including $4,858,300 in magazines, $9,729,100 in network tv and $4,410,000 in spot tv.

■ In the same year, American Express increased measured media expenditures for its travel service to $1,297,800 from $229,700 in 1977. The travel service includes a worldwide network of travel agencies and preplanned vacation packages and tours. During 1978, retail travel service revenues, principally commissions on sales, rose 16% over 1977. The majority of these sales were made outside the U.S.

Of the travel service ad money, $773,100 or 60% into spot tv and $397,600 or 31% was spent in network tv. American Express continued its 1977 campaign for "The all around travel agent with 700 locations to help you around the world."

No. 1 in the field of travelers cheques, American Express reported $2.1 billion cheques outstanding in '78, a rise of 13% over the $1.86 billion outstanding at year's end in 1977.

Sales in the U.S. recorded their best gain since 1969, which the company attributes to increased air travel, a growing concern for security on the part of travelers and the widespread acceptance of Express Pac, a prepacked, color pack of travelers cheques in multiples of $50 to $1,000.

■ During 1978, Express Pac distribution was expanded to include the entire U.S. and parts of Canada, backed by $5,000,000 in marketing support.

For travelers cheques over-all, the company spent $12,133,900 in measured media in 1978, including $8,566,000 in network tv and $3,005,300 in spot tv.

While Master Charge and Visa were readying ad and marketing strategies to enter the $10 billion travelers cheque industry sometime in 1979, American Express continued to promote its cheques with a campaign in which Karl Malden touts the benefits of getting a full refund usually on the same day, should checks be lost or stolen, and puts forth the value of travelers cheques as emergency cash for the non-traveler.

A major subsidiary of American Express is Fireman's Fund Insurance Co. The property-liability group is sixth largest in the nation. Group net income rose 23% to a record $156,800,000 in 1978.

■ In 1978, property liability premiums written increased 8.8% to $2.3 billion from $2.1 billion in 1977. Life insurance in force rose 35.3% in 1978 to $3.4 billion from $2.5 billion in 1977. Life premiums written increased 30.6% to $142,800,000 from $109,300,000 in 1977.

Fireman's Fund spent $4,193,800 in measured media in 1978, almost all in network tv.

Another wholly owned subsidiary, American Express Publishing Corp., publishes *Travel & Leisure* magazine. Paid circulation increased 15% by the end of 1978, from its 1977 total of 800,000 to 920,000. The magazine also recorded a 29.6% gain in advertising. *Travel & Leisure* was backed by $40,300 in spot tv.

American Express opened 1979 with an $830,000,000 bid to take over McGraw-Hill, the nation's largest business publisher. Faced by strong opposition from M-H president Harold W. McGraw Jr., American Express let its offer expire March 1. The McGraw-Hill board ratified the move in late April when it unilaterally rejected American Express' final offer.

In July, 1979, American Express named McCann-Erickson to handle its Gold Bank Card account.

ADVERTISING EXPENDITURES

Advertising**	183,000,000	171,000,000

*Worldwide
**U.S. only; AA estimate

American Home Products, the nation's 11th largest advertiser, increased its U.S. advertising by 7% in 1978 to an estimated $183,000,000. The gain was a slight easing off of 1977's 8% pace.

Last year was AHP's 26th consecutive one for record sales and earnings, with sales surpassing $3 billion for the first time. Totaling $3,276,605,000, worldwide sales yielded a net income of $348,422,000.

Foreign sales were $1,072,800,000, a 20% increase over 1977. These represented 33% of the total volume. Foreign net income before taxes was $196,000,000, compared to $154,300,000 in 1977. Domestic sales totaled $2,203,805,000; earnings before taxes, $457,600,000.

■ Prescription drugs contributed $1,284,900,000 (39%) of total sales and $378,900,000 (56%) of pretax income, which totaled $682,300,000. Household products and housewares provided $888,700,000 (27%) of total sales and $99,700,000 (15%) of pretax income.

Food products contributed $657,500,000 (20%) of total sales and $74,700,000 (11%) of pretax income. Packaged medicines provided $445,500,000 (14%) of total sales, and $100,800,000 (15%) of pretax income.

In foreign sales, prescription and packaged medicines accounted for approximately 68% of the volume; the remaining 32% consisted of foods, housewares and household products.

Domestic measured media expenditures for 1978 were $166,758,900, a 6% increase over 1977's $156,965,100. Packaged medicines received 59% of this support, $97,742,300.

Home products and housewares received $46,009,600, or 28% of the total, while food products were backed by $16,820,500 and prescription drugs by $6,186,500. Ad expenditures in all categories except food products were up over 1977.

■ Domestic ad spending continued to favor network and spot tv, as AHP made a record-breaking, two-season $100,000,000 buy on NBC-TV, aimed, in part at assuring a good commercial position during the 1980 Olympics and elections.

Spot radio dollars, sharply increased over 1977, edged out network radio. In print, newspapers held about even with 1977 and farm publications received less emphasis while magazine dollars zoomed upward.

Network television received $111,136,200, a 2% increase over 1977. Spot tv jumped 9% to $38,722,200, while spot radio was up a whopping 80% to $3,855,000. Network radio was allotted $3,155,000, 14% over 1977.

Magazines were up to $7,693,400, a 30% increase, while newspaper slipped to $2,069,000, a 6% decrease. Farm publications also dropped 46%, to $128,100.

■ In the packaged medicines group, spending was dominated by Whitehall Laboratories, whose budget totaled $97,696,800, up $2,696,800, or 3%, over last year. The division posted record sales, as established products maintained leading positions in many categories, and new products entered markets previously untried by AHP.

Anacin analgesic tablets received the greatest chunk of Whitehall's measured ad support, $33,906,500, a jump of $3,359,500 over 1977. This was primarily allotted to network tv, as well as to some magazine and spot tv support.

During the year, Anacin continued its fight to hold a 13% share of the $750,000,000 analgesic market. Topped by Johnson & Johnson's McNeil Laboratories' Tylenol, whose share was 20%, it led Sterling Drug's Bayer, which held 10% of the market, and Bristol Myer's Bufferin and Excedrin, which held 10% and 8%.

■ In 1978, Anacin and AHP were involved in regulatory and legal actions that could have definite impact on future advertising. Ruling on a six-year-old case, the Federal Trade Commission issued an order calling for AHP to run $24,000,000

MARKETING PROFILES

in future Anacin ads with the disclosure that "Anacin is not a tension reliever."

In addition, McNeil Laboratories filed suit against AHP, alleging that the company was violating an earlier court order with a new Anacin campaign. The order had prohibited AHP from making claims about Anacin's superiority over Tylenol.

- Whitehall's second most advertised line was Dristan decongestant products, which received $23,061,200. Of this figure, $14,399,200 was allotted to Dristan tablets, $10,718,100 to network tv and $3,037,200 to spot tv.

Network tv also provided major support for other Dristan products. New introductions included Dristan AF, an aspirin-free remedy, with an $840,900 budget, and Viro-Med liquid.

Network and spot tv dominated the campaigns of other Whitehall products. Preparation H hemorrhoidal remedies: Total ad budget was $9,595,900, with network tv getting $5,753,000 of the total and spot tv $2,038,300.

Primatene Mist spent $6,970,800; network tv received $5,501,900 of this. Arthritis Pain Formula had support of $4,903,700, of which $3,505,200 was allotted to network tv.

- Anbesol received $2,904,300 and $2,022,900 went to Dry & Clear acne ointment, introduced last year. Of this figure, $1,510,700 was budgeted to spot television and $371,400 to network tv.

Sleep-Eze received $1,203,300, with $954,600 going to network tv. Of Compound W's $1,919,500, $1,391,300 went to network tv. This medium also received $1,277,400 of Denorex's $1,389,100, while spot tv was allotted $629,000 of Heet's total $1,122,700 campaign.

In 1978, Whitehall entered the $500,000,000 U.S. contraceptive market, with tests of Semicid contraceptive suppository. Tests were begun on Predictor, a pregnancy test kit. Budgets for the two products were $105,300 and $188,900.

AHP's second largest advertiser, with a budget of $46,009,600, was the household products and housewares group, including Boyle-Midway household items, Ekco Housewares, Ekco Products, Dupli-Color Products and the Prestige Group.

- Boyle-Midway was supported by $43,443,300 in advertising expenditures, $5,728,000, or 5%, over 1977. Woolite, the division sales leader, was again the No. 1 recipient of ad support, with a $14,635,100 allotment. Of this figure, Woolite Liquid and Powder Cold Water Wash received $9,853,000, primarily in network and spot tv.

Easy Off oven and window cleaners were budgeted at $6,458,200, and network tv was the major recipient. The PAM line of dry fry cooking sprays maintained its 1977 expenditures of slightly over $6,000,000, while Black Flag insecticides received support of $4,020,400.

Sani-Flush toilet cleaner products were backed by $2,923,800, primarily in network tv, and Wizard air fresheners went up to $3,510,000, a doubling of 1977 expenditures. Old English furniture polish also received support of $1,702,600.

Ekco, which posted record sales in 1978 had an ad budget of $2,363,100. Network tv received $1,134,800 of the total for promotion of kitchen tools, cutlery and cookware, which expanded to include two new lines—one stainless steel, the other aluminum. Ekco Slaymaker lock line's allotment of $195,300 was all in network tv.

The AHP food products group had a budget of $16,820,500, down $587,700 from last year's record-breaking support.

American Home Foods' Chef-Boy-ar-dee ad spending was $11,711,000, mostly in network tv. New products introduced included three types of pizza in a skillet and two pizza sauces.

The Brach candy division had record sales, boosted by special holiday and bulk candy promotions. Its budget was $2,795,800. Brach's also put $448,800 behind Candydent sugarless candy in test market.

- As in 1977, the prescription group led the company in sales and earnings, but received the smallest measured ad budget, due to the technical nature of its market outlets and legislative restrictions.

Wyeth Laboratories worldwide pharmaceutical sales reached an all-time high, and its Ovral retained the leadership as the most frequently prescribed oral contraceptive. New product introductions included the antibiotics Wymox and Wyamycin, and Simeco, a new antacid.

Arthritis flare-up!

Now relieve pain and stiffness...fast!

1. Arthritis flares up. Pain builds in joints. You feel stiff.
2. Anacin relieves minor pain of arthritis deep in joints.
3. Relieves stiffness caused by pain; gives hours of relief.

When you have minor arthritis flare-ups, make Anacin® your medicine of choice. Anacin is a medically recognized combination of ingredients. Anacin's pain reliever is recommended by doctors 4 to 1 over all other non-prescription medications for arthritis pain and its stiffness. Gives hours of relief for millions without stomach upset.

Read and follow label directions

American Home Products' Anacin spent $33,000,000 to hold onto its 13% share of the analgesic market. Most of the money was spent in network tv.

Gasoline made simple.

A lot of the new cars tend to be choosy when it comes to fuel. Most of them have catalytic converters, which means they are designed to accept nothing but unleaded gas.

Hondas are different. All our new cars—the Civic 1200, the Civic CVCC, and the Honda Accord—operate without a catalytic converter. So you can take your pick of regular or unleaded gasoline. As for premium, there is no benefit and it's a waste of money.

Of course, whichever gas you use, you can go a long way on it in a Honda. Our best mileage car, the Civic CVCC 5-Speed, was rated at 47 mpg for highway driving, 37 mpg city, according to EPA estimates.

Our lowest EPA mileage estimate was received by the Civic 1200 with 2-speed manually-selected Hondamatic transmission: 30 mpg highway, 25 mpg city. All estimates are lower for California and high altitude areas. Also, the Civic 1200 is not available in California or in high altitude areas.

Although we're happy to tell you about our 1978 EPA mileage figures, we want to be realistic about them. So please keep in mind that EPA estimates are the result of laboratory tests and are offered only as a means of comparison.

Therefore, your mileage will vary depending on such things as where you drive, how you drive, your car's condition, and optional equipment.

Still and all, a Honda makes the neighborhood service station a nice place to visit. You get your choice of gas pumps when you drive in. And very good mileage after you drive out.

Now, how could we make gasoline any simpler than that?

HONDA
We make it simple.

Playing on high-priced gasoline, American Honda emphasizes ability of its cars to use regular or unleaded gasoline.

American Honda Motor Co.

	1978	1977
Sales	$1,639,000,000	$1,201,959,784
Earnings ...	26,374,000	35,338,790
Advertising* ...	35,000,000	23,574,500

*Estimated by AA.

American Honda Motor Co., Gardena, Cal., the 88th largest national advertiser, is a wholly owned subsidiary of the Japanese-based company, Honda Motor Co. Ltd.

The U.S. unit increased its ad spending by 48% in 1978, to an estimated $35,000,000. The spurt was fueled by increases in magazine and network tv spending.

The company, which markets Honda cars and motorcycles and a line of consumer power products, showed a 36% gain in sales in 1978, a year in which consumer demand outstripped supply of Honda Civics, Accords and the newly introduced Prelude.

American Honda put 56% of its $18,464,561 auto ad budget, coordinated by Needham, Harper & Steers, Los Angeles, into network tv, with 42% in consumer and enthusiast magazines.

Although advertising seemed the least of Honda's concerns because of the strong demand during 1978, the company identified the tight supply situation as a temporary one and continued the advertising campaign introduced in 1978 that paves the way for future years.

The ad theme, "We make it simple," positioned Honda as more dependable and sensible than its small car competitors without saying so.

Availability problems for all Honda cars, particularly the Accord and the newly introduced Prelude sports coupe, continued through 1979. Honda kept a lid on its U.S. dealer network (there are 716) to counteract this problem.

Introduced in April, 1979, the Prelude sports coupe is being positioned as the "sports car for grownups" in network tv spots and ads in consumer and enthusiast magazines. The Prelude is priced around $6,500.

- Apparently foreseeing a strong future, American Honda began construction of a $250,000,000 plant in Ohio. The plant will manufacture only motorcycles initially, but indications are that it will eventually be used for the manufacture of Civics.

American Honda holds 40% of the motorcycle market, making it the industry leader in this product category. In late 1978, the company unveiled a new 36-unit 1979 line of motorcycles, featuring an entirely new 750cc Road Bike line-up. The new CB-750 line features double overhead cam engines and new styling.

Honda also introduced a new line of special custom styled units in the 500 and 400cc range. Honda believes the new bikes feature dramatic looks and offer customers a new macho image.

The new line was backed with a $10,000,000 tv and cycle enthusiast print campaign through Grey Advertising, Los Angeles. Ads carried the theme, "Honda, going strong." The campaign theme was an extension of 1977's effort, emphasizing sophistication of technology in the Honda motorcycle product.

- In early June, 1979, the Honda motorcycle account was switched to Dailey & Associates, Los Angeles. A tv and enthusiast magazine ad campaign is being planned for fall 1979 that will use a new "Honda, follow the leader" ad slogan.

Honda's line of power products, which includes a tiller, outboard motor, several generators, and a newly introduced lawn mower also handled by Grey, was backed with consumer and trade print campaigns with various themes. The power products division recently was also assigned to Dailey & Associates.

In early 1979, American Honda introduced the new lawn mower that stops its own blade seconds after the operator releases the mower's handle. The innovation gives Honda a jump on the rest of the industry which must have similar blade brakes to meet federal safety standards by 1982.

The new lawn mower (available in four models) retails from $344 to $444 and is distributed through the company's newly formed lawn and garden dealer network. "It took Honda to build a lawn mower this advanced" is the ad theme.

North America continues to be the biggest overseas market for two-wheeled vehicles for Honda Ltd. Although North America's share of the total overseas sales declined, the U.S. still accounted for 50% of the company's total overseas sales.

American Motors Corp.

	1978	1977
Sales	$2,585,428,000	$2,236,896,000
Earnings	36,690,000	8,266,000
Advertising*	43,444,500	31,486,900

*Estimated by AA

American Motors Corp., Southfield, Mich., the 78th largest national advertiser, staged a modest comeback in 1978. Advertising cuts were restored, earnings quadrupled and dollar sales kept pace with inflation.

Advertising outlays of $43,444,500 were up 38% over 1977 when they were slashed to $31,486,900 from $38,535,400 in 1976. But the big marketing news came when AMC and Renault, the French automaker, made it legal in early 1959 with the signing of an "arrangement" for AMC to sell Renault cars in the U.S. and eventually make them here. Renault got European rights to Jeep as well as access to the U.S. AMC sales outlets.

AMC also continued its revamp of its marketing staff, landing two top marketers from General Motors as well as a new president with marketing expertise. A new ad agency, Grey Advertising, New York, took over in March, 1978.

■ AMC boosted its earnings to $36,690,000 from $8,266,000 on sales of $2.5 billion, up from $2.2 billion. The earnings increase was attributed to consolidation of passenger car production and record Jeep vehicle sales of 180,667 worldwide compared with 153,485 the year before. Passenger car sales continued as a soft spot, falling to 214,537 worldwide from 227,365.

Total auto sales, including Jeep rose 20% to $2.2 billion and earnings were $38,800,000, up from a loss of $1,200,000 in 1977. AM General Corp., a subsidiary which makes trucks, postal service vehicles and transit buses turned in a loss of $5,200,000 against 1977 profits of $6,800,000 on sales that slumped to $248,000,000 from $377,000,000.

The results suffered from AM General getting out of the standard transit bus business and by a delay in government and international contracts for military trucks, the company said.

Only the Concord, nee Hornet, born again as a luxury compact, made much of an impression with U.S. buyers. It nearly doubled its sales from 79,508 in 1977 to 114,764 as the best-selling AMC car. Jeep led all AMC marques with 161,912 units, up from 115,079.

■ When AMC and Renault said "oui," it gave AMC a sorely-needed front-wheel-drive subcompact for the mpg wars—the Renault Le Car. But for most of 1978, AMC and Renault went their separate marketing ways until the formal agreement in early 1979.

Renault's ad budget for 1978 was estimated at $5,000,000. AMC started to set up its dealers with Le Car and chairman Gerald C. Meyers said AMC will sell the new Renault 18 sedan and station wagon in 1980.

AMC will manufacture a new series of cars in 1982. The new Renault cars give AMC the advanced technology it can't afford on its own and Renault gets its cars into 2,300 AMC dealers. It had 400 of its own, many of them dualed with other makers.

AMC started marketing the imports in March, 1979, with the only change a more prominent use of the Renault name. Renault's agency, Marsteller Inc., New York, stayed on board.

■ AMC chairman Meyers sees the Renault deal as attacking AMC's "basic problem, our relative size in a big industry where bigness is becoming even more vital as time goes on. In the world auto market of the future, the successful companies will be those with deep resources, world marketing muscle and solid technical strength.

"Passenger car sales right now aren't good. Despite all our efforts and all of our programs, we have not been able to get up any steam this year. But we have new ideas and products coming that should assist car sales soon," Mr. Meyers said.

These include a new line of four-wheel-drive cars called Eagle for model year 1980. The Renault accord means AMC has "leapfrogged 10 years and maybe $2 billion with the stroke of a pen," Mr. Meyers said.

There was one marketing effort that did generate somes sales steam. The Concord was introduced as a 1978 luxury model and the year also saw the bow of the 1979 Spirit. Like the Concord, the Spirit is a skillfull reshaping of an older model, this time the venerable Gremlin.

The intermediate line of Matador cars and wagons was dropped for model 1979. The strategy behind both Concord and Spirit is that buyers want more luxury in their small cars. "The 1979 AMC cars focus on this fact," the company said. "They are aimed at those customers who want products with quietness and comfort. Advertising stresses their appeal to buyers who want more than basic transportation."

■ This gave birth to "The luxury Americans want, the size Americans need," campaign for the 1979 models. Pacer, the egg-shape subcompact with the weight problem, became a "unique blend of midsize room, ride and handling in an efficiently sized car."

Gremlin, the future Spirit, along with Pacer was pitched at the women's market and the doomed Matador got nary an ad dollar.

The Jeep line got a record ad outlay, with 64% of that in network tv with the line "Jeep wrote the book on four-wheel-drive." Entries included the bread-and-butter CJ left alone as the smallest four-wheel-drive vehicle by a U.S. manufacturer.

Cherokee, a bigger model, was shown as a family model that would go off-road and the Wagoneer, a station wagon, was called the "ultimate in four-wheel-drive."

AMC had a new media approach, away from the national, network scene to local markets and spot tv. Indeed, spot tv expenditures doubled from $5,310,800 to $11,253,900, while network tv was up a bit to $17,932,500 from $14,913,200.

Magazines showed a sizable increase to $5,814,600 from $3,555,200, while newspapers were up a bit to $7,666,900 from $7,107,000. Spending in spot radio went to $758,100 from $397,000.

■ When it came time for the 1979 Spirit to debut, AMC said it would put more emotion into the ads because prospects were "sensitive about the kind of car they drive—it's not just a piece of transportation."

The introductory emotion turned to price sensitivity in December in the face of lower than anticipated sales. AMC cut the price of the Spirit by $200 and in the new year "took the gloves off" against Ford and Chevrolet in a series of comparison ads.

The newspaper campaign said the Spirit with its price reduction was only $5 more than a Chevette, "The best $5 buy in America." Standard equipment was compared against standard equipment.

AMC also revived (again) its Buyer Protection Plan, a 12-month warranty, and in the spring of 1979 added a rust warranty.

Things got so bad with passenger car sales that AMC stopped reporting them every 10 days. It had wanted to include Jeep figures lumped together but trade publications said that wouldn't be accurate. AMC started reporting monthly. One of the things AMC didn't want to point out every 10 days was a share of the car market that fell to 1.2% from 3.8% in 1974.

Jeep sales, strong throughout 1978, faltered with the spring, 1979, fuel crunch when buyers turned away from the thirsty four-wheel-drive vehicles. AMC's fuel economy plans for cars underwent a slight change when it decided to save the capital expenditures needed to make its own four banger and signed an agreement to buy the 2.5 liter engine made by General Motors.

■ That wasn't the only thing AMC got from GM. It lured Thomas A. Staudt from Chevrolet where he had been director of marketing. Mr. Staudt became vp of the marketing group, succeeding Dale E. Dawkins who became vp-product group. Mr. Staudt joined David J. Van Peursem who left Oldsmobile where he was director of marketing to become AMC's general manager of marketing, a new post.

Raymond Avedian moved from BBDO, Detroit, to passenger car ad manager, a post left vacant when Robert Lepre joined MCA Graham, New York.

Roy D. Chapin Jr. stepped down as chairman after 40 years in the business. Mr. Meyers moved up from president to succeed Mr. Chapin who had combined deft dealings with financial institutions (always important at AMC) with marketing flair.

■ The top management marketing slot was taken over by W. Paul Tippett Jr. who was president of STP Corp., director of sales and marketing for Ford of Europe and most recently exec vp in charge of Singer's Sewing Products Group.

Nonautomotive subsidiaries had record sales in 1978. Sales rose to $71,900,000 from $68,200,000 for Wheel Horse Products, garden tractors and lawn mowers; Mercury Plastics, maker of injection-molded parts, and Windsor Plastics, which makes nonautomotive plastics.

Reach out.
Reach out and touch someone.
Bell System

American Telephone & Telegraph Co. has budgeted about $30,000,000 for its "Reach out" campaign for 1979.

Earnings	5,109,203,000	4,296,589,000
Advertising	172,822,100	131,968,200

American Telephone & Telegraph Co., New York, the world's largest corporation, increased its advertising 35% to $172,822,100 in 1978 to become the 13th largest national advertiser.

The total includes ad spending by AT&T and its principal telephone subsidiaries, but excludes minor-held Southern New England Telephone and Cincinnati Bell.

It was a record year for sales, earnings, dividends and capital expenditures. Sales were up more than 10% to almost $41 billion, while earnings topped $5 billion.

Long distance calling increased by 12.6%. Overseas calls continued to grow by about 27%, with customers in nearly 900 cities able to dial direct to 47 countries.

At year's end, Bell System phones in service totalled some 133,000,000 or 5,000,000 more than in 1977.

About $3.2 billion, or 23% of record capital expenditures of $13.7 billion, went into modernization projects. Bell installed 365 local electronic switching systems during the year. About 30% of Bell System telephones, close to 40,000,000, are served by some 1,700 local electronic switching offices.

Bell moved ahead with the installation of its latest "super switchers" for long distance calls. Nine of these high-speed, high-capacity digital switchers were added in 1978. There are now 21 in the nation, including one operated by the General Telephone Co. of Florida.

Western Electric, AT&T's manufacturing arm, began producing a commercial lightwave system this year. In 1980, it will be installed in the Atlanta metropolitan area, linking two local central offices and a long distance switching center.

A Bell Laboratories development, called Advanced Mobile Phone Service, was tested in the Chicago area during 1978. AMPS uses a set of contiguous geographic "cells," each equipped with an assigned set of frequencies, and a base station for transmitting and receiving calls.

Callers leave a cell and move on to another without any effect upon the call in pogress. As they do, the frequencies they were using are freed for other callers. The new system will make mobile service more widely available.

■ The trial of single sideband microwave radio, a technique that more than triples the capacity of existing microwave transmission systems with the addition of only a minimal amount of new equipment, was conducted successfully last year by Bell Labs, AT&T Long Lines and Western Electric. The 29-mile microwave route linked Ashburnham and Wendell, Mass.

In 1978, AT&T restructured its organization to match the markets it serves. It grouped its operating and marketing activities into three major areas: Business, Residence and Network. Each unit is headed by an exec vp.

Four large business organizations began using the Bell System's new Enhanced Private Switched Communications Service, enabling customers to monitor their own networks.

A new service for business customers with less complex requirements is Electronic Tandem Switching (ETS), featuring automatic route selection which chooses the most economical path among the various services that a business may have. For smaller businesses having up to 80 lines, Bell introduced the Horizon system, offering features formerly only available to larger customers.

■ In 1978, the Bell System received approval from the Federal Communications Commission to expand its DATAPHONE Digital Data Service (DDS), offering private line digital transmission with speeds up to 1.5 megabits per second, to serve 96 cities. During the year, 24 cities were added to the DDS network, for a total of 48 cities at the end of 1978.

Today's residence customers can choose from 22 styles of phones, including three new Design Line versions introduced in 1978: The Noteworthy phone set, a compact wall unit that incorporates a telephone, slate or cork message board and a compartment for storing a phone book; the Telstar phone, a desk set of contemporary design, the Snoopy & Woodstock Phone, in the tradition of the Mickey Mouse phone.

■ A new public telephone service, called Charge-A-Call, was introduced in 1978. Requiring no coins it is designed for customers who intend to make collect, credit card or charge-to-a-third-party calls.

The Justice Department continued to press its antitrust action against the Bell System, whereby it seeks dismemberment of Bell's integrated structure. In particular, it seeks the divestiture of Western Electric, some or all of the operating phone companies and the possible separation of other parts of the Bell System.

In a "statement of contention and proof" filed by Bell early this year by order of U.S. Federal Dis-

MARKETING PROFILES

trict Judge Harold H. Greene, AT&T told the court that any objective judgment of its structure under regulation will confirm that their conduct has been reasonable and not in violation of antitrust laws.

The FCC continued its investigation, known as the Second Computer Inquiry, to determine the scope of data communications services, which common carriers, such as AT&T, provide under regulation, as distinguished from data processing services, which the FCC said it will not regulate.

On Jan. 31, 1979, chairman-ceo John D. deButts retired after 42 years with the Bell System, including seven years as chairman. Charles L. Brown, president, succeeded him, while William M. Ellinghaus, vice-chairman, assumed Mr. Brown's duties.

■ The company spent $12,600,000 for residence advertising in 1978. The largest share of AT&T's measured advertising spending was devoted to long distance calling (more than $18,500,000), with network tv and print used to convey the message that "long distance is the next best thing to being there."

"Reach out and touch someone" is the focus of long distance advertising in 1979, with the entire system using elements nationally and locally. The theme is sung in six radio spots by Ray Charles, Roberta Flack, Tammy Wynette, Paul Williams, Jose Feliciano and Phoebe Snow. AT&T has budgeted about $30,000,000 for the "Reach Out" campaign for 1979.

Among the 23 individual Bell System affiliated companies, several had measured advertising spending in excess of $1,000,000: Southwestern Bell ($5,288,300), Chesapeake & Potomac ($4,044,700), New York Telephone ($2,516,400), Pacific Telephone & Telegraph ($2,153,600), Illinois Bell ($2,024,200), Ohio Bell ($1,910,500), Bell of Pennsylvania ($1,782,500), New England Telephone & Telegraph ($1,472,500), Southern Bell ($1,452,200), Mountain Bell ($1,040,900).

Measured spending for national Yellow Pages totaled $10,220,100, almost all in tv. Western Electric general promotion accounted for $4,621,000 in network tv and magazines.

BUSCHHHH!
BUSCH

Anheuser-Busch's Busch beer was reformulated and the package redesigned last year. The brew is supported by tv and multiple page ads.

Anheuser-Busch

	1978	1977
Sales	$2,701,611,000	$2,231,230,000
Earnings	111,040,000	91,945,000
Advertising	116,599,000	79,171,000

Anheuser-Busch, St. Louis, the country's biggest brewer and 34th largest advertiser, hoisted its ad budget by 47% last year to a total of $116,599,000, as it continued its race "to make space" between it and its nearest competitor, Miller Brewing Co.

During the past year, Anheuser-Busch became the first brewery to brew over 40,000,000 bbls. in a single year—another jewel for its "King of Beers" crown. In its St. Louis plant (the brewery's first) A-B marked another milestone by producing 1,000,000 bbls in a single month.

With a marketing force marshalled into the brand management system and fleshed out with MBAs and Procter & Gamble grads, the company rolled out three new products in 18 months. Not letting up in momentum, Anheuser-Busch brought out more new products for test last year: Wurzburger Hofbrau, its "real import" from Germany, and, out of its soft drink division, Chelsea, "a premium soft drink."

■ Although the precocious Miller Brewing still nips at its heels, Anheuser-Busch has steadfastly maintained its dominance in the beer industry. By year-end, A-B held a 25.1% share of market, while Miller collected 18.8% piece of the action. Matching Miller's expansion plans dollar for dollar, Anheuser-Busch's network of 10 breweries will have a production capacity of at least 58,000,000 bbls. by 1982.

In 1978, A-B's sales climbed 22.9% to $2,701,611,000 from its '77 tally of $2,231,230,000. Net income kept pace, increasing to $111,040,000—21% over the $91,945,000 rung up in 1977.

In beer (the company's bread and butter and 92% of its consolidated net sales), A-B's barrelage was up to 41,600,000 bbls.—making 1978 another record year. In 1977 the company's barrelage figures were 36,640,000 bbls. (also a record).

■ Anheuser-Busch calls its '78 marketing efforts, "the most extensive and aggressive in company history." It was certainly the most expensive. A-B led its beer brethren in network tv buys. Last year, Anheuser-Busch even went so far as to shoot special spots for tv specials—*i.e.* "Roots," "Rocky" and a whole series of "Bud Taste-Buds," designed with "Saturday Night Live" in mind.

A-B's biggest seller is Budweiser, "the King of Beers." Beginning in April, the brand got a new pitch themelined "This Bud's for you." The campaign stars working Americans. The brewery spent $24,636,700 on Budweiser in the six measured media, up from the $2,726,500 spent in '77. The bulk of those funds ($19,678,900) went into network tv.

Michelob, A-B's super-premium contender, kept its "Weekends are made for Michelob" pitch with Vic Damone on the vocals. In measured media support, the brew got $11,689,500—with $8,216,700 in network tv. Michelob also had a good deal of sports promotion support with tie-ins with golf, sailing and rugby.

Michelob's reduced-calorie version, Michelob Light, is now available nationwide. Still claiming "Good taste runs in the family," the commercials make sure to include female beer quaffers. In media, A-B spent $6,475,800 on Michelob Light—with $5,113,200 in network tv. In '79, the company has allocated more than $10,000,000 to boost the brand.

■ Natural, alias Anheuser-Busch Natural Light, reportedly gained market share points in the light beer segment—further solidifying its No. 2 ranking behind light beer leader, Miller Lite.

The brand is being promoted by the master of mispronunciations, Norm Crosby, and the rather eccentric Ray Johnson. New spots tap the talents of Marcia Wallace (formerly Bob Newhart's scatterbrained secretary), Fred Willard ("Fernwood 2-Night" host), ventriloquist Willie Tyler and dummy Lester.

Like its super premium counterpart, the brew is being aimed at the fairer sex as well in ads headlined "Its my beer too"—created by D'Arcy-MacManus & Masius and running in such books as *Better Homes & Gardens*, *Cosmopolitan*, *McCall's* and *Woman's Day*.

The new Busch with its jazzy graphics, new taste and higher price made its way last year throughout New England into the Southeast and Midwest (everywhere except southern Illinois and Missouri where only the packaging is new).

With Needham, Harper & Steers on the creative, the brand maintained its naturalistic "Head for the Mountains" motif. The brewery shelled out $5,078,400 on Busch with the lion's share ($5,011,500) in spot tv. Spending was up even higher for its '79 attack as the company boasted of outspending its nearest competitor by 50%.

■ After rumors flew for months across the Atlantic, the Anheuser-Busch/Wurzburger pact was finally perfected. The company has sent the German brew out into test in Boston, Atlanta, and Hartford. TBWA is doing the creative drive emphasizing the barrel-in-the-Atlantic method of import.

While the marketing men were getting out the brews, the company's chairman and corporate legal army were out in the back slinging mud with Miller Brewing.

The brawl hit a new intensity when Miller tromped up to the Federal Trade Commission to charge A-B of false, deceptive and misleading advertising in its claims that A-B brews are natural—which Miller alleges they are not.

The Milwaukee brewer raised its voice against A-B on another front as well—this time it was Busch's light beer entries. Again, Miller claims A-B is making false claims and that any brew over 100 calories is not a "light" beer.

Anheuser-Busch disagrees on both scores and came back with a detailed counterpunch presented to the Bureau of Alcohol, Tobacco & Firearms.

■ Anheuser-Busch is hot on the diversification trail, as exemplified by the establishment of a Delaware holding company and development of its soft drink division.

Last winter, A-B put its first soft drink, Chelsea (known then as the "not-so-soft" drink with a 0.5% alcoholic content) into test in New Orleans, Peoria, Sacramento, Springfield, Mass., and Richmond, Va. As a result of the ballyhoo caused by groups accusing A-B of encouraging children to become beer drinkers by offering them a "baby-beer," the company yanked the product off the market, re-did it completely, reformulated the head and alcohol out and came with an alternative (interim) in ad drive—"Chelsea. The Natural Alternative."

In the summer (and in its third time at bat), Needham came up with yet another—"Peel a Chelsea"—campaign.

Chelsea is just the first of what is expected to be a line of soft drinks. The company is looking for new products that can tap its beer distribution set-up. One line of products currently under development is a line of snack foods, reportedly called Eagle.

■ Aside from its beer division, Anheuser-Busch is the leader in baker's yeast and has business interests in family entertainment, can manufacturing, transportation, malt production, baseball, and real estate.

In the $1 billion themepark market, A-B's entries had good years in '78 as attendance was up 19% at the Old Country in Williamsburg and 8% at the Dark Continent in Tampa. The company announced a $20,000,000 expansion plan to create a new section in the Florida park called Timbuktu, with a roller coaster and a 1,200 seat festhaus plus a water park dubbed Adventure Island, complete with water slides.

The baseball Cardinals had a rough season in '78 and attendance fell to 1,300,000—not surprising for a city known for its fair weather fans. However, in '79 under the auspices of former Card third base great Ken Boyer, the Redbirds took off in the first part of the season to old heights as that "grand old man" of baseball, the base burglar, Lou Brock, led the league in hitting. The team also got a new bird mascot—Fredbird the Redbird.

Avon Products

	1978	1977
Sales*	$2,014,706,000	$1,648,471,000
Earnings*	227,941,000	191,492,000
Advertising**	63,800,000	55,000,000

***Worldwide**
****U.S. only**

Avon Products, New York, ranked 62nd among national advertisers in 1978, with a domestic advertising expenditure of $63,800,000, a 16% increase over 1977.

In 1978, Avon again set records in both sales and earnings. Net worldwide sales reached $2.01 billion. A 22% increase over 1977, this is the highest rate of gain the company has achieved in the past 22 years. Earnings were up 19% from 1977 to $228,000,000.

Domestic sales increased 20% to $1.12 billion. Foreign sales, excluding Geni Canada tableware, were up 24% to $84,000,000. Sales in Europe increased 22%; in both Canada and the Pacific, they were up 23%, and in Latin America, up 30%.

■ In 1978, Avon began sales operations in New Zealand, Thailand and the Ivory Coast. It also acquired Beautifont Inc., a cosmetics manufacturer, and Aura Laboratories, a supplier, in the Philippines.

In 1978, a record number of more than 1,000,000 Avon representatives sold the company's 700 products on a direct basis to 80,000,000 customers in 27 countries. They were supported by $45,100,000 in worldwide media advertising, an increase of $9,712,000 over 1977.

Another $38,420,400 was spent on unmeasured advertising, for brochures and catalogs, some as long as 96 pages; shopping bags; sales rep presentations, and other special promotional tools.

Television received the largest chunk of Avon's measured advertising dollars, $20,114,500 in network and $1,104,000 on spot tv. Magazines followed, with a $2,879,700 allotment, down $671,000 from 1977; $1,561,500 of this amount was directed toward sales representative recruitment.

Radio was divided between $331,400 for spot and $267,600 for network, there was no network radio investment in 1977, and spot totaled less than $80,000,000. Avon spent $682,400 on newspapers in 1978. In addition, the company intensified its ad efforts across the board to reach black and Spanish-speaking consumers.

■ The major advertising push of the year was the $3,500,000 "Operation Smile" campaign. Designed to increase the number of customers served by each sales rep, the campaign, whose theme was "Avon, you make me smile," appeared in tv, radio, women's magazines, Sunday supplements, and bus posters.

In the campaign, customers received an Avon "About Town" $2.25 lipstick for 35¢ plus a used lipstick. The company's biggest promotion ever, "Operation Smile" resulted in a 40% increase in overall U.S. sales during May, 1978, compared to May, 1977; a doubling of lipstick volume; and a 30,000 boost in the number of Avon representatives.

Avon also branched out into other promotional areas in 1978. The company signed a $10,000,000 to $15,000,000 five-year package agreement with the Women's Tennis Assn. to sponsor a winter circuit championship tour. The tour had previously received backing from Philip Morris for Virginia Slims.

AVON
YOU MAKE ME SMILE

Avon has gone to tv advertising in a big way, spending more than $20,000,000 in the medium. Commercials supported its "Operation Smile" promotion.

■ New Avon products in 1978 included Tempo, the latest prestige fragrance, which received introductory support of $4,738,100, allotted primarily to network tv and women's magazine color spreads; Skinplicity, a facial skin-care plan; Feelin' Fresh, a bath product family line; Avon New Vitality, hair conditioning products, and 16 Avon Colorcreme Moisture lipsticks. Fine jewelry was added to the company's Collection jewelry line.

Of major financial significance in 1978 were Avon's merger plans with Tiffany & Co., the 142-year-old prestige jeweler. On Feb. 1, 1979, Avon and Tiffany approved the merger agreement, which would make Tiffany, operator of six jewelry stores throughout the U.S., a wholly owned subsidiary of Avon.

Under the agreement, Avon was scheduled to issue 0.845 shares of its capital stock for each outstanding share of Tiffany common stock, or a total of approximately 1,951,340 shares of Avon stock. The merger was approved by the board of directors of each company in the spring of 1979.

Tiffany, which reported net earnings of approximately $4,000,000 for the year ended Jan. 31, 1978, is operating as an independent entity with its management lineup intact.

Bradley H. Wells became director of advertising, replacing Richard McCaffery, and Peyton Sise and Ann Weeks became managers, advertising, succeeding Diane Perlmutter.

B.A.T. Industries

	1978	1977
Sales*	$1,361,700,000	$1,478,777,800
Advertising*	82,397,500	91,253,000

***Domestic (cigaret sales only), estimated by AA**

B.A.T. Industries, the 47th largest national advertiser, is estimated to have spent $82,397,500 on advertising in 1978.

Brown & Williamson, Louisville, is the largest U.S. subsidiary of B.A.T. Industries Ltd., a British holding company and that country's third largest industrial enterprise.

■ Although B&W neither issues an annual report nor releases sales figures, it is estimated that based on unit sales, the company accumulated $1,361,700,000 in cigaret sales in 1978, compared with $1,478,777,800 in 1977. Worldwide sales for B.A.T. Industries in 1978, meanwhile, were estimated at $13,460,000,000.

The 1978 ad total was down 9.7% from an estimated $91,253,000 in 1977. This reflected a 3.1% decline in cigaret sales the company experienced, from 95.26 billion in 1977 to 92.3 billion last year. B&W's market share likewise dropped to 15.3% from 15.8% in 1977.

■ B&W, which just recently reorganized its tobacco unit into the BWI Tobacco Group, ranks third among the six major U.S. cigaret makers, behind R.J. Reynolds and Philip Morris Inc. and ahead of American Brands, Lorillard Corp. and Liggett & Myers.

(The reorganization resulted in the formation of three divisions: Brown & Williamson Tobacco U.S.A., Brown & Williamson International Tobacco and Export Leaf Tobacco Co.)

Kool, the top selling menthol cigaret in the U.S., continues to be the company's best-selling brand. In third place over-all in 1978, Kool sold 59.4 billion units, 790,000,000 fewer than the year before. Kool filters accounted for 58.6 billion units in 1978.

Kool received $27,555,300 in measured media in 1978. Magazine support totaled $10,803,300, newspaper supplements $4,758,600 and outdoor $11,902,300.

Kool Super Lights, introduced in 1977, were promoted through a series of star-studded concerts during March. Featured were singers Sarah Vaughan, Mel Torme and Paul Anka, as well as jazz saxophonist Gerry Mulligan and the Count Basie Orchestra.

■ The Super Light extension, supported by more than $14,500,000 in measured media in 1978, aimed at warding off the defection of Kool and Kool Milds smokers to single digit low-tars produced by other manufacturers.

Viceroy, No. 2 at B&W and No. 13 nationally, sold 12.3 billion units in 1978, down 590,000,000 from the year before. Measured media spending for the brand totaled $6,889,100, compared with $9,117,700 in 1977. Magazines received $2,097,000, newspaper supplements $424,300 and outdoor $4,367,800.

In the fall, B&W moved the low-tar Viceroy Rich Lights into national distribution from test market in Little Rock, Ark. More than $3,000,000 in measured media supported the effort, which included the line, "the first low-tar cigaret good enough to be called rich."

■ Raleigh, the No. 14 brand nationally, had plain and filter combined sales of 12.1 billion units, 350,000,000 fewer than in 1977. The filters, including Raleigh Lights, accounted for 11.1 billion of those units, down from 11.3 billion in 1977. Plain kings were also down, from 1.1 billion in 1977 to 1 billion in 1978.

Measured media support for Raleigh totaled $6,896,600, down considerably from $9,371,400 in 1977. Magazines received $1,894,100, newspaper supplements $3,004,400 and outdoor $1,998,100. The outlay included $261,200 for a sweepstakes and $129,400 for a refund promotion.

■ Belair, the 20th largest-selling cigaret, followed the pattern of the other B&W brands when it saw its sales drop to 8.3 billion units in 1978 from 8.7 billion in 1977. Measured media spending, however, increased slightly: $8,246,400 in 1978, compared with $8,102,100 the year before. Magazines received $4,640,200, newspaper supplements $2,000,100 and outdoor $1,606,100.

Recognizing the ever-growing shares low-tars are receiving—an estimated third of the market—B&W moved a new brand, Arctic Lights, into national distribution during the spring. The 9mg menthol was the third low-tar entry from B&W in the last few years. It follows the successful Viceroy Rich Lights and the heavily supported but unsuccessful Fact, withdrawn from the market in 1978.

Ads for Arctic Lights are depicting a pack of the cigarets encased in a clear block of ice. B&W said that the brand "delivered more in trial than any new brand we've ever tested."

On the international front, B&W has begun shipping Kool and Viceroy, as well as Lorillard's Kent, to China. The move came in light of B.A.T. Industries' efforts to shore up sagging sales by expanding markets in developing countries.

Other products in the B&W tobacco stable include Laredo, a roll-your-own cigaret kit; Sir Walter Raleigh regular, aromatic and special mixture pipe tobaccos; Tube Rose snuff; Bugler, Target and Kite tobaccos for roll-your-own markets, and Bloodhound, B&W Sun Cured and Red Juice plug chewing tobacco.

■ One operation of Brown & Williamson's that showed up prominently in the news last year involved the company's retail outlets, estimated to have had a volume of $1.6 billion in 1978.

Faced with persistently disappointing years at Gimbels, B&W consolidated its retail units—Gimbels, Saks Fifth Avenue, Kohl Supermarkets and Kohl Department Stores—by forming the BWI Retail Group and bringing in Saks' top management team to run it.

Gimbels, a 38-store chain with outlets in four states, reportedly was finding its New York and Philadelphia operations less than profitable. That has been mitigated somewhat over the years by the sales and earnings growth displayed by the 31-store Saks. Reports noted Gimbels and Saks together showed a 5% rise in sales, to $1 billion, in 1978, but all of it was said to be attributable to Saks.

■ Media ad spending as measured by Leading National Advertisers for Gimbels in 1978 totaled $4,363,300, of which $78,400 went to magazines, $626,400 to newspaper supplements and $3,658,500 to

MARKETING PROFILES

spot tv. For Saks, the total was $2,753,100, with $727,100 to magazines, $236,100 to newspaper supplements and $1,575,000 to spot tv.

Beatrice Foods Co.

	1978	1977
Sales	$7,468,373,000	$6,513,116,000
Earnings	261,010,000	225,945,000
Advertising	150,370,000	126,078,000

Beatrice Foods Co., Chicago, the nation's 17th largest advertising, invested $150,370,000 in advertising in 1978, an increase of 19% over the previous year.

As in the past, Beatrice in 1978 put the bulk of its ad investment—$109,570,200—into such non-measured media as coupons, premiums, packaging, point of sale and the like.

Out of the total $33,429,800 spent in measured media, Beatrice's largest investment was in spot television ($16,903,900), followed by network tv ($5,565,800), both up over the previous year.

Measured magazine advertising jumped from $3,000,000 to $4,000,000, while newspaper expenditures dropped from nearly $3,500,000 to $2,700,000. Other measured media included farm publications, network radio and outdoor.

ARCTIC LIGHTS
Discover
Arctic Lights
–more menthol refreshment than any other low 'tar' cigarette.

Brown & Williamson moved its low-tar Arctic Lights into national distribution during the spring.

▪ Though the Dannon yogurt line continued to be the company's most heavily advertised product as measured by Leading National Advertisers, Dannon's measured advertising dropped to $4,600,000 last year from $4,800,000 in 1977

Dannon yogurt advertising actually dropped to $2,800,000 from $3,200,000 while support for Danny frozen yogurt products increased to $1,800,000 from $1,500,000 the year before.

This reflected Beatrice's continued expansion of frozen yogurt items designed to compete with ice cream and sherbet. Most of the ads were in spot television.

Other lines receiving heavy advertising support included Samsonite luggage, $3,672,200; Peter Eckrich & Sons, $4,470,000, most of it for frankfurters ($1,600,000) and sausage ($2,000,000) on spot tv; $2,614,000 for Sanna division's Swiss Miss Lite instant cocoa mix and Swiss Miss Ready to Eat pudding; La Choy Chinese food products, $2,200,000, and Culligan home water purifiers, $1,215,900.

▪ Relying on a combination of acquisitions and internal growth, Beatrice has accumulated more than 400 distinct operating units under its corporate umbrella. Of the ten business lines Beatrice uses in its reporting procedures, six pertain to food and related services, while four involve manufactured and chemical products.

With food-related businesses accounting for 72% of total sales in 1978 and 62% of pre-tax earnings, Beatrice considers itself the "country's largest food company."

The company is widely recognized for its management acumen, and its successful corporate strategy has called for the conglomerate to maintain a low corporate profile while allowing its operating units a great deal of autonomy.

Though the corporate headquarters makes decisions on top personnel, performs financial and accounting functions, reviews all marketing decisions and provides counseling and assistance when necessary, most operating decisions—such as ad expenditures (within guidelines), themes, campaigns and agency selections—are left to the individual operating units.

▪ Considering Beatrice's generally low profile, probably the most surprising development during the last year was the highly visible and widely publicized conflict within the corporation's board of directors.

The conflict revolved around the question of who was to succeed retiring ceo Wallace N. Rasmussen and what was to be the role of the outside directors. Though the airing of directorial dissension proved an embarrassment to the company, most observers do not anticipate that the shakeup will have any significant effect on the operations of the corporation.

During the last year, Beatrice sold off several companies, including high fidelity manufacturer Harman International and the finance and insurance segments of Southwestern Investment Co. At the same time, Beatrice made two major acquisitions, bringing Tropicana Products, and Culligan International Co. into its fold.

▪ Despite Beatrice's buying and selling during 1978, most food industry analysts are convinced that the company's growth in the near future will come from internal growth and geographical expansion of the company's strong regional brands.

Dairy and soft drink operations showed increased sales of $1.9 billion in 1978, up 5.5% from $1.8 billion the year before, with the most volatile activity occurring in the Dannon yogurt operations.

Acquired 20 years ago as a $4,000,000 sales company, Dannon is expected to do in excess of $100,000,000 in sales in 1979. It became the first branded yogurt to be sold nationally when it entered the California market this summer.

Supplied by the recently completed Fort Worth plant, Dannon's West Coast outlets give the yogurt producer entry to a giant and highly competitive market and bring it head to head with such firmly entrenched companies as Knudsen Corp. and Beatrice's own Johnston unit, as well as such other newcomers to the western yogurt market as General Mills and Foremost-McKesson.

▪ Dannon had previously announced that it would be going national in 1981, and the speeded up timetable is seen as an effort to cash in on the advantage of being "on the shelf first."

Though Dannon will undoubtedly gain some advantages from the move, it will not be without its costs. According to several industry observers, Dannon, which does more than 75% of its business in the eastern U.S., will find that the distribution costs of going west of the Mississippi will cut into its profits.

Analysts also point out that the yogurt market—estimated by some to have reached $600,000,000 in annual sales—has begun to plateau and that competition will become increasingly fierce.

Some of these events have already come to pass. In 1978, despite an estimated 7% growth in unit volume, Dannon experienced a decline in earnings due to competitive pressures and expansion costs. Beatrice officials have indicated that Dannon advertising, which fell in 1978, will be increased in the coming year.

▪ The increased competition spilled over into the frozen yogurt market, and the Danny frozen yogurt line responded with a substantial increase in advertising expenditures to support the product expansion it has undertaken in the last two years.

In Beatrice's other dairy operations, Viva brand's new yogurt drink was well received last year and is slated for wider distribution; Swiss Miss Light, a low-calorie hot chocolate drink, rolled national; and Swiss Miss puddings, introduced several years ago, took off last year, doubling in sales over the last 18 months.

Due to the inclusion of newly acquired Tropicana, Beatrice's grocery operations sales grew to $963,000,000 (up 36%) while earnings shot to $82,000,000 (up 64%). Excluding Tropicana, the grocery operations recorded a 10% increase in sales and a 12% increase in earnings.

▪ There is little doubt that Beatrice is looking to squeeze a lot of profits out of the fruit juice market with its acquisition of Tropicana, for which it paid close to $500,000,000 last year.

Despite a shortage in the Florida citrus crop that forced the company to import higher priced supplies, the growing demand for fruit juices enabled Tropicana to report good earnings last year. The company has launched an expansion program that will double its production capacity this year.

La Choy's strong performance also bouyed the grocery operations. Riding the surging interest in ethnic and convenience foods, the producer of Chinese foods introduced canned sweet and sour chicken and pork as well as frozen won ton soup last year as part of its long-term plan for expanding its Oriental items and developing consumer tastes.

▪ Despite a 20% increase in sales to $658,000,000, the Specialty Meat operations showed a minimal increase of 1% in earnings to $45,000,000. According to food industry analysts, most of this lackluster performance was a result of problems suffered by the E.W. Kneip fresh meat unit and caused by last year's beef shortages and fluctuating demand. The Peter Eckrich & Sons processed meat unit continued its expansion toward national distribution of its products. Eckrich currently generates 30% of its sales outside its Indiana, Illinois, Ohio and Michigan stronghold, as compared with 12% five years ago, and has opened three new branch offices.

In line with its geographical expansion, Eckrich's measured media advertising support increased nearly 50% to $4,500,000 from $3,300,000 the previous year.

Despite rising gas prices that hurt sales of Airstream recreational vehicles, the strong performance of Samsonite luggage helped the Travel and Recreation operations post a 20% increase in earnings to $46,000,000 this year on a 14% increase in sales to $497,000,000.

▪ Samsonite's performance was spurred by the air travel boom that resulted from airline deregulation and was supported by a 25% increase in measured advertising.

The company also continued its penetration of the fashion-oriented softside luggage market that it had entered in 1970 and that now comprises one-third of its total sales. Four new lines of softside luggage were introduced last year to meet the wider range of consumer tastes.

Despite declining domestic candy consumption, the Confectionery and Snack operations posted strong performances last year with sales increasing 13% to $164,000,000 and earnings jumping to $59,000,000, up 15%.

▪ Particularly strong were activities in Latin America, where increasing disposable income has led to increased demand for such products.

Domestic performance was helped by greater aggressiveness in new products and brand development, including a new television campaign for Fisher nuts that quadrupled Fisher's measured ad expenditures, and the national distribution of Clark's successful Crispy bar, as well as the test marketing of several nutrition-oriented products.

New Swiss Miss Lite.
When you taste what we put in, you won't believe what we took out.
What we put in are the same select, imported cocoas we use in our regular hot cocoa mixes for an old fashioned chocolatey taste.
What we took out is one third of the calories. Without using artificial sweeteners or preservatives.
You won't believe the taste.

Swiss Miss Lite was one Beatrice Foods Co. product that received heavy support over the year.

In Beatrice's other lines of business:

- Institutional and Industrial operations earned $111,000,000 last year (up 5%) on sales of $753,000,000 (up 11%). Recently acquired Culligan will be added to this group, and is planning to raise the proportion of commercial and industrial business it handles, as well as trying to capture a greater portion of the large number of homes in water problem areas that do not have water conditioners.
- Food distribution and warehousing operations continued to show solid improvement in both sales and earnings. Sales last year rose 18% to $977,000,000, while earnings rose 15% to $50,000,000.
- Agri-Products operations showed sales increasing 12% to $391,000,000 last year, with earnings rising to $33,000,000, up 33% over last year.
- Housing and Home Environment operations, which were adversely affected by the poor performance of the Harman International high fidelity group (which the company expects to sell), experienced a decline in earnings of 20% to $42,000,000 last year despite an increase in sales to $573,000,000.
- Chemical and Allied Products operations posted a strong performance last year, with earnings climbing 28% to $38,000,000 on a sales increase of 20% to $274,000,000.

Beecham Group Ltd.

	1978	1977
Sales*	$1,910,817,000	$1,610,946,000
Earnings*	303,048,000	265,608,000
Advertising	27,656,500	30,779,200

***Worldwide figures, converted to U.S. dollars.**

Beecham Group Ltd., Clifton, N.J., the 100th largest national advertiser, spent an estimated $27,656,500 in advertising in 1978, a 10% decline from an estimated $30,779,200 in 1977.

The figure, however, was still considerably above the $8,166,400 spent in 1976, before the acquisition of Merck & Co.'s Calgon consumer products business.

The British-based company reported worldwide sales of $1,910,817,000 in the year ended March, 1979, an 18.6% increase over the $1,610,946,000 recorded the year before. Earnings also increased, 14.1%, to $303,048,000 from $265,608,000 over the same time period.

Although the company does not break out U.S. figures, sources said the U.S. divisions of Beecham Inc. had sales of about $400,000,000 in the year ended March, 1979.

Total group sales distribution for the year broke down as follows: North and South America 19%, United Kingdom 30%, Western Europe 31% and others 20%.

■ The big product news for the company in 1978-79 was the national rollout of Aqua-fresh, a toothpaste that went through several years of extensive testing. In early tests, Beecham obtained a 4% market share with Aqua-fresh, and figures for expansion markets went much higher.

The national rollout of the toothpaste, which is being positioned as a breath freshener and cavity fighter, was said to be accompanied by a planned $10,000,000 in ad support. In 1978 alone, Beecham supported the brand in test market with $2,808,500 in measured media ad spending, including $2,584,800 in spot tv.

The introduction prompted what some industry observers viewed as a response from Procter & Gamble's Gleem, which came out at the same time with a campaign that conveyed a new message. Furthermore, the introduction was expected to affect the swapping of positions that has been going on for some time between Colgate-Palmolive and Lever Bros.

■ Among Beecham's consumer products, meanwhile, those reportedly displaying the best performance in the U.S. included Sucrets throat lozenges, Cling Free fabric conditioner, Massengill disposable douche, Calgon water conditioner, Lancaster cosmetics and Vitabath bath gelee.

Cling Free, a former Merck & Co. product, received the most measured media support, with $6,153,400 spent in all—$3,000 in magazines, $6,021,700 in network tv and $128,700 in spot tv.

The family of products that received the most combined support turned out to be the Calgon brand, which also came over in the Merck acquisition. Calgon water softener received $2,118,000, with $1,536,600 going to network tv and $581,400 to spot tv.

Calgon bath oil beads was close behind with $1,741,500, most of which, $1,690,500, went to network tv. Calgonite dishwasher detergent accounted for $1,408,900, with $1,397,000 going to network tv and $11,900 to spot tv.

Other products that came over in the Merck deal also received a sizable chunk of ad support. Sucrets throat lozenges received $3,287,700, virtually all of it going into network tv. Hold—a brand that includes a cough drop and a liquid cough suppressant—got $2,369,100 in support, again most of it in network tv.

Massengill disposable douche also received more than $1,000,000 in support, in its case $3,733,900, with $414,300 going to magazines, $3,276,200 to network tv and $43,400 to spot tv. Massengill liquid and powder douche received considerably less.

Brylcreem, one of Beecham's anchor products, received $1,065,900 in support, including a $40,800 cash refund promotion that ran in magazines. The breakdown: Magazines, $107,800; network tv, $915,600, and spot tv, $42,500.

Other consumer products that received support, albeit at a lower level, included Fruit-Fresh food preservative, $601,200; 2nd Debut cosmetics, $298,600; Vitabath bath gelee, $179,500; Lancaster cosmetics, $74,500; Back to Basics liquid disposable douche, $41,200, and Selection Parfum, $13,800.

In agency news during the year, Beecham Cosmetics division shifted its Vitabath account from Dancer Fitzgerald Sample to Shaller Rubin Associates, thereby consolidating all of cosmetics accounts at the New York agency.

Borden Inc.

	1978	1977
Sales	$3,802,559,000	$3,481,278,000
Earnings	135,827,000	126,870,000
Advertising*	50,000,000	59,340,700

***U.S., estimated by AA**

Borden Inc., Columbus, O., the 74th largest U.S. advertiser, reduced advertising expenditures about 16% in 1978 to an estimated $50,000,000, down from about $59,340,700 the previous year.

Sales increased to $3.8 billion in 1978, a 9.2% increase over 1977's record $3,481,278,000. Net income increased 7% to $135,827,000 from the previous high of $126,870,000 in 1977. Net income was reduced by net foreign exchange losses of $7,700,000 in 1978 and by $4,200,000 in 1977.

Of the four Borden divisions, foods and dairy and services each contributed 28% of the company's sales. The chemical division contributed 24% and the international division, including exports, provided 20%.

■ The food division's sales improved 3.9% in 1978, totaling $1,067,836,000. Divisional operating income increased 6.9%. Increased sales volume is attributed mainly to the cheese, confectionery, snacks and some grocery products.

An increase in dollar sales was offset somewhat by lower volume in soft drink mixes, the result of continued intense competition and the disposition of the division's canning operations.

Sales by the dairy and services division increased 8% over 1977 and operating income showed a 3.1% hike. According to the company, the sales gain is the result of higher selling prices on slightly higher volume of fluid milk, fruit beverages, cream and some specialty operations.

A 5.4% sales increase was recorded for the chemical division, though operating income decreased 6.6%. On Dec. 31, 1978, the chemical division withdrew from the home insulation market, but whatever impact this may have is not reflected in the 1978 figures.

The international division recorded a 26.1% sales increase in 1977 and a 12.4% increase in operating income. The division's food segment operations were hurt by a European surplus of cheese and the weakness of the U.S. dollar.

■ In the grocery products group of the foods division, the company credits three factors for the improved performance of Wyler's drink mixes after the severely depressed activity of the previous year: Revamped advertising and promotion, cost savings within the operation and consolidation of marketing and sales activities. In 1978, the Wyler's brand was supported by tv advertising featuring country singer Roy Clark. With its market share slipping significantly in the past few years, Wyler's now has about an 8.8% market share.

Borden spent more on advertising Wyler's drink mixes in measured media than on advertising for any of its other products. The entire $5,103,000 for drink mix advertising was spent on commercials for tv, primarily network tv.

Calling Wyler's "The thirst-quenchingest, great-tastingest new soft drink around," the company launched its canned ready-to-drink lemonade in Indianapolis and Minneapolis on May 15, 1978. A total of $139,600 was spent on spot tv to support the product. Aimed at heavy soft drinkers, the 1978 advertising theme was "Lemonade lovers, you'll love Wyler's ready-made."

■ Borden expanded its involvement in beverages with the introduction of canned yogurt shakes in several western states and glass-packed fruit drinks (under its Bama brand) in south and southeast markets.

Coupon newspaper ads offered 30¢ off when consumers purchased four cans of the new yogurt shakes in any of four flavors: Strawberry, raspberry, blueberry and orange. The company spent $39,000 advertising the new yogurt shakes in consumer magazines ($34,800) and on spot tv ($4,200).

Eagle Brand sweetened condensed milk, the company's original product, "had its best year ever," according to the company, due to repositioning as a conventional dessert starter. Of the $2,373,900 spent on advertising Eagle Brand last year, $1,641,600 went to network tv and the rest was split between consumer magazines and spot tv.

ReaLemon reconstituted lemon juice showed improved sales volume, receiving $18,200 worth of measured media advertising in spot tv and newspaper supplements. It also was advertised in conjunction with Wyler's instant bouillon and ReaLemon powdered lemon drink mix.

A Federal Trade Commission challenge to the ReaLemon trademark fell through in November when the commission rejected a contention that only trademark licensing would end ReaLemon's monopoly position in its market. The commission did uphold a 1976 finding that Borden illegally tried to maintain ReaLemon's market position by offering more generous trade allowances in geographically targeted markets in order to regain market share lost to new rival brands.

Borden has appealed the unfavorable portion of the finding to the U.S. circuit court.

■ In the confectionery group, Cracker Jack was supported by $2,090,900 on network tv, primarily, and spot tv. Improving both its dollar sales and tonnage, Cracker Jack "benefited substantially from a new advertising campaign, consumer promotions and a national rollout of a foil bag line marketed through snack distributors," according to the company.

Of the company's cheese products, Lite-line low-calorie cheese received the most advertising support with a total of $3,089,700 in measured media. Concentrating on network tv ($2,749,100), the company also purchased space in consumer magazines ($303,400) and time on spot tv ($37,200). It is now rolling out Skim-American low-fat cheese products.

The dairy and services division last year introduced a new line of All Natural ice cream products and rolled out Lite-line Swiss-style yogurt to Rochester, Syracuse and Buffalo, N.Y., as well as Baltimore.

After three years' involvement, the division withdrew from the home insulation market after its foam-in-place insulating product, made from urea formaldehyde combined with a catalyst, received extensive unfavorable publicity about health hazards associated with its use. The company termed the charges "unsupported."

The division's Krylon spray paints benefited from ad support totalling $1,303,600. Most of the money ($1,281,500) was spent on network tv and emphasized the product's no-drip feature.

This year, Borden has said it is determined to secure the No. 1 position in the instant glue category. The company plans to spend $2,000,000 on an advertising program designed to push its product, Wonder Bond, to the top of the heap. Krazy Glue currently is believed to hold the No. 1 spot with more than a 30% share.

Ads by Conahay & Lyon are imploring Wonder Bond consumers to "Stick with a name you can trust." Last year, $352,700 was spent in measured media, mainly network tv, to advertise Wonder Bond.

Create some creamy lemon meringue magic
The easy, no-cook way
Creamy Lemon Meringue Pie

Borden's Eagle Brand sweetened condensed milk, which reportedly had its "best year ever," was promoted with recipe ads.

Bristol-Myers Co., New York, the 9th largest national advertiser, is estimated to have decreased its U.S. advertising budget 5% to $192,850,000 in 1978.

The company reported worldwide advertising and product promotion expenses of $432,924,217, up 4% from 1977's $406,000,000. This represented 17.3% of total 1978 sales, compared with 18.3% in 1977.

For the first half of 1979, B-M reported sales of $1.3 billion, up 12% from a year earlier, while net earnings increased 14% to $102,827,000. Heavy advertising expenses in the first half caused earnings to trail year earlier results.

Sales in 1978 rose 9.7%, and earnings 14%. Gains in both sales and earnings came from the pharmaceutical and medical products, toiletry and beauty aids, and household products segments; earnings in the nonprescription health product division decreased slightly in 1978 because of the substantial earnings decline of Westwood Pharmaceuticals.

- Total sales for the main consumer products units—Bristol-Myers Products, Drackett Co. and Clairol—were $1.6 billion, up 6% from 1977. This represented 66% of total B-M sales. These units also provided $264,202,000 of the company's total profits, a 1% increase over 1977.

Domestic measured media expenditures were down $8,155,900 to $155,944,900. This was a 5% decrease from last year's total support of $164,100,800.

Newspapers showed the greatest decline, from $2,970,500 in 1977 to $762,400 in 1978. Network tv spending fell 3.5% to $110,341,400.

- In 1978, B-M's Clairol hair color products continued to remain on top of this $400,000,000 U.S. retail field, holding a market share of over 50%.

The Clairol beauty products division received ad support totaling $43,150,400, primarily in network television. Clairesse hair color had the largest budget, $6,175,400, of which $4,345,300 went to network tv, $951,800 to spot tv and $776,200 to magazines.

Other heavily advertised products included Clairol Final Net Invisible Hair Net, which received $5,531,500, again mostly in network tv; Herbal Essence shampoo, which was allotted $5,725,100; Loving Care hair color lotion, which was supported by $4,410,500, and Nice 'N Easy hair color, the recipient of $4,511,900.

New Clairol product introductions in 1978 included Clairol Condition shampoo, whose budget of $2,903,200 was divided between network tv, with $2,873,300, and spot tv, which received $119,900.

Clairol Condition Beauty Pack Treatment, also a new product, was supported by $1,734,400, with magazines receiving $875,700, network tv $749,900, and spot tv, $108,800.

- The Clairol appliance division set new records in sales and earnings in 1978, as hairsetters retained their position as the division's leading personal care appliance.

One for the Road, a fold-up travel hairdryer, was a new introduction; the Foot Fixer, introduced in 1977, also grew rapidly, with increased public interest in active sports participation.

Ad support for the division totaled $8,821,900; network and spot tv received the bulk of the budget. The Crazy Curl Hair Styler was allotted $1,254,300—$752,800 to network television, $501,500 in spot tv.

The True-to-Light mirror was also heavily promoted, with $535,400 going to spot tv and $372,400 to women's magazines. Women's magazines received $805,200 in a Clairol beauty appliance campaign.

- In the Bristol-Myers' products division, Ban, Ultra Ban, Ban Basic and Tickle continued to hold approximately 20% of the highly competitive U.S. deodorant/-antiperspirant market, as the overall share of all aerosol products in the market plunged from 80% to 40%.

Ban deodorants and antiperspirants received total support of $8,688,000; Ban Roll-on deodorant was the largest recipient, with $7,272,300, of which $6,819,200 went to network television.

Tickle, another roll-on deodorant marketed as an alternative to aerosols, was allotted $5,082,200, primarily in network television, while the Ultra Ban line received $2,391,800.

New product introductions were Ban Super Solid, a stick deodorant that was supported by $376,800, all in magazines, and Ban Big Ball roll-on.

- B-M's Bufferin continued to hold 10% of the $750,000,000 U.S. analgesic market, followed by B-M's Excedrin, which captured 8%. The leading product in this category was Johnson & Johnson's Tylenol, which had 20% of the market; American Home Products' Anacin held 13%, and Sterling's Bayer 10%.

Bufferin's ad budget included $13,866,900 allotted to Bufferin tablets, of which $12,030,700 went to network television; $201,800, all in magazines, for Bufferin & Arthritis Strength Bufferin tablets, and $1,500, all in spot television, for Bufferin cold tablets.

Excedrin tablets received $10,456,700, mostly in network television; Excedrin PM tablets got $3,714,100, again mostly in network tv, and Excedrin X Aspirin Free tablets received $279,800, all in spot tv.

B-M's new introduction in the analgesic category was Comtrex, a cough and cold remedy that combines a decongestant, analgesic, cough suppressant and antihistamine.

Positioned as a cold reliever competitive with Bayer, AHP's Dristan, and SmithKline's Contac, Comtrex received support of $5,763,200—$5,420,200 to network tv, $267,300 to magazines, the remainder to newspapers and spot television.

- Other B-M products with major ad support were the Vitalis hair preparation line, which received $3,049,600, mostly in network television; Body-On-Tap Beer Enriched shampoo, a new introduction that was allotted $5,727,000, of which $5,354,900 went to network tv, the rest to spot tv and 4-way nasal sprays, given $2,473,100, again mostly in network television.

In 1978 B-M's Drackett products achieved new sales records, led by Windex window cleaner, Renuzit air freshener and the O-Cedar line of brooms and mops. Windex's budget was $4,212,100, of which $2,857,500 went to network tv, $851,900 to magazines and $502,700 to spot tv; O-Cedar products received $1,569,000.

Vanish toilet bowl cleaners were allotted a total of $5,377,900; Drano drain openers got $4,480,400; Endust spray was budgeted at $2,178,300, and Behold furniture polish received $2,347,300. For all four lines, network tv was the major ad medium.

To compete against AHP's Woolite, B-M introduced Handle with Care special care wash to its Miracle White line. Advertising, which stressed the product's built-in fabric softener, totaled $2,900,900. Of this, $2,090,600 went to network tv, $406,600 to magazines, $355,600 to spot tv and $68,100 to newspaper supplements. Other Miracle White products received support of $2,614,900.

- The Nutrament line was backed by $144,300, and the Weight Watchers frozen desserts and fruit snacks received $408,100.

NEWSPAPER DATA

National newspaper advertising investments were supplied by Media Records. Reproduction of this data without written permission is prohibited.

Newspaper brand data for the top 100 newspaper advertisers and for companies with newspaper investments of $10,000 or more are available from Media Records, 370 Seventh Ave., New York 10001 (212) 736-7490.

Westwood's Keri Lotion and Alpha Keri Bath Oil had ad support of $1,146,600; its acne product Fostex had a budget of $56,000; PreSun and PostSun suntan products received $199,000, and Piz Buin suntan Lotion got $287,600. Magazines were the only medium for all Westwood products.

In the Mead Johnson nutritional division, the position of the Vi-Sol and Vi-Flor line of pediatric vitamins improved, as did the position of the milk-free formula ProSobee. Enfamil infant formula, backed by $26,200, all in magazines, remained strong.

- Bristol Laboratories' hospital antibiotics, Amikin and Cefadyl, showed substantial sales increases in 1978. The division introduced Stadol, an injectible potent analgesic, into the $65,000,000 pain reliever market. Unlike other pain relievers such as morphine and Sterling Drug's Demerol, Stadol claims to be nonnarcotic. Stadol's introduction is considered an indication of B-M's intent to broaden its ethical drug base.

Young & Rubicam's resignation of $30,000,000 worth of Bristol-Myers billings in May, 1979, triggered some major agency realignments.

The company added four new agencies to its roster and gave more business to Needham, Harper & Steers, Grey Advertising and Daniel & Charles. Newcomers were: Kenyon & Eckhardt, for the $10,000,000 Excedrin account; Marschalk Co., Endust, billing $2,200,000; James Jordan Inc., getting $2,000,000 for Renuzit, and Lois, Pitts, Gershon, awarded the $3,000,000 Vitalis account. Assignments were for creative only; Boclaro handles buying.

Brown-Forman Distillers Corp.

	1978	1977
Sales	$560,000,000†	$457,000,000
Earnings ...	40,100,000†	31,250,000
Advertising*	35,000,000	27,500,000

†Fiscal year ended April 30, 1979
***AA estimate**

Brown-Forman Distillers Corp., Louisville, the 88th largest national advertiser, increased its advertising to an estimated $35,000,000 in 1978, up about 27% over the estimated 1977 investment of $27,500,000. The company said it spent $38,000,000 in fiscal 1979 and reported that ad expenditures would increase 32% in the current fiscal year, to $50,000,000.

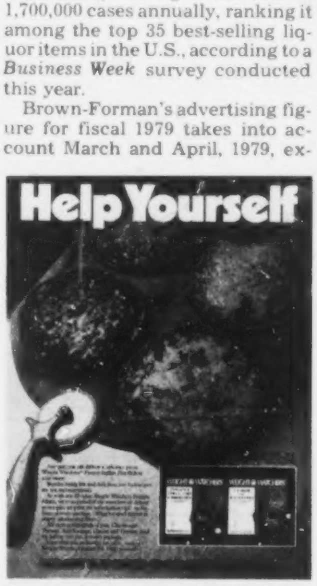
Sales for fiscal 1979 came to $560,000,000, exceeding the half-billion dollar level for the first time and bettering the 1978 mark, $457,000,000, by 22%. Earnings of $40,100,000 also topped the previous high, set in 1978, of $31,250,000.

The company, marking its 110th year in 1980, is the nation's leading independent and family-managed distiller (the Brown family owns the majority of the company's stock and the company's only product is alcoholic beverages).

▪ Brown-Forman's purchase in March, 1979, of Southern Comfort Corp., St. Louis, will be a significant factor in boosting the distiller's advertising outlay.

Southern Comfort, which represents all of that company's volume, is currently selling at the rate of 1,700,000 cases annually, ranking it among the top 35 best-selling liquor items in the U.S., according to a *Business Week* survey conducted this year.

Brown-Forman's advertising figure for fiscal 1979 takes into account March and April, 1979, expenditures of the brand.



Bristol-Myers' Weight Watchers frozen desserts and fruit snacks were supported by $408,100 in measured media in 1978.

Source: Media Records.

After B-F's purchase, strategy for the Southern Comfort brand "basically stayed the same as it had been," according to Bill Cosher, account exec on the brand at Krupnick & Associates, St. Louis, which has handled Southern Comfort for the last 15 years.

That program consists mainly of booklet inserts containing mixed drink recipes and one-page, four-color magazine ads. Both booklet and ads are placed in Sunday supplements and major national publications including *Time*, *Newsweek*, *Sports Illustrated*, *Playboy*, *Penthouse* and *Ski*.

Each of the distiller's three product categories posted net sales gains in fiscal 1979: American spirits rose 15%; imported spirits gained 16%, and wines and specialties moved ahead 59%. Reflecting the changing character of the industry, B-F's combined imported spirits and wines and specialties categories accounted for 50% of the year's total sales.

In addition to Southern Comfort, seven of the company's major labels each sold over 500,000 cases on an annual basis: Jack Daniel's Black Label (whisky) 2,300,000 cases; Old Forester (Kentucky bourbon whisky) 790,000; Early Times (Kentucky bourbon whiskey) 1,900,000; Canadian Mist (Canadian whisky) 2,400,000; Bolla (Italian wines) 1,300,000; Cella (Italian wines) 1,500,000, and Korbel (California champagnes and brandy) 600,000.

The purchase of Southern Comfort notwithstanding, the most significant marketing event of the year was an internal executive shift that saw William Street succeed Roger Coleman (who is set to retire this fall) as president of B-F Spirits, the company-owned marketing division. Replacing Mr. Street as board chairman and ceo of Garneau was William R. Carroll, formerly B-F Spirits, national sales director.

Tv advertising in excess of $5 000,000 supported Cella, the company's fastest-growing label, which includes Lambrusco and the companion white Bianco. The Bolla label also was heavily supported, with network and spot tv investments together of nearly $4,000,000. Manoff Geers Gross, New York, handles both.

Canadian Mist, the largest selling brand in B-F's imported spirits category, achieved a record volume of 2,400,000 cases, aided by heavy magazine and outdoor backing (McCann-Erickson is the agency).

▪ "Quality bourbon, like great wine, is made naturally" was the theme of the company's new campaign for Old Forester. The heavy print drive, launched in November by DKG, New York, was aimed at 25-to-49-year-old males. The push ran through December in 15 magazines and newspapers and outdoor in 139 markets.

CBS Inc.

	1978	1977
Sales	$3,290,052,000	$2,826,313,000
Earnings ...	198,079,000	182,008,000
Advertising	122,322,000	96,372,000

CBS Inc., New York, the country's 30th largest advertiser boosted ad expenditures 27% in 1978 for a total domestic outlay of

$122,322,000. A sizable amount of the increase went to newspaper ads designed to improve the CBS-TV Network's standing in the Nielsen race.

The communications company's revenues passed $3 billion for the first time—a mere two years after they had reached the $2 billion mark. Total sales climbed 16% to $3.29 billion while earnings rose 9% to $198,079,000. Domestic revenues hit $2.79 billion, for a gain of 15%, with profits up 6%.

Strongest gains were registered abroad with foreign sales up 22% to $429,300,000; earnings on those sales zoomed ahead 25% to $71,200,000.

▪ Financially speaking, 1979 did not start happily for the folks at Black Rock. First quarter sales rose 11% to $828,732,000, but earnings plummeted 47% to $17,800,000. CBS president John Backe blamed this unpleasant turn of events on the sluggish audio record market and on sharply rising costs for network tv programing.

As predicted within CBS Inc., there was a turnaround in the second quarter where revenues, earnings and earnings per share hit new records. Net income rose 11% to $65,800,000 on revenues of $913,800,000—a 22% gain over second quarter 1978 revenues. But profits for the first half of '79 dropped 10% due to the sharp first quarter dip.

Broadcasting—especially tv—as the foundation of this company provides by far the largest share of its revenues and profits. The CBS/Broadcast Group in 1978 made $225,700,000 on revenues of $1,327,500,000.

Major promotion, advertising and marketing attention in this group was directed toward trying to get the CBS-TV Network back into the No. 1 position in prime time.

ABC has pretty much monopolized the top spot for several years and the dominance is beginning to show—to show to CBS' disadvantage—in terms of total sales, pricing levels and network profits.

An edge of a single prime time rating point now is worth about $30,000,000 annually. By late spring and early summer, CBS had tightened the race enough to move ahead on an occasional week, but the fall race with the matching of ABC's heavyweights against a raft of CBS and NBC newcomers is what everyone is waiting for.

The broadcast group depends heavily on print to get its message across both to viewers and advertisers. The main vehicle for the networks and the owned stations is newspapers, which by CBS' calculations were in for nearly $45,000,000 in the budget last year. The mix also includes consumer magazines and business publications.

Second to broadcast as a revenue and profit producer is the CBS/Record Group, which weighed in last year with $946,500,000 in sales and $93,800,000 in profits. Then came 1979 and the impact of industrywide troubles in the recording field which hit hard at CBS. Those troubles apparently consisted mainly of fewer hits for Columbia stars and less manufacturing work assigned to CBS by other labels.

In the second quarter of 1979, things improved considerably thanks to Wings, Earth, Wind & Fire, Electric Light Orchestra and Cheap Trick. At one point Columbia held eight of the top 25 spots on the national radio charts.

Exact spending for the Columbia and Epic labels is hard to trace in the measured media reports where they show up with about $4,000,000 in tv money. In market share, Warner and CBS are vying for first place.

The big advertising spender in this corporate family is the CBS/-

MARKETING PROFILES

olumbia Group, which includes he Columbia Record & Tape Club, elf-proclaimed as the "largest mail rder distributor of recorded mu- ic in the world." Its profits for '78 vere $33,600,000 on revenues of 598,900,000.

The club spent nearly $20,000,000 n measured media in 1978—8,793,000 in magazines, $6,275,400 n newspaper supplements and 4,616,700 in spot tv.

The toy division operates within nis group; its most heavily pronoted item, judging from the ublished figures, was the Gabriel ames and toys line. Gabriel was acked up by nearly $3,000,000 in v, about half of it in network.

The smallest member of the corporate family in revenues, but oming along fast partly as a result fthe acquisition of Fawcett Publi- ations, is CBS/Publishing Group which boosted its profits 45% to $38,500,000 in '78 on a 10% sales hike which brought it to the $442,300,000 mark.

▪ None of the highly successful perations of this group loomed arge in the measured media pending columns. However, Holt, Rinehart & Winston reported it old more elementary and high chool texts than ever despite a hrinking number of school-age ids. In the reading for fun category, Holt's best-sellers included dith Holden's "The Country Di- y of an Edwardian Lady" and arry Trudeau's "Doonesbury's reatest Hits."

Female star of the consumer ublishing division remained *oman's Day*, as it set new records n advertising revenues with its irst 14th issue year.

The men's group was paced by *ield & Stream*, No. 1 with the out- oors set. Similarly new sales ighs were chalked up by Fawcett aperbacks—Crest, Gold Medal nd Popular Library.

By mid-1979, this group had a new boss—John Suhler, who advanced from head of the consumer publishing division to succeed John Purcell, who moved up to No. in the corporate suite with the ti- le of exec vp, CBS Inc.

CPC International

	1978	1977
Sales	$3,221,800,000	$2,369,800,000
Earnings+	147,300,000	132,900,000
Advertising*	65,901,700	51,000,000

+Worldwide *U.S. only

CFC International, Englewood Cliffs, N.J., the 60th largest national advertiser, increased its U.S. ad spending a hefty 29% to $65,901,700 in 1978 from $51,000,000 in 1977.

Open up to the amazing world of Hellmann's!

Hellmann's mayonnaise helps make CPC International one of the 20 largest food companies in the world.

Worldwide sales increased 12.3% to $3.22 billion, topping the $3 billion mark for the first time. Worldwide ad and promotional expenditures were $179,000,000, up from $149,000,000 in 1977.

CPC, noted for such brand names as Hellmann's mayonnaise, Skippy peanut butter, Knorr soups, Mazola corn oil and margarine, Karo and Golden Griddle syrups and Bosco milk amplifier, changed its organizational structure from five major operating divisions to four.

All operations in the United States, Canada and the Caribbean were consolidated into one new division, CPC North America. The three other divisions are CPC Europe, CPC Latin America and CPC Asia.

When ranked by sales, CPC is one of the 20 largest food companies in the world. About 85% of CPC's business is concentrated in the United States, Canada and Western Europe. Branded grocery products, the company's largest business segment, accounted for 58% of sales in 1978.

▪ Corn wet milling accounted for 36% of CPC's sales in 1978. Other business, which together contributed 6% of total sales in 1978, includes specialty chemicals, packaging and restaurants.

Foreign business showed a larger gain than domestic operations partly because of the weakening of the dollar against other currencies, price increases necessitated by higher costs and larger volumes in branded grocery products and corn wet milling operations that showed real growth, according to James W. McKee Jr., chairman.

In the new product area, Skippy Old Fashioned was introduced into the western states. This was intended as a competitor for the "natural" peanut butter entries. Measured ad spending for Skippy was $5,030,700, a drop from spending of $6,739,800 in 1977. All of the 1978 ad spending was in spot and network television.

Ad spending for Hellmann's Big H hamburger sauce, which was introduced in test markets in 1977, rose to $2,785,600 in 1978 from $142,000 in 1977. The initial success of Big H sauce in these test markets led to its early introduction in the eastern and western regions of the U.S., where the company said it was well received. It is now being introduced into the rest of the U.S.

▪ CPC's new Karo Honey Hive topping was concept tested in Spokane, Wash., with ad backing of $19,100, all of it in magazines and newspaper supplements. The agency is McCann-Erickson, New York.

Mazola corn oil, the leader in its field, was supported by $8,135,300 in measured media spending, the bulk of it in network and spot tv.

Dutch Pantry Inc., which operates 31 company-owned units and franchises 46 others, reported a loss in 1978, and the company said steps were being taken to restructure the business of this affiliate and to refurbish facilities.

Campbell Soup Co.

	1978	1977
Sales	$1,983,659,000	$1,769,132,000
Earnings ...	121,410,000	107,103,000
Advertising*	56,400,000	60,000,000

*Estimated by AA

Campbell Soup Co., Camden, N.J., the 70th largest national advertiser, decreased its domestic advertising expenditures by an estimated 6% to $56,400,000 in fiscal 1978.

Consolidated marketing expenditures worldwide totaled $163,000,000, up 7% from 1977. Marketing expenditures represented 8% of net sales for the third year in a row.

Campbell's consolidated net sales and earnings set records in the fiscal year ending July 30, 1978, with sales of $1,983,659,000 and earnings at $121,410,000. Sales increased 7% and net earnings grew 12% last year.

The canned foods division accounted for about $1 billion in sales in fiscal 1978. Campbell's 59 varieties of red-and-white soups have a lock on more than 80% of the $1 billion-plus wet-soup market and are the company's most heavily promoted products. Advertising for the line, down from 1977, totaled $11,908,000, with over half going to network tv. Magazine spending was $2,835,100.

During 1978, 16 of Campbell's standard soups—all with less than 90 calories per 10 oz. serving—were repositioned under the name Light Soups, appealing to calorie-conscious consumers. Actress Lee Meriwether was signed to a network tv and magazine campaign for "The light ones," which broke in April.

New varieties of condensed soup introduced last year were noodles and beef broth, noodles and chicken broth and an improved cream of mushroom.

Chunky Soups also received fewer measured ad dollars in 1978—$4,622,500 against $4,963,200 in 1977. Two single serving size Chunky Soups—Chunky ham 'n butter bean and beef with noodles, stroganoff style—were introduced in test in 1978. Both rolled national in July with a network tv campaign that runs through September.

Campbell moved into the instant soup market with three varieties of a moist instant in test in Indiana and New York. The product, called Campbell Cup, is packaged in aluminum containers with peel-back tops and requires six ounces of water.

Three new varieties of Swanson's chunk chicken in a tuna-size can were introduced in 1978, with white and dark mixed going national. Chunk thigh chicken and chunk style mixin' chicken rolled national in July.

Source: Leading National Advertisers. Farm papers not included.

- The Swanson division, which accounts for $300,000,000 in sales of frozen foods, rolled national with take-out style frozen chicken in a 28-oz. box in 1978.

Chunky meat pies, a chunky, square, 10-oz. version of the traditional 8-oz. pie, went into test in Kansas and Wisconsin markets. Seven varieties of Swanson main courses, new individual entrees in microwave-safe paper trays, went into test in California.

Hungry Man frozen pizza will roll national within a year with a print and tv campaign. The five varieties—cheese, sausage, hamburger, combination and Sicilian—are now in 12% of the U.S. with measured ad dollars at $289,200.

Total measured media spending for the Swanson division was $4,024,700, down slightly from 1977. The most heavily promoted products were frozen dinners and entrees, budgeted at $1,807,700.

- Pepperidge Farm generated about $250,000,000 in sales. Measured spending totaled $4,706,800, a significant increase over the $1,960,400 spent in fiscal 1977.

Many of those ad dollars went to new products. Snack Sticks and Snack Bars are new biscuit division products slowly rolling national. Snack Sticks, similar to bread sticks, come in four varieties—plain, cheese, sesame seed and pumpernickel. Distribution of individually-wrapped Snack Bars, a cross between a brownie and granola bar, will depend on production capacity because the bars contain no artificial preservatives.

Butter Thins, butterfly-shaped crackers, are a variation on Goldfish Thins, introduced in 1978.

Expansion of Pepperidge Farm's 80-product fresh sweet goods line will also depend on production capacity. The line of fresh danish, coffee cakes, loaf cakes, etc., is now in Midwest and Atlanta markets.

Frozen puff pastry sheets and pie shells, introduced in limited distribution in 1978 with $176,400 in measured media, will roll national in November. Two varieties of 24-oz. frozen cakes, called Cakes Supreme, were added to Pepperidge Farm's traditional line of 16-oz. cakes. Network tv advertising for the company's first large fancy cakes will run for the second time in August.

- V-8 vegetable juice and V-8 spicy hot appetizer and mixer were backed by $3,490,600 in measured media, most in network tv.

Recipe pet foods were pulled back, becoming a regional brand in the East where they have done well. Recipe received $142,100 in ad dollars—a considerable drop from $918,000 in 1977 and over $3,000,000 the year before.

Spending for Franco-American canned products totaled $2,604,900, with $1,290,500 going to network and spot tv advertising for Spaghettios.

In 1978, Campbell acquired Vlasic Foods, Bloomfield, Mich., as a wholly owned subsidiary. Vlasic, marketing over 100 varieties of pickles, relishes, peppers and sauerkraut, has more than 25% of the pickle market. Vlasic sales were over $100,000,000 in fiscal 1978, spurred by $2,792,600 spent in measured media—most in network tv.

Although Vlasic is working to expand within its current market, it tests products in local markets in response to competitors' new product marketing. A half pickle tested in Los Angeles in 1978 will roll national this year. Vlasic also increased its use of consumer promotions—specifically couponing—after being acquired by Campbell.

- Campbell acquired three regional retail food operations early this year. Herider Farms, a Texas based company with $33,000,000 in sales, markets Golden Nugget brand fresh chickens and eggs to retailers and food processors. Domsea Farms, Bremerton, Wash., produces plate-sized salmon and trout for retail and institutional sale under the Domsea brand.

A new mushroom division markets fresh mushrooms on the East Coast under the Campbell's Farm Fresh Mushrooms label.

On May 10, Campbell and H.J. Heinz Co. announced the out-of-court settlement of a controversy that began in 1976 when Heinz filed a suit charging Campbell with antitrust violations in the canned soup market. Campbell filed a counter-suit in 1977, charging Heinz with unfair food service selling practices and claiming Heinz will not sell ketchup unless other institutional food products are purchased.

Terms of the settlement were not disclosed.

Carnation Co.

	1978	1977
Sales	$2,576,047,000	$2,334,660,000
Earnings	123,700,053	109,100,000
Advertising*	28,500,000	31,853,100

*Estimated by AA

Carnation Co., the 99th largest national advertiser, decreased its ad spending in 1978 by 10.5% to an estimated $28,500,000.

Sales totaled $2.58 billion in 1978, up 10% over 1977's $2.33 billion; earnings were up 13% to $123,700,053.

The company, which markets evaporated milk, pet foods, tomato products, animal feeds and diet foods, decreased its network tv budget slightly in 1978, to $17,695,700 from $18,386,600 in 1977, and almost cut its 1977 spot tv budget in half, to about $3,000,000 from more than $7,000,000.

How your customers can make dozens of delicious soups, lots of savory sauces, and loads of delightful money.

Campbell Soup Co. promoted its soup varieties to the trade in color spread ads. The company's canned soups hold 80% of the market.

Carnation is No. 2 in the pet food market, behind Ralston Purina, with a 1978 market share estimated at 11.1% by industry analyst John C. Maxwell. This is a drop from Carnation's 11.6% share in 1977.

Facing stiff competition from regional and national introductions of new brands of dry cat food by competitors, sales of Carnation's Friskies dry cat food slowed in 1978. Market share slipped to an estimated 21.5%, with dollar sales also down.

To strengthen its position in the increasingly competitive dry cat food market, Carnation rolled national in the spring of 1978 with Chef's Blend dry cat food, a combination of beef, cheese, tuna and liver flavors. Tv and magazine ad support stressed the "four tasty flavors" in the new brand.

Carnation had more success in the canned cat food segment, a product category that accounts for more than half of the over-all cat food market. Friskie's Buffet line increased its share from 21% to 22%, according to the Maxwell Report, and Bright Eyes grew from an estimated 2.8% to 3.1%.

Carnation added a salmon and salmon and liver combination to the Friskie's Buffet line in 1978.

▪ On the dog food side, Carnation is making another try at the semi-moist dog food market in 1979 with the test market launch of Ground Round. Positioned as a less expensive burger-type food, the product has been introduced in Columbus, O., Buffalo and Miami, supported by tv and newspaper.

Among its established products, Carnation's Friskies canned dog food holds about 8% of that market segment, followed by Mighty Dog with 7.5%. Friskies Dinner Cubes have about 5% of the dog food segment.

Over-all, Carnation spends almost half of its $26,473,600 measured ad budget on its pet food products.

Furthering research into new product development, Carnation is developing a prescription birth control dog food, tentatively called Extra Care. The company had originally hoped for over-the-counter sales by 1980, but current indications are that it will take much longer than expected.

Profits of the company's tomato products slipped in 1978, adversely affected by oversupply and competitive conditions. Carnation expects that the closing of its San Jose, Cal., Contadina Plant will favorably cut production costs.

Carnation began test marketing Contadina Half & Half, a blend of tomato paste and tomato sauce, in Memphis and midwestern markets.

▪ Carnation entered the consumer frozen food arena in 1977, with french fries, hash browns and taters in selected markets backed by spot tv, and newspaper ads.

Carnation continues in the retail frozen food business, but in 1978 faced some obstacles. Early in the year, a U.S. federal court issued a permanent injunction against the company's use of the name Tater Pops for a frozen potato product in test market. Ore-Ida Foods sought the injunction, claiming the name infringed on its Tater Tots trademark. The court also ruled that Carnation's packaging for the line had to be changed.

Carnation's food service division continues to grow. The Chef-Mate canned entrees, soups, salads and sauces show particularly strong sales.

Early in 1978, Chef-Mate potato salad was introduced nationally to the food service trade. The product, in test market in 1978, features a patented "cool-cooked" process which produces vegetable and meat salads that are shelf stable, but have fresh eating properties.

Carnation hot cocoa sales again reached record levels. The company credits the introduction of mini-marshmallow hot cocoa mix and expanded bulk jar distribution for the sales increase. Carnation's products in the add-to-water cocoa category led the market in 1978. Market share gains were registered with Instant Breakfast products.

Slender diet meal bars were introduced nationally in early 1978, a successful addition to the Slender diet food line. The Slender brand is the market leader in the diet meal category.

Powder creamer sales increased in 1978, from a several year slide attributed to reduced coffee consumption. Carnation anticipates rising sales figures for the brand in 1979.

Yogurt products manufactured by Carnation's Favorite Foods, Fullerton, Cal., operation (marketed under the Yonson label) showed excellent growth in the western yogurt market, now dominated by Beatrice Foods' Johnston's and, in 1979, Dannon yogurt brands, and the market leader, Knudsen Corp.

Earnings	69,714,000	60,090,000
Advertising	84,747,600	67,260,000

Chesebrough-Pond's, Greenwich, Conn., the 45th largest national advertiser, increased its domestic advertising 26% to $84,747,600 in 1978.

The company marked its 23rd consecutive year of operating records in both sales and earnings in 1978, with a 20% increase in sales and 16% increase in net income.

All seven operating divisions contributed to the sales record, with the international, G.H. Bass and package foods divisions

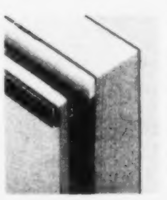
GIVE YOUR REPORTS OUR PROFESSIONAL LOOK

—with Velo-Bind Document Packaging, the premier desktop binding system

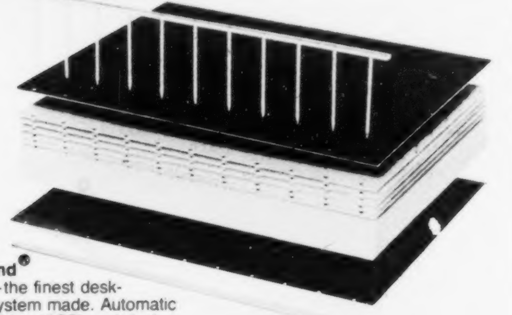
Velo-Bind offers a cost effective, attractive, productivity-improving answer to a major market requirement. Now you can give all your documents—reports, briefs, presentations—the crisp, clean look of a quality binding to match the value of their contents.



Secure durable bindings. Covers and pages are bound with colorful Velo-Bind plastic strips. A patented hot knife process rivets the strips together under pressure to produce a strong, cleanly-styled binding that's easy to file, shelve or mail.

Wide choice of covers. Attractive, durable soft covers in paper, composition or clear plastic materials with full range of colors; or library-quality hard covers for even more distinguished presentations.

Quick, easy, economical. Bind soft cover documents in 20-60 seconds; hard cover books in just a half minute more. Desktop equipment is compact, clean, easy to operate. A standard size plastic strip binds all documents up to one inch thickness, eliminates inventory problems. Two and three inch strips available for thicker documents.



New Velo-Bind® Model 323—the finest desktop binding system made. Automatic Contact Punching (ACP) and dual speed binding provide ultimate speed and ease of operation. Handles pages up to 14⅞" wide and 3" in thickness. Portable—weighs only 60 pounds.

For more information on how you can improve productivity through Velo-Bind's Document Packaging System—complete and mail:

showing particularly outstanding growth.

All divisions registered earnings increases except the Health-tex division, which continued to experience production scheduling and inventory related problems.

In domestic operations health and beauty products accounted for $198,540,000 or 20% of corporate sales; package foods, $182,623,000 or 19%; Prince Matchabelli, $96,159,000 or 10%; hospital products, $28,366,000 or 3%; Health-tex children's apparel $158,805,000, or 16%, and Bass, $28,366,000 or 3%.

▪ The company's oldest and largest domestic division, health and beauty products, introduced two new products during 1978.

Rave soft perm, promoted as the first odorless home permanent product, was launched in the second quarter and in six months captured a 27% share of market.

Sales for home perms had been flat in recent years, but jumped 68% in 1978. Chesebrough-Ponds believes this is largely due to the introduction of Rave.

Pond's cream & cocoa butter lotion, a skin softening product that complements the market-leading Vaseline Intensive Care lotion, was also introduced by the health and beauty products division.

The division spent $18,783,000 on advertising in 1978, an increase of 9% over 1977. Of this total, $5,616,800 was spent on Vaseline Intensive Care products, $1,810,200 on Q-tip swabs, $586,500 on Vaseline petroleum jelly, $6,722,500 on Pond's cold creams and lotions, $1,636,100 on Cutex nail products and $2,198,600 on Rave home perm.

For 1979, the division's objectives are twofold. It plans to extend C-P's foothold in the hair care market by introducing Rave hair spray, investing $6,000,000 in a multimedia effort including tv, magazines, newspapers, supplements and 30,000,000 25¢ coupons. C-P views the hair spray category as a growth opportunity for an innovative new product.

Advertising for Rave hair spray by Ogilvy & Mather notes, "It gives a soft hold; you can even comb through it."

▪ With its established products such as Vaseline petroleum jelly, Pond's cream, Q-tips cotton swabs and Cutex products, the company plans to maintain or improve its position of market leadership.

The packaged foods division had an outstanding year in 1978, posting a 25.2% sales increase and a 26.2% rise in operating income. In July, the division introduced Ragú Classic Combinations sauces, a new line of spaghetti sauces that quickly became the second best seller in the category.

Ragú traditional sauces remain No. 1, and Ragú Extra Thick & Zesty holds the No. 3 position. These three brands combine to give the company a 66% share of the spaghetti sauce market.

New products in various stages of development and testing include Ragú pizza quick sauces, Ragú table sauce and Adoph's chili cooking sauce. At least one of them should go into national distribution during 1979.

During 1979, the packaged foods division spent $12,988,000 on advertising, an increase of 47% over the previous year.

▪ The acquisition of G.H. Bass & Co., a Wilton, Me., based manufacturer of top-quality casual footwear, was completed on July 31, 1978. This purchase is consistent with the company's policy of broadening its consumer product lines via a selective acquisitions program.

Despite increasing competition from imports, Bass shows a solid gain in both sales and earnings in recent years. Sales for 1978 were nearly $60,000,000, a 55% increase from the previous year.

The excellent sales growth of Bass in 1978 was credited principally to the expansion of the division's line of warm-weather footwear, including "Sunjuns" open sandals for men and women.

▪ The company's other apparel division, Health-tex, had lower earnings but record sales in 1978, posting a 10.5% sales gain over 1977. The division makes brand-name children's wear for sale in department and specialty stores, and last year expanded its product line to include girls' sizes 7-14.

Rapid growth of the Health-tex business has resulted in ongoing problems with the coordination of production and distribution operation. While efforts to improve delivery and to maintain the high-quality of Health-tex products resulted in record sales, the cost of these efforts, and other inefficiencies, resulted in a reduction in the division's profit margin.

A new line of Kidproof jeans for boys is being launched in 1979. They will be available at retail in the fall of 1979. The Health-tex Division spent $1,383,000 in advertising during 1978.

▪ Prince Matchabelli, the division known originally for its leading fragrances for women, showed strong growth in nonfragrance products in 1978.

Aziza makeup products paced the division's sales gains, aided by the introduction of new eye shadow and lipstick lines. The introductory advertising blitz for blush and lip gloss products amounted to $1,000,000 in three months.

Total 1978 media spending for the Aziza products was over $5,000,000. In 1979, they moved heavily into spot and network tv, while maintaining an 11-time schedule in four core magazines—*Cosmopolitan*, *Glamour*, *Mademoiselle* and *Seventeen*.

▪ All three fragrances produced by Prince Matchabelli—Wind Song, Aviance and Cachet—continue to rank among the leaders in the industry.

In the fall, C-P will undertake a four-month $4,500,000 ad and promotion campaign for the introduction of Chimere, a new fragrance aimed at the 25 to 35-year-old, professional woman. The Chimere customer is being profiled as efficient, yet sensitive; competent, yet warm; in control, yet giving.

The theme line is "To the world it's discreet and elegant, but up close it's something else." Chimere is targeted at the upper end of mass distribution with a $4.75 to $15 price range. Advertising will be handled by Scali, McCabe, Sloves.

▪ Chimere's ad budget is in addition to the $7,720,200 invested in Aviance, Cachet and Wind Song in 1978 as reported by Leading National Advertisers. In addition, budgets for these established brands have been increased 7% to 8% in 1979.

AZIZA DEMONSTRATES
HOW TO HAVE A MORE MEMORABLE MOUTH.

The Aziza line of Chesebrough-Pond's Prince Matchabelli division moved heavily into tv while maintaining an 11-time schedule in four women's magazines.

For 1978, the Prince Matchabelli division spent $13,005,000 on advertising, a 10% increase over 1977.

The company's smallest division, hospital products, focused its marketing efforts in three primary areas—wound dressings, respiratory therapy aids and urological devices—with a resulting sales gain of 8% and an operating income increase of more than 16%. There is no measured advertising for this division.

The international division experienced one of the most outstanding years in its history in 1978. Net income rose 44.7% while sales, at $276,542,000 grew by 22.1%. C-P notes that the net effect of foreign currency fluctuations had a relatively minor impact on the increase in income before tax.

An aggressive program of introducing new products—most of them already successful in the U.S., but a growing number developed specifically for international markets—was key to the division's success. The international division also stepped up its efforts in other product areas, notably Prince Matchabelli, Ragú and Health-tex. Prince Matchabelli products now account for about 13% of international sales.

For the first quarter ended March 31, 1979, Chesebrough-Pond's announced record sales and earnings. Net income for the quarter increased 20% to $19,665,000 compared with $16,394,000 for 1978. Quarterly sales totaled $272,204,000, up 27% from $214,268,000. Results reflect increased advertising and marketing expenditures for new products.

Earnings	(204,600,000)	163,000,000
Advertising*	188,900,000	127,100,000

• Restated
(Loss)
***Estimated by AA**

Chrysler Corp., Highland Park, Mich., the 10th largest national advertiser, raised its advertising expenditures in 1978 by 48% to $188,900,000 from $127,100,000 in 1977. The company had a loss on slightly higher dollar sales while unit sales slumped.

Late in the year, Lee Iacocca answered an SOS to become president of the embattled No. 3 automaker, and an upheaval in marketing and advertising agencies followed.

But Mr. Iacocca, fired earlier in the year as Ford Motor Co. president, couldn't stop the bleeding that resulted in a loss of $204,600,000 compared with 1977's profit of $163,000,000.

LNA

MARKETING PROFILES

Sales rose to $13.6 billion from $13.1 billion the year before. They were restated to reflect Chrysler's peddling of European and South American operations. The company called it "deconsolidation."

- Passenger car sales dropped to 1,249,550 units in the U.S. from 1,341,014 and the company's share of the market, including captive imports, dropped to 11.1% from 12%. Chrysler's share of the hot truck market also fell—to 11.9% from 12.8%—but unit sales still set a record of 489,134, up from the previous high of 469,161 in 1977.

Things got worse early in 1979 with a first quarter loss of $53,800,000, although that was less than the first quarter loss the year before. Sales slumped to $3 billion from $3.3 billion and unit sales continued to slide—501,085 from 513,386. The market share also eroded further 10.9% for cars compared with 11.3% the year before.

Mr. Iacocca told the annual meeting bluntly, "No one can promise any easy answers or any quick turnaround in our company's fortunes. The problems are too complicated for that, the lead times too long and the competition too intense. The task is to bring every step of the process in at just the right time from design to purchasing to manufacturing to advertising and marketing. That's what we're going to do at Chrysler. We are restoring a sense of discipline to the organization."

He outlined a program to fight the ills of high factory inventories, slow sales, quality and service problems and lack of new products.

- Chrysler had problems in 1978 before the gasoline crunch, but when it came, it spotlighted the soft spots—what Mr. Iacocca called market turmoil.

"The full-size car and intermediate car markets are under great pressure while the demand for small, fuel-efficient cars is overwhelming," he said. "That kind of wild fluctuation upsets everyone's planning. We are in a mass-production business, a long lead time business and we can't turn our plants on a dime to stay with the market. Where we have the products, we are doing very well. Omni and Horizon [subcompacts] are sold out for all practical purposes."

But production was constrained by availability of the Volkswagen four-cylinder engines Chrysler buys. Sales of six-cylinder compacts like Volare and Aspen were strong as were captive imports sold by Chrysler dealers.

"For the short term, the losers in all this are the eight-cylinder car models and trucks, especially vans and recreational vehicles—a market, I might add, in which Chrysler has led the industry for many years," Mr. Iacocca said.

Chrysler's new products for model year 1979 were revamped full-size cars. But to start, production problems negated introduction advertising. When the cars finally started to arrive in showrooms, the gas crunch hit.

- Those events did not escape the eye of stockholder critics at the annual meeting. One said, "Inadequacy of past planning is reflected in our unsatisfactory product mix to meet the demands of the market. This found Chrysler entering markets which were ripe for decline and insufficiently represented in areas that justified an increasing commitment of product engineering effort, marketing attention and plant investment."

When Mr. Iacocca came on board in November, 1978, dispirited dealers hailed the move and his ad philosophy became apparent. The cars became the stars, not celebrity presenters or cute slice-of-life vignettes.

He was displeased with the way some cars had been photographed. For the two-door Omni and Horizons that were introduced—late as usual—he even picked the car colors for the ads.

- Later he told ADVERTISING AGE of his beliefs in simple, fundamental advertising that rested on the bedrock of local dealer associations. "We're going to organize the finest local associations in the world because they work," he said. "They can really tailor and localize advertising to generate floor traffic with no ands, ifs or buts and we're going to get back to that.

"The factory can't do it alone. It's just regionalized advertising that I grew up in and we've got to get it instituted in some detail at Chrysler."

BLIZZARD WIZARD.
RELAX.
PLYMOUTH HORIZON CAN HANDLE IT.

The Plymouth Horizon—and its twin, the Dodge Omni—came on fast to rank second in Chrysler's car sales.

- The answer came in March when Mr. Iacocca fired Young & Rubicam as the Chrysler-Plymouth agency and BBDO, Troy, Mich., as the Dodge agency and hired Kenyon & Eckhardt, the Lincoln-Mercury agency.

It was the biggest account switch in history—$120,000,000. Ross Roy, Chrysler's merchandising agency, lost about $6,000,000 in Chrysler leasing and marine business; it retained the $50,000,000 merchandising account.

K&E would enjoy a "unique relationship" with Chrysler, Mr. Iacocca said. It would be in on product planning and marketing committees. It also got a deal that in effect sets a floor under agency earnings.

Mr. Iacocca had worked with K&E while at Ford, and a host of former and current Ford marketers were to follow him to Chrysler. Before the big agency switch, John Morrissey left his post as Ford division general marketing manager to join K&E, eventually becoming chairman.

Mr. Iacocca hired Gar Laux for a series of posts that saw him rise to group vp-marketing. Jerry Pyle left a Ford division sales post to become executive marketing director and Peter Dow left as Chrysler marketing director to join Campbell-Ewald as an exec vp.

Y&R and BBDO pitched the Lincoln-Mercury account and Y&R got it. BBDO said it would keep a small office open in Detroit and scout around for another car account. Chrysler meanwhile said it would return to the two-division marketing set-up of C-P and Dodge. They had been merged under U.S. Sales & Service.

- All was outwardly serene when Chrysler revved up for the 1978 model year wars in the fall of 1977. Chrysler went with the emphasis on compact and intermediate cars in an admitted holding action until Omni and Horizon could come on stream a few months later.

The Dodge Monaco and Plymouth Fury were the biggest cars (except for the moribund New Yorker) and they were yesteryear's intermediates. Dodge Aspen was "the greatest sales success in Dodge History" after a few years with Rex Harrison as spokesman. LeBaron, an intermediate was a "new symbol of leadership."

Diplomat was still "carnapping" and Magnum, a big specialty car, got into that act. C-P said it was its most extensive tv and magazine introduction in history. A month later, Chrysler revived limited rebates on the veteran Furys and Monacos and Chrysler took another blow when Avis announced it would switch from Chrysler products to General Motors cars.

- The big guns were saved for Omni-Horizon. Chrysler was spending record amounts in all major media. Omni was the prize on national sweepstakes promotions, billed as the multi-purpose car. Horizon was the over-the-road car and both talked gas mileage.

Chrysler was out front of other U.S. automakers with front-wheel-drive and the roomy subcompacts took off. Chrysler piggybacked special option sales on other lines soon after introduction.

It was the last gasp for its cooperative ad program with dealers. It switched the $19,000,000 it contributed to the dealer associations back into factory coffers for use in model 1979.

Omni-Horizon sales momentum was snagged by a report from Consumer Reports magazine that the cars handled unsafely. Despite clean bills of health from federal safety officials, sales slowed and Chrysler was forced to keep the heat on the compacts once more. LeBaron would "Put a little life in your style" and Diplomat switched from carnapping to a "light-hearted" approach.

- By 1979 model introduction time, optimistic Chrysler marketers were eyeing 15% of the market with their new full-size cars, Dodge St. Regis, Chrysler New Yorker and Newport, along with the new two-door O-H cars and captive imports. The first thing to go wrong was limited availability of the heavily advertised big cars.

Ironically, Chrysler, which had set out to capitalize on what it called confusion in the marketplace, started out by confusing would-be buyers of the big cars. But William W. Bivens, then vp auto sales, said that with old nameplates on new sizes and new names on new sizes people would rethink their buying needs.

"The market is shifting," he said. "The usual reference points, including price differences between segments, are disappearing. Change in the marketplace is good for our corporation. Maintaining the status quo benefits the companies with dominant market shares. Confusion in the marketplace benefits those with a lower market share."

Mr. Dow, then director of marketing, said, "The big cars are not only an important opportunity to gain additional consideration but to gain a foothold in that segment of the market that could set a pattern for Chrysler in years to come."

Mr. Laux, everybody's successor, has indicated the big cars need a relaunch in model 1980.

- Of the '79 big cars, Mr. Laux said, "I don't know where the cars were originally planned [to fit into the market]. Certainly it was the top-of-the-line, but where it fits against the competition I don't know. Certainly I think there is a place for the car line in our lineup, and we're starting to see that regardless of who the car is competing against, it is moving in the marketplace. Maybe the public is determining where it should be rather than the plans."

In any case, the new 1979 models for Chrysler-Plymouth got some unusual marketing twists. The Chrysler nameplate was to slug it out with Chevrolet and Ford, and Plymouth's small cars were corralled in a single campaign for the first time in a number of years.

Plymouth didn't have one of the big cars—it will for model 1980. Volare was the Plymouth standard bearer. The captive import Plymouth Champ, Horizon and upscale import Saporro were included in a special Plymouth campaign.

Actor Hal Linden spoke for the Newport and Ricardo Montalban for Cordoba. The New Yorker was "the most fabulous New Yorker of them all." The car was even given a party in New York to mark its ad tie-in with Saks Fifth Avenue.

- Dodge was using the brass band approach for the St. Regis, its big car. Marching bands, dixieland bands and a symphony showed up on tv. Diplomat was touted as a stylish alternative and Aspen was "big for its size."

Colt got the mpg treatment and Omni's slice of life campaign continued. "Dodge is into truckin' like America's into jeans," was lifted from the pickup line to cover all trucks. The smaller Dodges were linked with "That's my Dodge."

It was the old reliable compact twins, Volare and Aspen, leading the sales parade again for Chrysler. V-A racked up sales of 367,433 in 1978 to top all other Chrysler offerings. The sales malaise was dramatic in Volare-Aspen, however. Sales plummeted nearly 200,000 from the 550,527 of 1977.

MARKETING PROFILES

pacts came on fast to rank second with sales of 208,490 in their first year. LeBaron and Diplomat, the upscale V-A offering, actually racked up a sales gain—186,214 to 110,105. Captive imports slipped to 103,292 from 121,292 and vans dipped to 58,271 from 59,147.

■ By January, Mr. Iacocca's influence was being felt. First BBDO and Y&R competed to handle a new combined effort for all its captive imports. BBDO won and the name Mitsubishi came out of the closet. Mitsubishi is a Japanese automaker. Chrysler owns 15% of the firm.

Tag lines read, "Built by Mitsubishi. Sold exclusively by Dodge and Chrysler-Plymouth dealers." The featured cars were Champs, Colt, Arrow and D-50 trucks.

"Mitsubishi was dissatisfied with sales and we're dissatisfied. We had to do something about telling the total story," said Frank Hoag, Chrysler ad director. The campaign was technically oriented and eschewed slice of life.

At almost the same time, Chrysler doubled the budgets for the first quarter of 1979 for its big cars.

Chrysler also named former astronaut Neil Armstrong as corporate spokesman to talk about the engineering features Mr. Iacocca felt had been overlooked. He was later teamed with sports announcer Joe Garagiola in a special spring options sale.

The Armstrong campaign was a heavy one in tv and newspaper. The doubled big car budget was hitting at price comparisons between Newport and Chevrolet Caprice. Then came the gas pinch and sales of everyone's big cars joined those of Chrysler in the doldrums.

Mr. Iacocca got into the act directly. He signed letters and brochures in a direct mail campaign aimed at his former employer, Ford. "Find out for yourself. I did," the headline read. The letter compared Chrysler products with Ford products.

For the Mustang-Omni letter, he wrote, "as far as I know [and he should] Ford doesn't have a small sporty car with front-wheel-drive off the drawing board yet."

A new extended optional warranty plan was tied directly to new car sales. The five-year, 50,000 mile plan was offered free if buyers picked models with special option packages. It was K&E's first campaign for Chrysler.

By 1979 annual meeting time, Mr. Iacocca admitted the campaign had fallen short of expectations because of "timing that was not super"—the energy flap. A spurt in import sales he called a "disaster" together with Chrysler's slumping sales put another pinch on the budget.

So 1980 ad outlay "probably will be down but I wouldn't want to speculate how much right now," he said. Chrysler will still be in there swinging, he said. "Starting this fall we will have some of the most exciting new products . . . and we are going to back them with very effective marketing programs," he said.

■ Chrysler was also cutting back in its overseas operations. It sold its European operations to PSA Peugeot-Citroen for $300,000,000 and 15% of Peugeot; sold its Brazil operations to Volkswagenwerk, and peddled its Venezuela company to General Motors.

Chrysler denied published reports that VW would acquire the rest of Chrysler in the U.S., but speculation continued there would be some major deal with VW in North America where Chrysler has underused plants and VW needs additional production.

Source: Figures are from Broadcast Advertisers Reports, and supplied to Leading National Advertisers.

Canadian sales of cars slipped to 178,609 from 200,284 and to 18% of the market from 20.2%. Chrysler Financial Corp. earned a record $48,500,000 up from $43,000,000. Service and Parts division reported sales rose 16.7% from the record levels of 1977.

Other personnel changes after Mr. Iacocca joined Chrysler: Mr. Bivens moved from vp-auto sales to vp-general manager of the fleet division; E. Tom Pappert became sales manager, eastern sales and marketing from general sales manager; Al D. Imber moved from manager of truck sales to sales manager, western sales and marketing; Jeff Elpern got the new post of manager, import car advertising, and Richard C. Hotchkiss became manager of product merchandising from Dodge truck ad manager.

Clorox Co., Oakland, Cal., the 92nd largest national advertiser, boosted its ad investment about 25% in 1978 to an estimated $62,100,000, up from $49,774,300 in 1977.

For the fiscal year ending June 30, 1978, the company said it put $60,477,000 into advertising.

Sales for fiscal 1978 were $1.05 billion, up almost 20% over 1977's $872,800,000. Earnings rose 7%, from $32,300,000 in 1977 to $34,645,000.

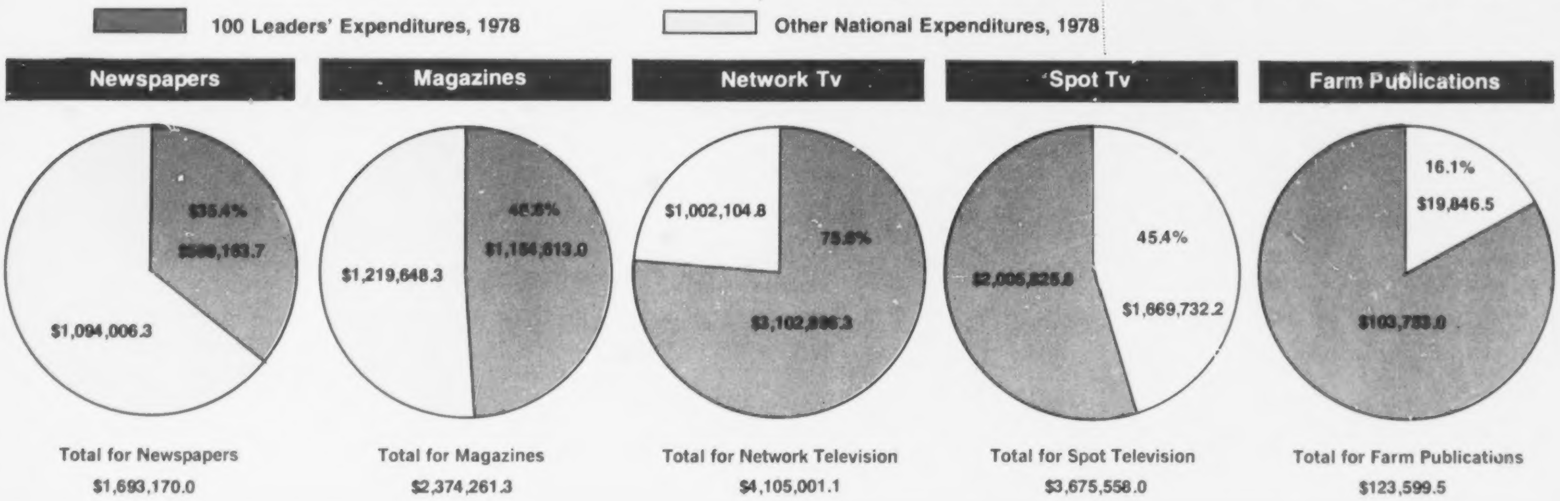
LNA

100 leading national advertisers account for



MARKETING PROFILES

Clorox liquid bleach got the biggest chunk of the measured ad budget with $10,621,900, followed by Clorox 2 bleach powder at $6,247,300.

- Dominant in the liquid bleach market in the U.S., Clorox made strides overseas in 1978, acquiring Spain's leading manufacturer of liquid bleach, S.A. Casamitjana Mensa of Barcelona whose brands El Conejo and Neutrex lead the market in that country.

However, it was Saudi Arabia that was the fastest growing overseas market for Clorox liquid bleach, where plans are underway for construction of a second bleach manufacturing plant.

Clorox 2 bleach powder faced increased competition and an aggressive barrage of comparative advertising by the Gold Seal Corp., Bismarck, N.D., distributor of Snowy bleach. Snowy ads, "A little Snowy bleaches like a lot of Clorox 2" on network tv and women's service magazines have been repeatedly challenged by Clorox with the National Assn. of Broadcasters, the tv networks, magazine publishers and other trade groups.

But the Snowy campaign, now in its third year, has resulted in an erosion of Clorox' share of the market, now estimated at 67%. Snowy's share is estimated at 25%.

- Kingsford Charcoal, another major Clorox brand, set sales records in 1978 though it received only $2,563,000 of the measured ad budget. Magazine and network tv ads continued to emphasize "the Kingsford edge," the fast lighting characteristic of the charcoal, which had long been the only nationally sold brand.

But Kingsford's edge on the $213,000,000 charcoal market was challenged for the first time in the spring of 1979 by Husky Industries, Atlanta, Ga., with Royal Oak, the second charcoal to be sold nationally.

Network tv ads for Royal Oak featured music by the Royal Philharmonic orchestra of London and *TV Guide* ads stressed the "outdoor flavor" of the hickory smoked flavor enhancers in the briquets.

Barbeque industry sources predicted a tough battle and suggested the competition would spur sales of other barbeque related products.

Clorox also began testing Match Light, lighter fluid smoked briquets, in Dallas, Denver, San Diego and Omaha in the summer of 1978.

- Clorox prevailed against a challenge to its Hidden Valley Ranch Style salad dressing mixes by General Foods which introduced a similarly named product.

In an out of court settlement, General Foods agreed not to use the term "ranch style" in its dressing mixes; the brand name was changed to "Farm Style."

Clorox added a second mix to the Hidden Valley line, Milk Recipe formula, which was rolled out nationally during 1978. An estimated $3,175,400 was spent on Hidden Valley ads.

With profits down by five cents a share during the first quarter of fiscal 1979, Clorox sold one of its least profitable subsidiaries, Martin-Brower Co., a food and restaurant supply distribution company.

Martin-Brower, the largest supplier of McDonald's, was sold to Dalgety Inc., U.S. subsidiary of London's Dalgety Ltd.

- According to Robert B. Shetterly, chairman and chief executive officer, Clorox strengths "lie primarily in the developing, manufacturing and marketing of products" rather than distribution services.

or mayonnaise and buttermilk.
Same delicious taste any way you mix it.

Clorox' Hidden Valley Ranch Style dressing mix prevailed on its legal battle to keep exclusive use of the "ranch style" term.

In June of 1979, Clorox sold its County Kitchen Foods mushroom division in Great Britain to H.J. Heinz Ltd. The company still retains ownership of Moore's Foods, Fort Atkinson, Wis., which sells seafood and other breaded specialties both in the consumer and food service markets.

Of the two newest household products introduced by the company, Sunburst window and glass cleaner and Twice as Fresh solid air freshener, the latter was expanded into national distribution in the fall of 1978.

Coca-Cola Co.

	1978	1977
Sales	$4,337,900,000	$3,619,800,000
Earnings	375,700,000	331,200,000
Advertising*	138,805,300	88,981,900

*Estimated by AA

The Coca-Cola Co., Atlanta, the 22nd largest national advertiser, increased its ad spending to an estimated $138,805,300 in 1978, a 56% increase over 1977 spending that surpassed the company's previous high of $91,334,540 in 1976.

Total net sales rose 19.8% to $4.34 billion in 1978, while company earnings rose 13.1% to $374,700,000. Overseas operations contributed 46% of sales income, compared to 44% in 1977.

The company's flagship brand, Coca-Cola soft drink, received the bulk of media spending in television, with $17,771,300 allocated for spot tv and $14,004,300 in network tv. An additional $773,100 was secured for magazines. Over-all, the company poured $84,537,400 into network and spot tv. TAB and Fresca, the company's low-calorie soft drinks, received combined tv spending of about $14,000,000.

The Coca-Cola Co. maintained its perennial industry lead with a market share of approximately 27%, a comfortable margin above archrival PepsiCo's 17% share and Seven-Up's 6% piece of the beverage market. TAB leads the low-cal segment.

- Coke responded to the three-year-old "Pepsi challenge" campaign with a new tactic, this time with tv commercials emphasizing "Coke is lighter" because it has 5% fewer calories than Pepsi. The Pepsi challenge is a blind taste test in which consumers choose Pepsi in preference to Coke.

The two marketers are battling over more than blind taste tests. Coke is making its move to shake Pepsi's Soviet Union stronghold by readying a marketing blitz as the official drink of the 1980 Moscow Olympics. It will be Coke's first entry into the previously Pepsi-only territory.

U.S. recognition of the Peking government in December, 1978, opened up more opportunities for the company on the international front. The Atlanta-based marketer was granted sole privilege of selling cola-flavored drinks on mainland China. Installation of a bottling plant in Shanghai is expected to begin before year-end, with distribution scheduled for major cities and tourist spots.

Despite this seeming progress, the Shanghai Advertising Corp. (which handles advertising for all of China) recently (June, '79) denied Coca-Cola Co.'s request to contract for advertising in the country's two major cities. An agency exec said, "We must see whether we need the product or not before we advertise."

Until a decision is reached, no native Chinese can purchase Coca-Cola in China. Hong Kong-imported Coke is available only to foreigners and tourists.

Back on the home front, the theme song, "Give me a smile . . . and I'll pass it on" brought a new twist to the three-year-old "Coke adds life" campaign. McCann-Erickson produced a number of spots using music, summer sunshine and happy people enjoying life to convey a pleasantly energetic mood.

Recently, Coke announced plans to go the celebrity route, signing on comedians Bob Hope and Bill Cosby for commercials and magazine ads breaking July 1. The new pitch, "Have a Coke and a smile," is an extension of the "Coke adds life" campaign.

In February, 1978, the soft drink giant made a push for the black market, offering a premium of prints of eight great black Americans to commemorate black history month. Sixty-second biographies of black Americans also appeared as public service radio spots. Adair Advertising handled the minority campaign. In addition, Coca-Cola Co. sponsored the PBS telecast "Langston," a program based on the work of black poet-laureate Langston Hughes.

- Coca-Cola Co.'s soft drink line-up was joined this June by Ramblin' root beer, which began testing in Salt Lake City and Baton Rouge, La. Kenyon & Eckhardt devised the slogan "You're something more." The new root beer is part of the company's strategy to keep its bottlers from using as few other soft drink suppliers as possible.

Another newcomer, Mello Yello, appeared on the roster in June, 1978, as a me-too version of Pepsi's old but recently revived Mountain Dew. Spots by McDonald & Little, Atlanta, touted the low carbonation beverage as "the world's fastest soft drink"—referring to its smooth, easy to drink qualities. Its first test was successful enough to prompt a major rollout this March, with a year-end goal of distribution in 50% of the country.

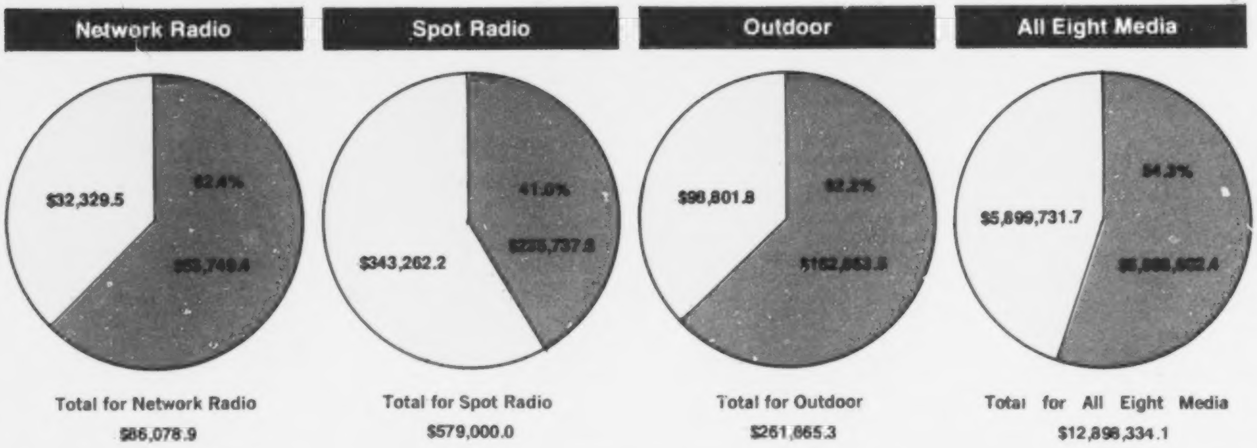
The company spent approximately $14,000,000 promoting its diet soft drinks, TAB and Fresca, mainly in spot and network tv. New packaging graphics and "New beautiful people" commercials helped push TAB to the No. 1 position as favorite low-cal drink among all soft drink consumers (not just dieters).

Marschalk Co., New York, continued ads for Mr. PiBB with the tagline, "Have a PiBB, Mr." In the tv, radio, print and outdoor campaign, young people gulp the cherry-flavored cola while engaged in vigorous outdoor sports. Spending was slightly under $2,000,000.

Sprite, Coca-Cola Co.'s lemon/-lime offering, was reintroduced to the New York market after a many-year hiatus with a new $3,000,000 campaign, again by Marschalk. Regular and sugar-free Sprite appeared on shelves in both bottles and cans. Ad theme was "Tastes like a lymon."

The foods division is the company's marketing arm for a variety of products outside the car-

giant share of expenditures in most media



Of $12.9 billion invested by national advertisers in eight media last year, more than half ($7 billion) came from the 100 leading national advertisers, as shown in these charts. Sources: Leading National Advertisers; Broadcast Advertisers Report; Radio Expenditure Reports; Institute of Outdoor Advertising; Outdoor Advertising Assn. of America; Radio Advertising Bureau; Agricultural Marketing Information Service (AGRICOM); Newspaper Advertising Bureau.

bonated beverage category, including the Minute Maid, Hi-C, Snow Crop, Taylor, Butternut and Maryland Club brand names. According to Leading National Advertisers, approximately $31,366,000 was spent in media for this division in 1978. Coca-Cola Foods and other nonsoft drink operations account for 24% of total sales worldwide.

Under the Minute Maid umbrella, lemonade crystals rocketed to new heights in the powdered drink category, achieving the No. 1 dollar share just one year after its national rollout in January, 1978. Lemonade frozen concentrate was repackaged to coordinate ads between it and the crystals.

Two other new citrus products boosted foods division sales substantially—Hi-C 6-flavor powdered drink line,and ready-to-serve peach flavor fruit drink. Ads by McDonald & Little play up the Hi-C name and the slogan, "You know how good it is."

And, despite tight supplies and higher prices, consumer demand for Minute Maid juices remained high, securing a place for the Minute Maid name as leading national brand of citrus juice products.

▪ Five Alive, a new all-natural frozen concentrate fruit beverage, appeared in test in Indianapolis, Seattle and St. Louis on the Snow Crop label. Snow Crop frozen orange juice is also marketed by Coca-Cola Co. in several major metropolitan areas.

In September, 1978, the Taylor wine unit of the company's wine group went to federal court seeking advance approval from the Bureau of Alcohol, Tobacco & Firearms for its comparative taste test spots naming several rival brands. Unable to obtain advance clearance, Taylor went ahead as planned with the controversial $1,500,000 campaign. Ads broke Oct. 1, bringing cries of outrage and foul play from several other wineries.

Only one and a half months later, the ads were voluntarily pulled following a meeting with BATF investigators and held in abeyance as the federal agency reviewed its 40-year-old alcohol ad rules. Meanwhile, new spots appeared in February, this time with no name-dropping. Kenyon & Eckhardt handled.

Coca-Cola Co.'s leadership extends to nonbeverage interests as well. Aqua-Chem is its largest subsidiary, leading in the manufacture of desalination and water purification equipment. Aqua-Chem also produces boilers, membrane filtration and effluent processing systems.

In May, 1978, the marketer acquired Presto Products, maker of plastic bags and other blown film products. It joins Belmont Springs Water Co. (domestic bottled water), Universal Water Systems (water conditioning equipment) and Winkler/Flexible Products (plastic straws and cutlery) under the Coca-Cola Co. umbrella. A new Consumer Technologies division was formed this May to unite these companies under central management.

Colgate-Palmolive Co.

	1978	1977
Sales	$4,312,954,000	$3,874,825,000
Earnings	175,572,000	165,708,000
Advertising*	122,500,000	120,000,000

*U.S. only; estimated by AA

Colgate-Palmolive Co., New York, the 29th largest national advertiser, continued to hold ad increases to a minimum—about 2%—despite the introduction and expansion of several major new products.

Worldwide sales rose 11% to $4.3 billion and earnings 6% to $175,572,000. Earnings in relation to sales continued to slip, to 4.1% down from 4.2% the previous year, but up from 3.3% in 1970.

Worldwide, Colgate invested $260,387,000 in media advertising, up from $243,546,000 in 1977.

During the year, Colgate acquired AJD Cap Corp., which was assigned to the sports and recreation division, and Princess House, marketer of lead crystal, china, flatware and accessories via home party plans.

This year, Colgate was within days of closing a deal that would have rid it of troubled Helena Rubinstein Inc., but the sale to Kao Soap Co. fell through at the last minute.

▪ The company reported that sales of its household products division rose 5% in 1978, reflecting strong performances by heavy and light duty detergents and the expansion of Dermassage dishwashing liquid and Fresh Start laundry detergent.

Other strong performances were shown by Palmolive Gold soaps and Pine Forest Ajax all-purpose cleaner. In the personal care division, Colgate attributed increased sales to a new Colgate toothpaste theme, "the clean in your mouth is Colgate," and the rollouts of Fluorigard dental rinse and Mersene denture cleanser.

Curity first aid products improved distribution and Colgate Instant Shave posted record sales as it continued to lead the market in units sold, according to Colgate.

Colgate's share of the $1.6 billion detergent market continued to slide, down to 12% last year, as the gap widened behind rivals Procter & Gamble and Lever Bros.

Fab powder is Colgate's biggest selling brand with over a 3% market share, followed by Dynamo at just under 3%, Cold Power at 2.5% and Ajax at 2%. The company put into test Carefree combination detergent and fabric softener and Fab liquid. Fresh Start, a powder in a bottle, captured over a 1% share prior to rolling national.

▪ Heaviest measured backing went to Fresh Start ($7,000,000), followed by Dynamo ($6,900,000), Fab ($5,000,000) and Cold Power ($4,300,000). Ajax, which received $3,600,000 in 1977, was backed by less than $6,000 in 1978.

In the light-duty market, Palmolive remained Colgate's strongest entry as measured backing continued at the $7,000,000 level.

Spending for Dermassage dishwashing liquid was reduced slightly to $3,100,000, while Ajax dishwashing liquid received about half that amount. Ajax cleanser, the No. 2 entry behind Comet, was reduced to $700,000 in ad backing, down from $1,800,000 the previous year.

Colgate holds about 10% of the toilet soap market. Irish Spring, its biggest entry, has about half of the total. Cashmere Bouquet, Palmolive and Dermassage account for the rest. The company also put Experience toilet soap into test late last year. Heaviest backing by Colgate went to Irish Spring with a $5,600,000 ad effort. The Palmolive line received about $2,700,000.

▪ Other entries from the household products division include Baggies, the No. 2 entry, which received just over $2,000,000 in ad spending; Axion presoak, with $1,300,000 in advertising; Handi-Wipes with $2,300,000; Ajax liquid cleaner with $3,700,000, and the Ajax line with $1,400,000.

In the personal care products division, Colgate reported that two major promotions—Savings Bonanza and Cash In—contributed to sales and earnings advances.

To maintain its No. 2 slot of over 20% of the dentifrice market, the company backed Colgate toothpaste with $15,000,000 in measured media and aimed to increase adult usage with advertising emphasizing a "fresh, clean taste." Colgate continued to support Ultra Brite, about a 5% share brand, with advertising promising "whiter-looking teeth are just one tube away." Spending totaled $4,200,000.

The division rolled out two new products last year, Mersene denture cleaner and Fluorigard anticavity rinse. The company promised to spend at a $13,000,000 annual national rate for Fluorigard and is expected to settle in at about a 5% share of the mouthwash category.

Ad spending last year amounted to $2,800,000 for Fluorigard and $1,800,000 for Mersene. The division also began testing Respond shampoo and Hair Defense "hair cuticle protector." Other major spending, $2,300,000, went into the Curad first aid line. Colgate said it is the No. 1 marketer of shave cream with a 27% share for its Rapid Shave and Instant Shave brands.

- The company's sports and recreation division continued its trend of sales and franchise improvement. It expanded into the baseball and souvenir cap market through the acquisition of AJD Cap Corp. Measured media spending for a variety of sports equipment, clothing and tournaments exceeded $3,000,000.

The division continued media support of established businesses and tournaments, while supporting new product activities, including Ram golf equipment, Bancroft rackets, Tretorn shoes, Etonic golf and running shoes, Fred Perry tennis shoes, Southern Athletic and Bike products and AJD caps. Heaviest support was behind Ram, Bancroft and Etonic products, but no line received over $400,000 in measured media.

- The company's food business showed mixed results. Sales rose 20%, but earnings failed to meet expectations due to higher cost of basic ingredients and introductory expenses in rolling out new products, according to Colgate. The company's candy business and restaurant operations also turned in poor performances.

Success boil-in-bag rice was the heaviest backed food entry, with $2,800,000 in measured media, followed by Hebrew National kosher franks with $800,000. Other Riviana rice brands are Carolina, Mahatma, River, Water Maid and Bake It Easy. The company also markets Hills pet foods and MBT broth.

Early this year, there were a number of top management changes at Colgate, following the sudden resignation of chairman/chief executive officer, David Foster. Keith Crane, president, also assumed the ceo title.

Within weeks, he created a new level of management and elevated Reuben Mark, William Powell and Roderick Turner to group vps.

Mr. Mark has responsibility for household products, personal care products, Associated Products divisions, the marketing services department as well as other manufacturing and purchasing areas.

Mr. Powell is responsible for all diversified companies except Riviana and Mission Hills, which report directly to Mr. Crane. Mr. Turner is responsible for international.

Baltimore means Business

The Port of Baltimore is the third largest in the United States in foreign commerce. Last year, its volume of containerized cargo increased 28%.

It provides 170,000 jobs to the 14th largest market in the nation. It generates $3 billion in economic impact every year. It serves the East Coast with a modern, accessible facility in a strategic inland location.

The Port brings business to Baltimore . . . and Baltimore means business for you. **Reach Baltimore through its most effective advertising medium – The Baltimore Sun.**

TEAR CAREFULLY ALONG PERFORATIONS

nsolidated Foods Corp.

	1978	1977
.....	$4,700,000,000†	$3,535,567,000
s ...	111,000,000†	100,633,300
sing*	91,500,000	86,178,000

es by company for fiscal year ended 1979, and reflecting merger with orp.
imate for combined companies durndar 1978 and 1977.

Consolidated Foods Corp., Chicago, became the nation's 40th largest national advertiser in 1978, reflecting its merger with Hanes Corp., which actually became effective at the start of 1979.

Combined advertising expenditures for the two companies rose 6% from$86,178,000 in 1977 to an estimated $91,500,000. Even without the merger, however, both companies would have ranked among the 100 top advertisers, Hanes with an estimated $62,000,000 in 1978 and Consolidated with an estimated $29,500,000. Consolidated reported that advertising for fiscal 1979 totaled $100,104,525.

Sales for the two companies rose to an estimated $4.7 billion in fiscal 1978. Consolidated alone had sales of more than $3.5 billion in fiscal 1977, with earnings of $100,633,000.

Sheer Energy All Sheer. Nothing shows but your toes.
ALL SHEER
SHEER ENERGY

Consolidated Foods' Hanes hosiery, which includes L'eggs, was the most heavily advertised line in the company's stable.

For calendar 1977, Hanes recorded sales of $414,158,000 and earnings of $20,820,000.

▪ Other than the ad boost provided by the merger, Consolidated also reported marked increases in advertising and promotion at existing divisions.

In addition, Consolidated spent approximately $25,000,000 in foreign advertising for its operations in Europe, Canada, and Australia, an increase of approximately 24%.

According to company figures, almost two thirds of the corporation's 1979 fiscal year advertising budget—$61,624,553—was spent in measured media, with the remaining $38,479,978 going into such non-measured media such as coupons, premiums, packaging, point of purchase and the like.

Of the measured media expenditures in the fiscal 1979 budget, Consolidated invested most heavily in network television ($32,710,218), followed by spot tv ($12,036,080), magazines ($7,196,810), newspapers ($6,588,278) and spot radio ($2,037,092). Network radio and outdoor advertising each drew less than $1,000,000.

▪ According to Leading National Advertisers, during 1978 the most heavily advertised line was the Hanes hosiery products. These included: L'eggs hosiery ($8,414,900), Hanes hosiery for women ($5,004,000), Underalls pantyhose ($2,565,300), Slenderalls pantyhose ($2,038,400) and Hanes pantyhose for women ($1,093,700), with the lion's share of the advertising appearing on network tv.

This strong advertising support helped Hanes and L'eggs brands garner 29% of the hosiery market, up from 26.9% last year and 10% in 1971. Consolidated officials estimate that this is twice the market share of the nearest competitor.

Other Consolidated lines heavily advertised in measured media in 1978 included: Shasta soft drinks and sugar free beverages ($5,008,000), mainly in spot tv; Sara Lee frozen baked goods and Light 'n Luscious cakes ($4,884,900), mainly in network and spot television; Hanes Red label underwear for men and Hanes underwear for men ($2,509,500), mainly on network tv; Tyco train and racing sets ($1,454,500), spot and network tv as well as some magazines; and Aris gloves for women ($1,410,900), mainly network tv.

▪ Last year marked the conclusion of a major transition period for Consolidated during which the company reorganized itself from a large number of smaller companies in many industries to a select number of larger companies in a few industries. In line with this goal, during 1978 Consolidated negotiated acquisitions of companies totalling annual sales of approximately $1.5 billion.

In addition to the purchase of Hanes for $250,000,000, Consolidated bought a 65% interest in Europe's largest coffee and tea producer, Douwe Egbert, in January, 1978, and, in May, 1978, acquired Chef Pierre, a Michigan-based manufacturer of frozen pies.

▪ Since 1976, the company has also divested itself of approximately 50 companies totalling annual sales of approximately $600,000,000. These transactions involved operations in 15 different industries—including fashion apparel, furniture, household products and motels— and did not involve any prominent advertisers.

Having succeeded in moving into large companies that manufacture high value-added products with strong brand identification and leading market shares, Consolidated officials indicated that the company's main growth in the near future will come from internal development rather than from further acquisitions. This is expected to include not only new products, but the expansion of regional brands into new territories as well.

The corporation is now organized into three main groups with seven principal core positions. The largest group, with sales of approximately $3.2 billion, is consumer packaged goods, which includes beverages (Douwe Egberts and Shasta), Hanes, specialty meats, frozen foods (including Kitchens of Sara Lee, Booth Fisheries, Chef Pierre, and Popsicle), and other consumer products.

The food services group, with sales of about $900,000,000, includes PYA/Monarch, an institutional food distributor, and Lawson's, the nation's seventh largest convenience store chain.

▪ The direct selling group, with sales of about $600,000,000 is anchored by Electrolux and Fuller Brush.

Hanes, the largest unit in Consolidated's consumer products group, has continued the advertising and promotional activities connected with its new L'Erin cosmetics line. Seeing the $1.3 billion cosmetic industry as a growing, high-margin portion of the packaged goods industry that could easily be integrated into the L'Eggs distribution system, Hanes began test marketing the cosmetics line in 1977.

The products include eye and face makeup, nail enamel, lipstick, cleansers, and moisturizers. Leading National Advertisers figures showed that the line received almost $1,500,000 in spot tv last year, and the products are currently being marketed in 22% of the nation, with another 10% scheduled to be added in the fall.

Hanes is also looking into the possibility of marketing children's books via its food and drug store distribution network, and expects to begin test marketing the books in late 1979 or early 1980. Just as with the other Hanes products, the company will provide its own racks and displays, and all inventory will be on consignment.

▪ Several new products were also introduced by the consumer products' frozen food operations. With research indicating that one and two-member households now make up 52% of all households, recently acquired Chef Pierre introduced frozen, individually wrapped pie slices this year, and Kitchens of Sara Lee introduced its new Individual Danish.

The Individual Danish, which has been in national distribution since March, is described by Consolidated officials as the company's "most successful product introduction to date," and the pie slices are currently being tested in six markets.

The frozen foods operation is also attempting to take advantage of the growing U.S. per capita fish consumption with two new Booth Fisheries products—Beer Batter french fried fish and Buttermilk Batter french fried fish. Company officials say that the new products, which were introduced in January, have resulted in sales "well in excess of forecasts."

In the specialty meats portion of the consumer products group, Hillshire Farms has introduced two new products—Smoke Bratwurst and Smoke Italian Sausage. Both products are in introductory stages and the company says that both "have met with wide favor during initial consumer taste-testing."

In Consolidated's beverage group, soft drinks marketer Shasta has suffered from the intensely competitive cola wars since it went national last year. Though Shasta measured media totals jumped to $5,000,000 in 1978 from $2,500,000 the year before and the national push helped swell sales 7.9% to almost $200,000,000, the nation's seventh largest soft drink bottler still faced a decline in earnings last year.

Some observers predict that Shasta will continue to limp along for some time, but Consolidated officials are hoping that last August's shake-up of Shasta management will begin to show some effects and help pull the unit out of its slump.

Shasta's advertising plans for the coming year include emphasis on the line's recent conversion to a fructose sugar base. The ads will stress that fructose sugar is a "good taste, good for you" feature.

In addition, Shasta has obtained U.S. rights to Capri Sun, a popular German soft drink, and has been test marketing the line in Buffalo and Atlanta since May. The natural fruit drink comes in apple, lemonade and orange, and is packaged in foil pouches.

▪ The retail and food service group's PYA/Monarch, the nation's third largest institutional food service distributor, has been helped by the acquisition of Douwe Egberts and Chicago-based Superior Tea & Coffee Co. and posted sharply higher earnings this year. Not only will these acquisitions broaden PYA's coffee and tea offerings, but the European firm's Moccomat frozen coffee concentrate system is expected to be well-received by U.S. food service operations.

Delta Air Lines

	1978	1977
Sales*	$2,225,447,000	$1,870,347,000
Earnings*	135,375,000	16,654,000
Advertising	28,900,000	25,700,000

*Fiscal year, ending June 30, 1978, and 1977

Delta Air Lines, Atlanta, the 98th largest national advertiser, increased its advertising 12% to $28,900,000 in 1978.

Delta boarded 36,300,000 passengers, a record for the carrier, as operating revenues increased 19% to $2.23 billion and earnings increased 18% to $137,375,000, also a record for the airline. It was the 31st consecutive profitable year for Delta. For the first quarter of the current year, earnings were $26,197,000.

Although one of the most profitable U.S. airlines, Delta is only the fifth largest domestic trunk airline in terms of revenue-passenger miles. In revenue-passenger miles (the total number of passengers multiplied by total number of miles they have flown), Delta hit 23.332 billion in 1978, up from 19.119 billion in 1977.

The only other U.S. airlines with higher revenue-passenger miles in 1978 were United with 39.399 billion; American, 28.987 billion; TWA, 26.967 billion, and Eastern 25.183 billion.

- In terms of passengers carried, Delta with more than 36,000,000 ranked third, behind United with over 40,000,000 and Eastern with more than 37,000,000. Delta's passenger ticket revenues were $1.86 billion.

Delta's marketing and advertising program is shaped largely by its route structure, which serves more than 90 cities. The company has developed a system of short-haul routes feeding into its system of lucrative, long-haul routes to permit the carrying of passengers all the way to their destination.

A major portion of total Delta business comes from small and medium-size cities east of the Mississippi and the airline has the shortest average flight in miles of any major U.S. carrier.

Decisions in Delta's favor by the Civil Aeronautics Board permitted the airline to start Atlanta to London service in April, 1978, the airline's first transatlantic route. This operation was profitable almost from the start, with a 67% load factor for the year. By the end of 1978, 78,513 passengers had used the new nonstop flights.

In 1978, Delta received authority to serve a number of other new cities and routes, including the following: Atlanta-Cleveland, Atlanta-Nashville, Las Vegas-Reno, Miami-San Juan, New Orleans-Tampa, Atlanta-Raleigh/-Durham, Cleveland-Ft. Lauderdale and Boston-West Palm Beach.

During the year, the airline applied for Atlanta-Frankfurt authority. The route was granted early this year and service was inaugurated to Germany on June 17. Delta is also seeking new international routes between both Miami and Atlanta and points in the Bahamas.

The airline celebrated its 50th anniversary of passenger service this year on June 17, and marked the event with a promotional run by the Delta Dusters, an employe running club, from Dallas to Jackson, Miss., the route of its first flight.

Partly because of its route structure, Delta tends to avoid elaborate and expensive image advertising in favor of no-nonsense ads full of facts and figures. It continues to use its major theme, "Delta is ready when you are," created several years ago.

The airline summed up its position in a direct mail piece sent to businesses during its anniversary month: "Over the past 50 years, you've learned to expect great service from Delta Air Lines. What more could you ask? More of the same."

- During 1978 and continuing into 1979, the airline industry went heavily into discount fares and special low inaugural fares for new routes, encouraged by the CAB's interest in "deregulation" of the industry. Delta went along reluctantly, declaring in its advertising that "Delta will not be undersold."

To its regular existing Night Coach and Excursion fares were added "Super Saver" (discounts up to 50% under certain conditions), "Simple Saver" (liberal discounts on certain specified flights), "Senior Citizen" (for passengers 65 and older) and "Systems Excursion" (allowing passengers to visit several Delta cities on one trip at one fare).

The airline has announced yet another fare, the "Supreme Super Savers," to start Sept. 8. Delta promises the latest discount fare will replace 47 old ones and will be simple.

DELTA ANNOUNCES SUPREME SUPER SAVERS
Delta is ready when you are

Delta Air Lines' "Supreme Super Savers" is the latest of the company's discount fares to enter the market.

In newspaper ads, the airline notes, "Until now, discount fares have been something of a mixed blessing. Nice savings, but you had to be a Philadelphia lawyer to understand all the restrictions."

- While meeting the competition with special discount fares where it feels it must, Delta has gone on record warning that without a continuation of a high level of traffic growth, the industry cannot maintain the low discount fares in the face of escalating costs without seriously eroding profits.

While discounting of fares continues, one major cost problem has been escalating fuel prices. By the end of 1978, the average price per gallon was 38.24 cents, up from a 1973 average of 12.03 cents. The price would seem low to a motorist, but every 1¢-per-gallon increase adds approximately $11,000,000 to Delta's annual fuel bill.

DuPont

	1978	1977
Sales	$10,584,000,000	$9,435,000,000
Earnings	787,000,000	545,000,000
Advertising*	70,000,000	59,000,000

*U.S. only, estimated by AA

E. I. DuPont de Nemours & Co., Wilmington, Del., the 56th leading national advertiser in 1978, boosted its advertising budget 18.6% to an estimated $70,000,000 last year as its net income rose 44% over 1977's $545,000,000 to $787,000,000.

The company reported worldwide advertising expenditures of $93,000,000 in '78. In 1974, the last time DuPont was in the 100 leading National Advertisers' list, its worldwide ad total was $72,900,000 and its U.S. total came to $54,176,000.

DuPont's chemicals, plastics and specialty products (CPS), showed a 6% gain in volume last year, with total sales of $7.14 billion, 13% higher than in '77. CPS sales last year accounted for 67% of corporate sales.

- DuPont reported that its specialty lines—agrichemicals, electronic products, explosives, finishes, and medical and printing products—continued their "excellent growth" and registered an earnings gain of 38%. Sales of chemicals improved "modestly," but earnings were down, reflecting worldwide overcapacity in commodity chemicals.

Fibers showed the greatest improvement last year, recovering from a low base. But DuPont found that capacity is still excessive worldwide. Fibers sales were $3.4 billion, 11% ahead of '77, and accounted for 33% of sales last year. The company has strength in carpet and industrial fibers and so feels its return on investment will improve from 4% in '78.

Sales abroad were about $3 billion, 19% ahead of '77, continuing a pace that finds international sales growing faster than domestic sales.

DuPont consolidated four industrial departments and realigned their product lines in 1978. Two new departments resulted, following a pattern set by earlier realignments of this sort.

The company's plastics, fibers, elastomers and finishes go into a vast array of commercial and consumer products. Some of its better-known trademarks are Stren monofilament fishing line, Dacron polyester, Kevlar aramid fiber, Lycra spandex fiber, Orlon fibers and Teflon fluoropolymers.

In 1978, DuPont spent $3,577,500 in measured media, for its Teflon coating according to Leading National Advertisers, with $3,100,000 going for magazine ads and the rest in spot tv.

Market acceptance of DuPont's most durable Teflon coating, "Silverstone," is reported by the company to be excellent. Advertising expenditures were spread among magazines ($649,000) and network tv ($1,878,800). Corian, DuPont's resistant counter tops, reported strong sales to hotel and motel markets.

Another of DuPont Co.'s major earners, its apparel market, was responsible for more than half of 1978's worldwide corporate fiber sales of $3.4 billion.

- With the recession of '74-'75, use of polyester in knits started to decline, leading to a collapse of the 1976 price structure. To stop the decline and stimulate growth DuPont began developing new Dacron yarns, including Serell, an air-jet textured filament yarn.

These yarns, made into a wide range of new fabrics, departed from the "shiny" look of the early doubleknits and provided "natural" aesthetics and functionality.

After four years of lying low, DuPont got back into the advertising game with a promotion for Stren.

DuPont began the Stren campaign last April in more than 50 consumer magazines and in 30-second tv spots. The message, "Tough new Stren, twice as tough as the next best fishing line," was by N W Ayer ABH.

The Stren ads were followed last July by a promotion for Dacron. The ad program was prompted by DuPont's effort to halt the decline of polyester filament sales by working to develop new Dacron yarns.

In the campaign by BBDO, New York, using tv spots produced and directed by Richard Avedon, the products became known as "Today's Dacron" and were featured in 30-second commercials and in print ads. DuPont spent an estimated $2,124,500 on Dacron advertising last year.

Still at work creating new textiles and fibers, DuPont plans to penetrate the denim market with a

1978 AD $ SUMMARY

MARKETING PROFILES

new kind of Dacron staple. The material, when blended with cotton and woven into a denim, is said to fade and soften like cotton jeans.

Also under development is a blend of Dacron and Orlon fibers to be introduced later this year as Binell. This new fabric has a soft, cottony touch. In addition, because of the Orlon content, the material transports moisture to the fabric surface, making it ideal for underwear and active sportswear.

A new family of Orlon fibers is being created for the sweater and craft yarn market. Withdrawn from the market for acetate yarns was Nandel, a DuPont yarn that had not been selling well.

In February, 1979, DuPont budgeted more than $5,000,000 for a corporate ad campaign. Print ads and tv commercials explain the role and importance of chemicals in everyday life. The slogan, for the spots, which aired during specials on ABC, CBS and NBC, was "You and DuPont. There's a lot of good chemistry between us." BBDO is the agency.

Eastern Air Lines

	1978	1977
Sales	$2,379,564,000	$2,035,893,000
Earnings	67,257,000	27,877,000
Advertising	34,800,000	32,500,000

Eastern Air Lines, Miami, the 91st largest national advertiser, increased its advertising 7%, to $34,800,000 in 1978.

The airline reported the highest earnings in its history during 1978, reaching $67,257,000, more than double its restated earnings of $27,877,000 for the previous year. Revenues increased 16.9% to $2.38 billion.

Operating expenses increased 15.4% to $2.28 billion, and fuel costs increased by 12.9%, to $428,200,000. The airline's load factor (percentage of available seats occupied) rose from 56.2% to 64.5%, the second highest load factor among U.S. trunk carrier.

The available seat miles rose 6.3% to 39.1 billion. In terms of revenue-passenger miles (the total number of passengers multiplied by total number of miles they have flown), Eastern was fourth largest in 1978, with 25.2 billion.

- In number of passengers carried in 1978, Eastern's total of 37,448,000 was second only to United. The increase of approximately 6,100,000 passengers, or 19.6% over 1977, was the largest single-year rise in the airline's history.

Seldom in its history has Eastern started so much new service as it initiated in 1978, taking over several previously dormant routes under provisions of the Deregulation Act of 1978 and expanding service from the airline's Atlanta and Miami hubs.

New routes included Miami-San Francisco, Atlanta-San Francisco, Miami-Tampa-Mexico City, Miami-Haiti, New York-Cozumel/Merida/Cancun on Mexico's Yucatan Peninsula via New Orleans; New York-Fort Myers, St. Louis-Salt Lake City, Austin-Houston, Atlanta-Charleston and Atlanta-Savannah among others.

Service expansion has continued in 1979. Newest routes, started May 1, include Atlanta-Austin, Miami-Guatemala and Atlanta-Seattle.

- Eastern's advertising normally covers three areas—business travel, vacation packages and its corporate effort featuring former astronaut Frank Borman, the airline's president and chief executive officer, as spokesman. In the industry's current high discount environment, however, Eastern has shifted much of its ad emphasis to promotional, discount fare advertising.

Effective through Dec. 15, Eastern is offering a $49 round-trip fare to Florida for young people age 2 through 17 (one per adult) in conjunction with new Super Saver discounts that can save adults 30% to 50% off regular coach fares.

Eastern is also offering its California Fare Deal—a tour basing fare, good from 23 southern and southeastern cities to Los Angeles and San Francisco. The round-trip price is $199-$249 depending on origination. Children under 17 (one per adult) fly for only $49 round-trip. This air fare is available with purchase of a minimum ground package of $100 per adult.

The airline continues to offer its innovative Unlimited Mileage fare, initiated in 1977. Under the fare plan, for $372 to $397 each, two adults traveling together can take an almost unlimited 21-day tour of the carrier's North American network. Effective June 12, a special Unlimited Mileage fare for one person was introduced at a slightly higher charge.

Faced with a shift of business travelers from first class to coach, Eastern and several other airlines, narrowed the price gap between first class and coach in May, 1978. "Eastern cuts the premium you pay for first class. Up to half," ads declared in business publications.

A major sales promotion/public relations activity of Eastern continues this year in its role as "official airline" of Walt Disney World in Orlando. The airline operates a major exhibit pavilion at the theme park.

Eastman Kodak Co.

	1978	1977
Sales'	$7,012,923,000	$5,966,986,000
Earnings'	902,284,000	643,448,000
Advertising*	86,071,700	85,471,800

'Worldwide *U.S., AA estimate

Eastman Kodak Co., Rochester, N.Y., the 44th largest national advertiser, is estimated to have increased its U.S. advertising slightly—1%—to $86,071,700 in 1978 to support its Ektra and Colorburst camera lines as well as traditional still cameras and film. Total measured media spending did not change substantially, though some funds shifted from print to increased broadcast advertising.

Kodak's worldwide sales of $7,012,923,000, up from $5,966,986,000 in 1977, included a record high $5,674,400,000 for the photographic division, up from $4,754,500,000 in 1977; and $1,531,900,000 for the Eastman chemicals division, up 11% from $1,374,300,000. (The 1978 sales of these divisions should be reduced by $928,100,000, the amount that figured in inter-divisional sales.)

For the first quarter of 1979, worldwide sales rose 19% to $1.64 billion up from $1.38 billion in the same period in 1977, while worldwide net earnings increased 40% to $197,500,000 from $141,000,000.

The U.S. and Canadian photographic division was combined with the international photographic division to form a new photographic division under the direction of President Colby Chandler on Jan. 1, 1979.

The company said the introduction of attractive new products for both traditional and instant photography, the excellent reception accorded Kodak Ektaprint copiers, brisk demand for color films and papers and expansion of the micrographic product line were major factors in the 1978 sales performance. It added that for the first time in Kodak history, research spending exceeded $1,000,000 a day as new and improved products continue to gain consumer acceptance.

Kodak is estimated to have a 35% to 40% share of the instant camera market which had an estimated 8,000,000 camera sales in 1978. Measured media spending was $12,548,800 for instant cameras with $612,000 for instant film and an additional $3,574,500 for Colorburst instant cameras and film—all in magazines.

The Ektaprint copier-duplicator, which rolled out in 1977, was supported with an estimated $1,000,000 ad budget, including a print campaign featuring work of New Yorker cartoonist Charles Saxon. Ektaprint got $1,451,400 in measured media in 1978.

The company reported that a more experienced sales organization, improved product reliability and an effective service organization led to increased installations of Ektaprint copiers. Kodak is believed to have less than 10% of the copier-duplicator market.

- New products for 1978 included instant and traditional cameras: Colorburst motorized instant cameras and new Ektra pocket models using conventional film, all with built-in electronic flashes. Colorburst 300, Kodak's highest priced instant camera to date retailing for about $74.95, has been advertised via b&w newspaper ads in 131 markets as well as color pages in magazines. Comedian Dick Van Dyke is ad spokesman for the camera.

Ektachrome 400 film also bowed as a high speed film allowing the shooting of color slides without flash or in very low light. It and other Kodak film received $6,254,200 in measured media. Ektra cameras got the biggest share of the corporate $51,913,100 in measured media with $13,210,600, mostly in network tv and magazines.

Founded by George Eastman, Kodak began diversifying in the 1920s. Although today it produces fibers, chemicals and plastics, photographic products still account for more than three-fourths of Kodak's annual sales. Kodak's share of the estimated $10,672,000,000 U.S. photographic market has been put at well over one-third.

- Last year, out of $31,211,200 spent in network tv, Kodak allocated $11,868,800, for instant cameras; $9,345,600 for Ektra cameras, and $4,124,700 for film. A $15,168,200 investment in magazines included $3,574,500 for Colorburst cameras and film; $3,511,800 for Ektra cameras and $1,569,300 for film.

Kodak also spent $370,200 to promote Kodel, Verel and Kodofill fibers with $138,500 for Kodel fibers in women's apparel.

In 1979, Kodak continued using Michael Landon as its major spokesperson for traditional commercials and print ads with his family. Products promoted were Kodak Ektra 1/Tele-Ektra 1, Ektralite 10 and the Ektramax cameras.

The Kodak film campaign continued with picture-taking vignettes and lively music to suggest to viewers that with Kodak film, "You've got what it takes."

In addition, Kodak launched a new campaign for instant products. The theme of the commercials was that Kodak instant cameras bring people closer together and with Kodak instant cameras and film, "The more you take, the more you give."

- In 1978, Kodak moved its $15,000,000 instant photo products account from J. Walter Thompson

MARKETING PROFILES

Co. to Young & Rubicam. JWT, its principal agency, continued to purchase tv time not only for traditional photo products but instant cameras as well.

A 1978 verdict found Kodak guilty of monopolizing certain segments of the photographic business. In June, 1978, the court granted, in part, Kodak's motion for judgment notwithstanding the verdict, reducing the award to Berkey Photo, before trebling, by $10,465,330. In July, 1978, the court entered judgment against Kodak in the amount of $87,091,309, consisting of trebled damages of $81,464,100 and attorney's fees and expenses of $5,627,209.

Kodak was ordered to sell to any customer requesting it Kodak color print paper without a backprint referring to the Kodak name and to disclose simultaneously to independent photofinishers certain information provided to Kodak's color print and processing organization.

On June 25, 1979, the Second U.S. Circuit Court of Appeals reduced the award of damages to $990,000, stating that antitrust laws were not designed as shelter against competition.

- Other antitrust actions brought against the company in 1973 by Berkey, by GAF Corp., which subsequently dissolved its consumer photography business, and by Pavelle Corp. are still pending.

Also pending is a 1976 suit in which Polaroid charged Kodak with infringing its patents for instant cameras and film.

Anthony Frothingham moved from general manager of domestic marketing division, U.S. and Canadian photographic division, to staff vp, International photographic division. He was succeeded by J. Phillip Sampler, formerly assistant to the general manager.

In July, 1979, Kodak named nine execs to new posts as marketing directors responsible for major planning areas under the U.S. and Canadian photographic division, which accounts for 80% of Kodak sales.

Advertising	141,431,000	108,353,000*

***Revised figure**
†Fiscal year ending October, 1978.

Esmark Inc., Chicago, the 20th largest advertiser, increased its advertising spending by an estimated 31% to $141,431,000 in 1978. Company sales rose 8% to $5.8 billion for the fiscal year ending in October, 1978, and earnings were up 7% to $80,100,000.

Swift & Co., the company that was the foundation of Esmark when it became a holding company in 1973, enjoyed improved sales and earnings over 1977. Sales rose from $3.76 billion to just over $4 billion and earnings leaped from $12,700,000 to $38,300,000.

Swift's move to reorganize and shift the emphasis from fresh meat packing to marketing branded products is beginning to bear fruit. Its contributions to Esmark's earnings increased from 8% in 1977 to 21% in 1978.

- The company had found itself losing out to stiff competition from modern and efficient meat processing operations such as Iowa Beef Processors and Missouri Beef Packers. But, starting in 1973, Swift restructured its organization from a highly decentralized operation into four primary operating centers: Consumer products, food service, fresh meats and international.

Last year, Swift spent $46,900,000 to advertise products in these four categories.

The consumer products include such branded products as Butterball turkeys, Peter Pan peanut butter, Brown 'N Serve sausages, Swift Premium processed meats, Strongheart dog food and Rival dog food—a new acquisition.

Swift's Li'l Butterball, a 4 to 10-lb. whole turkey, Butterball turkey breasts and Butterball stuffed turkeys were introduced into test markets last year and this spring moved into regional markets: Chicago, Milwaukee, Peoria, Oklahoma City, Nashville and Syracuse.

The Butterball line was supported by $2,977,600 in measured media spending last year.

- Sizzlean, a pure pork bacon-like breakfast strip that is 50% leaner than bacon, achieved national distribution in 1978 and was supported by $7,200,000 in advertising and promotion, including $4,161,600 in measured media. That is a 43% increase over last year's measured media figure.

Firebrand, an all beef breakfast strip, was expanded into regional markets, backed by $1,018,200 in measured support.

An extension to the successful Brown 'N Serve line, Brown 'N Serve ham patties, went into test market in 1978, backed by $79,800 in measured ad spending.

Homemade Soup Starter, a dried soup product that requires that only meat and water be added, went national in the fall, with $6,600,000 in 1978 measured media support. Stew Starter, a companion to the soup product, was placed in test market in the Quad Cities and possibly in other cities this spring.

- Estech, Esmark's chemical division, had a 4.6% sales increase from $471,200,000 to $493,900,000, but earnings were down 3.51%.

The company reported a slowdown of farm fertilizer sales last year, due to reduced acreage planting and unfavorable weather conditions. Despite that development, Estech's fertilizer market share was up for the year, and the first six month's sales figures from 1979 indicate a 7% growth in fertilizer sales. It is expected that Estech's fertilizer sales will bloom next year.

Golfer Jack Nicklaus was again spokesman for Estech's lawn and garden division, which reported a sales increase of 20%. Mr. Nicklaus promotes Vigoro, the No. 2 brand after Scotts, and Par Ex brands. Vigoro introduced a revamped graphics system for its products in 1979.

Estech has two other subsidiaries, Estech Specialty Chemicals Corp., which manufactures and sells industrial adhesives, specialty chemicals and lubricants, and Doric Corp., which sells to the dental industry through the Patterson Dental Co. and Centra brand name.

- Estech has embarked on a program to strengthen its corporate identity with ads placed in several trade publications in late 1978 that are scheduled to run throughout 1979.

International Playtex had fiscal 1978 sales of $467,100,000, a 12% increase over 1977. Earnings were up only about 2%, but the division was still the largest contributor to Esmark's 1978 profits with 29% of total earnings. Last year's lower earnings were attributed to higher product costs and to high new product introduction costs.

Playtex' Givenchy and Round the Clock pantyhose lines, acquired when Playtex bought the Pennaco division of U.S. Industries in 1977, have put the company firmly in the hosiery market.

The company also is strengthening its position in the tampon market—although at a decreasing rate because of greater competition—with the growth of

LNA

its Playtex Plus tampons which were introduced in 1977 and with the conversion of the rest of its line to high absorbency fibers. Tampons received $5,729,700 in measured media support.

▪ The intimate apparel division was active in 1978 in the new product and line extensions arena, featuring new styles and materials and supporting those efforts with heavy television advertising.

Playtex bras received $11,947,300, the largest chunk of measured media spending, which totaled approximately $27,791,400. The 18-Hour bra introduced its first seamless style and continued to use Jane Russell as spokeswoman. The Cross Your Heart line offered a cotton version, Free Spirit and Instead bra expanded their lines and Free Spirit Fanny Shapers and Fanny Smoothers were introduced.

The entire Playtex intimate apparel line faced heavier competition last year from chain store private label brands and a slowdown in consumer purchases.

A new bra and panty line under the Givenchy designer label called Underdressings, is in test in Kansas City, supported by tv and print advertising prepared by Ogilvy & Mather. National rollout is expected in the fall.

▪ Vickers Energy Corp. had a 3.6% rise in sales in 1978 to $627,800,000. Earnings were down 24% from $41,900,000 in 1977 to $31,800,000 in 1978. The earnings decline was linked to problems with Vickers Petroleum Co., which experienced a maintenance shutdown of its Ardmore, Okla., refinery, and to unfavorable industry conditions.

The company plans to open 40 new Vickers service stations in 1979; 37 were added last year. George Gobel, who has represented Vickers for 15 years, will continue as the company's spokesman.

Esmark's newest acquisitions, STP Corp. and Pemcor, make up the company's automotive division. The division had sales of $218,600,000, a 52% increase over 1977, and earnings of $23,800,000, up 44%.

STP Corp. markets automotive products such as gas and oil filters and oil and gas treatments. In 1978, it introduced Son of a Gun, a restorative spray for vinyls, rubber, leather and wood. It was backed by $2,499,500 in measured ad spending.

Pemcor makes automobile audio equipment and home high fidelity sound equipment, including its highly regarded Jensen speakers. Jensen car speakers and loud speakers received $714,700 in measured media.

The thrill of being there

Esmark's 1978 acquisition of Jensen, a car audio system and home speaker maker, reflects its move to diversify from the fresh meat processing arena.

Exxon Corp.

	1978	1977
Sales	$64,886,000,000	$58,458,000,000
Earnings	2,763,000,000	2,443,000,000
Advertising	38,000,000	35,270,800

Exxon Corp., New York, the 82nd largest advertiser, increased domestic advertising expenditures 8% to $38,000,000 in 1978.

Exxon's worldwide revenue reached $64.9 billion in 1978, up 11% from the year before, while earnings rose 11.6% to $3.4 billion from $3.1 billion in 1977.

Currency translations, which contributed to losses on the 1977 balance sheet, were transformed into gains in 1978 as the U.S. dollar gained strength in some parts of the world. Higher volume and improved sales prices also influenced last year's gains.

Earnings from petroleum production and related transportation increased 14% in 1978, due in large part to expanded recovery from Alaska, the North Sea (United Kingdom) and Malaysia.

But while Exxon's petroleum operations took in $2.48 billion in earnings last year, compared to $2.16 billion in 1977, over-all production declined, the company said, citing lower volume in the Middle East and Venezuela, as well as depletion of mature fields here.

▪ While declines in the sale of heavy fuel oil balanced increased sales of gasoline to yield only a slight gain in refining and petroleum marketing volume, earnings for Exxon's "downstream" operations climbed 16% to $876,000,000 worldwide last year.

U.S. earnings hit $294,000,000, up from $267,000,000 in 1977, but domestic petroleum product sales declined 12,000 barrels a day to 1,736,000 barrels in 1978.

Despite a sales boost at the company's existing service stations, Exxon remained in third place in the retail gas market.

The company's market share rose 0.2% to 7.3%, but Amoco (Standard Oil Co. of Indiana) and Shell Oil continued to lead the retail market as they did in 1977, finishing last year in a dead tie with 7.7%, according to the Lundberg Letter, an industry newsletter.

In 1977, Shell ousted Texaco from the No. 1 spot, holding a 7.53% share; Amoco moved to No. 2 with 7.3%, and Exxon followed with 7.14%. The longtime leader, Texaco, finished 1977 with 7.11% and fell still further in 1978 to 6.7%, according to the "Lundberg Letter's" findings.

▪ Exxon's continuing efforts to reduce costs led to a further jettisoning of 1,000 company-owned and leased service stations last year, bringing the total since 1972 to 15,000 stations closed. During that time, however, Exxon's remaining outlets raised their product sales volume 20%.

Not reflected in last year's product volume is $316,000,000 in natural gas revenue that the Department of Energy alleges Exxon overcharged customers. An Energy Department suit was filed in a Washington, D.C., federal court last year covering improper cost calculation before Dec. 31, 1977.

While contesting the current suit, Exxon had earlier filed its own suit in Dallas against "government efforts to apply retroactively ambiguous and complex regulations."

While Exxon has continued to divest itself of gasoline service stations, the company is building its chain of "Esso Shops," non-automotive convenience stores, in Europe and Brazil. There are now more than 3,000 Esso Shops in operation.

▪ Chemical sales increased 11% last year over 1977, while earnings rose 21% to $268,000,000 worldwide. Overseas income accounted for the major portion of earnings growth, with most of the 41% jump in foreign earnings coming from Europe and the Far East.

Exxon continued to place significant marketing weight behind its Uniflo motor oil, reformulated in 1977 for greater fuel efficiency. As gasoline supplies have tightened over the past year, motor oils with friction-reducing additives to stretch gas efficiency have become a more competitive segment of the motor oil market.

Mobil 1, Mobil Corp.'s heavily-advertised fuel-efficient product, and Uniflo hold the lead in that market segment, and Exxon greatly increased its ad expenditures for the product. Measured spending, excluding newspapers and spot radio, rose to $6,532,000 in 1978 from $1,767,000 the year before, according to Leading National Advertisers.

As gas supplies grew scarcer and prices rose, Exxon and its competitors focused attention on "gas saving" motor oil as much to enhance their corporate reputations as to promote a more desirable product.

▪ As with most oil companies, the major portion of Exxon's ad budget funded the company's corporate advertising. Under the continuing campaign banner, "Energy for a strong America," Exxon ads described the company's efforts to discover new sources of energy and stretch traditional sources.

Public interest activities also kept pace with over-all promotional outlays, rising 10% to $33,000,000 from $28,000,000 in 1977. Of that total, $28,000,000 was contributed in the U.S., while $5,000,000 was given by affiliates abroad in the countries where they operate.

In public broadcasting, Exxon again underwrote several PBS offerings with estimated spending of $5,000,000, making it one of the leading corporate patrons. Recipients in 1978 were PBS' "Great Performances," "MacNeil/Lehrer Report" series, "Live From Lincoln Center," a broadcast of the com-

plete Shakespeare plays and the documentary series "Global Papers."

Exxon's corporate advertising appeared largely on NBC-TV's "Meet The Press" and "Saturday Evening News," and ABC-TV's "Issues and Answers." Whereas Exxon shifted some of its ad dollars to network tv and consumer magazines in 1977, the mix in 1978 returned to its prior emphasis on spot broadcast buys as network tv spending fell. Consumer magazine spending remained strong in 1978.

▪ Exxon's budget for measured domestic media grew approximately 8% in 1978 to $31,260,800. In 1977, the company spent $29,000,000 in measured media.

The oil company's total tv spending stayed about even at $19,471,700 in 1978 compared with $19,588,900 in 1977, but spot tv gained approximately $3,000,000 at network tv's expense. The greatest budget shift occurred in spot radio, up to $4,022,000 in 1978 from $2,392,060 the year before.

The fervor with which Exxon pursued new ventures, under the auspices of its Exxon Enterprises division, again demonstrated the company's drive to prosper outside the energy field. The division's information-processing systems were paced by Exxon's Vydec text editing system, which grew 80% in volume to $44,000,000.

Ford Motor Co.

	1978	1977
Sales	$42,784,100,000	$37,841,500,000
Earnings	1,588,000,000	1,673,000,000
Advertising	210,000,000	184,000,000

Ford Motor Co., Dearborn, Mich., the 8th largest national advertiser, spent $210,000,000 in '78 advertising, up 14% from the $184,000,000 spent in 1977. Records were set in dollar and unit sales and profits were the second best in history.

Yet Ford said the year was one of "challenges and difficulties." The company was talking about inflation, capital expenditures and government regulation, but the phrase also could apply to marketing.

The year saw Ford fire its highest-ranking marketing exec starting a chain of events that stripped it of a major ad agency. Other difficulties arose with the other big agency. Chairman Henry Ford II completed his reorganization of top management paving the way for him to step down.

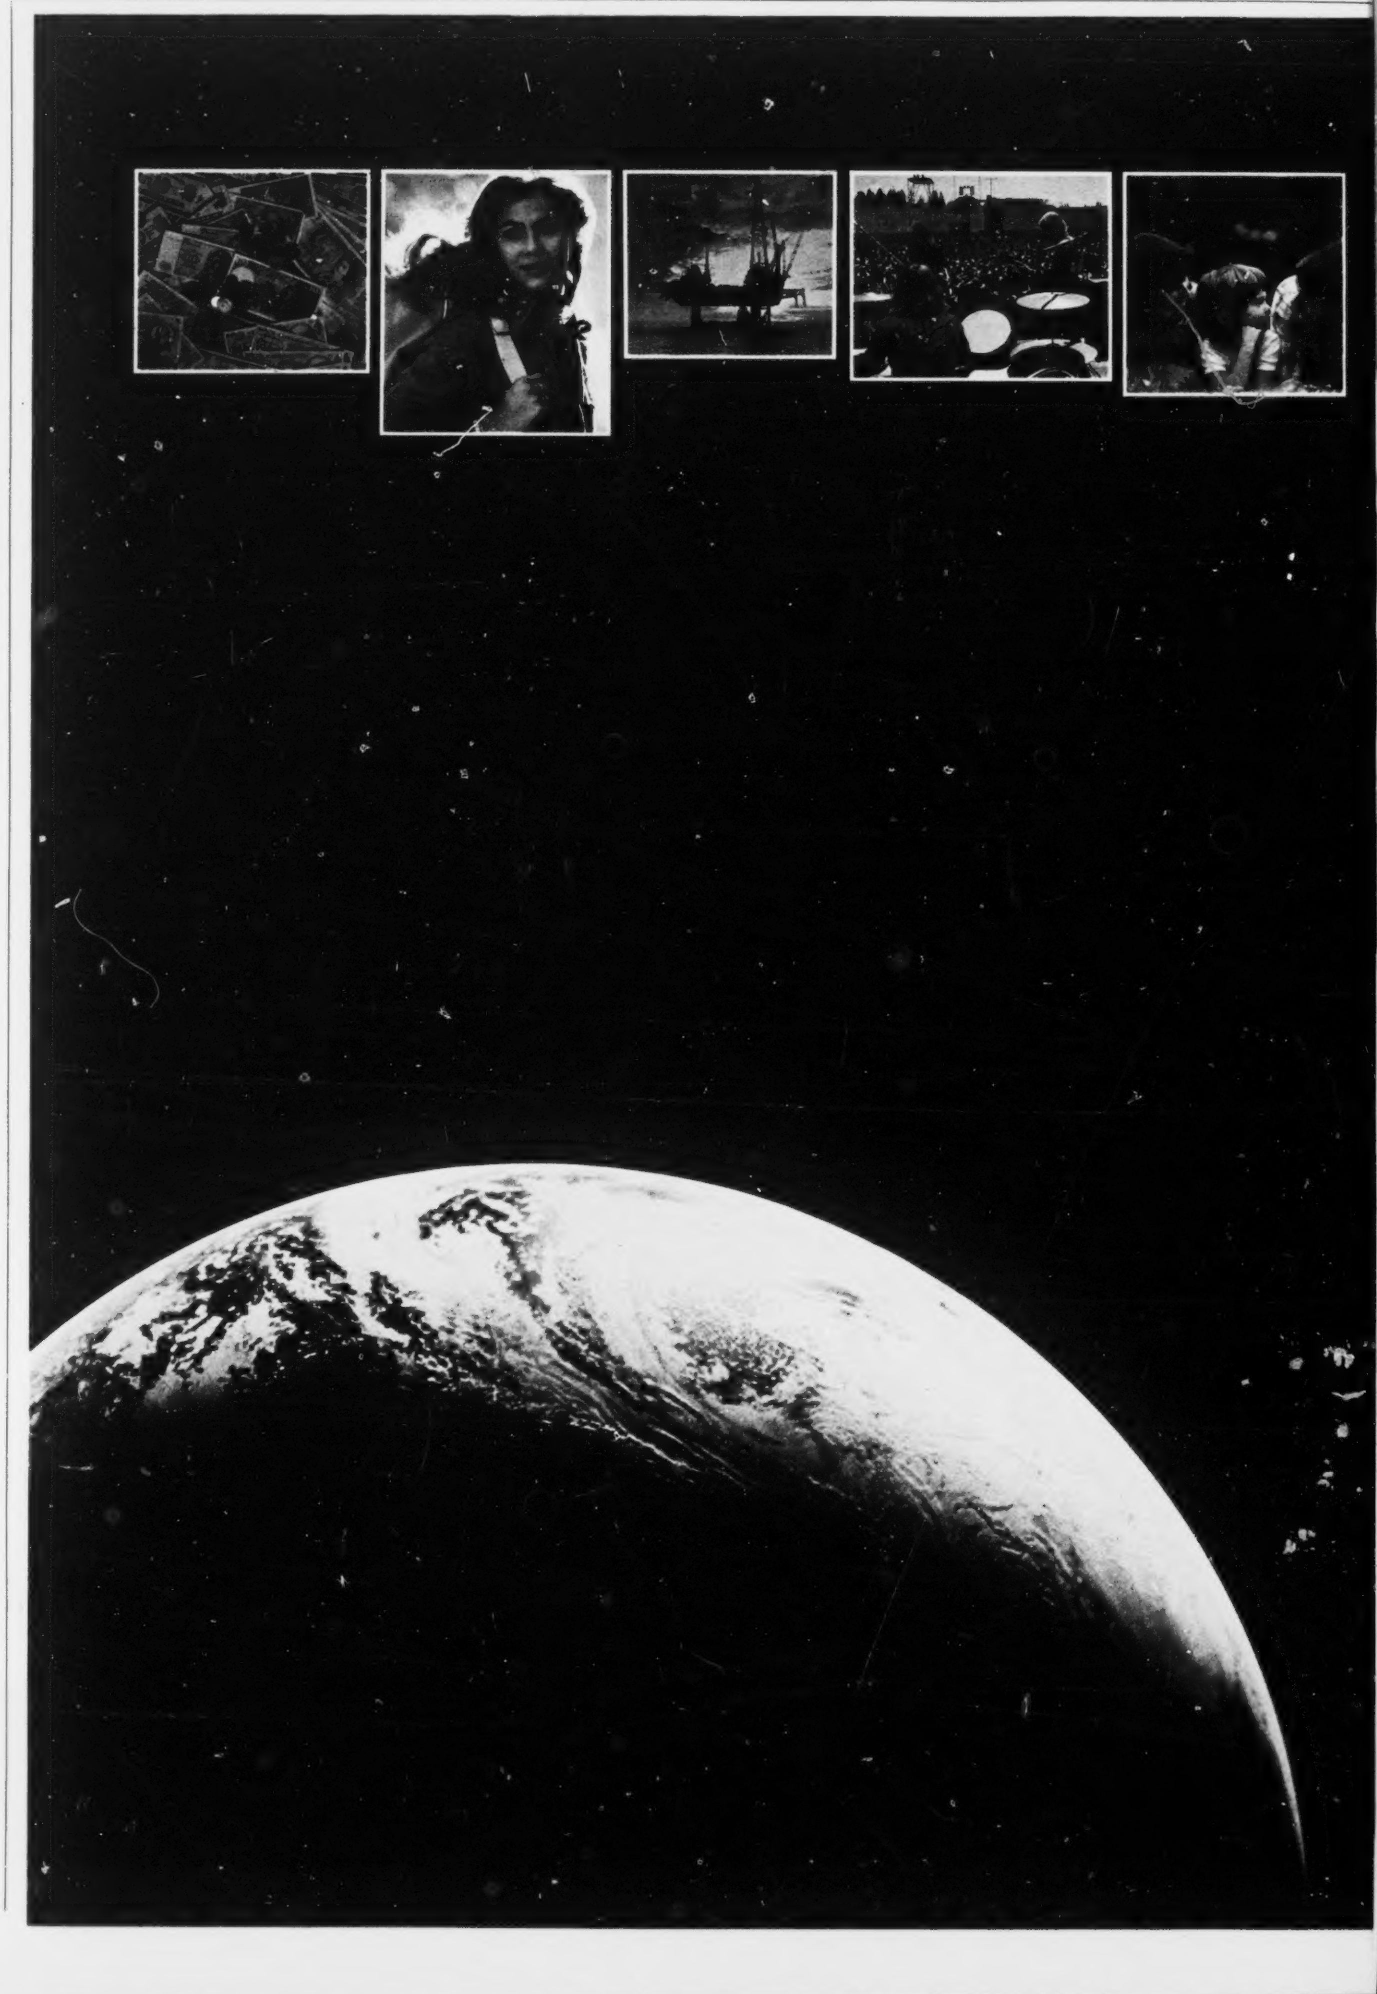
When Mr. Ford stepped down at the annual meeting this spring, the company lost its severest advertising critic. He had run the company for more than 34 years. But Mr. Ford characteristically still kept a finger in the pie. He turns over his duties as chief executive officer Oct. 1 to president Philip Caldwell but will remain as chairman.

▪ As usual, Mr. Ford's figure for media outlays during the year exceeded measured media spending—$210,000,000 to $172,038,700. Worldwide ad expenditures came to $346,200,000 up from $295,800,000 in 1977.

Dollar sales worldwide rose 13% to a record $42.8 billion from $37.8 billion and vehicle sales hit an all-time high of 6,552,000 units, or 2,000 higher than the 1977 record. Net income was $1,589,000,000, second to the record $1,673,000,000 in 1977. Earnings were cut by a strike in Great Britain.

Ford's share of the worldwide car market stayed at 15.7%. Ford increased its share of the U.S. market to 23.6% from 23.4%. U.S. retail car sales totaled 2,662,926 up from 2,615,217 and truck sales rose to 1,365,718 from 1,214,622, giving Ford truck leadership.

U.S. sales were a record 4,028,644 cars and trucks, giving Ford 26.1% share of the market, up 0.3% from 1977. Ford division dealers deliv-



ered a record 3,256,580 cars and trucks and, in its first full year of sales, the compact Fairmont became the best-selling new car in the history of the industry. Fairmont's 422,690 sales topped the old record of 418,812 set by the 1965 Mustang.

■ Lincoln-Mercury division also had a record 1978 with sales of 772,064 cars against 711,872 in 1977. The Zephyr, a twin of the Fairmont, pushed the division to its best market share in history—6.8%.

The results were a swan song for Kenyon & Eckhardt, the L-M and corporate agency which resigned the account to take over the Chrysler Corp. business. After Lee Iacocca was fired as president by Mr. Ford, he joined Chrysler late in the year and early in 1979 spirited away K&E. It was the biggest account change in history.

Meanwhile Ford division and its agency, J. Walter Thompson, were having their problems. A dispute over billings placed the Ford account in jeopardy. A Ford audit turned up failure by the agency's sales promotion division to pass along volume credit discounts from suppliers as stipulated in the Ford contract.

A JWT art subsidiary also billed the parent agency at retail rates and JWT then added its commission thus taking a double billing. The result that JWT reimbursed Ford with a payment in the high six figures and the agency, with still another management change in its Dearborn office, folded the sales promotion division.

■ JWT weathered that storm, perhaps aided by K&E's resignation of the Lincoln-Mercury account which plunged Ford into a search for new agencies.

It all started when Mr. Iacocca had dinner with Leo-Arthur Kelmenson, K&E president. That resulted in Mr. Iacocca stealing Mr. Ford's agency for the $120,000,000 Chrysler account.

Dropped were BBDO for Dodge and Young & Rubicam for Chrysler-Plymouth. Both ex-Chrysler agencies and Ogilvy & Mather pitched L-M, Ford corporate and smaller Ford accounts held by K&E.

Y&R won L-M and Ford Parts and Service division and dark horse Wells, Rich, Greene got Ford corporate, Ford Motor Credit, Ford Land Development Corp. and Ford Glass division.

O&M not only lost out at Ford, but Mercedes-Benz fired them for pitching the account. The big switch stunned the Detroit ad community. K&E had been with L-M for 34 years; BBDO and Chrysler had 35 years, and Y&R was with Chrysler 21 years.

John Morrissey's move from Ford division to K&E came several months before the big switch. Mr. Morrissey, who headed JWT's team on the original Mustang and worked closely with Mr. Iacocca, joined K&E as exec vp and general manager of the Dearborn office. When David J. Gillespie stepped down as chairman, Mr. Morrissey succeeded him.

Things were smooth on the agency front when Ford kicked off the 1978 models. Even before the 1979 fuel pinch, mpg was the big item Ford division was selling. It said it would concentrate a lot of effort on the Fairmont as federal fuel economy standards tilted the market to the compact and intermediate segments.

Even then officials were predicting Fairmont would displace Mustang as the top first year car—a prediction that underscored the waning influence of Mr. Iacocca, "father of the Mustang."

The ABCs of the marketplace for the 1978 models were mileage, room and price, said Mr. Morrissey, then general marketing manager. Fairmont was the "Ford in your future."

Ads for another mpg car, the subcompact Pinto, stressed its performance against other subcompacts, and the compact Granada took on Mercedes-Benz—at least in the ads.

MARKETING PROFILES

Thunderbird pushed "style at a surprising price" and Mustang II, a Pinto at heart, went after the youth market. The still-big LTD made Ford the home of the whopper. Ford tested a 24-page preprint color insert in 250 college newspapers.

The two-door sporty Futura was launched a bit later in the model year to take on the intermediate specialty offerings of General Motors.

▪ The 1979 Mustang advertising tried to bring back "excitement, fun and pizzazz" to a market concerned with meeting mpg requirements. Ford didn't return to the original Mustang advertising because the market had changed—it no longer occupied a unique niche. The horse did come back as the car was billed as a "New breed of Mustang." The car was teamed with the newly downsized LTD in campaigns that included a newspaper supplement to 60,000,000.

For a change, Ford officials welcomed the gas mpg rules. "Nothing stimulates a market more than a change," said Walter Walla, general manager. The small car market was the "battlefield of the future," he said.

Pinto, under attack for gas tank fires, got a fix that hopefully solved that problem as well as an extensive facelift. LTD became "The new American road car." Fiesta, the German subcompact import, was "Wundercar" and Fairmont was dubbed "America's success car."

Ford truck advertising crowed about sales leadership. Thunderbird was airborne with "Come fly with me" and Granada continued jousting with Mercedes.

▪ Pinto sales, aided by a special campaign featuring price comparisons against imports and others, staged a modest comeback. Fairmont needed spring help as the whole compact market slipped. But long lines at gas stations quickly revived that market and sent the one for big cars like LTD into a tailspin.

With mpg becoming much more important than marketers were predicting in 1978, Ford changed its small car marketing stance for the 1980s. It scrapped plans to meet GM's new compact line head-on with its own front-wheel-drive Derby and decided to build Fiesta as a U.S. mini-car as well as come up with a replacement for the elderly Pinto.

The full-size Ford LTD was dethroned as the Ford division sales leader. Sales were first helped by its "last of the big car" marketing push and then hurt by the downsizing as buyers took time to accept the new model.

LTD sales came to 332,930, down from 380,499 the previous year, but the slack was taken up by Fairmont at 405,780, up from 167,841, and Mustang at 199,760, against 170,659 the previous year. Thunderbird was off a bit but still strong while Granada slumped by a third.

LTD II was hampered by a cutback in production capacity and Pinto's fuel tank problems that held 1978 sales to 167,880, compared with 220,775 in 1977.

Fiesta boomed to 76,145, almost double the 1977 sales of 40,549. In all, Ford division sales slipped to 1,890,862 from 1,903,345.

▪ Lincoln-Mercury started off early with the 1979 Versailles, the luxury compact aimed at the Cadillac Seville. It bowed a month ahead of the rest of the line with heavier advertising, particularly on tv with a Frank Sinatra song in the background.

L-M added actor Cliff Robertson as tv spokesman for the newly downsized Marquis, the LTD sibling. The car was lauded as "the most scientifically engineered Marquis in history."

Capri, the Mustang look-alike, retained its European background with "the sexy European" becoming "The sexy new '79 Capri, a miracle under $4,700." Capri no longer was imported from Germany. The car was aimed at domestic and import sporty car buyers and included a V-8 performance model that was to run into the fuel situation.

L-M made a virtue out of necessity when it launched the big Lincoln-Continental and Mark V as "the last of the breed" with a "Collector's Series." For 1980, those cars would be downsized. The long lines at the gas pump in the spring meant long lines of Continentals and Marks on dealer lots.

By spring, L-M was into a $3,000,000 campaign against the new GM compacts to push sales of fuel-efficient cars like Bobcat (Pinto), Zephyr, Monarch (Granada) and Capri.

L-M filled the air and magazine pages with the campaign that included special value packages. The six-week campaign was more intensive for its span than the fall launch.

▪ Lincoln-Mercury set a record with 772,064 unit sales, up slightly from 771,872 the year before, with the luxury personal XR-7 (twin of the T-Bird) the best-seller at 159,687. The full-size Mercury was next with 136,719, a drop from the 140,610 of 1977.

Zephyr, like Fairmont, was a success story with sales of 120,781, up from 42,234, while Lincoln and Mark V were contained only by capacity and finished slightly higher than the previous year.

There were no big surprises in Ford's measured ad spending. A 75th anniversary network telecast was swallowed up in the $110,798,500 the automaker spent on tv, up from $94,119,100 the year before and the biggest single media expenditure both years. Network outlays accounted for most of it.

Newspapers again topped magazines—$27,209,700 to $23,744.900. Spot radio dipped to $6,475,000 from $7,568,000.

Again the Ford division accounted for the lion's share of the budget with a total of $142,199,200, of which $116,879,100 was measured and $25,320,100 unmeasured. Last year, the total was $115,258,700, with $93,901,700 measured and $21,357,000 unmeasured.

Network tv was the only big gainer, going to $55,896,900 from $46,171,000. Newspapers stayed even, $19,109,700 to $19,053,300, and magazines slipped to $18,951,400 from $19,691,600. Radio also fell, to $5,827,500 from $7,008,000.

▪ Lincoln-Mercury's total of $63,231,600 was up substantially from the $52,245,300 of 1977, with the big increase in tv. Expenditures on the tube totaled a measured $37,035,500, up from $31,080,400. Magazines got $4,705,600, down from $5,132,100.

Of L-M's totals, $50,590,400 was measured in 1978 against $44,667,300 the year before.

But Ford was spending well in non-car campaigns as well. The company's 75th anniversary was marked by a two-hour tv special that was interrupted five times for commercials—some as long as 3½ minutes. Bill Cosby, the corporate spokesman, delivered the message in that and in "Ford wants to be your car company" commercials.

Ford Parts and Service division backed an optional service contract with an $8,000,000 ad campaign. Ford had been operating the program for two years without much fanfare, but when GM broke its 36-month plan, Ford cut prices and went to bat. The price reductions were centered around small cars to help them stave off import competition.

Ford Life Insurance Co. moved into major media, stepping up direct mail to 20,000,000 pieces and tying that to market-by-market newspaper support. Ford Life concentrated on credit insurance for auto loan borrowers.

Ford Parts and Service and a group of Detroit area auto parts wholesalers got together in a program to advertise Motorcraft parts. Ford started marketing sparkplugs under Motorcraft rather than Autolite.

General Electric Co.

	1978	1977
Sales	$19,653,800,000	$17,518,600,000
Earnings	1,229,700,000	1,088,200,000
Advertising*	121,294,400	112,210,300

***AA estimate**

General Electric Co., Fairfield, Conn., the 31st largest advertiser in the U.S., increased its domestic advertising spending by an estimated 8% in 1978 to $121,294,400. The company reported total worldwide ad spending of $247,400,000, a 13% increase over 1977.

Bigger media outlays for certain GE consumer products, notably home air conditioning and heating systems and GE food processors, contributed to the increase.

But the biggest single boost was for general promotion, which the company increased by more than 66%. This was tied to special anniversary advertising as 1978 was GE's 100th year in business. GE's centennial ad efforts included a corporate magazine campaign introduced in the fall; a two-hour prime time ABC television special in addition to regular programing, and a series of GE customer dinners in which actor Pat Hingle portrayed Thomas Edison.

GE won a CLIO award for best corporate commercial for a related ad in which Mr. Hingle as Edison explained the outdoor lighting used for the 1927 Tunney-Dempsey fight.

▪ But the company didn't make bigger media outlays across the board. Although it boosted its magazine budget by $8,330,400, it trimmed its television expenditures for the year by nearly the same amount. Network radio was slashed a full 86% to only $176,400.

In 1978, GE began to reap the benefits of the major restructuring it completed in 1977. Sales of GE products and services rose 12% to $19.65 billion and earnings hit a record high of $1.23 billion, a 13% increase.

Six operating sectors, each headed by its own executive, freed top management from a burden of details and the company says it is now tapping new growth sources including new types of products, man-made materials, natural resources and business services.

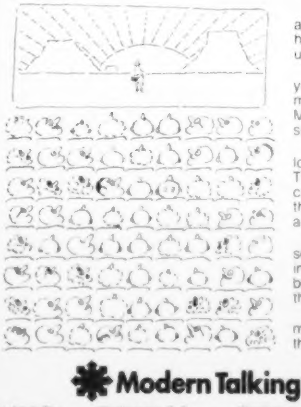
Consumer products and services, by far the most significant sector in terms of large advertising outlays, contributed 23% of total GE revenues and 30% of earnings. Its revenues amounted to $4.86 billion and its net earnings to $377,000,000.

▪ Each of the 10 individual product lines on which GE spent in excess of $1,000,000 in ad dollars in 1978 were in the consumer products and services sector.

These included GE color television sets, $4,859,500; GE food processors, $3,708,400; GE dishwashers, $2,209,400; GE microwave ranges, $2,043,800; GE washers, $1,758,800; GE microwave ovens, $1,712,400; GE home light bulbs, $1,538,800; GE refrigerator-freezers, $1,442,700; GE home air conditioning and heating systems, $1,179,400, and GE portable hair dryers, $1,012,600.

The company also spent $4,987,300 on multiproduct advertising, a portion of which included rebates on about 30 small appliance products from the consumer sector.

New consumer products introduced during 1978 included the Widescreen 1000 Home Television Theater, the Spacemaker micro-



When America goes to the movies your sponsored film will be there.

Americans are going out to the movies again. By the hundreds of millions. And this huge audience brings with it very desirable, upscale demographics.

That's a tremendous opportunity for your company's sponsored films. Because more and more movie theatres are turning to Modern for interesting shorts to fill out their screenings.

As the world's largest distributor of free-loan motion pictures, we've got what it takes. Through our on-line computer system, we're currently scheduling shorts into over 6,000 theatres, resulting in about 500,000 showings a year.

We know how to help you, too. Our research surveys, for example, answer many important questions: How long should the short be? What are the most wanted subjects? Do theatres want lobby posters?

So be there when America goes to the movies. Ask Modern all about it by calling one of the offices below.

wave oven, Maxi-Miser and Soft White fluorescent lights, a halogen sealed-beam automobile headlamp, the Curl Tamer hair straightener, a new food processor with an attached blender, the His 'n Hers electronic digital clock radio and a digital scale that computes weight electronically.

▪ Industrial products and components accounted for 20% of total GE revenues and 18% of earnings, with revenues rising to $4.1 billion and net earnings to $223,000,000.

GE held its position in 1978 as the leading supplier of small electronic motors, controls and other components to the air conditioning and appliance industries. New products introduced in 1978 included a computer lighting control system, and limit switches that seal out environmental contaminants.

The power systems sector contributed 17% of total GE revenues and 8% of net earnings, with revenues of $3.5 billion and net earnings of $102,000,000. New products included an automatic meter reading system and a time-of-day watt hour meter for consumers whose electric rates vary by time of day.

Technical systems and materials contributed 22% of total GE revenues and 23% of earnings, with revenues of $4.7 billion and net earnings of $278,000,000. The sector entered the commercial avionics market in 1978 and won a good portion of its revenues from commercial jet engine orders from Delta and American Airlines.

▪ Natural resources, the sector which is managed by and consists primarily of Utah International Inc., contributed 5% of total GE revenues and 15% of earnings, with revenues of just over $1 billion and earnings of $180,000,000 an 8% decline from 1977's record high.

The remaining 13% of GE's total revenues and 6% of earnings was contributed by the international sector, with revenues of $2.77 billion and net earnings of $78,000,000. The sector works with the other sectors to develop and implement their international business strategies and manages multi-industry foreign manufacturing affiliates. Advertising spending by this sector is included in the worldwide figure reported by GE, but not in the domestic figure.

GE's television business department in 1978 assigned its tv hardware advertising to BBDO, New York, already GE's corporate, lamp and household appliance agency. The $5,000,000 account had been split between Grey Advertising and Lawler, Ballard & Little.

BBDO also picked up the $1,200,000 account of the GE Credit Corp. after GECC terminated a 16-year relationship with Riedl Associates.

▪ Despite the introduction of the Widescreen 1000 Home Television Theater in 1978, GE did not appreciably increase its advertising budget for color television during the year. Reportedly, the company did not make any money at all in color television.

It proposed a merger with Hitachi Ltd. of Japan in 1978 to strengthen its market position, but the Justice Department squelched the move in November as a violation of antitrust laws.

Advertising for GE's tv line will probably become more visible this fall, due to an approximate 15% budget increase with its new agency, BBDO. The company spent about $4,250,000 in 1978 through Grey Advertising.

Known in the past for its expertise in producing small, portable tv sets, GE is expected to focus its future marketing strategy on the larger tv screen sizes like the Widescreen 1000.

GE continued to maintain its dominance in the $500,000,000 light bulb market in 1978. It fought the introduction of Turtle-Lite, a new long-life bulb from competitor Westinghouse, through a series of magazine ads, and managed to retain about a 65% share of market.

▪ Following a stated company goal to stress innovation in its appliance lines, which account for about 40% of consumer sector earnings, GE came out with an improved Potscrubber III dishwasher in 1978 that featured 10 patented energy-saving inventions.

A dishwasher duel shaped up between GE (which has about a 22% market share) and Maytag (5%), which both fought to pick up the 18% market share owned by Hobart.

In 1979, GE's major appliance group invited BBDO to contribute to the tv portion of the Potscrubber III campaign on a special assignment basis. Young & Rubicam, however, which developed the tv and print campaign, will continue to promote the dishwasher, which had a 1978 budget in excess of $2,000,000.

Increased housing completions during 1978 and related strong demand for central air conditioning in new homes was a major factor in the sharp earnings improvement GE experienced in its air conditioning and heat pump business.

GE nearly doubled its ad spending for these products in 1978 and its Weathertron heat pump is now the No. 1 brand on the market. GE expects the heat pump business to grow in 1979 and it now has more than a 40% market share of the $500,000,000 business.

▪ As GE economists predict a flattening of the economy in 1979, the company is looking to increased service businesses as a new growth source. During 1978, GE agreed to buy Cox Broadcasting, one of the largest independent chains of tv and radio stations.

Added to GE's existing broadcast services, the Cox purchase would make GE the third largest in cable tv operations. GE and Cox reached a "definitive agreement" for combining operations in 1979 and completion of the deal awaits corporate and government approval.

after dinner treat.
GENERAL ELECTRIC

More than $2,200,000 was spent to advertise General Electric Co.'s line of dishwashers.

GE and competitor Norelco were among the companies moving into the booming home security market, which traditionally has been served by expensive built-in systems. GE is introducing an ultrasonic alarm called Zonar, which will retail for $69.95 in 1979.

†For the fiscal years ended April 1, 1979 and 1978
*AA estimate

General Foods, White Plains, N.Y., the 3rd leading national advertiser, boosted advertising 13% to an estimated $340,000,000 in 1978, a year when it resumed balanced growth between two major divisions, grocery coffee and food products.

Worldwide, GF spent $372,770,000 in advertising in its fiscal year ended April 1, up 11% over the previous year. GF sales worldwide continued to grow, to $5.5 billion, up 1.8% over the previous fiscal year. Earnings increased to $232,100,000, up 37%.

As it registered its best year ever in fiscal '79, GF stated that its recovery in the grocery coffee market was largely responsible for its profit growth.

Packaged convenience foods, 48% of GF's total sales, also scored well, but GF found that inflation was cutting into some of its food-away-from-home business and other U.S. grocery items.

▪ GF's products are classified in three segments: Packaged convenience foods, which recorded sales of $2.6 billion in 1978, up 5.6% from $2.47 billion the year before; food-away-from-home, which showed sales of $737,865,000, a 2.6% decline, due chiefly to lower selling prices for food service coffee and grocery coffee, which brought in $2.1 billion, a 1.1% decline.

GF again gave heavy measured advertising support to its big sellers, Jell-O gelatin dessert, at $12,000,000; Kool-Aid powdered soft drink mix, $19,000,000, and a combined coffee advertising total of $48,356,200, almost half in support of the Maxwell House line.

Until recently, Maxwell House regular coffee led major rival Procter & Gamble's Folger's. But toward the end of 1978, for the first time, Folger's took the lead in ground roast coffee sales with 26.5% of the market, compared with Maxwell House's 22.3%.

In the regular coffee market, Maxwell House has a 22.3% share; Sanka, 2%; Yuban, 2%; Max-Pax & Brim, 3.5%, and Mellow Roast, 1.8%. GF still leads in the instant coffee market with its Maxwell House at 24%; Maxim, 4%; Sanka, 10%; Yuban, 1.3%; freeze-dried Sanka, 2.5%; Brim, 3%, and Mellow Roast, 3.5%.

▪ In light of the fierce coffee competition between GF and P&G resulting from P&G's invasion of GF's East Coast market, the Federal Trade Commission hit GF with a suit alleging unfair competition in its coffee advertising.

The basis of the FTC suit involved stepped up competition between Folger's and Maxwell House. GF is accused of using predatory pricing and heavy ad and promotion budgets to maintain monopoly power in the Northeast. The case is still pending.

Mellow Roast coffee went into national distribution in 1978, backed by an estimated $9,010,500 for the Mellow Roast instant and regular advertising. GF also entered the economical ground coffee sweepstakes with Master Blend. The new product was tested in Dallas, Detroit, Houston, Buffalo, New York and Charlotte, N.C.

There were signs Mellow Roast was not doing as well as anticipated and therefore the development of Master Blend, thought to be the answer to P&G's Folger's Flaked coffee, also an economy ground.

Other new products introduced were Mocafa, an instant coffee with a chocolate taste; ground roasted Postum, a caffeine-free grain beverage, and Irish Mocha Mint, a new flavored coffee.

▪ GF continued to enjoy success in the powdered soft drink market. In '78, GF went into test markets with Shiver, a presweetened drink mix in chocolate and strawberry flavors. Advertising support was $1,000,000.

GF further expanded its soft drink line by test marketing Crystal Falls, a vitamin and mineral fortified drink. Spending last year was $805,000.

Kool-Aid soft drink advertising exceeded $19,000,000 in '78 with funds helping market new 12-oz. cans for the drink. TV and print ads carried the slogan, "Things are so much summer with Kool-Aid in your day." Kool-Aid is considering marketing two new powdered flavors; grape and cherry, in 15-oz. canisters.

While Kool-Aid is the leading soft drink mix with a 45% share unsweetened and presweetened, it is followed by GF's Country Time, the nation's leading lemonade mix, holding a 9.5% share of the market total.

Country Time is ahead of Hawaiian Punch and Wylers (all flavors) with their 9.2% and 8.8%, respectively. GF expanded the Country Time line by adding ready-to-drink lemonade drink in cans, frozen concentrate, unsweetened lemonade mix, iced tea and apple cider versions. The Country Time ad budget was $7,000,000 last year.

Tang instant breakfast drink first marketed 20 years ago, continued to be successful. GF put th drink in decorator jars, with cents off coupon ad support. Advertising spending for Tang was $10,182,900 according to Leading National Advertisers Inc.

GF is making headway towar its goal of a carbonated powdere soft drink and believes it will soon have a product in that area. GF has already entered the carbonated foods field with its highly successful candies, Pop Rocks and Cosmic Candy.

▪ The company also tested a carbonated gum product, Increda Bubble Bubble Gum, in a small market in the Northwest and changed the name of Space Dust to Cosmic Candy to disassociate the product from the illegal drug angel dust. Ads for the carbonated candy call it "unique, fun and exciting."

Citing stiff competition within the Beverage and breakfast foods market, GF expressed pleasure with consumer acceptance of C.W. Post family style cereal, which entered national distribution. Log Cabin pancake and waffle mix was a new product brought out as a companion to Log Cabin syrup. The ad budget was $4,405,400. Combined cereal advertising was a reported $31,591,700.

GF, the cold cereal market's third leading manufacturer, registered a total 16% share in dollar sales, with leading brands Post Raisin Bran netting a 3.5% share; Post Grape Nuts, 2.4%, and Post Sugar Crisps, 2%.

▪ In the packaged desserts area, GF extended the Jell-O brand line to include apricot flavor gelatin and butter pecan instant pudding & pie filling. Jell-O ad spending reacned an LNA-measured $17,937,200 with $14,078,200 of it in network tv.

GF spent $12,126,000 on its Jell-O gelatin dessert, $1,580,000 on Jell-O instant pudding & pie filling and $5,811,200 for Jell-O pudding & pie filling. Cool Whip frozen whipped topping continued its success with an estimated ad total of $8,286,300.

The packaged convenience foods division found itself pressured by the inflationary grocery market situation. While net sales rose 5.6%, earnings declined 10.3% as selling price increases were unable to offset lower volumes and company expenditures.

GF's main meal brands—in particular Shake 'n Bake, with measured ad support of $15,042,600; Stove Top Stuffing, $10,796,900, and Good Seasons salad dressing, $6,795,100—all performed well in sales.

New items tested were Good Seasons French and buttermilk farm style salad dressing mixes, four new flavors of Shake 'n Bake sauces and, in limited areas, Birds Eye International recipe rice products.

The 1977 restructuring of the Birds Eye line of frozen food is credited with reducing operating costs and improving earnings. The Birds Eye line of Americana recipe vegetables, backed by $2,757,200 in measured advertising last year, went national in '77 and is reported by the company to be doing well.

GF went national last year with Oven Fry coating mix, a product that allows the preparation of fried chicken in the oven with the use of only a little oil. Print and tv ads announced, "Tastes fried because it is fried." Ad support was estimated at $693,000.

In the pet foods division, GF backed its Gaines Full Course dry dog food wtih real meat with the message, "400% better taste than the leading dry." The ad noted the dry entry dog food product had "moist chunks made with real meat." Total measured advertising for the Gaines dog food line was $19,244,900.

GF's Cycle is in sixth place in the canned dog food product line, in terms of annual retail sales. Cycle canned dog food approached $45,000,000 in retail sales, up $5,000,000 from 1977.

In dry dog food, the company takes 8th and 13th places, respectively, for its Cycle dry and Gaines Meal.

■ In the moist dog food area, GF has three entries, Top Choice, second with an estimated $80,000,000 in sales; Gainesburgers, third, with $70,000,000; Gaines Variety, sixth, at $22,000,000, and Prime/Puppy Choice, seventh, at $17,000,000. GF's Gaines Biscuits & Bits is believed to rank fifth in the snack dog food category.

Over-all GF stands third behind Ralston Purina and Carnation in the pet food market, holding an estimated 11% share. The company considers pet food an area of growth and is seeking better representation in the dry market area.

Under the company's food service products division, GF's Burger Chef continues to operate at a loss, but the company remains optimistic about its growth potential. Net sales declined 2.6% with a 7.8% earnings increase mainly from the company's Canadian restaurants Crock & Block, the White Spot chain, Ernie's Fine Food and the 1867 restaurants.

■ Burger Chef ranks tenth among fast-food chains with an estimated 2.2% market share. The renovations were announced through an ad campaign almost wholly placed in spot tv. Ad expenditures were measured at $4,547,500 in spot tv and $48,000 outdoor.

General Mills

	1978	1977
Sales	$3,745,000,000†	$3,243,000,000
Earnings	147,000,000†	128,800,000
Advertising*	170,000,000	160,500,000

†Fiscal year ended May 27, 1979
***AA estimate**

General Mills, Minneapolis, the 14th largest national advertiser, boosted ad spending about 6% in 1978 to an estimated $170,000,000. For the fiscal year ended May 27, 1979, the company reported total ad spending of $189,000,000.

Sales in fiscal 1979 increased 15.5% to $3,745,000,000 and earnings were up 14.1% to $147,000,000.

Although 1978 was a flat year for ready-to-eat cereals, dollar volume was up 7% over the previous year. Presweetened cereal sales declined modestly, perhaps due in part to consumer concern over the nutritional value of the presweetend children's cereals.

The Federal Trade Commission has been holding hearings to consider a possible ban on advertising of sugared cereal for children. The FTC has also been investigating General Mills and other cereal manufacturers with an eye to calling for divestiture of certain holdings.

■ One of the more successful newcomers to the Big G breakfast products operation is Golden Grahams. The cereal captured 1.3% of the cold cereal market in 1978 after gaining a 1% share in 1977. Measured ad spending for the bite-size cereal increased to $5,990,000 as the cereal reached full national distribution.

Cheerios kept a solid lock on its No. 1 position as the nation's leading cold cereal with a 6.1% share of the total dollar market and a 5.8% share of the pound volume market. General Mills slightly decreased Cheerios' ad budget in 1978.

A new variety of Cheerios, Honey Nut, went national in mid-1979. Lucky Charms presweetened cereal got a boost from a promotion of Star Wars toys in conjunction with the company's Kenner Products division.

The Betty Crocker line of cake mixes continued to receive heavy advertising support in 1978. Facing increased competition from Pillsbury Co. in the area of cake and brownie mixes, General Mills increased its ad spending for the Betty Crocker dessert line.

The measured ad spending for the 18-flavor line of Super Moist cake mixes exceeded early estimates, reaching $6,247,000 in 1978.

■ Gold Medal flour sales volume fell slightly as the over-all market for flour dropped 5% in 1978. But Gold Medal continued as the leader in the $350,000,000 flour market.

Bisquick baking mix continued as the leader in its market, with record volume gains over the previous year and measured ad spending totaling $1,924,200, while Bisquick buttermilk baking mix received $897,000.

Consumer demand for convenience foods helped boost sales of Betty Crocker Mug-O-Lunch mix. The three-flavor line of instant hot meals rolled national in August, 1978. Hamburger Helper and Tuna Helper skillet dinners increased sales in 1978 after the company shifted the product image from an economy item to a convenience food.

A busy mom can make Hamburger Helper in minutes.
And kids take seconds.
When you need a helping hand.

Hamburger Helper saw increased sales in 1978 after General Mills changed the product's image from an economy item to that of a convenience food.

In October, 1977, General Mills completed a deal with the French company Sodima to market and manufacture Yoplait yogurt in the United States. The product, from a Midwest market base, is currently being expanded into West Coast markets.

This move will put Yoplait into about half the United States. General Mills said Yoplait "is doing well in market share—about where we expected it to be at this time."

■ In General Mills' restaurant operations, Red Lobster Inns of America—a chain of seafood restaurants—led the way with increased sales and earnings. Red Lobster opened nine units in 1978—behind the previous year's 28 openings.

One Red Lobster restaurant closed. Ad spending skyrocketed from $7,217,200 in 1977 to $11,460,000 in 1978.

York Steak Houses, in its first full year after General Mills acquired it in 1977, expanded into more states. Regionally concentrated advertising totaled $339,000.

As in 1977, the crafts, games and toys division of General Mills enjoyed record success. Sales increased 23.8% to $610,000,000 behind a worldwide demand for Kenner's line of Star Wars toys. Parker Brothers, led by Monopoly and other board games, did well.

General Motors Corp.

	1978	1977
Sales	$63,221,100,000	$54,961,300,000
Earnings	3,508,000,000	3,337,500,000
Advertising	266,346,000	235,346,100

General Motors Corp., Detroit, the 4th largest national advertiser increased 1978 advertising expenditures by 13% to $266,346,000 from $235,346,100 in a year it called one of "extraordinary achievement."

It was the best year ever for giant GM which "outperformed the industry as a whole in almost every category," said chairman Thomas A. Murphy. Dollar sales, profits, and unit sales were records for the third straight year.

Sales came to $63.2 billion up from the previous record of $54.9 billion in 1977. Earnings of $3.5 billion easily topped the 1977 high mark of $3.3 billion.

Vehicle factory sales worldwide were a record 9,482,000 or 5% above the 1977 record. U.S. sales of cars climbed to 5,292,000 from 5,259,000 and truck sales hit 1,586,000 from 1,436,000. GM got 48% of all U.S. car sales, 41% of all trucks and buses for a total of 46% of the vehicle market.

Buick, Oldsmobile, Pontiac and Cadillac divisions set sales records and Chevrolet set one for combined sales of cars and trucks. GMC Truck & Coach also had record truck sales. Chevrolet continued as the best-selling car nameplate.

■ Timing was the secret sales weapon along with hard selling. With the big car downsized for fuel economy in model 1977, GM shrank its intermediates for model 1978.

After a few stumbles, the intermediates moved well, paving the way for the best-timed cars of recent years—the downsized compact X-bodies which hit the showroom as 1980 models just as a gas crunch started. Even the downsized luxury personal cars gained quick acceptance.

GM's ad expenditures kept pace no matter what yardstick was used. Measured expenditures were $266,346,000 up from $235,346,100. Chairman Murphy told the annual meeting that model year, as distinct from calendar year, outlays were $240,000,000, up from $225,000,000, a hike he characterized as "modest, not very much at all."

The biggest increase was in tv, the largest GM media category. Measured expenditures rose to $132,899,600 from $117,447,800 or by some $15,000,000 with the increase coming solely in network buys. Spot dropped off $1,700,000 or so.

The biggest percentage gain was in spot radio to $20,202,000 from

BEST AVAILABLE COPY

MARKETING PROFILES

$15,928,000 with most of the increase from Chevrolet's massive radio push in the fall of 1978. Magazines rose some $12,000,000 to $56,305,300. Newspapers were steady—$46,702,900 compared with $47,504,900.

▪ Chevrolet, as usual, spent the most and sold the most. Ad expenditures were $116,051,100, up just slightly from the year before. Car sales rose to 2,349,781 from 2,280,439, but trucks carried the day, setting a Chevy record with 1,340,259, up from 1,205,882. The combined total was a record 3,690,040 vehicles, compared with 3,486,321 in 1977.

There were soft spots in Chevy sales. The big Chevrolet dropped to 621,140 units from 657,151. Nova, an old compact, fell to 248,214 units from 312,135 and Monte Carlo, a downsized specialty intermediate, lost sales as well as weight—355,058 units to 370,825. Malibu, the companion intermediate, gained sales to 374,124 from 296,193.

The Chevette and Monza subcompacts got a lot of special attention and sales responded. Chevette rose to 247,088 units from 196,218 and Monza climbed to 158,127 from 157,226.

▪ Malibu got star billing as the 1978 wars opened in the fall of 1977. It and Monte Carlo got 30% of the introductory ad dollars. The old "See the U.S.A. in your Chevrolet" tune was revived with "See what's new today in a Chevrolet."

By December, GM and Chevy saw the new intermediates weren't making the anticipated sales splash. The result was GM kept the intro campaigns going into the new year.

The pitch was switched from appearance to product features but the real culprit was a muddle in the mid-size market. Distinctions between compacts and intermediates became blurred—the GM intermediates were as big as its own compacts but smaller than other companies compacts and other intermediates were bigger than GM's full-size cars.

Malibu sales dropped more than 10% and Monte Carlo was off 9%. "This has been a learning period for consumers," said Thomas A. Staudt, marketing director who in early 1979 was to defect to American Motors Corp. But then he said, "Consumers have to interpret a whole host of new brand names and entries as the compact and intermediates grow closer. It's a search and sorting process."

▪ A few weeks later, GM decided the intermediate sales malaise of all its divisions had gone far enough. It mounted a corporate ad campaign after President E. M. Estes admitted, "Maybe we were too cocky going into the 1978 model year. There's no question we weren't working nearly as hard as we had been a year earlier."

A total of 100 daily newspapers were used along with 30 and 60-second commercials in prime time and early evening hours. The campaign hit at fuel economy, room and handling ease.

Chevrolet also stepped up its ad allocation from the intro 30% of budget to well above that using heavy radio, direct mail, Sunday supplements and more tv. Malibu got a fix, picking up the old "Baseball, hot dogs, apple pie and Chevrolet" theme song. It worked as sales started to climb in March.

Chevrolet didn't spare the horses when it came to introduce the 1979 models in the fall of 1978. Monza was the center of "National Chevy Week" and Chevrolet mounted the most intense radio effort ever in such a short time.

With no new cars to introduce, Chevy spread the rest of its effort across the line. The full-size Chevrolet was acknowledged as the top-selling nameplate with "America has driven it to the top." Malibu continued the spring strategy as a "fresh new slice of apple pie." Monte Carlo got more print exposure stressing elegance and performance.

Nova, the doomed compact, again traded on its use as a police car before it was phased out for the X-body Citation in the spring of 1979. Camaro, the sporty subcompact with a good track record, became an "image" car and for the first time Chevy four-wheel-drive trucks were advertised separately.

Chevette, meanwhile, got ad attention as funds were diverted from Monza and other good-selling lines after the first of the year. Chevy pointed out it was the best-selling subcompact.

▪ Oldsmobile cracked the 1,000,000 mark in sales—1,006,344—in 1978, a year which saw its mainstay Cutlass drop slightly in sales. Cutlass had 520,279 sales, down from 527,939. Olds along with Buick was doubly encumbered with downsized intermediates that in standard versions had an aeroback or roofline that swept unbroken to the rear bumper.

Buyers weren't confused in this part of the mid-market. They didn't like the styling. Despite this, Cutlass managed to hold its own while sales of the full-sized Delta 88 and 98 increased to 396,815 from 349,403.

Olds' marketing strategy for Cutlass helped. There wasn't just one model but a whole flock, each aimed at a different buyer. The Supreme Brougham was a "retreat into luxury"; the Calais was the "sophisticated sport" and the Salon (the slope back) was designed for function and economy.

Omega was seen as a refuge for those who rebelled against the aeroback, but the big money—about half of the intro budget—was on Cutlass. The use of fringe time was boosted to improve cost efficiencies; magazines got more play and spot radio held even.

There was an eight-page color newspaper supplement that had a circulation of 41,000,000. The Olds diesel got off with a substantial campaign that had to be cut back because of manufacturing delays.

▪ In all, Olds spent $34,090,400, up from $27,221,600, with the largest chunk and biggest increase in tv. Olds spent $14,689,600 on tv, up from $8,946,900. Magazines went up as Olds told the engineering story. Expenditures were $8,919,600, up from $7,778,100.

Olds was still optimistic as the first quarter of 1978 opened. The aeroback was targeted more firmly at the import buyer and the low-end compact buyer and the ad heat was kept on. By spring, voiceover tv commercials were taking on imports head-on in what was called a second season.

GAS
GAS
GAS
THERE HAS NEVER BEEN A BETTER TIME TO OWN AN OLDS.
Oldsmobile

GM's Oldsmobile sold 1,000,000 cars in 1978, even though its Cutlass dropped in sales. Oldsmobile spent $34,090,400 in 1978.

Olds spent more ad dollars in the third quarter than it did to introduce the 1978s. Olds rolled out an old model name the Holiday 88 coupe to attract those still shying away from the aerobacks. A Firenza model was added to the lackluster subcompact Starfire.

▪ Olds came into model 1979 sadder but wiser. Cutlass models were grouped in one commercial that hit again on "Cutlass is different cars for different people." The Delta 38 was segmented as a family car and 98 got the line, "Of the world's luxury automobiles, it could be your most logical choice." It was advertised only in upscale books. Omega went overseas for background magazine shots in a continuing attack on imports.

Buick also had the handicap of the aeroback intermediates—the Century in its case—but sales of the downsized car increased to 323,356 from 279,657. The full-size Buick, LeSabre and Electra dipped to 312,119 from 323,860 while Buick's compact Skylark stayed even.

Buick raised its ad outlays significantly as it aimed at the younger buyer. Ad outlays climbed to $44,252,400 from $31,502,500. The biggest increase was in network tv to $19,668,500 from $11,154,500.

Buick went after the younger buyer who wanted more luxury and it did it with turbo-charged engines on the intermediate Regal coupe and standard LeSabre. Turbocharging delivers gas economy and performance and Buick headlined everything with "A little science, a little magic."

The science was the turbo and the magic was the new styling. Electra, the top of the line; Riviera, a personal luxury car off the Electra and LeSabre repeated the story of their downsizing—luxury without sacrificing room.

Skylark was an "intelligent" compact and Skyhawk was given a sporty personality for the subcompact market. Skylark was also the second best selling GM compact next to Chevrolet's Nova.

Buick's idea of a spring tonic was to replace its normal scatter prime time tv buy with a lineup of specials. The March blast was the highest for any March, the company said. Magazines also got a strong campaign and a month-long radio buy was made on the networks.

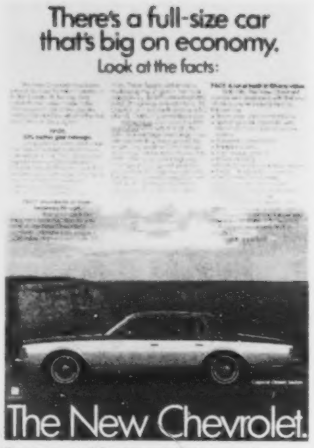
▪ The Buick intermediates weren't suffering as badly as those of Olds but they still got reinforcement. The turbo equipped models were in short supply and Regal ads also started promoting mpg. At about the same time, Buick hired actor Glenn Ford as a spokesman despite his competitive surname. But Mr. Ford didn't get his name on the screen, all the same, thank you.

Opel, the only captive GM import, received a spring campaign that stressed its parentage with "If you're looking for a great Japanese car, look for a great American name. Buick." It was the valedictory for Opel. Isuzu Motors Ltd. of Japan stopped exporting Opel to Buick in mid-1979 to set up its own distribution network.

Buick had the newly downsized Riviera in the fall of 1978. The car shed its Electra lines and joined the Olds Toronado and Cadillac Eldorado on a front-wheel-drive chassis. The Riviera became a "halo car"—one that attracts attention and people into showrooms.

▪ Over-all, the emphasis was on fun. "Psychographic surveys indicate that people are very much concerned with how they're going to enjoy their life style and appreciate the fruits of what they have earned," a Buick adman said.

The theme became, "After all, life is to enjoy." Buick was back with the turbo this time in a Century Turbo coupe with performance axle, spoilers and blacked-out trim. GM backed the Riviera, Eldorado and Toronado with a special corporate campaign talking about engineering features.



General Motors' Chevrolet retained its position as the best-selling car nameplate, backed by ad spending of $116,051,100.

Pontiac made its downsized intermediates, LeMans and the specialty Grand Prix, the stars of its 1978 intro. The theme used science-fiction backgrounds of galaxies, but the aim was simple. "We are going to push through the noise of the introductory period with our biggest media blitz to fight to get our story out," a Pontiac marketer said.

It included a tv network barrage, network radio, spot tv, radio, Sunday supplements, direct mail and outdoor. When the year closed, Pontiac had increased its ad expenditures to $33,544,500 from $27,543,400 with the biggest boost in network tv—to $12,603,500 from $8,624,300.

Magazines gained to $6,082,700 from $4,119,300, while other media held steady, except for outdoor which was cut to $199,200 from $1,428,600.

▪ The results were mixed with the intermediates. LeMans outdrew its predecessor model 125,020 to 73,061. The 1977 LeMans "didn't get one line of factory advertising," Pontiac said.

Grand Prix fared less well, dropping to 224,195 from 235,833, which was still good enough to retain its position as Pontiac's best-seller. Phoenix dropped to 58,280 from 72,520. Total sales rose to 896,980 from 808,467.

Pontiac's two subcompacts, Sunbird (Monza) and Firebird (Camaro) did well. Firebird rode a pre-gasoline crunch wave of performance cars to sales of 188,212, up from 137,807, and Sunbird, plugging mpg, moved up to 91,737 from 90,483.

When things started slowing down around the first of 1978, Pontiac leapt in with "Price our Pontiacs" price ads on LeMans and Grand Prix. Also featured were the regular Pontiac Bonneville and the Sunbird.

By fall the largely unchanged 1979 models needed a new image. "The market is going to smaller cars. Our image has always been the medium-price bigger car and we've got to adjust," said James Graham, director of merchandising. "Sunbird is where the future is. We think we are viable to go after the import market."

So Pontiac reduced the Sunbird price and added more equipment and launched a campaign, "More Sunbird for the money." The price reduction and special campaign were similiar to the National Chevy Week for Monza.

▪ The successful Firebird, a car that seemed dead a few years before, was the "halo" car for Pontiac. It got more ad dollars behind its "muscle car" versions to rub off the performance image on the rest of the line.

An eight-page magazine foldout had the Firebird on the cover with the legend, "A new breed of wow"—Ford's new Mustang was just plain "New breed." The rest of the line went under "Our best get better."

Cadillac, with downsizing behind it and nothing new in model 1978, concentrated on image with "Behind the great name, a great car." It found its own youth market—couples earning $40,000 plus.

Cadillac sales and ad expenditures were tasteful. Sales rose nicely to 350,813 from 335,785 with the Seville, the compact Caddy, the regular Cadillac and the personal luxury Eldorado all moving up.

Ad outlays increased decorously to $14,208,700 from $12,208,000. Network radio was the big gainer going to $260,200 from $150,500. More was spent on newspapers and magazines—$6,631,800—than tv—$5,683,400.

By the summer, Cadillac was trying to warm up the market for the diesels it needed to get respectable mpg. The radio-only campaign promoted the diesel although then it was only available on 1,500 Sevilles. The 1979 models were due to get diesels and Cadillac wanted to smooth the way.

▪ Cadillac believed its downsizing had sunk in and was predicting great things. The Eldorado, it was thought, would appeal to a broader segment of the market with its downsizing. It became (that word) "the new breed of Eldorado."

But Cadillac did have a problem—the new Eldo was the same size as the Seville now. "We hope they will appeal to different buyers," a Caddy adman said. Eldorado stressed styling and roadability and the Seville, comfort and elegance.

GMC Truck & Coach division started off its 1978 model year sounding like one of the car divisions. It wanted to cash in on the popularity of light trucks for personal use. The line was "Realizing your next car should be a truck."

GMC didn't ignore its heavy duty stuff either and used "Get truckin'. Get a GMC." The results in 1978 were a record 351,257 trucks sold, up from 292,921 in 1977. Ad expenditures increased to $3,912,300 from $3,170,100 but the mix changed when the 1979 models went on sale.

Ad outlays were increased and the division turned to tv for the first time in several years. Network tv expenditures went to $892,500 from zero, most of it on Monday Night Football. Network radio, the mainstay previously, was cut back to $223,100 from $485,300.

▪ GM started losing some of its top marketing personnel to other companies. James Bostic resigned as Oldsmobile director of marketing to join Toro Mfg. Co.; Christine Meyers left Pontiac as ad manager to become Detroit ad manager for *Penthouse;* Don E. Parkinson moved into her job from the field; Tom Staudt left Chevy as director of marketing to join AMC as vp-marketing group; David J. Van Peursem who took Mr. Bostic's place at Olds left to join AMC as general manager of marketing.

Within GM, L. D. Robbins was named director of marketing at Buick, succeeding George Frink who moved to a corporate post.

Elsewhere, GM and the Federal Trade Commission agreed that some print ads for 1979 models should disclose where a car engine was made. It was an outgrowth of the Oldsmobile engine "switch."

GM signed as a major sponsor of a 12-hour network tv series on ways to cope with future energy problems. Walt Disney Produc-

tions is to make the series which ties in with Disney World in Florida where GM also will sponsor the "Experimental Community of Tomorrow."

- GM of Canada had its sixth straight record year with vehicle retail sales of 585,000 and car sales got 3.1% more penetration to capture 42.1% of the market.

Overseas retail sales were a record for the third straight year. GM sold 1,526,000 cars and 340,000 trucks—with Europe leading the way.

Combined worldwide sales of GM power and appliance products set records. Detroit Diesel Allison division sold more than 141,000 engines, up 19%. Deliveries of U.S.-made locomotives by Electro-Motive division were up 27% with record dollar sales, GM said. TEREX earthmoving equipment sales were up 3% worldwide.

Early in 1979, GM sold its Frigidaire appliance business to White Consolidated Industries. The division spent $11,006,700 in 1978 advertising, up from $7,352,700.

Gillette Co.

	1978	1977
Sales+	$1,710,471,000	$1,587,209,000
Earnings+	94,564,000	79,720,000
Advertising*	99,000,000	90,044,000

+Worldwide *U.S. Estimated by AA

Gillette Co., Boston, the 38th largest national advertiser, increased its advertising 10% to an estimated $99,000,000 in 1978.

Worldwide sales in 1978 increased to a record $1.7 billion, while earnings increased 19% to $94,564,000. Sales for the first quarter of this year rose 15% to $457,222,000, while earnings jumped 38% to $30,853,000.

Gillette chairman and chief exec, Colman M. Mockler Jr., attributed the higher first quarter sales and earnings to improved sales in the International division and to sharply higher profits for the Braun Group and diversified companies. He also noted, however, that while sales of Gillette North America were up slightly, operating profits were slightly lower.

Gillette's sales and profits contributed by its four major lines shaped up as follows in 1978: Blades and razors, sales 33% and profits 72%; Personal Care, 25% and 13%; writing instruments, 8% and 6%, and Braun products, 24% and 13%.

- Worldwide advertising and promotion costs in 1978 were $239,900,000, up from $207,900,000. The 1978 total included $155,900,000, for advertising, including sampling, and $84,000,000 for sales promotion.

With sales and profits advancing to record levels, Gillette's safety razor division continued its dominance of the wet shave market on the strength of Trac II, the nation's largest selling shaving system, and the continued success of the Atra
automatic-adjusting twin-blade
zor and cartridge. Introduce
mid-1977, Atra continues to be
best-selling razor in the count

Since its introduction, Atra
achieved about an 8% share
blade units in the U.S.
company's Trac II cartridges
main the nation's best-sell
blade with an estimated 18
share of units.

During the past months, h
ever, Trac II has come under att
from the Bic Pen Corp. In a c
parative ad, Bic compares
shaving closeness of its 19¢ sir
edge disposable razor to the hig
priced double edged Trac II.

Gillette has asked the Natio
Advertising Division of the Be
Business Bureau to review
commercial, and has asked
three networks to ask Bic for m
fications. Both NBC and ABC
presently showing a modified c
mercial and the NAD is prese
reviewing the ad.

- Gillette, in addition to marke
its own Good News! twin-bl
disposable razor, is testing a sir
edge disposable priced co
petitively with Bic.

At its annual meeting in A
Gillette unveiled Atra Invitatic
line extension to the Atra. Price
$1.59 for its introduction, the I
tation is expected to appeal to
ple who have resisted regular A
because of its heavier weight a
or its suggested $4.95 list price

In the $425,000,000 blade mar
Gillette's share continues to b
the area of 60%. Schick (War
Lambert) has the No. 2 spot w
share in the low 20s. The rest o
market is held by American Sa
Razor, Wilkinson Sword, Bic
and private labels.

In an attempt to build its shar
the $525,000,000 deodora
antiperspirant market, the
sonal care division last Au
launched Dry Idea roll-on anti
spirant, backed by an $18,000
advertising and promotional i
ductory campaign.

- Deodorants and antiperspi
are the division's most impo
products. Sales of nonaer
products rose last year offsett
slight decrease in the aerosol
gory.

Gillette's Right Guard and
& Dri hold approximately a
share of the over-all market.
division's share is believed to
slightly less than that of Procte
Gamble (Sure and Secret), and
above Bristol-Myers (Ban, U
Ban, Ban Basic pump and Ti
roll-on).

In the United Kingdom
Latin America, Gillette brands
tained their strong positions,
ported by the launch of Zirconi
roll-on antiperspirant.

Last year, the company als
troduced Ultra Max shampoo
blow dryer use. While its intro
tion was supported by
$17,000,000 campaign, sales did
meet expectations. Hoping to
tain a 7% to 8% share of
$800,000,000 shampoo market,
company has repositioned
shampoo.

- Procter & Gamble's Hea
Shoulders, is the shampoo lea
with a 12% share, derived from
tie-in as a dandruff-killer a
shampoo. There are more than 6
national brands of shampoo.

In March, Gillette and its former agency, J. Walter Thompson Co., reached an out-of-court settlement and agreed to pay Alberto-Culver Co., Chicago, $4,250,000. Alberto originally sued Gillette and JWT over a comparative ad, which claimed that Gillette's Tame conditioner "rinses clean" while leaving the impression that Alberto Balsam left the hair oily and greasy.

The division also introduced two new products this year. Silkience "self adjusting" hair conditioner, backed by a $6,000,000 campaign, and Foamy Tropical Coconut shave cream, launched in July with a $2,000,000-plus campaign.

Gillette's Foamy line continued to lead the $125,000,000 shaving cream market with a 24% share. Trac II shave cream accounted for an 8% share.

The company has also just completed a repackaging and design of its Dry Look pump hair spray for men. The new package is color coded to differentiate between regular, max and extra hold. According to the company's annual report, Dry Look, last year, increased its market share and remained the best selling men's aerosol hair groom.

▪ Ad spending for the personal care division last year was approximately $41,000,000, according to Leading National Advertisers. Among the products receiving the most support were Adorn hair spray, Foamy Face Saver shave cream, Dry Idea, Right Guard antiperspirant spray and stick, and Soft & Dri roll-on and spray.

In February, J. Walter Thompson Co., New York resigned its $25,000,000 Gillette business in order to work on Warner-Lambert's Schick account overseas.

Gillette assigned its Atra business to McCann-Erickson and its White Rain and Adorn hair products to N W Ayer ABH. Its Cricket and Super Cricket disposable lighters and Daisy disposable razors were not reassigned and are not presently being advertised.

Gillette's appliance division introduced 11 new products during the second half of 1978 and the first half of 1979, including six new hair dryers/stylers, a curling wand, SuperCurl Easy Roller for hairsetting; Body Tender, a total body care appliance with six attachments; Heat Wrap, which can be adapted to almost any portion of the body to soothe aching muscles, and Steam Facial skin cleanser, complete with directional steam hose, facial brush and sponge applicator.

Body Tender, SuperCurl Easy Roller and Heat Wrap mark the division's first entry into the skin care, hairsetter and health care markets.

Gillette's hair dryers and curling irons remained among the leaders in their categories. The Max line continued to be the No. 1 selling hand-held dryer line. Ad spending on Gillette personal care appliances was approximately $4,000,000 last year.

▪ The Paper-Mate division in January introduced Eraser Mate pen, a refillable ballpoint with erasable ink, which received $5,000,000 in ad support.

The division's ballpoint pen sales hit record highs with much of the growth attributable to sales of Write Bros. stick pens in both the retail and commercial sectors.

In addition, porous pens, the largest part of the company's U.S. business, maintained a leading share in the $110,000,000 category, with the introduction of the Quick Silver Flair rolling ball pen. Gillette now has an entry in every porous point pen category. The Quick Silver was backed by $1,800,000 in ad support for its introduction last year.

We're as basic to America as a small town bus stop.
Greyhound Corporation

Greyhound, the nation's largest intercity bus system, used spread ads with folksy flavor to promote its service.

Greyhound Corp.

	1978	1977
Sales	$4,589,765,000	$4,041,329,000
Earnings	58,353,000	81,936,000
Advertising*	45,742,500	50,825,000

*Estimated by AA

Greyhound Corp., Phoenix, the 76th largest national advertiser, decreased its advertising 10% to an estimated $45,742,500 in 1978.

Sales increased to $4.6 billion, 14% above restated 1977 sales. Earnings decreased 29% to $58,353,000. The decline was due to costs associated with closing certain Armour food units in 1978, on the heels of 1977 earnings that were swelled slightly by gains from the sale of Armour's pharmaceutical business.

Greyhound has changed considerably since launching its first intercity bus route in 1914, with a fare of 15¢ between Hibbing and Alice, Minn. Today it is a conglomerate of many companies and services, including Greyhound Lines—the bus company—and the Armour Group of companies, marketers of meats and other food and consumer products. Food and consumer products contributed 22%, and transportation contributed 19% to corporate income in 1978.

▪ Among the corporation's other activities are food services, financial services, leasing, insurance, convention services and aircraft maintenance services. Greyhound also is the largest manufacturer of intercity buses in North America, with 55% of its production sold to other bus companies in 1978. This year production also began on the Citycruiser, Greyhound's entry into the rapidly growing transit bus market.

Under the leadership of Gerald H. Trautman, chairman and chief executive officer, who took over the corporate helm in 1966, Greyhound has moved toward balanced diversification, gradually diminishing the impact of any single segment on the bottom line.

Beginning with the acquisition of Armour & Co. in 1970 and concentrating in recent years on building financial and leasing operations, the move has proven to be sound, as the ailing intercity bus industry has struggled to reposition itself in the face of competition from the private automobile, government-subsidized passenger rail service and inroads of air travel on long-haul business.

In 1978, the airline industry, in a growing atmosphere of "deregulation," turned to low promotional fares with a vengeance. Greyhound, the nation's largest intercity bus system, with about 60% of the total market (and approximately 49% of all regularly scheduled intercity bus revenues)—tried taking on air travel in its advertising, pointing out the similarities of bus and air travel and suggesting the difference between the two came down to time *vs.* money: "Sometimes the airlines can save you time—Greyhound almost always saves you money."

▪ Taking a cue from the airlines, Greyhound and Trailways, the nearest intercity bus competitor with about 20% of the market, stepped up their own promotional fare activity, a move that apparently did little for either bus line.

By August, 1978, Mr. Trautman apparently decided that his bus line was riding on the airlines' merry-go-round and it was time to get off. He took over as chairman of Greyhound Lines, from James L. Kerrigan, and named Frank L. Nageotte, former executive vp of the bus line, to succeed Harry J. Lesko as president.

The ad campaign emphasizing the competition with air travel was scrapped. This year, George W. Cawman, formerly vp-business development, Armour & Co., switched to vp-sales, Greyhound Lines, succeeding Charles D. Kirkpatrick, who retired.

Greyhound Lines takes a preemptive No. 1 position in its 1979 television advertising using a combination of old still photographs and scenes from a modern bus while discussing its service—and ignoring other modes of transportation.

▪ In a tv spot that recalls the first route in Minnesota, the voiceover announcer also declares: "Today, Greyhound is the No. 1 transportation company in the world, carrying 53,000,000 people a year to over 14,000 places in 48 states. The new Greyhound. It ain't what it used to be. Take the bus and leave *everything* to us."

In the six media measured by Leading National Advertisers, Greyhound Lines spent $2,921,700 on passenger advertising in 1978, including $2,592,300 in network tv. For its package express business, the line spent $213,900, including $186,800 in magazines and $27,100 in network radio. Greyhound tours were backed by $11,900 in spot tv and $18,100 was spent for general promotion of the line in magazines.

In October, the corporation reorganized Armour & Co., creating a group of six operating companies. The move was aimed at recognizing that rather than dealing with one homogenous market, Armour business was in several definitive market segments, each requiring custom marketing strategy and well focused management.

Armour declared the development of aggressive business strategies for the six companies as its primary objective in 1979. From those strategies, it intends to develop plans for expansion of existing brands and identify new product and acquisition targets.

▪ Armour Fresh Meat Co. was formed with a separate marketing organization to give added sales impetus to its Veribest and Naturally Tender brands of fresh meat products.

Armour Processed Meat Co. products include Armour Star Bacon, the leading brand in 1978, and Armour Hot Dogs, the nation's second largest selling brand. The company also markets hams, sausage and lunch meats.

In 1979, the processed meats gave up their individual ad approaches, including "the dog kids love to bite" for hot dogs, in favor of an umbrella theme for several products: "Armour. Making it easy to say I love you every day."

In measured media, Armour sausage received $194,500 in spot tv in 1978. Armour Star bacon was supported with $753,300, including $536,400 in magazines and $210,000 in spot tv and $6,900 in outdoor.

Armour Star franks were backed with $754,300, including $499,600 in network radio, $228,200 in magazines and $23,400 in outdoor. A hotdog sweepstakes received $228,200 in magazines. A lunch meats premium offer was backed by $34,000 in newspaper supplements.

▪ Armour Poultry & Dairy Products Co. performed well in 1978 as consumers turned to turkey and chicken as economic alternatives to red meat. In a joint venture, Gold'n Plump branded broiler line was successfully launched in Minnesota and Wisconsin. The turkey business in 1978 was directed toward smaller, cut-up parts, broth and butter-basted whole birds.

Armour-Dial Co. markets Dial soap, the leading deodorant bar, and is believed to be an industry leader in canned meats with a line that includes Treet, Vienna Sausage and Potted Meat and other canned meat products. The company's principal competitor in soaps is Procter & Gamble. Hormel is its principal competitor in canned meats.

Largest single measured expenditure by the corporation in 1978, $5,696,200, continued to be for Dial soap. Of the total, $3,322,900 went to network television, $1,198,700 to magazines, $659,200 to network radio, $285,200 to spot tv and $230,200 was spent in magazines for a Dial soap sweepstakes.

In 1979, the company is said to be putting its heaviest radio and tv support ever behind the brand. A tv spot which shows a woman jogging and then showering carries the jingle theme, "Startin' out clean, startin' out Dial, startin' out new."

Armour-Dial's beauty bar entry, Tone bar soap, was backed by $4,984,400 in measured media, most of it in network tv and $29,600 in magazines and $7,000 in spot tv.

▪ Armour-Dial also markets antiperspirants and shampoo. "As the world gets wetter, Dial gets better," ads declared in 1978 for reformulated Dial anti-perspirant spray in a $135,100 magazine effort. The company also spent $2,558,300 in measured media for Dial Spray deodorants, including $1,839,500 in network tv and $718,800 in spot tv.

Another $75,300 went to spot tv for Dial Dry anti-perspirant. Dial Roll-on deodorant was backed with $63,600, virtually all in network tv.

Dial 2 dandruff shampoo, moving beyond initial test markets in 1978, was supported by $398,600 in spot tv.

	1978	1977
Sales*	$4,311,956,000	$3,647,517,000
Net Earnings*	180,516,000	150,327,000
Advertising	126,787,000	100,610,984

*Fiscal years ended July 31, 1978, and 1977.

Gulf + Western Industries, New York, the 26th largest national advertiser, boosted its total advertising expenditures 26% to $126,787,000 in 1978. Its big spenders were Paramount Pictures, Kayser-Roth and Consolidated Cigar Co.

The company reported a sales increase of 18% and a net earnings rise of 20% for the fiscal year ended July 31, 1978.

Gulf + Western's operating groups accounted for sales in fiscal 1978 as follows: Manufacturing, 21%; financial services, 18%; leisure time, 15%; apparel and home furnishings, 14%; paper and building products, 9%; consumer and agricultural products, 8%; natural resources, 8%, and automotive replacement parts, 7%.

■ The first phase of G + W's new corporate ad campaign was the insert of its entire 1978 annual report in the Feb. 5, 1979, issue of *Time*. This 64-page section was the largest ad ever to appear in any medium.

The company said it was designed as a vehicle to describe G + W's scope and diversity to the more than 22,000,000 *Time* readers and celebrate the company's 20th anniversary. The next phase of G + W's ad campaign will be directed toward the business and financial communities and will focus on the company's eight operating groups.

The *Time* insert was priced at $2,700,000 for the U.S. edition and $600,000 for the European edition after discounts. (These expenditures will be included in G + W's 1979 advertising figures.)

The leisure time group, with record sales of $802,000,000 in fiscal 1978 (up 82% over fiscal 1977), includes Paramount Pictures Corp.; Simon & Schuster; Madison Square Garden sports and entertainment complex; Famous Players Limited, a 51%-owned Canadian subsidiary operating theaters in Canada and France; Famous Music Corp., which publishes and promotes musical compositions, and Cinema International Corp. (CIC), which is jointly owned by Paramount and Universal City Studios for overseas distribution of movies.

■ Paramount was the group's biggest advertiser with $42,806,000 in ad dollars spent in 1978. Two box-office smashes, "Grease" and "Saturday Night Fever," grossed more than $100,000,000 each in the U.S.

"Grease" is the movie industry's most successful musical ever and Paramount's biggest all-time box-office hit. Paramount almost doubled its share of the 1978 box office grosses—to about 20%.

For his role in the success of Paramount, Barry Diller, chairman and chief executive officer, was chosen Adman of the Year for 1978 by the editors of ADVERTISING AGE.

Mr. Diller, who took over the movie studio in 1974 after being with the programing arm of ABC-TV applied his tv movie and programing expertise to the film world.

Major hits included "Heaven Can Wait" and "Foul Play." Other movies released in 1978 and 1979 included "Up in Smoke," "Goin' South," "Death on the Nile," "Days of Heaven," "Oliver's Story," "King of the Gypsies," "Warriors," "Hurricane," "Real Life" and "An Almost Perfect Affair."

■ Paramount's 1979 summer lineup included national release of seven features—one of the heaviest product concentrations in the company's history. These features include: "Players," "Prophecy," "Escape from Alcatraz," "Sidney Sheldon's Bloodline," "Meatballs," "Sunburn," "North Dallas Forty" and "Grease/Saturday Night Fever" as a double feature.

In 1979, Fotomat Corp. and Paramount Pictures signed an agreement whereby Fotomat will rent and sell Paramount features in videotape and disc form through its 3,700 U.S. and Canadian retail outlets.

■ Paramount Television turned in a record performance as a result of such top-rated shows as "Laverne & Shirley," "Happy Days," "Mork & Mindy" and "Taxi." Paramount also produces made-for-tv movies and series for U.S. network telecast.

The studio currently is producing at least 11 pilots for the three tv networks for the 1979-80 season in addition to various tv films and miniseries. Paramount TV has been syndicating tv series such as "Star Trek," "The Odd Couple," "The Brady Bunch" and "Mission Impossible."

Simon & Schuster spent about $7,085,000 in advertising, promotion and publicity in 1978, compared with about $5,400,000 in 1977. The company had record sales of $86,000,000 and had more books—hardcover and paperback—on the best-seller lists during 1978 than in any other year in its history.

During 1978-79, hardcover best-sellers included "Tutankhamen; The Untold Story," "The Teamsters," "The Human Factor," "The Women's Room," "Running and Being," "Second Ring of Power," "Good as Gold," "How to Get Whatever You Want Out of Life" and "The Pigeon Project." Paperback best-sellers included "The World According to Garp," "Dreams Die First," "Attachments" and "True Confessions."

■ The marketing of books has taken on new sophistication at Simon & Schuster. Computers are used to help the sales force run profit-and-loss evaluations on books and to track book sales. Also, the centralization of five warehouses into one new facility has increased efficiency and produced savings for the company.

Madison Square Garden Corp., the group's newest operating unit, reported revenues of $157,000,000 in fiscal 1978. MSG, which spent $4,965,000 in ad dollars in 1978, owns and operates Madison Square Garden Center in New York, the New York Knicks, the New York Rangers, the Washington Diplomats, James Lipton Productions, Marketing Concepts, 80% of International Holiday on Ice, the Bugs Bunny Follies, Madison Square Garden Cable Network and racetracks in New York and Chicago.

Most of MSG's advertising is done in-house through Madison Square Garden Advertising.

G + W's consumer and agricultural products group had net sales of $440,000,000 in fiscal 1978, up 13% from the previous year. The consumer products unit of this group consists of Consolidated Cigar Co. and the Schrafft Candy Co. Cigar sales accounted for $170,000,000; $43,000,000 were in candy sales, and $227,000,000 in agricultural products.

■ Consolidated Cigar remains the leading advertiser in the group with more than $3,500,000 in measured advertising dollars spent in 1978. This represented a 53% share of all the advertising expenditures in the cigar industry.

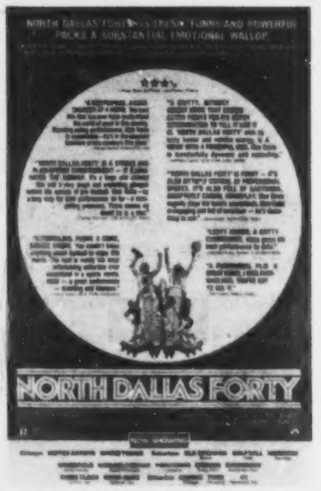
The world's largest cigar manufacturer, Consolidated Cigar slightly enhanced its first place position in the U.S. cigar market with a 26.2% share of unit volume. Its leading domestic brands include Dutch Masters, El Producto, Muriel, Capitan de Tueros and Ben Franklin. Its leading pipe tobaccos are Mixture No. 79, Sutliff Private Stocks and Old Grand Dad.

After successful introduction of Muriel Air Tips Pipe Aroma, Consolidated Cigar unveiled Dutch Treats Pipe Aroma, the latter being a little cigar sold in packs of 20. Its new premium pipe tobacco entry is Sutliff Private Stock Nos. 1, 2 and 3.

Most significant in cigar development is the introduction of Flite Filters, a new cigar that eliminates traditional cigar aroma while retaining its taste. Introduction of the new aromaless cigar began early this year in Ohio, Detroit, Baltimore and Washington, D.C. Advertising in these markets was concentrated in newspaper and broadcast media.

■ Consolidated Cigar continues to rely on personalities such as Susan Anton in the promotion of its products. This year El Producto Cigars signed Sonny Jurgensen and Maury Wills for a magazine, newspaper and transit ad campaign with a theme of "C'mon, move up to the pros. El Pro."

In fiscal 1978, G + W's apparel products group consisted of Kayser-Roth. The group's net sales totaled $725,000,000, up 15% from 1977. Of this, $457,000,000 was in apparel, $187,000,000 in hosiery and $81,000,000 in other products.



NORTH DALLAS FORTY IS FRESH, FUNNY AND POWERFUL. PACKS A SUBSTANTIAL EMOTIONAL WALLOP.
NORTH DALLAS FORTY
NOW SHOWING

Paramount Pictures Corp. released "North Dallas Forty" and six other features during a heavily active summer.

Kayser-Roth is one of the nation's largest manufacturers of apparel. The group in fiscal 1978 was divided into four lines of business: Apparel, hosiery, shoes and specialty textiles.

Some of its well-known brand names include Catalina, Cole of California, Excello, Colonial, Her Majesty, Oscar de la Renta men's wear, Bostonian, Sandler of Boston, John Newcombe tennis wear and Kayser intimate apparel.

The hosiery division produces ladies' pantyhose and stockings marketed under such brands as No-Nonsense, Kayser, Mojud and Supp-hose and are distributed through supermarkets, drugstores and mass-merchandisers. Men's hosiery is marketed under the Interwoven, Supp-hose and Fruit of the Loom brands.

In fiscal 1979, Simmons Co., a major manufacturer of home furnishings, was acquired by G + W. This apparel products group was expanded to include Simmons and form a new unit—the apparel and home furnishings group. Simmons Co. will be included in the results of the apparel and home furnishings group in fiscal 1979.

Gulf + Western's other operating groups spent about $15,392,000 collectively for advertising and promotion in 1978, broken down as follows: Manufacturing, $4,061,000; natural resources, $250,000; paper and building products, $1,346,000; automotive replacement parts, $3,149,000, and financial services, $6,936,000.

H. J. Heinz Co.

	1978	1977
Sales	$2,150,027,000†	$1,868,820,000
Earnings ...	99,200,000†	83,800,000
Advertising*	74,111,000	65,800,000

†Fiscal year ended May 3, 1978
*Estimated by AA

H. J. Heinz Co., Pittsburgh, the 55th largest national advertiser, increased its domestic advertising an estimated 13% in 1978 to $74,111,000.

Fiscal 1978, which ended May 3, 1978, marked the 15th consecutive year of sales and earnings gains for Heinz. Consolidated sales rose 15% to $2,150,027,000, with domestic sales totaling $1.3 billion. Consolidated earnings rose 18.3% to $99,200,000.

Heinz markets more than 1,250 products worldwide, including ketchup, other tomato products, mustard, pickles, vinegar, juices, baby food, soups, sauces, tuna and frozen foods.

In addition to Heinz U.S.A., the company markets products domestically through Star-Kist foods, Terminal Island, Cal.; Ore-Ida Foods, Boise, Ida.; the Hubinger Co., Keokuk, Ia., a producer of corn syrups and starches for industrial use; Weight Watchers International, Manhasset, N.Y., and Foodways National, Hawthorne, N.Y., which markets food products under the Weight Watchers label.

■ In 1978, Heinz maintained its share of the retail ketchup market, estimated at 40%, and hiked its share of the foodservice ketchup market to 60%. The only national marketer of vinegar, Heinz maintained an estimated 12% share to lead in that market.

Ketchup was promoted with $7,438,400 in measured media, the most spent on any Heinz product. Over $6,500,000 of the total was in network tv. Measured ad dollars for vinegar totaled $104,200, primarily in magazine and spot tv advertising.

Heinz 57 steak sauce was repositioned for greater versatility as a recipe ingredient in 1978, with total spending at $3,409,100. Color-coded caps were added to Heinz Homestyle gravy, and brown gravy in a larger 18-oz. size was introduced in test. Media spending totaled $3,244,400.

In the battle for second place in the baby food market, Heinz claims has pulled ahead of Beech-Nut into second place with over a 15% share. All Heinz baby juice is now sold in bottles rather than cans—a move that increased shipments 50%.

In 1979, Heinz introduced a line of natural fruit yogurts made especially for babies into test. Baby food was backed by over $400,000 in measured media in 1978.

Heinz also took another shot at the Campbell-dominated soup market in 1978, introducing a line of premium-priced, ready-to-serve soups called Heinz creamy soups. The line remains in limited test.

Star-Kist tuna is in a virtual tie with Ralston Purina's Chicken of the Sea for leadership in the retail tuna market, which this year topped $1 billion in sales. Star-Kist tuna was backed by $3,784,300 in 1978, with most going to network tv.

Star-Kist rolled national in January, 1979, with 9-Lives dry cat food, backed by a campaign featuring Warner Brothers' Sylvester the cat. Measured media spending in 1978, while the product was in test market, came to $279,600, about two-thirds in spot tv.

The product represented the company's attempt to become a major factor in the dry cat food market, now dominated by Ralston Purina, which holds about a two-thirds share.

In the canned cat food market, the 9-Lines brand is No. 1, with a 1978 market share estimated at about 27%, up about five percentage points over 1977. Square Meal, 9-Lives soft, moist entry, is No. 2 in that segment behind Purina's Tender Vittles.

Total measured media spending for the 9-Lives line was $5,300,000 in 1978, with most of it going to network tv support for canned 9-Lives.

■ The Ore-Ida subsidiary went national in 1978 with Country Style dinner fries in a three-pound package, after test marketing the product in 20% of the U.S. The Ore-Ida line has about 46% of the frozen potato market in pounds, and a 51% share of dollar sales. Ore-Ida frozen potato products were backed by $6,940,000 in measured media, primarily in network tv.

La Pizzeria, Ore-Ida's premium frozen pizza, continued to expand its market area. It is now No. 1 in a number of its markets.

The company also reported success with its Mrs. Goodcookie brand of frozen ready-to-bake cookies. The chocolate chip variety was No. 1 in its category in the 80% of the country where Mrs. Goodcookie is sold, and the new peanut butter version, introduced in September, 1978, now ranks No. 3.

■ Ad spending for Weight Watchers, acquired for about $71,000,000 in October, 1978, was $3,923,600. Weight Watchers switched agencies from Ted Barash & Co. to Doyle Dane Bernabach after the merger.

In May, Heinz and Campbell Soup Co. announced the out-of-court settlement of a controversy begun in 1976 when Heinz filed a suit charging Campbell with monopolizing the wet-soup market. Campbell maintains an 80% lock on the billion dollar market.

A Campbell countersuit charged Heinz with unfair food selling practices, claiming it would not sell ketchup unless other foodservice items were also purchased. The case had been scheduled for trial in September. Details of the settlement were not disclosed.

Heublein Inc.

	1978	1977
Sales	$1,620,112,000	$1,550,902,000
Earnings ...	56,529,000	41,568,000
Advertising	118,000,000	106,459,200

Heublein Inc., Farmington, Conn., the 33rd largest national advertiser, increased its ad spending about 11% in 1978 to an estimated $118,000,000. Measured media spending was $79,235,400, up from $68,491,000 in 1977. Income increased 35% to $56,529,000 for the fiscal year ended June 30, 1978, as sales climbed 4% to $1,620,112,000.

For the liquor industry as a whole, 1978 was a landmark year. Huge ad campaigns by numerous marketers, combined with a demographic trend that finds the "youth market" of yesterday turning from soft drinks to alcoholic beverages as it matures, helped raise total consumption to a record 446,000,000 gallons. The increase of 3.1% from 1977 was double the gain over the preceding year.

Reflecting this trend, Heublein's beverage sales totaled $923,800,000, up 10% from last year. For the company's Spirits Group, 1978 was a record year in sales and total cases shipped; the latter was up almost 10%.

■ Smirnoff vodka continued its strong growth with U.S. shipments for the year up 3%, to a total of 6,500,000 cases. Retail sales increased at an even faster rate. Smirnoff advertising emphasized the ubiquitousness of the spirit in a series of scenes created by some of the world's most famous photographers, including Irving Penn and Helmut Newton.

In July, Joseph E. Corr joined the company as vp-marketing for the Spirits Group. Mr. Corr had most recently served as director of national accounts and merchandising at Philip Morris.

In the fall, Heublein introduced Vaklova, an imported liqueur, called by company spokesmen "a super-premium product with a rich heritage." To start the brand off on the right track, the company went straight to the heart of the upscale market, directing advertising at the metropolitan, sophisticated drinker via ads in magazines like *The New Yorker* and *Bon Appetit*.

■ The company attempted to increase its commanding lead in the prepared drink market with its new Louis and Gilbert Hotel cocktails. The brand, which was product tested in Southern California in the fall, retailed for about $1 and was available in six varieties: Whisky sour, strawberry daiquiri, tequila sunrise, strawberry margarita, screwdriver and margarita. The line is named for Louis and Gilbert Heublein, the company's founders.

F. William Free & Co.'s Tactical Marketing Group, a unit formed last year to concentrate on launching new products and rejuvenating existing ones, provided much of the strategy behind the Hotel line.

In January, 1979, Heublein's outdoor agency, Asch Advertising, teamed up with Castor Spanish International to produce Smirnoff's first outdoor appeal to the Hispanic market, placing the vodka ad in Spanish on New York's bus shelters. Simultaneously Heublein spnsored a Miss Black Velvet contest, the finalists of which appeared in the January editions of national magazines.

Also in January, the company's marketers spent three days "brainstorming" with personnel from the company's agencies. Taking both category and consumer approaches, the confab participants considered questions like: What's new in Scotch? How are people responding to new flavors? What are the best opportunities for product development right now?

■ Mr. Corr, speaking of the meeting, told ADVERTISING AGE: "This was the first time we've ever had a session like this and, from now on, we're going to do it every six months. It's a great opportunity for us all to philosophize about this industry and try to determine why certain things happen in the marketplace."

In March, several Southern California vintners, including Heublein's United Vintners, received state approval to produce "soft wines" with alcoholic content as low as 7% (most wines have 12% to 13%) on an experimental basis through March, 1980. The vintners had sought approval from the California Dept. of Public Health, which issued temporary waivers of the state's no-less-than-10%-alcohol rule for wine-making.

In Heublein's food operations, the Grocery Products Group turned in another record performance, with sales of $117,760,000. Revenues of the Food Service and Franchising Group declined for most of the year, but Kentucky Fried Chicken registered an average 14% sales gain per store. Total revenues from food operations were $423,700,000, down 13%, while operating income increased 7% to $32,900,000.

■ Kentucky Fried Chicken continued to use the advertising theme "It's so nice to feel so good about a meal," adopted in 1977. The ad program was developed by Young & Rubicam when it replaced Leo Burnett Co. as the agency for the national system.

About 90% of the franchisees and all of the company stores used the national theme material in local advertising campaigns. Tinker, Campbell-Ewald handles local advertising for the 750 company-owned stores.

Continuing with its remodeling program, KFC also moved to encourage more franchisees to remodel. During the year, it announced an incentive program that would return to franchisees up to $10,000 for each store remodeled to the new image before Oct. 31, 1980.

Heublein's Grocery Products Group continued to emphasize its Ortega Mexican food business last year and continued to market to the retail grocery and food service trade through separate marketing and sales groups.

Ortega continued to outpace the rapidly growing Mexican food market, with advertising of Ortega tacos playing a key role in that growth. In late 1978, Ortega began advertising its new "cushion pack," which reduces shell breakage. Total grocery products ad spending during the year reached the $10,000,000 level for the first time, an increase of 33% over 1977.

■ As beef prices rose, A.1. sauce launched an ad campaign with the theme, "A.1. makes every bite count," simultaneously employing broad-scale consumer couponing and trade promotions to keep the meat tenderizer growing against the competition.

Heublein enlisted the help of a newly formed market research company to investigate the buying patterns and cultural nuances of the Latino market. Loretta Adams, president of Market Development, San Diego, Cal., conducted research into the expansion of existing products in the Latino market, which she viewed as still "virtually untapped."

Special marketing programs spurred the growth of the Grocery Products Group. New Mexico's famed auto racing brothers, Al and Bobby Unser, who have long been associated with Mexican foods, traveled as Ortega's spokemen during the brand's marketing expansion. Spanish-language radio and tv spots supported Ortega's refried beans, a new product.

Another endeavor that proved successful was the separate Foodservice Sales and Marketing units, established to boost sales to the restaurant and institutional food trade.

THE PROFIT INGREDIENTS. FROM HEUBLEIN.

Heublein's Grocery Products group pushed its products to the trade in 4-color spreads. Its Ortega line is growing faster than the rapidly growing Mexican food area.

International Telephone & Telegraph Corp.

	1978	1977*
Sales	$15,261,178,000	$13,183,226,000
Earnings ...	662,000,000	552,000,000
Advertising	122,700,000	104,699,000

***Restated**

International Telephone & Telegraph Corp., the 28th largest national advertiser, increased its U.S. ad spending about 17% to an estimated $122,700,000 during 1978.

Worldwide ad spending, which ITT execs had originally planned to hike by 20% to $170,000,000, actually came closer to $185,000,000 in 1978.

Once again, ITT-Continental Baking Co. consumed the bulk of the advertising and promotion expenditures, with $28,000,000 in measured media and additional millions in unmeasured media, chiefly p.o.p.

Various other ITT entities contributed to the ad spending boost, with O.M. Scott & Sons and Sheraton Corp. spending another $11,000,000 or more. Hartford Insurance Group, ITT Telecommunications, Morton Foods and ITT Rayonier allocated more than $9,000,000 for measured media alone.

■ ITT, whose global sales climbed nearly $2.7 billion to $19.4 billion when insurance and financial results were included, has five basic business fields. They are telecommunications and electronics ($5.6 billion in sales last year), engineered products ($4.9 billion), insurance and finance ($4.1 billion), consumer products and services ($3.6 billion) and natural resources ($1 billion).

In percentage terms, telecommunications/electronics represented 29% of total ITT sales, followed by engineered products (like Koni shock absorbers and ITT Grinnell pipe, valves and fittings) and insurance/finance (Hartford Insurance Group, for instance).

Consumer products, from foods and hotels to lawn care and book publishing, accounted for 19% of global revenues, while natural resources (including ITT Rayonier) added another 5% to the total.

■ Within the consumer units—encompassing ITT-Continental Baking Co., Sheraton Corp., C&C cola, Bobbs-Merrill and a few others—the food products operations once again hit record earnings levels. Food sales reached $1.7 billion as income reached $29,000,000.

As for Sheraton, that unit "surpassed all previous earnings records" during 1978; it now has 402 hotels and motor inns in 42 countries.

Wonder, 1 billion loaves of which were sold last year, continues to grow in volume and market share despite a declining bread market, according to Continental Baking execs.

■ A major new product, introduced via Grey Advertising, was Fresh & Natural, positioned in several test markets as a delicious tasting bread made only with natural ingredients. Its measured support last year surpassed $823,000.

The Home Pride brand name was expanded last year to include an English muffin line in at least three states; that was given $363,000 in measured backing while the Home Pride bread was budgeted at $4,530,000.

Among its other breads, ITT spent $2,516,000 on Fresh Horizons, $460,000 on Braun's and $87,000 on Roman Meal bread. Town Talk, including bread and other baked goods, spent $227,500 last year.

ITT-Continental Baking and two agencies, Needham, Harper & Steers and Grey Advertising, last fall asked the FTC to kill subpoenas seeking more information about Fresh Horizons advertising.

■ But early this year, the FTC pressed the advertiser to agree to a consent order requiring future advertising for all baked goods to disclose when ingredients are in a product that consumers would not normally anticipate in food. In Fresh Horizons high fiber bread, that ingredient was pulp derived from wood sources.

Of the Continental Baking measured spending total, Wonder bread alone accounted for $5,700,000, while the Hostess snacks line was allocated almost $11,000,000. Hostess cakes alone spent $4,100,000-plus.

Hostess continued to hold the sales leader position in the national snack cake market, with runners-up varying by region. The closest competitors include Dolly Madison snack cakes from Interstate Brands and the regional Drake brand from Borden. According to ITT, Hostess cakes sold 1.7 billion units during 1978.

■ Hostess continues to be a major national advertiser in DC, Marvel and other national comic book groups, featuring such characters as Superman, Batman, Wonder Woman, Casper, Sad Sack and others in the ads.

Continental Baking continued to be a cosponsor, with Mattel Toys, on the off-network "Archies" cartoon tv reruns, promoting Wonder and Hostess products. Vitt Media International handled the clearances as it has done with the ITT corporate vehicle, "Big Blue Marble."

Hostess continued for the fourth year its successful baseball card on-pack promotion during the spring and summer months, switching to "Wacky TV Cards," spoofing popular kid-oriented tv programs, for the important fall "back to school" period. (Early last year, Wonder bread offered "Close Encounters of the Third Kind" trading cards as its major premium offer.)

Not included in Continental Baking's measured spending is the "considerable" amount spent yearly on placing, upgrading and maintaining an extensive in-store display rack system and p.o.p. support for its various premium offers.

■ During the spring, the ITT division reentered test with Continental Kitchen Flavor Seal entrees in retort pouches, a shelf-stable package. A line of seven entrees was placed into Atlanta and Columbus, O., backed with multi-media advertising via Ted Bates & Co.

The pouches were first marketed in late 1977 in three test markets but were withdrawn when the company could not keep up with consumer demand.

The item is a meat-based meal formulated without artificial color, flavors or preservatives in a vacuum-sealed, flexible pouch.

In other food operations, the Morton division spent $2,000,000 in 1978 measured media while Gwaltney spent $184,000.

Frozen Steak House platters received $1,600,000 of the Morton budget, with the remainder backing the Morton brand on frozen dinners, main dishes, donuts, muffin rounds and pies, all via Grey.

Morton also began national distribution of its new desserts line which includes a single-service cheesecake.

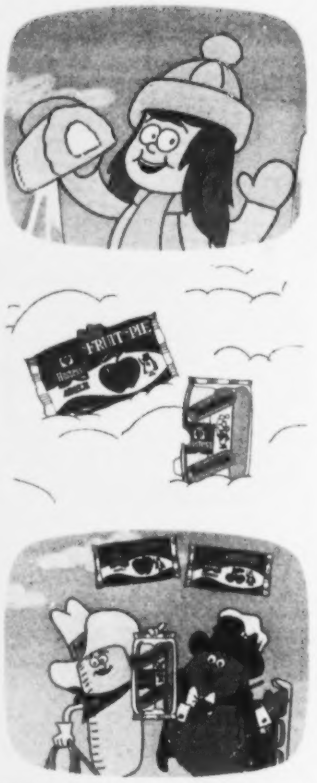
■ Gwaltney expanded its geographical coverage significantly during the year to market products from Maine to Florida.

Great Dogs chicken franks, Big 8 franks, Williamsburg bacon, Smithfield hams and other meats shared media spending. This division began 1978 with a new agency, when D'Arcy-MacManus & Masius won the $1,000,000 account from Bates.

C&C cola, marketed by Cantrell & Cochrane, spent nearly $700,000 on media advertising last year on tv and radio and in newspapers. More than 225,000,000 C&C cans were sold in New York alone, its oldest market, where the brand claims third place in cola sales.

Rolling out during 1979 to Baltimore/Washington and California markets, C&C continues to focus on why it "tastes great and costs less" than rivals Coke and Pepsi.

■ The other big spenders in the consumer products and services group were O.M. Scott & Sons, which poured $7,300,000 into measured media last year; Sheraton Corp., spending more than $4,000,000; and Hartford Insurance Group, at $2,400,000.



ITT's Hostess fruit pies and Twinkies were promoted to children in animated commercials. The entire Hostess cakes line received over $4,000,000 in 1978.

Scott said it boosted advertising and promotion expenditures last year to maintain its leadership role in the estimated $150,000,000 lawn care market. More than $5,000,000 of its media budget was allocated to the Turf Builder lawn fertilizer and Turf Builder Plus 2 weed-and-feed product.

In an acquisition agreement announced earlier this year and compatible with its Scott operation, ITT said it planned to acquire W. Atlee Burpee Co., Warminster, Pa., from General Foods.

■ Boston-based Sheraton Corp. screened eight agencies last year before Creamer Inc., New York, won the account, succeeding BBDO's Quinn & Johnson in Boston.

The Hartford accounts for nearly all of ITT's insurance/financial category ad spending, or about $2,800,000, with ITT Consumer Financial Services spending $294,000 on its loan services.

The No. 7 U.S. property and casualty insurer, Hartford Insurance continued to emphasize the importance of loss prevention in its advertising, using actual case histories to support the theme, "The best protection is prevention."

The live stag emblem remained highly visible in the tv commercials, which turned up on such shows as NBC's "Kitty Hawk" special, "Big Events" and the repeat of "Tut: The Boy King" last year, as well as on CBS' "The Word" miniseries. The insurer also used business and news magazines.

■ ITT has had mixed results following the U.S. introductions of European cosmetics products. In mid-1978, the company decided to withdraw the popular priced Rimmel cosmetics after two years (and $113,000 in measured spending in '78 alone).

However, ITT's Payot, which entered the U.S. from France last year, is now in 450 stores with Pavlova fragrance and Payot skin care products, with advertising handled by Cathy Cash Spellman, New York. Payot spent $279,000 on advertising in '78.

ITT's book publishing operations spent a combined $230,000 in measured media last year for Audel, Bobbs-Merrill and G.K. Hall titles.

■ During 1978, the company made its debut in the U.S. retail telephone market with the Own-A-Phone line of custom-designed, decorator and futuristic phones. An announced $3,000,000 multimedia campaign, however, has yet to break.

This year, ITT plans to spend $2,000,000 in a campaign breaking this autumn and perhaps $6,000,000 during 1980. Hicks & Greist, the agency for ITT Personal Communications and consumer specialty products, will handle those efforts.

About one-third of the 1,000,000 new phones sold in this country last year were sold by ITT, which also sold 700,000 color tv sets in Europe and an undisclosed number of videocassette recorders and personal computers, all in Europe, through other divisions.

This spring, ITT began a newspaper-radio effort to promote its 11-city long distance service network with a "City-Call will save you money" theme. Advertising via D'Arcy-MacManus & Masius eventually will expand to another 24 cities, ITT said.

ITT Telecommunications chose NH&S to handle its retail phone account in '78. In other agency activity during '78, ITT Financial Corp., Minneapolis, moved to Hughes Advertising from Coleman & Goff.

Within the natural resources unit, ITT Rayonier spent more than $1,500,000 on advertising, with tv spots featuring designers praising rayon as a versatile fashion fiber.

ITT, which also budgeted more than $6,200,000 to bolster its corporate image in measured media last year, continued to sponsor "Big Blue Marble" on tv in the U.S. and 60 other nations as well as the "American Character" featurettes in radio syndications and it helped fund the Metropolitan Museum of Art's "Vanity Fair" costume exhibition.

Johnson & Johnson

	1978	1977
Sales†	$1,991,307,000	$1,713,583,000
Earnings†	144,330,000	129,352,000
Advertising*	134,000,000	91,800,000

†U.S. only ***AA estimate**

Johnson & Johnson, New Brunswick, N.J., the 24th largest national advertiser, is estimated to have increased U.S. advertising 46% to $134,000,000 in 1978. A big chunk of that increase went to Johnson's Disposable Diapers and o.b. tampons, both of which achieved full national distribution in 1978.

Worldwide advertising for J&J climbed 37.9% to $168,736,000 in 1978, from $122,398,000 in 1977. Sales of consumer products (43.6% of J&J worldwide sales) increased 20.3% to $1.5 billion in 1978, compared to $1.27 billion in 1977.

U.S. sales rose 16.2% to $1.99 billion, with earnings up 11.6% to $144,330,000. U.S. sales for the first three months of 1979 were up 29.3% over the same period in 1978, while earnings were up 36.3%.

Worldwide sales and earnings set new records as sales increased 20% to $3.5 billion and earnings rose 20.9% to $299,060,000.

■ While J&J operates as a group of decentralized companies which manufacture and sell a broad range of products in the health care and other fields, the company is primarily known to the consumer through its baby and personal hygiene products.

In addition to the Band-Aid, Johnson & Johnson and Johnson baby product lines, consumer brand names include Conceptrol and Delfen contraceptive products; Carefree and Stayfree feminine hygiene products; Shower-to-Shower body powder; Reach toothbrush; Tylenol analgesic, and Intensin and Sine-Aid sinus medication.

J&J channels most of its media dollars into network television, which got $64,979,100 or 75.5% of measured ad expenditures in 1978, trailed by magazines (13.6%), spot tv (7.6%), newspapers (2.3%) and spot radio (1%).

About 29% of J&J's ad dollars went for baby products in 1978. Of the $24,512,100 in measured media expenditures, Johnson's disposable diapers got $9,318,800, making it the top spender in the baby products division. The diaper now accounts for 35% to 40% of J&J's consumer product sales, with a dollar growth of 35% in the past year.

■ Ad support for the diaper ($7,310,300 in network tv and $1,875,700 in spot tv) was tripled in 1978 when the diaper (after four years) achieved full U.S. distribution. A heavy network tv effort via SSC&B features Nanny who, as a new mother, explains the absorbent qualities of the product to parents.

In its mature midwestern/east central markets, Johnson's diaper holds about a 20% to 25% share, but both it and leader Pampers have experienced erosion of share from elastic-leg diapers Luvs (P&G) and Kleenex Huggies (Kimberly-Clark).

In October, J&J introduced a new disposable "panty diaper" in Mexico, which touts "soft little elastic" at the legs and "gives perfect adjustment, avoids leaking, doesn't come loose." J&J's new diaper is not available yet in the U.S. and it is not known whether it will arrive here to do battle with Luvs and Huggies.

Johnson's Baby Shampoo got $5,545,200 in measured media support in 1978 ($5,346,900 in network tv), up from the $4,716,100 spent in '77. Advertising continued to aim at an expanded market for the shampoo, with one spot featuring Minnesota Viking quarterback Fran Tarkenton as spokesman.

■ The shampoo people created a bit of a fracas this spring by urging the FDA to set new standards for baby shampoo, arguing that some other brands caused eye irritation. The FDA turned down the request, claiming that baby shampoo problems, real or alleged, don't endanger children's eyes under normal use.

A significant advance in preventive dentistry.
The Reach Toothbrush to help fight cavities.

Reach toothbrush, introduced by Johnson & Johnson in 1977, received more than $4,000,000 in ad spending in 1978.

Other big spenders in the baby products division were Johnson's baby powder, which got $4,794,100 ($4,301,500 in network tv); and Johnson's baby oil, which got $3,041,900 ($2,619,900 in network tv). Spending for both products was stable. Johnson's baby lotion continued to lose ad support ($961,400 down from $1,630,600 in '77), while No More Tangles creme rinse received no measured support, according to Leading National Advertisers.

In March of 1978, J&J Burke-tested a tv commercial in Boston for new Soap & Sponge. The spot says the product consists of "baby soap sealed in two special cleaning sponges" with a scrubbing side. Other new items receiving minimal ad support were Playpath Playthings ($5,800 in magazines) and Johnson's Baby Wash Cloths ($1,400 in spot tv).

In the McNeil consumer products division, the Tylenol analgesic brand got $19,775,600 in measured media dollars (up from $13,365,600 in '77), making it J&J's No. 1 ad spender.

Products include Tylenol tablets, which got $12,288,200; Tylenol Adult Liquid Pain Reliever (new in '78), which got $2,912,900; Co-Tylenol cold medicine ($2,788,000); Children's Tylenol ($1,199,000), and Extra Strength tablets and capsules ($565,600). About 80% of spending was in tv, with the remainder in magazines.

■ In the $750,000,000 analgesic market, Tylenol is the leader, holding a 20% share, followed by former leader American Home Products' Anacin (13%), Sterling Drug's Bayer (10%), and Bristol-Myers' Bufferin (10%).

Tylenol's meteoric rise in recent years has led to turmoil in the analgesic field, with charges of false advertising hurled back and forth among the leaders both in the media and in the courts.

In May, 1978, a U.S. Circuit Court of Appeals upheld a lower court ruling prohibiting American Home Products from advertising that Anacin is more effective than Tylenol because it reduces inflammation, on the grounds that consumers had been deceived about the relative efficacy of Anacin and Tylenol and the deception would continue to injure Tylenol's reputation if the Anacin ads were allowed to continue.

Meanwhile, the National Advertising Division accepted a safety superiority claim for Children's Tylenol as compared to aspirin. Measured ad spending for the children's product, which holds a 3.3% share of the total analgesic market, was $1,199,000 (up from $607,400 in '77), equally divided between magazines and tv.

For the first time in 18 years, Procter & Gamble's Crest has been bypassed as the largest selling health & beauty aid in drug stores, food stores and mass-merchandisers and the culprit is McNeil's Tylenol. Sales of Tylenol topped those of Crest by about $500,000. Compton Advertising is the Tylenol agency.

McNeil's entry in the sinus remedy market, Sine-Aid (with acetominophen), garnered $2,071,600 in ad support, mostly in network tv. The brand holds a 23% share of the $42,000,000 market, which has been growing 5% annually.

McNeil successfully test-marketed Intensin extra-strength capsules as a sister product to Sine-Aid. Intensin ad copy claims "54% more analgesic than the leading sinus tablet," which is Warner-Lambert's regular-strength Sinutab. Measured spending for Intensin was $100,500 in '78.

Warner-Lambert's Sinutab, with a 30% market share, and Smith/-Kline's Sine-Off, at 25%, have both followed McNeil's lead and added extra-strength acetominophen entries.

■ In the health care division, top ad priority went to o.b. tampons, which achieved full national distribution in 1978. Measured spending was $7,210,200 ($4,781,400 in network tv, $1,292,000 in magazines, $1,045,100 in spot tv).

Other big spenders in the division include Band-Aid bandages ($4,759,300) and new Reach toothbrush (introduced in 1977), which got $4,190,400, way up from the $1,182,100 spent in '77.

As the $120,000,000 U.S. sun care market heated up last year with a spate of new introductions, J&J's health care division put $1,215,600 in measured support (mostly tv) behind its Sundown sunscreen, which had been national with no support for two years. Young & Rubicam ads center around the product's staying power "even in the water."

In the Personal Products Co., most support went to Stayfree maxi and mini-pads, which got $12,073,100, making it the No. 2 brand spender behind Tylenol and ahead of Johnson's Disposable Diapers.

Spending for the pads, up from $10,508,000 in '77, was $8,319,300 in network tv, $3,017,800 in magazines and $736,000 in spot tv. Carefree Panty Shields received $4,163,800 in measured ad dollars ($2,460,900 in network tv, $1,582,800 in magazines). No spending for established Modess sanitary napkins was recorded by LNA.

■ In November of 1978, the Personal Products Co. introduced new Assure Natural Fit tampons in Rochester. Assure is described as "the high absorbancy tampon with a difference: It fits!" Unlike J&J's o.b. tampon, which is digitally inserted, Assure has a tube applicator and a deodorant, making it directly competitive with market leaders Tampax, Playtex and Kotex.

Some observers feel J&J missed the mark with o.b., whose market share potential is felt to be at most 10%, and that new Assure, a more mainline entry, might stand a better chance. Ad support, via SSC&B, was measured at $17,500 in 1978.

The new tampon may be on a collision course with P&G's new Rely tampon, however. P&G filed suit in U.S. district court alleging that Assure tampons are an infringement upon its Sure deodorant trademark. P&G also claimed that it has marketed tampons called Sure since 1964 and that it continues to use the name Assure for shampoo and mouthwash.

Also in the Personal Products Co. is Shower-to-Shower deodorant body powder, which received $1,304,600 in measured support, all in tv.

Advertising for Ortho Pharmaceutical's contraceptive products doubled from $621,400 in 1977 to $1,228,600 in 1978, with Deifen vaginal foam getting $891,800, and Conceptrol cream getting $336,800, both in magazines.

In February, 1979, the company acquired Technicare Corp., which manufactures diagnostic equipment in the fields of computed tomography scanning, ultrasonic imagers and nuclear medicine systems. Technicare's principal affiliates are Ohio-Nuclear Inc., Unirad Corp. and Chayes Virginia Inc.

S.C. Johnson & Son

	1978	1977
Sales	$550,000,000	$450,000,000
Advertising':	43,903,400	48,866,500

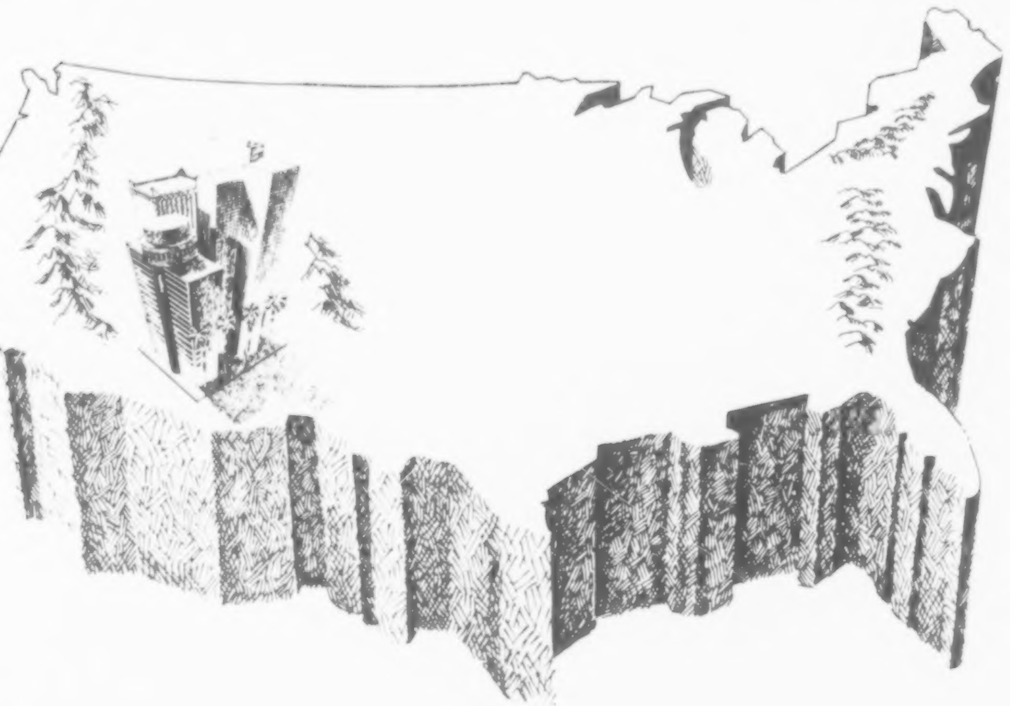
Figures are U.S. only, estimated by AA

S.C. Johnson & Son, Racine, Wis., the 77th largest national advertiser, is estimated to have decreased its advertising spending about 10% to $43,903,400 in 1978.

Despite the new product introduction of Agree shampoo in the summer of 1978, which got massive sampling and ad dollars behind it, spending for Johnson's established brands, with the exception of the Raid line, was sharply cut.

S.C. Johnson is privately owned and does not reveal sales and earnings. ADVERTISING AGE estimates domestic sales at about $550,000,000, for 1978. Total worldwide sales for last year were over $1 billion.

Test the U.S. in Phoenix.



When you test Phoenix, America's mobility and our ever-growing sunbelt migration give you opinions from Chicago, Poughkeepsie, and Oakland as well.

Phoenix gives you less than 5% deviation along all national demographic lines, and has the additional plus of a highly mobile population: the folks who pulled up roots from back home and are willing to try something new, including your test product.

Phoenix Newspapers dominate this major urban market with 81% weekly penetration metro households for a combined daily circulation of 301,000 and 308,000 on Sundays. No spill-in, no spill-out. You get contained, controlled testing with a near perfect statistical base. Our only blemish is that the people who read our newspaper tend toward the higher income levels, reflecting (as Phoenix will so well for you) a national trend.

For more information and a free copy of our new "Inside Phoenix" contact Howard Ruby, The Phoenix Newspapers, P.O. Box 1950, Phoenix, AZ 85001. He'll help you buy the best test in the West, the Midwest or the U.S.

MARKETING PROFILES

Founded in 1886 as a marketer of wood flooring, S.C. Johnson began in 1977 demonstrating its determination to excel in the personal care area as well as in the traditional household products categories in which it has been strong.

The national introduction of Agree creme rinse/conditioner, which rose to the top of the category within six months of its launch, showed that Johnson had the marketing savvy to accomplish this diversification. And in 1978, the company scored another success with Agree shampoo.

Following a test marketing program, in which the new shampoo got an 8.6% share Johnson Wax introduced Agree shampoo to the trade nationally in June, 1978. Advertising, with the theme "helps stop the greasies between shampoos," started last August.

A total ad budget of $30,000,000 for the first year was announced at that time, with $11,600,000 going to sampling, $9,100,000 to trade promotion and advertising and $8,500,000 into media. Through the end of 1978, $3,874,000 was spent in measured media, mostly network tv.

Agree now holds a 6% dollar share of the market, ranking as the No. 3 cosmetic shampoo. Agree shampoo is sold in regular, balsam, protein and oily hair formulas.

■ Another new product from S.C. Johnson that is getting considerable ad spending is Scrunge, a scouring pad/sponge. Scrunge went into test in the spring of 1978 and was rolled out in October. According to the company, Scrunge will get $6,000,000 in ad support in the first year.

Through calendar 1978, $2,273,000 went into media for Scrunge, split closely between net tv and magazines. The company said it is the leading product in its segment of the total market.

Agree creme rinse and conditioner still ranks as the best selling item in that category by units and is No. 2 behind Revlon's Flex in dollar share. Agree's unit share is about 21% and in dollars, about 18%.

The campaign theme "Agree helps stop the greasies," remains from the launch, but the company has more recently been experimenting with magazine ads using testimonials from consumers across the country.

Ad spending for Agree creme rinse/conditioner was sharply down from the introduction in 1977. From a launch supported with between $14,000,000 and $19,000,000 in media, couponing and sampling, (at least $7,000,000 in media) spending reported by Leading National Advertisers for 1978 was at $3,247,000.

■ Early this year, S.C. Johnson did some switching in its agency roster. J. Walter Thompson Co., which is a Johnson Wax agency abroad, picked up its first piece of domestic business from the company. The Chicago office will handle the business. Products moved to JWT included Pledge furniture polish, Edge shaving gel and Step Saver self-polishing floor wax.

Benton & Bowles and Ogilvy & Mather, both New York, ended their U.S. relationships with Johnson Wax by mutual agreement, the company said, due to account conflicts in new product areas, and low billings.

One of the products involved in the move, Edge shaving gel, improved its position in the shaving creme market by moving from a tied position with Noxzema shave creme into a solid second place behind Gillette's Foamy. Ad spending was down to $1,485,000, from $2,095,000 in 1977.

The push for personal care success is significant for S.C. Johnson, because the company had to find new growth categories. The household product areas in which Johnson has been a leader—floor care and furniture care—now are growing at a rate of less than 5% a year, compared with the steady 15% annual growth these categories experienced during the 1950s and '60s. Johnson reportedly has 10 new personal care entries in development and plans to introduce one a year.

■ In the floor care market, Johnson Wax continues to lead and its top seller, Future acrylic floor finish, improved its market share during 1978. Sharing the leadership slot in this market is Lehn & Fink's Mop & Glo. Spending for Future was steady at $2,795,400.

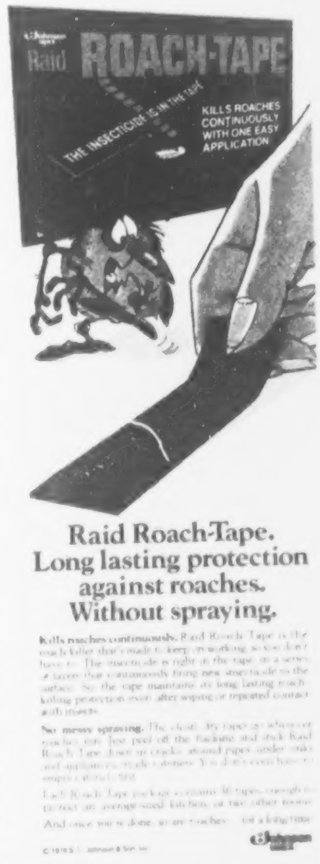
Step Saver, which was originally intended to compete with Mop & Glo, saw its spending cut from $2,354,700 to $1,609,900 in 1978.

In the furniture care area, Johnson Wax also holds the leadership position and its Pledge increased its share this year. Pledge now has close to 40% of the furniture polish category. Ad spending for Pledge declined for the second consecutive year from $5,800,000 in 1977 to $4,668,800 in 1978.

It appears that the company may be phasing out advertising for such brands as Favor and Klean 'n Shine. Spending for Favor furniture polish was cut to $896,900 from $2,330,000 in 1977 and Klean 'n Shine, got only $188,300 in measured media backing, according to LNA. These two products, which were at O&M and B&B, respectively, are now not assigned to any agency.

Glory home rug cleaner also got slashed measured spending figures in 1978, down to about $105,000 from the previous year's total of $1,423,600.

■ Ad budgets in several other categories were cut also. J/Wax car products, though promised a $3,000,000 expenditure for 1978, actually showed about half that sum.



Johnson
Raid
ROACH-TAPE
THE INSECTICIDE IS IN THE TAPE
KILLS ROACHES CONTINUOUSLY WITH ONE EASY APPLICATION
Raid Roach-Tape.
Long lasting protection against roaches.
Without spraying.
Kills roaches continuously.
No messy spraying.
Johnson

Spending for Raid Roach-Tapes helped S. C. Johnson & Sons continue to control 50% of the insecticide market with the Raid brand.

Rain Barrel fabric softener and Shout spray soil and stain remover also experienced budget cuts, though Shout's spending is about $2,000,000 annually.

Johnson Wax also is the leading marketer of insecticides and insect repellents. The Off! brand owns the repellent market with about 80% of total sales. Off! towelettes, introduced in 1977, have been very successful for the company. Media expenditures for the Off! brand as a whole were down to $845,700 in 1978 from $1,187,500 the year before.

The Raid brand continues to control more than 50% of the insecticide market on a national basis. Spending for Raid was up in 1978, as the Roach-Tapes alone got $2,226,800 in measured media support. Spending for the total Raid line was about $6,000,000, up from $4,191,800 in 1977.

In the air freshener category, Johnson's Glade has been a market leader in solid and aerosol formulations. Spending for Glade, however, dwindled to $201,700 in 1978 from $1,633,000 in 1977.

■ Other developments at the Racine company in 1978 included a lawsuit filed against Helene Curtis Industries when Curtis introduced its Clean Hair line of shampoos and conditioners. Johnson charged Curtis with false and misleading advertising and simulation of the packaging and labeling of Agree shampoo and creme rinse/conditioner. In an out-of-court settlement, Johnson won changes in packaging and advertising.

Herbert Fisk Johnson, chairman emeritus of the company, and its head for 38 years, died on Dec. 14, 1978.

K mart Corp.

	1978	1977
Sales	$11,695,539,000	$9,941,398,000
Earnings	343,706,000	297,818,000
Advertising	250,000,000	210,000,000

K mart Corp., Troy, Mich., the nation's No. 2 retailer and 5th largest advertiser, continued to make ground on Sears, Roebuck & Co.'s leading retail position as it increased domestic ad spending 19%, to $250,000,000 in 1978.

Sales shot up 17.6% to a record $11.7 billion, while earnings also set a new record, rising 15.4% to $343,706,000.

Store expansion continued to be a prime contributor to the company's sales growth. The retailer added 169 new stores and closed 21 last year, bringing the total to 1,496 K marts, 313 Kresges and 82 Jupiters in the U.S., Canada and Puerto Rico. The company has opened 600 new stores in the past three years and now does business in 257 of the 275 Standard Metropolitan Statistical Areas.

■ But it's not just the number of stores—an additional 1,500 are expected to open in the next 10 years—but the placing of the stores that has become key to the retailer's dramatic 20% compound annual sales growth rate in the last decade.

The company has continued to build in the major metropolitan areas, but at the same time it has tapped virtually untouched smaller markets in rural areas by building mini-K marts—stores of either 61,000 or 40,000 sq. ft., instead of the big-city sizes of 90,000 or 73,000 sq. ft.

The company claims it contributed 3.3% of total mass-merchandise sales in the U.S. last year, up from 3.2% in 1977.

In advertising, the company last year continued a policy set in 1977 to emphasize fashion and quality in its product lines—not just low prices. While K mart stuck to a jingle touting it as "the savings place," the ads featured items like women's disco shoes and name-brand major appliances at discount prices.

The bulk of K mart's advertising—about $217,000,000 of it—was unmeasured, consisting of newspaper preprint inserts (about 26 per year), Sunday magazine and run-of-press copy. Most advertising is prepared centrally and distributed to regional ad departments or individual stores which place it locally. In this way, the company maintains a firm hand over ad costs, while assuring continuity in the advertising.

Measured media spending was up about 7% in 1978, to $33,831,300, according to the company, although it still accounted for only 15% of the total ad budget. The biggest increase was in network tv, where spending was hiked 62%, from $5,240,000 to $8,915,000.

Spot radio rose slightly to $3,494,500, from $3,200,000, while network radio spending increased to $2,404,000.

■ Other measured media spending also decreased last year. About $1,000,000 dollars was hacked off the magazine budget, as spending dropped from $4,950,000 to $3,972,200. Spot tv edged down from $15,120,000 to $15,045,100. Outdoor spending dropped to a negligible level of $500, from $1,900.

By category, household furnishings received the heaviest backing in measured media, with the company spending $6,941,100 ($5,644,500 in '77). But the biggest increase came in automotive, where spending leaped from $7,600 to $1,992,200.

Measured ad spending in drugs and toiletries dropped from $377,800 to $174,900; from $32,700 to $500 for food; from $387,000 to $115,100 for men's apparel, and from $411,000 to $73,600 for children's apparel.

But ad investments increased dramatically for women's apparel, from $1,076,000 to $2,745,700, while family apparel spending rose from $328,700 to $692,200. Miscellaneous dropped to $16,501,500 (from $18,605,000 in '77).

■ For 1979, K mart chairman Robert Dewar predicted the company would continue to show financial results above those projected for the rest of the retailing business, even if the widely predicted recession becomes a reality in the second half. In the first quarter, K mart's earnings jumped 32.6%, to $45,590,000, on sales of $2.62 billion. In the first five months, sales soared 15.8%.

In the first quarter, the company forged ahead with its expansion, opening 36 new K marts. At least 180 new stores are expected to open in 1979.

At K mart's annual meeting last May, Mr. Dewar predicted the company's retail earnings would surpass Sears' "within a few years," while a company source said K mart execs are confident that Sears' over-the-counter retail sales lead can also be overtaken in the early 1980s. Sears earned $922,000,000 in 1978, with retail merchandise sales amounting to about $12.5 billion.

ADVERTISING AGENCY

Ross Roy Inc., Detroit

Kellogg Co.

	1978	1977
Sales	$1,690,600,000	$1,533,442,690
Earnings	145,100,000	138,191,[illegible]
Advertising*	79,600,000	69,804,[illegible]

*Estimated by AA

Kellogg Co., Battle Creek, Mich., the 49th largest advertiser, boosted its ad budget to an estimated $79,600,000 in 1978, up about 14% over $69,804,300 in 1977.

Sales rose to $1.7 billion in 1978, compared with $1.53 billion the previous year, and earnings reached $145,100,000.

The sales and earnings figures are deceptive, however, because foreign gains contributed heavily to the over-all figures. Earnings in the United States market were down 3% compared to 1977, but were offset by a 127% increase in earnings in areas other than the U.S., Canada and Europe due to higher prices and greater volume.

The FTC has been investigating the leading cereal companies to see if their holdings constitute a shared monopoly. It seems unlikely the FTC will eventually require divestiture, but the investigation drags on. It has yielded more than 36,000 pages of testimony and "continues to demand much of our management time and financial resources," according to Kellogg chief executive officer William LeMothe.

Kellogg and other cereal manufacturers have also faced stiff consumer attacks on advertising directed at children—especially for presweetened cereals. The FTC has held hearings into whether all advertising aimed at children should be banned.

Consumer reaction to the hearings may have contributed to an over-all decline in 1978 sales of presweetened cereals. Kellogg has stressed more heavily the nutritional value of its cereal products during the past two years.

- One of the company's cereal successes for 1978 was an adult cereal—Most. The high-fiber wheat cereal moved into national distribution in early 1979 after successful market testing. Most received about $1,038,300 in measured ad spending during 1978 and the ad spending for the bite-sized cereal is expected to increase considerably in 1979.

Another product, Graham Crackos, rolled national early this year. Most of Kellogg's cereals maintained the same market shares in 1978 as in the previous year. Sugar Frosted Flakes, Corn Flakes and Rice Krispies continued to anchor the company's cereal sales.

Frosted Flakes, which decreased in market share from 5.2% in 1977 to 5% in 1978, had the largest measured ad spending with $6,592,000. Rice Krispies received $5,473,000 in measured ad spending and also declined slightly in market share to 4.6%.

Corn Flakes received $4,946,000 in measured ad spending and increased slightly in market share to 4.9%. Cracklin' Bran, which controls 0.08% of the total cereal market, had an ad budget of $3,802,700.

- Kellogg expanded other product lines during the year. The Pop-Tarts toaster pastries line gained some new flavors. Danish Rings, tested in Ohio and Indiana markets during 1977, rolled national in January of this year.

Mrs. Smith's Pie Co. operation expanded during 1978 with new varieties of pies, including Light Pie and Lowfat Yogurt Pie for calorie-conscious consumers. A complete line of dessert and entree crepes under the Mrs. Smith's label is currently being test marketed.

Eggo brand frozen waffles set sales records in 1978, and Kellogg's plans to add new flavor varieties and perhaps alter the product's packaging.

The Eggo foods division of Fearn International subsidiary has expanded the market area for its line of commercial food service products, including syrup, mayonnaise, soup bases, salad dressings and gelatins. Fearn expanded distribution of its LeGout entrees, soups and desserts into supermarket deli distribution.

The Salada Foods subsidiary added a canister iced tea mix with a pull-top lid and a low-calorie tea mix. The measured ad spending for Salada regular tea was $1,341,000.

Kimberly-Clark Corp.

	1978	1977
Sales	$1,910,600,000	$1,725,500,000
Earnings ...	148,800,000	130,700,000
Advertising*	38,139,000	31,076,000

***AA estimate**

Kimberly-Clark Corp., Neenah, Wis., the 81st largest advertiser, is estimated to have spent $38,139,000 on advertising in 1978, up 22.7% over the $31,076,600 spent in 1977.

Sales were up 11% in 1978, the $1.9 billion from $1.7 billion the previous year. Net income climbed 14%, to $148,800,000 from $130,700,000.

First quarter 1979 sales totaled $546,500,000, about 14% higher than the first quarter of 1978, while earnings reached $42,100,000, compared with $38,100,000 in 1977.

Net income from operations in the U.S. rose 20%, to $114,400,000, during the year, while net income from operations outside the U.S. declined 3% in 1978, to $34,400,000. Kimberly-Clark attributed the drop to a decline in Canada.

- Consumer and service products—household and personal care paper products among others—had '78 sales of $1,231,900,000, about 10% over the 1977 figure. Operating profit, at the same time, increased 15%, to $147,500,000.

More than half of the company's '78 ad spending—$22,359,700—went into tv. Kleenex facial tissues, New Freedom maxi and mini pads and Kleenex Huggies disposable diapers were the top tv spenders.

Kleenex facial tissues were backed by $3,631,600 in network tv and $289,000 in spot tv. As in 1977, actress Jo Anne Worley appeared in tv spots promoting the variety of uses for Kleenex tissues.

New Freedom pads, despite having seen net tv spending decline from the nearly $5,000,000 recorded in 1977, still witnessed a considerable amount: $3,228,300 for net and $420,700 for spot.

One new development in the New Freedom brand was the introduction of a rounded-end napkin designed to improve comfort and absorbency. The new product, now being introduced nationally, is considered by the company to be the most significant development in feminine napkins since tabless pads were introduced earlier in the decade.

- The third product receiving considerable tv support was Kleenex Huggies, advertised as "the elastic leg diaper that helps stop leaking." The disposable diaper, now available in 40% of the country, is in-

PPL OPENS NEW U.S.

PROPRIETARY PERFUMES LTD., 50 WILLIAMS DRIVE

At a gala champagne reception, members of the fragrance community joined PPL in celebrating the official opening of our new U.S. headquarters in Ramsey, New Jersey. On hand for the festivities were PPL's chairman, Geoffrey Roberts, and PPL board members from our international headquarters in Ashford, Kent, England.

"The United States has become the world's most attractive nation for investments by international companies . . . We are at home in the United States: a growing company in a growing country."

In his welcoming remarks at the new facility, Mr. Roberts stressed PPL's commitment to assume an even greater role in worldwide fragrance marketing. "Today, the U.S. is home to more than $40 billion in investments by international enterprises. The United States has become, and will remain for some time to come, the world's most attractive nation for investments by international companies.

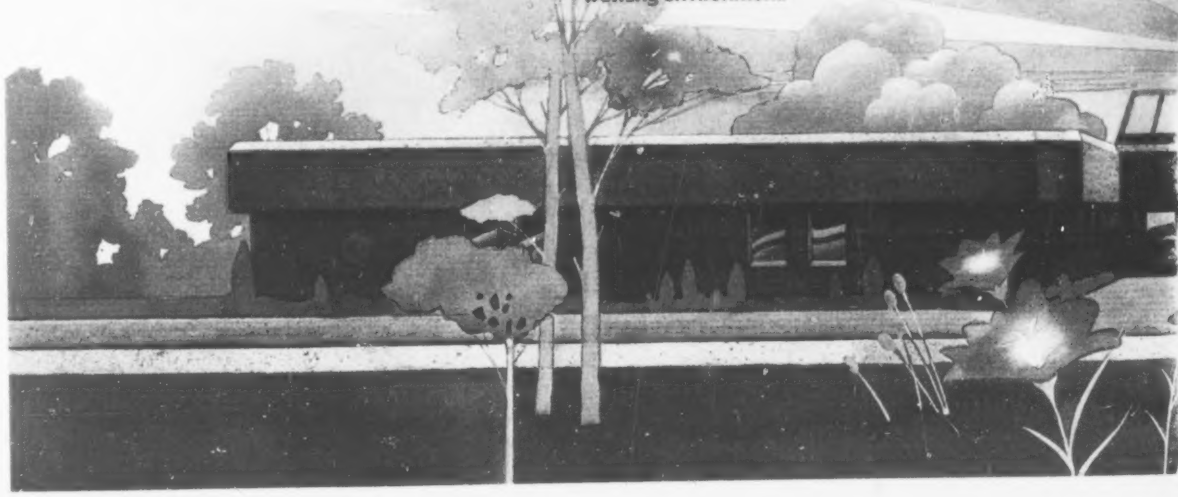
"We're proud to be a part of the rapidly growing international presence in the United States, a country with an enormous advantage over other nations. The U.S. is a liberal, cosmopolitan society that thrives on human diversity and personal freedom. It is a land of opportunity where ambition, innovation, hard work and economic productivity are rewarded. We feel at home here—a growing company in a growing country."

And we certainly are growing. Already we've increased our U.S. staff by one-third and are predicting an annual U.S. growth rate of more than 20 percent.

We're very proud of our spacious new home.

The three-wing building, situated on more than seven landscaped acres, boasts modern full-scale laboratories, including fragrance and applications labs, testing and quality control laboratories, aerosol, soap and small-scale compounding laboratories. In addition, there is a product library with perfumed products from all over the world, a fragrance library of more than 5,000 perfumes, a vast compounding area and modern administrative offices.

One of the most interesting features of the new facility is its unique charcoal air filtration system. It provides clean air throughout the facility, making for a pleasant, odor-free working environment.



volved in strong competition with Procter & Gamble's premium diaper, Luvs. After Kimberly-Clark first started testing Huggies in Michigan and Wisconsin, in late summer of '78, it opened battle against Luvs in major eastern markets. Both brands are parity priced—about 25% to 30% above Pampers, the leader in the $900,000,000-plus disposable diaper market.

The efforts with Huggies came as the company virtually abandoned its disposable Kimbies diapers and as it moved Kleenex Super Dry diapers, which have wetness indicators, into 30% of the country. Huggies was supported by $2,126,000 in spot tv in 1978.

▪ Among other products receiving heavy ad support were the Kotex brand of feminine protection products. Kotex maxi and mini pads received a total of $3,316,100 in measured media support, most of it in net tv. Kotex Light Days pads received $1,876,300, against most of it in net tv.

Kotex tampons and stick tampons got $2,329,000, of which $1,383,100 went to magazines; the remainder went to spot tv.

In the $500,000,000 trash bag market, which has been growing at a rate of only 5% a year, Kimberly-Clark introduced Ironsides, "a trash bag with guts," into test in Fort Wayne.

In its first assignment from Kimberly-Clark, Tatham-Laird & Kudner stressed the strength of the nylon-reinforced bags that the company claims can "stand up to sharp and jagged objects." A total of $12,400 in measured media support backed the bags—$9,400 in magazines and $3,000 in spot tv.

If successful in test market, Ironsides would face competition from the current top trash bag manufacturers, Union Carbide (Glad) and Mobil (Hefty), which during the year held 34% and 26% of the market, respectively.

The paper towel category continued to see Phyllis Diller act as spokeswoman for Kimberly-Clark's Thick & Thirsty two-ply paper towel. Measured media support totaled $183,200, all of it going to net tv.

Another K-C paper towel, Hi-Dry, received no reported ad support, but it managed to rack up significant sales figures nonetheless because of its low price.

While developing and maintaining lines in these consumer product categories, Kimberly-Clark is attempting to carve out a market with its new nonwoven fabric called Evolution.

The company in January introduced its entry into the $500,000,000 tablecloth market at the National Housewares Exposition. Known as Cheers, the cloth is being made and marketed for K-C by Straubel Paper Co., and Riegel Textile Corp.

In addition, Kimberly-Clark later introduced Rest Assured, a mattress pad fabric that involves a licensing plan that will get consumer ad support.

▪ Evolution first surfaced in mid-1977 with radio and newspaper ads backing the brand and the mattress pads manufactured with the fabric. That effort apparently led to the licensing program that carries the Rest Assured name.

Cheers tablecloths aren't being supported by direct consumer ads. The line is being aimed at discount stores and grocery chains.

Major agency switching meanwhile, did not bypass Kimberly-Clark during the year. The chief beneficiary was Ogilvy & Mather, New York, which eventually gained the accounts of Kotex feminine care products and the infant care product lines from Kelly, Nason-Univas.

ADVERTISING AGENCIES

Leo Burnett Co., Chicago: household products; New Freedom feminine care products

HEADQUARTERS

RAMSEY, NJ 07446 • NUMBER 17

A second distinctive feature of the Ramsey facility is a specially designed trolley which, driven by the compounder, travels throughout the blending area collecting predetermined amounts of raw material for compounding. The materials are then deposited in stainless steel tanks for mixing and filtering.

In keeping with the dynamic, innovative and highly creative nature of the fragrance industry, the new PPL facility sparkles with an aesthetically stimulating environment.

A large indoor garden connects the laboratory, blending and office areas with a rich variety of greenery and complements the carefully landscaped grounds.

To preserve the natural setting, we had a low building designed, spared as many trees as possible during the initial building stages and planted the grounds heavily after construction. With over 1500 plants, bushes and trees of various species, the building blends in with its rural, residential surroundings.

We're also blending in elsewhere . . . With the cooperation of the Art Center of Northern New Jersey, we're sponsoring a series of art exhibitions in our new headquarters.

Charles M. Young, PPL's U.S. president, says aesthetic involvement is a reflection of company philosophy. "Art and fragrance both involve creativity. We know how important it is for artists, like perfumers, to be supported and encouraged in their work. This is what we hope to accomplish with our art displays."

Speaking of accomplishments . . . We've been hard at work developing new capabilities to better serve our customers.

Our new U.S. headquarters is just one of a growing number of PPL perfume facilities throughout the world. In addition to our international headquarters in England, we have major support centers in France, Germany and Singapore. We're also expanding our center in Brazil and increasing our chemical manufacturing facility in Ashford.

At present, we process more than 25 tons of perfume daily at our Ashford plant, one of the largest compounding facilities in the world. Our worldwide production has more than doubled since 1968, and this year's figures well exceed budget projections.

The key to PPL's continued success is our unique service package, combining both creative and technical skills with worldwide experience. We understand the role of fragrance in providing our clients with an important plus in successfully marketing their consumer products.

Advertising*	114,166,700	99,000,000

†Worldwide

***Estimated by AA for U.S. and Canada**

Kraft Inc., Glenview, Ill., the 36th largest U.S. advertiser, increased its national total advertising by approximately 15% in 1978 to an estimated $114,166,700.

Sales rose for the 17th consecutive year to $5.67 billion, an 8.2% increase over the previous year. Earnings rose 19.4% to $184,000,000.

Kraft reportedly invested $141,300,000 in world advertising in 1978, an increase of 21% over the $116,700,000 invested in 1977. This represents 2.5% of world sales as compared with 2.2% in 1977.

Sales within the U.S. and Canada were $4.68 billion, a 6.6% hike over 1977. Outside the U.S. and Canada, sales rose 16.8% to $991,000,000.

▪ In promoting its retail food group last year, Kraft spent $6,132,300 on multi-product advertising ($4,076,400), its foods division sweepstakes ($1,139,800) and its tv programs ($916,100). The multi-product advertising mainly was seen on network tv. The sweepstakes was advertised in consumer magazines and newspaper supplements only. And the advertising dollars promoting the tv programs were spent on space in consumer magazines.

▪ Two of the company's biggest promotions are the annual Salad Days campaign for pourable and viscous salad dressings and the Family Reunion theme, which was initiated last year.

Kraft calls the Family Reunion theme the "largest and most successful promotion of Kraft retail products in company history." As Kraft celebrated its 75th anniversary, it used this theme to remind consumers that "the Kraft brand name has been associated with the bringing together of good food and families for more than three generations."

Kraft pourable salad dressings, which rank No. 1 in a $400,000,000 market, have been promoted through the Salad Days campaign since 1971. The campaign starts every year around April and runs for about four months throughout most of the country.

It has been supported in conjunction with many produce suppliers, including the California Tree Fruit Agreement, Dole bananas and pineapples, the California Iceberg Lettuce Commission and the National Potato Board. These partners provide ingredients that appear with Kraft products in the ads and they share costs, campaign strategy and advertising ideas. Kraft spent $268,200 in consumer magazines promoting its Salad Days sweepstakes.

▪ Total measured media advertising for salad dressings last year was $7,694,900, with $5,718,200 in spot tv and $1,175,500 in network tv. The remainder was split between consumer magazines ($710,000) and network radio ($90,500).

For the viscous salad dressings, Miracle Whip received $7,150,900 in support and Kraft mayonnaise got $4,668,700, according to Leading National Advertisers.

Most of the Miracle Whip advertising went to network tv ($3,627,000) and spot tv ($2,577,500). The mayonnaise similarly was advertised on spot tv ($2,276,600) and network tv ($1,434,300).

In another joint promotion, Kraft joined with Picante Inc., marketer of Pace Picante sauce, a Mexican style hot sauce, for a newspaper campaign featuring Velveeta cheese spread. The ads ran in the southern half of the country during November and December, 1978.

▪ With the theme, "Hot Dippity!", the ads offered a recipe for "a hearty hot dip ready for dipping in minutes." Measured media support for Velveeta last year totaled $596,300. The portion for newspaper supplements was $31,600 and the rest, $564,700, was spent on ad space in consumer magazines.

Kraft macaroni and cheese dinners were promoted in a sweepstakes featuring the "You know you're going to like it" theme and offering an unusual grand prize: "You pick it!" the ads said. It broke with color page ads in July, 1978, women's magazines and in-store p.o.p. displays.

Over-all last year, the macaroni and cheese deluxe dinners were supported by $2,359,800 in measured media. The bulk of the funds $1,785,400 spent on network tv.

"Bite into the taste of natural fruit" sweepstakes in support of Kraft jams, jellies and preserves offered a variety of prizes to match the choice of flavors. The company spent $208,200 on advertising in consumer magazines.

In a coupon promotion, Kraft supported its cheese products by offering a cheese cutting and serving board for $5.75 and proof of purchase. Color ad pages were seen in April issues of *Family Circle*, *House & Garden*, *Southern Living* and *TV Guide* and the May issues of *Better Homes & Gardens* and *True Story* magazines.

Over-all, Kraft cheese received $10,569,000 worth of advertising support, primarily split between network tv ($4,491,600), spot tv ($3,068,500) and consumer magazines ($1,977,800).

▪ Kraft also sponsored a Premium Ice Cream Program promotion for Breyers, Sealtest and Light n' Lively lines in the Houston and Dallas/Fort Worth markets. And, in a combined merchandising program, Miracle Whip salad dressing, which made substantial gains during 1978 as "The Bread Spread," was teamed with Kraft Singles cheese slices in a Sandwich Days promotion.

A longtime sponsor for tv specials, Kraft sponsorship was extended to many shows in the past year, including the "Country Music Awards" last October, a repeat of "The Gathering" in December on ABC-TV, the Bing Crosby Youth Foundation salute hosted by Bob Hope in January, a Pearl Bailey special on CBS during March and the two-part "Chronicles of Narnia" shown on CBS-TV in the spring.

William Beers, Kraft chairman-chief executive officer at the time the shows were in production, said the company would put "more than $3,000,000" behind the first two "Narnia" shows. The shows were supported by special instructional materials and displays for use in schoolrooms and libraries in addition to extensive multimedia tie-in marketing promotions that, according to the company, "are a regular aspect of Kraft tv specials."

KRAFT
KRAFT

Kraft cheese spreads were advertised in color fractional ads in women's magazines.

Kraft also sponsors "The Adventures of Slim Goodbody in Nutri-City," a children's health feature series broadcast twice a week on the "Captain Kangaroo Show."

▪ In order to increase the marketing effectiveness of its dairy group, Kraft put that operation this year under the direction of its retail food group, headed by O. Everett Swain, exec vp and chairman of retail food. This move affected the operation of Sealtest, Breakstone and Breyers, which currently is marketed primarily in the eastern U.S.

Kraft spent $7,254,500 advertising Sealtest brands in measured media last year, with the bulk of its dollars in spot tv ($6,952,400). For Breakstone cottage cheese, salad dressings and sour cream, $2,545,100 was spent almost exclusively in spot tv advertising. Breyer's ice cream and yogurt were backed with $6,596,000 in spot tv.

In an as yet unresolved suit filed last year, Kraft is suing the Kitchens of Sara Lee unit of Consolidated Foods for trademark infringement, charging that Sara Lee's Light 'n Luscious name for cakes and yogurt chiffon pies corrupts Kraft's own Light n' Lively trademark and will dilute the value of the Kraft brand.

▪ According to the company, "Kraft's over-all marketing target is eventually to participate in all meals, wherever consumed." Therefore, Kraft has opened seven broadline food service distribution centers, bringing the total to 19. The new offices serve the metropolitan areas of Atlanta, Birmingham, Dallas, Los Angeles, Memphis, New Orleans and Tampa. The company's broadline districts now cover about 60% of the major U.S. markets.

During 1978, Kraft introduced food service portion control cheese products in five varieties: Sharp and mellow cheddar, Muenster, brick and Gouda.

In order to "take advantage of the trend to greater consumer interest in diet and nutrition," the Light n' Lively line of lower-fat, reduced-calorie process cheese products was expanded from test market into national distribution last year. Total advertising dollars for Light n' Lively in measured media during 1978 was $2,319,300 mostly in spot tv ($1,170,000).

Parkay Light spread, a vegetable oil product with 25% less oil than margarine, tested favorably and was put into national distribution in September.

The company introduced several of its products overseas last year: Dips, cheese spreads and imported natural cheeses in Australia; Cheez Treet, a filled cheese spread, in the Philippines; Philadelphia Brand cream cheese in Belgium, and Kraft mayonnaise, sweetened condensed milk and Philadelphia Brand cream cheese in the Canary Islands.

Kraft products receiving measured ad support in excess of $1,000,000 in 1978 included:

- Cheese products with $1,276,300, primarily in consumer magazines.
- Cracker Barrel brand cheese with $2,318,600, also primarily in consumer magazines.
- Grated cheese with $1,251,100, all in consumer magazines.
- Jellies and preserves with $1,467,300, primarily in spot tv.
- Parkay margarines with $5,548,800, primarily in network tv.
- Wrapples caramel slices with $1,190,400, almost entirely in network tv.
- Philadelphia cream cheese, with $1,423,500 split between magazines ($901,500) and outdoor ($522,000).

In June, 1979, John M. Richman replaced William Beers as chairman and chief executive officer of Kraft Inc. According to Dow Jones wire service, Mr. Richman intends to strengthen his company's position in its established markets before tackling the diversification that many business analysts have predicted for some time.

In reference to diversification, Mr. Richman noted that Kraft "can afford to search carefully" before investing and he added, "I think we've got to be prepared to take a few risks. Not everything we touch will turn to gold."

He also pointed out that there is a general lack of awareness regarding the scope of Kraft's work in food service.

"We're building what we hope will be a business of over $1 billion in a few years almost from scratch," he said, adding that Kraft hopes to become the No. 1 national supplier to the food service industry.

Mr. Richman also said Kraft will be exploring expansion opportunities in Europe, the Far East and Latin America.

Liggett Group

	1978	1977
Sales	$970,695,000	$877,848,000*
Earnings ...	56,820,000	2,604,000
Advertising	68,943,000	57,753,000

*Restated

Liggett Group Inc., Montvale, N.J., the 58th largest national advertiser, increased its U.S. advertising and promotional budget about 20% to $68,943,000 in 1978.

Liggett's most significant development during the year was its shift away from its cigaret business and toward more diversified consumer products.

▪ On June 26, 1978, the company sold its foreign cigaret business to the Swiss affiliate of Philip Morris Inc. for $108,000,000 including $63,000,000 in inventory, receivables and other assets relating to the international business. This caused speculation that Liggett would get out of the cigaret business altogether since its Liggett & Myers Tobacco Co. had suffered a 30-year decline of market share, ranking last among six U.S. cigaret makers with only 3.4% of the market.

Cigaret revenues were higher in 1978 because of price increases despite lower unit sales and increased promotional spending, the company said. Sales for the domestic cigaret operations were $284,000,000, equal to 29.2% of total corporate sales. However, operating revenues were only $8,400,000, or 9.4% of total operating income.

The company spent a total of $16,840,000 in measured media, mostly magazines, advertising its cigaret brands. The bulk of the ad dollars went to promote the low-tar cigaret category.

Liggett spent $4,795,500 to advertise its low-tar L&M Long Lights and L&M Flavor Lights and $10,179,900 for low-tar Decade. This included $119,000 for a Decade team tennis championship sweepstakes promotion developed by Bozell & Jacobs and $28,000 for the introduction of a new premium length Decade 100s brand in Oregon test markets.

▪ Two additional low-tar entries, Lark Lights and Eve Lights, were test marketed in 1978. Lark Lights' distribution has expanded this year. In contrast to the high spending for the low-tar category, no measured media ad spending was reported for Chesterfields, one of Liggett & Myers' oldest brands.

▪ Late in the year, J. Walter Thompson Co., regained the advertising account for L&M cigarets which it lost to Cunningham & Walsh in 1973. JWT reportedly accepted the account of the troubled cigaret line on a fee system to prevent the agency from losing money. C&W was forced to resign the account due to a conflict which arose when it merged with Chicago-based Post Keyes Gardner, a Brown & Williamson Tobacco agency.

Pinkerton Tobacco Co., Liggett Group's chewing and smoking tobacco unit, produced net sales of $63,769,000, equal to 7.5% of total sales and generated operating income of $18,087,000, or 16.9% of total operating income.

Sales of the chewing and smoking tobacco group remained about the same as in 1977 because price increases were offset by lower unit sales. The company said it would increase its promotional support of its principal brands in this group to meet competitive activity and protect its interest in the business.

In 1978, television and radio were the primary advertising mediums for Pinkerton's chewing tobaccos, including its principal brand, Red Man, the largest selling chewing tobacco in America. Red Man tv commercials featured Terry Bradshaw, quarterback of the Pittsburgh Steelers.

▪ Spirits and wine sales were 21% higher, reaching $232,340,000 in 1978, equal to 22.1% of total revenues. Operating income reached $43,307,000, or 40.6% of total operating income. Operating income for principal brands, including J & B Rare Scotch, Wild Turkey bourbon, Grand Marnier liqueur and Bombay English gin, was 26% higher, despite what the company termed "considerably higher" promotional expenditures. Measured media spending for those four brands totaled $11,445,300.

During the year Liggett's Paddington Corp. expanded distribution of its Izmira brand of white beet Turkish vodka to a national level with promotional support including $1,491,700 spent in magazines and outdoor advertising.

Late in 1978, Liggett's Austin Nichols & Co. division introduced two new products, Cordial Campari, a raspberry liqueur, and the Henriot line of premium French champagne, and it expanded distribution of Croft sherry and port wines.

Liggett's Carillon Importers Ltd. promoted Grand Marnier liqueur with gourmet cooking demonstrations in more than 1,000 department stores and with a national amateur ski club competition.

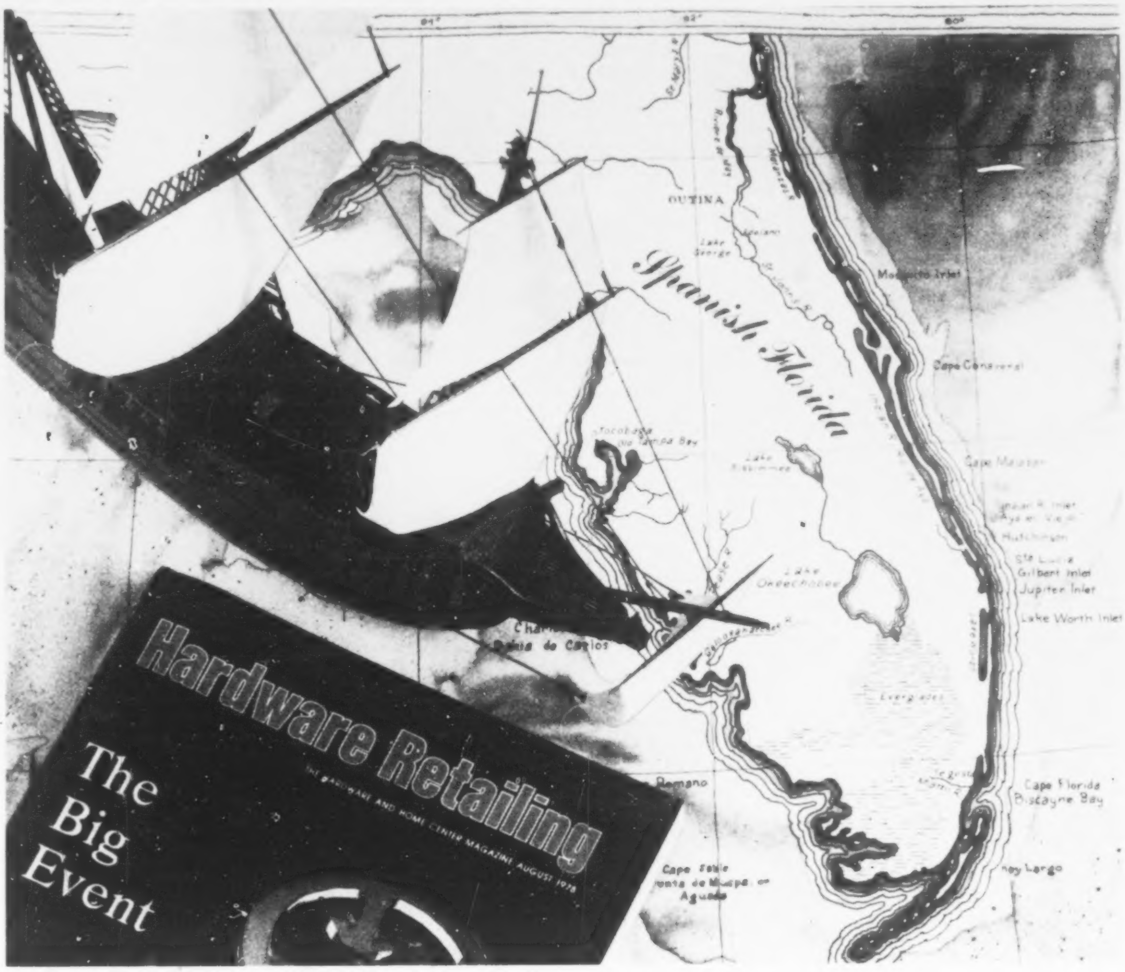
▪ Sales climbed to a record level of $182,895,000 at Allen Products, Liggett's pet food company, but 1978 operating income was slightly lower at $10,884,000, because of very high promotional expenditures to launch the new Alpo dry dog food, the company said.

It spent $6,887,700 in measured media introducing the new product, largely on network television, with commercials featuring actor Lorne Greene.

▪ The company also spent more than $5,000,000 advertising its Alpo brand of premium canned dog food, as the company introduced new beef and liver dinners and completed national distribution of Alpo beef chunks dinner. Alpo liver chunks dinner will move into national distribution this year.

The company said pet food sales at Allen Products increased 31% in 1978 because of the new Alpo dry dog food and significant increases in sales of canned Alpo.

Altogether, Liggett spent $14,199,200 in measured media for its various Alpo products. Other



Two great space buys.

An acre in Palm Beach for only 13 cents.

Florida had been settled in 1513 by Ponce de Leon, searching for the "fountain of youth." Three hundred years and a number of wars later this tropical paradise had become a thorn in the side of its Spanish overlords. And, to settle claims against it by American citizens, Spain ceded the entire 58,560 square miles for $5 million, or 13 cents an acre. A truly great space buy.

***Hardware Retailing* is your best space buy in hardlines advertising.**

And advertisers know it. That's why hardlines manufacturers and their advertising agencies place more total pages of advertising in *Hardware Retailing* than in any other hardlines book—1640 pages in 1978.

Why? Because they know that *Hardware Retailing* gives them more readers—and *more influential* readers—at the lowest cost per thousand in the industry. And the reason we've got the readership is our across-the-board leadership in hardlines publishing—in editorial, in circulation, in marketing and in the "people power" of the National Retail Hardware Association.

Enter the "Great Space Buyers of All Time" Contest. You may win a vacation trip for two to the Las Vegas Hilton or one of 100 other prizes.

Ask your *Hardware Retailing* representative for an entry blank (and a little help if you need it), and name the exact year the Adams-Onis Treaty brought Florida to the United States. This is part of a series of six. Get all the answers right, and your name goes into our Grand Drawing.

MARKETING PROFILES

Allen Products pet food brands include Liv-A-Snaps pet food treats, Bi-Ta-Biscuit dog bones, and Alamo brand dry dog food and Beef By-Products Dinner, a new popular-priced canned dog food.

During 1978, Liggett actively sought to sell Perk Foods Co., its unsuccessful economy-priced pet food subsidiary, following a Federal Trade Commission order to divest itself of Perk. (Liggett sold Perk to CHB Foods, Terminal Island, Cal., in 1979.)

Liggett's other products division, which includes physical fitness and sporting equipment of the Diversified Products Corp; three Pepsi-Cola soft drink bottling franchises; the National Oats Co. line of popcorn and cereals; carpet care products from Earl Grissmer Co; and jewelry products from watchband maker Brite Industries Inc., has a good year over-all, with total group sales of $179,115,000.

- During 1978, the company acquired the Atlantic Pepsi-Cola Bottling Co., Columbia, South Carolina, which more than tripled Liggett's involvement in soft-drink bottling.

As part of Liggett's shift away from cigarets and toward other consumer products, the company's corporate staff relocated from Durham, N.C., to Montvale, N.J., last month to be in the greater New York area.

The company says its primary objectives will be to restructure its present product lines and seek further diversification through acquisitions. The company also is looking for internal growth from its distilled spirits, pet foods, soft drinks and physical fitness products.

ADVERTISING EXPENDITURES

	1978	1977
Newspapers	$18,994,800	$20,000,000
Magazines	23,081,600	18,596,800
Spot tv	3,368,700*	4,541,900

Loews Corp.

	1978	1977
Sales	$3,455,644,000	$3,238,412,000
Earnings	168,165,000	174,349,000
Advertising	78,385,800	66,114,000

Loews Corporation, New York, the 50th largest national advertiser, is estimated to have hiked its 1978 advertising expenditures 19% to $78,885,800.

Sales reached a record $3.45 billion, up nearly 7% over 1977, but net income declined to $168,165,000, from $174,349,000. The 1977 figure includes income of $45,700,000 from the sale of Loews' foreign cigaret business. Income from continuing operations jumped 83% in 1978 to a record $147,700,000, from $80,700,000.

Loews owns 57% of the stock in CNA Financial Corp. Loews' equity in CNA generated 50% of the parent's net income in 1978, compared with 43% the year before. CNA property and casualty insurance revenues were up nearly 5% to $1,119,446,000, and life insurance revenues increased by 3% to $1,008,957,000.

CNA's consumer finance subsidiary, General Finance, generated revenues of $125,126,000, an increase of 11% over the previous year. This record was achieved in the face of the higher money costs that track the higher prime interest rate.

CNA's advertising program in 1978 stressed its commitment to its independent agents in a $704,500 magazines campaign. CNA introduced a "high performance agents" program and expanded its agent incentive plan.

Loews reports that its tobacco subsidiary, Lorillard, enjoyed its finest year in its 218-year history in 1978, as its share of the domestic market rose to 9.1%, from 8.8% in 1977. A full share of the market was worth about $87,000,000 in sales at the manufacturer's level in 1978.

Lorillard has a growth rate of about 12 times the industry average. Production of all Lorillard brands totaled 55.29 billion units, up 4.1%.

Lorillard continues as the fifth largest cigaret manufacturer, trailing industry leader R.J. Reynolds, Philip Morris, Brown & Williamson and American Tobacco.

The growth segment in cigarets is low-tar brands, defined as 15mg and under. In 1976, one out of every five cigarets sold was low tar. By 1978, low tar brands had captured one-third of the market.

Lorillard anticipated this trend and positioned itself solidly within the market, with four principal entries: Kent, at 12mg; Golden Lights, 8mg; True, 5mg, and the new Kent III, at 3mg.

Wear a Max today!
Great looking.
Great tasting, too.
Long, lean all-white
Max 120s.
MAX
MAX

Loews Corp.'s Max 120s received $2,000,000, most of which was put into magazines and newspapers. The cigaret is targeted to women.

On Sept. 13, 1978, Lorillard dropped the Kent name from Kent Golden Lights brand in order to make the brand easier to ask for, and to clear up any confusion that existed between Golden Lights and the parent brand Kent, according to the company.

Golden Lights recorded another year of high growth, selling 14.7 billion units, a 26% surge over 1977, making it one of the industry's fastest growing brands. Golden Lights 100s paced the growth, enjoying a volume jump to 4.53 billion units, from 1.99 billion, with total market share more than doubling to 0.7%, from 0.3%.

Golden Lights was backed by a measured media campaign of $22,580,375, including $8,251,475 in newspaper support. Outdoor received $3,807,400.

Second among Lorillard spenders was True, with $13,762,115 for all measured media, including nearly $6,000,000 in magazines, $3,777,000 in outdoor and $2,321,415 for newspapers. Unit sales for True were up 6.1% to 11.55 billion.

- Lorillard's high volume cigaret, Kent, saw sales drop 13.9%, to 15.98 billion units. By year's end, the unit volume differential between it and the soaring Golden Lights had shrunk from 6.94 billion to 1.28 billion.

In 1977, Kent registered sales of 30.16 billion, and ranked sixth among all brands. In 1978, after Golden Lights was spun off from its parent, Kent held the No. 10 spot, with Golden Lights following as No. 11.

Kent's precipitous sales drop in 1978 was offset by Golden Lights' jump, so that their combined volumes in 1978 exceeded 1977 sales by a half billion units.

Kent's advertising budget was substantial. Leading National Advertisers reports that Kent put $7,903,700 into magazines, newspaper supplements and outdoor. An additional $3,786,500 was channeled into newspapers. Kent deluxe 100s and king size cigarets received the heaviest support.

- Newport experienced a sales gain of 17.7%, to 8.58 billion units. It was the only major low filtration menthol brand in the industry that enjoyed growth in 1978. Excluding newspapers, Newport spent $7,953,100 on major media, with almost 45% of that amount allotted to outdoor.

Max 120s, a cigaret targeted to active women, by contrast put no money into outdoor. Max' estimated $2,000,000 ad expenditures were concentrated in magazines, with some newspaper advertising, in an effort to carve into the market created and dominated by Philip Morris' Virginia Slims, which had 1978 sales of 9.69 billion, up 1.8%, compared with Max' 3% gain to 1.04 billion units.

Max' promotional approach is strongly tied to fashion, striving to earn an image of smartness and sophistication. To this end, Max makes use of sweepstakes, mailings, beauty market tie-ins and pinpoint samplings to select groups.

Old Gold sales were off, to 3.3 billion, from 3.57 billion. Major media received $1,294,000. Last summer, Old Gold parted ways with its agency of two years, Kelly Nason, New York, and settled at MCA/-Graham, the agency which also manages the Newport account.

Old Gold, and its low-tar extension, Old Gold Lights, introduced in the summer of 1977, are marketed mainly in the northern tier of the country. The brand has not shared in the volume growth generated by other Lorillard products.

- After testing two new low tar entries, Triumph and Kent III, both at 3 mg, Lorillard rolled out Kent III into the national market early in 1979, with Triumph following six months later. By the end of 1978, the ultra low tar segment of the tar spectrum had the fastest growth, almost 30%.

With its new entries, Lorillard is taking aim at the market controlled by American Brands' Carlton, which at 1mg witnessed growth of 27% to 10.09 billion units in 1978, and R.J. Reynolds' Now, at 2mg also a comer, increasing its market share 13.1% to 3.20 billion units.

In 1978 test, Kent III had an ad budget of $160,300; Triumph was allotted $141,900. Both brands were supported principally in outdoor.

Lorillard spent $704,500 advertising Beech-Nut chewing tobacco in 1978.

- Loews' hotel division increased its revenues by 17.6%, or $17,624,000, compared with 1977, a reflection of increased occupancy and higher room rates. Loews presently operates 15 properties around the world, including the soon-to-be completed Loews Biarritz Hotel, a spa resort on France's south Atlantic coast. On the French Riviera is Loews Monte Carlo, which contains the only in-house casino in Europe.

In January, 1979, the hotel division opened the new Loews Anatole in Dallas, a 1,001 room hotel with convention facilities. In Manhattan, Loews hotels include the Regency, Drake, Warwick and Summit, as well as the Ramada Inn and the Howard Johnson Motor Inn. Loews spent $167,000, primarily in magazines, to promote these New York facilities last year.

The Theatre division upped its revenue contribution in 1977 by 24.7%, or $8,217,000, as the result of increased theater attendance. A list of popular film releases—such as "Superman," "Close Encounters of the Third Kind," "Saturday Night Fever" and "The Goodbye Girl"—attracted more movie-goers in 1978 than in 1977 to Loews theatres.

- Loews acquired a 30.3% interest in Bulova Watch Co. in January, 1979, from the Hong Kong-based Stelux Mfg. Co. for $11,400,000. After acquiring an additional 7% of the stock, Loews launched a tender offer to acquire the remaining shares at $10 each.

At the close of the initial period of the offer, Loews had control of nearly 84% of the stock. Total price of the deal is put at around $38,000,000.

Although possessing assets of $180,000,000, Bulova has not been in good fiscal shape lately. It lost a total of $48,100,000 in the last three years. In the first three-quarters of 1978, Bulova netted $10,000,000 on sales of $171,000,000, although a loss was expected in the traditionally slow fourth quarter.

Loews is said to be attracted to Bulova in part because of its well known consumer name, and its extensive network of 20,000 retail jewelry distributors. When Loews took over the now-successful CNA Financial Corp., it too was troubled.

ROOTS:
THE NEXT GENERATIONS

ABC's "Roots: The Next Generation" rated as the second most popular show in tv history.

MCA Inc.

	1978	1977
Sales	$1,120,644,000	——
Earnings ...	128,379,000	——
Advertising	61,000,000	——

MCA Inc., Universal City, Cal., the 66th largest U.S. advertiser, makes its first appearance in the list of 100 top national advertisers with advertising expenditures estimated at $61,000,000 for 1978.

Advertising campaigns totalling $18,900,000 that support theatrical films released by Universal Pictures comprise the lion's share of MCA's spending. Spencer Gifts, Inc., a mail order and retail store operation catering to the mass market, is MCA's second largest spending subsidiary with 92% of its $6,400,000 measured advertising budget concentrated in newspapers and related supplements.

MCA's record and music publishing divisions allocated $1,500,000 to advertising albums and tapes. The balance of MCA's advertising is divided among other divisions.

- The unmeasured category of $31,000,000 reflects cooperative advertising primarily from MCA's feature film and to a lesser extent music and book divisions. These cooperative ads are placed by movie theaters, record stores and book stores handling MCA products.

MCA Inc. is headquartered on the lot of its Universal Studios near, Hollywood, Cal., in a 16-story, dark glass building that is referred to as "The Black Tower" in the film, tv and music industries where the diversified company has major holdings. Stock split 5 for 4 in September, 1978, on the strength of film, tv, retail and mail order, financial and recreation divisions reporting "the best year in their history," according to MCA.

Advertising for feature films, according to a Universal Pictures representative, increased 86% in 1978. The increase is attributed to an over-all effort to provide greater advertising support to films and also because the 23 features released in 1978 are eight more than the year before.

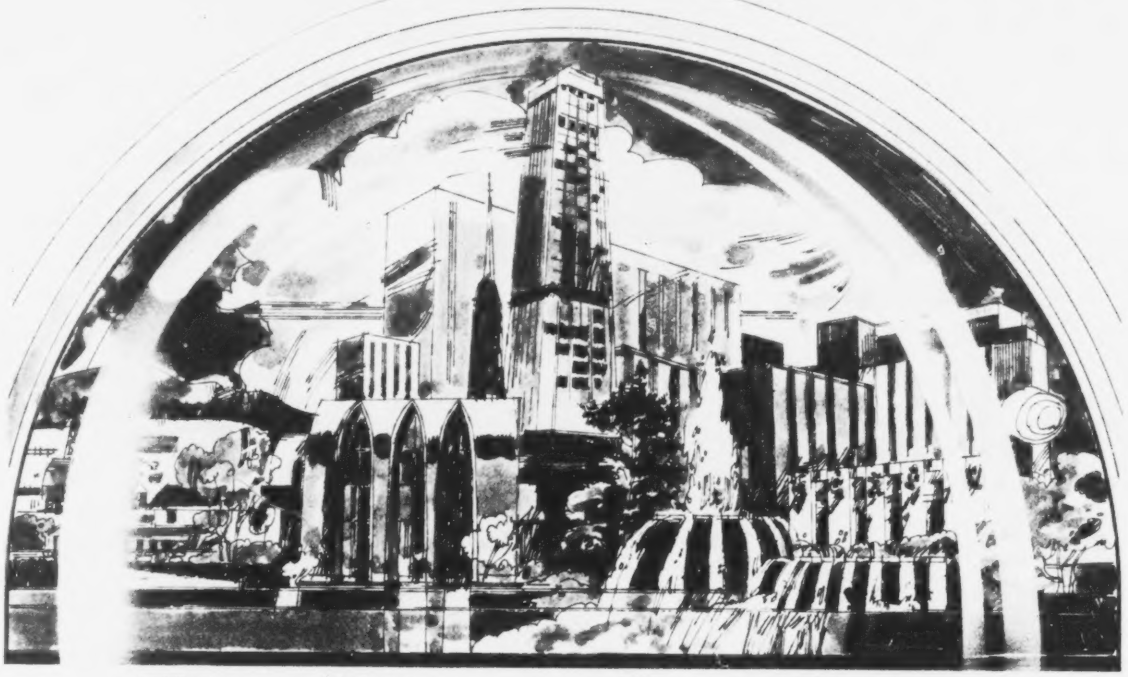
Rental fees of $84,000,000 for "Jaws 2" and $65,000,000 for "Animal House" (gross box office is about twice these figures) led Universal Pictures to revenues of $318,703,000 in 1978, up from $222,845,000 the year before.

The $3,000,000 "Jaws 2" advertising campaign was the largest in 1978. "The Wiz," whose performance at the box office was fair, had $2,000,000 in advertising support while a $1,600,000 budget backed "Animal House."

Disappointments in 1978 included "Sgt. Pepper's Lonely Hearts Club Band" and "Moment By Moment," both of which failed to win approval from audiences or critics. Other major Universal films in 1978 included "The Big Fix," "The Brinks Job," "Gray Lady Down," "House Calls," "I Wanna Hold Your Hand," "Paradise Alley" and "The Greek Tycoon."

Late in 1978, Universal Pictures released "The Deer Hunter" in limited engagements to qualify it for Oscar consideration. The film won five Oscars, including Best Picture,

Milwaukee



The all-in-one Test Market

"Maximize experimental effects — and minimize confounding variance."

Those, of course, are the bare bones of any experiment. If you wanted to test the effect of fertilizer on corn yield, chances are you wouldn't put your fertilized field in Ohio and your control field in Nebraska. You'd want both fields on the same farm. And your confounding variance would be nil.

Unfortunately, advertising experiments tend to be a bit more complicated than their agricultural counterparts. It's hard, for example, to hit half the people in a city with one ad, and half with another, and keep the two groups balanced demographically.

Unless you use The Milwaukee Journal.

Target Marketing is The Milwaukee Journal's computerized method that splits our coverage area into 58 separate market cells — DEMOGRAPHICALLY. You tell us the customers you want to reach, by age, income, occupation . . . you select the profile!

And because Milwaukee is large enough to offer a demographically balanced test market and control market, you can execute a tightly controlled experiment — all within one SMSA.

The Milwaukee Journal
Milwaukee Sentinel

A major floor covering manufacturer, for example, used a split-run test of hard-sell vs. soft-sell on two demographically balanced groups.

And a packaged goods manufacturer used a 4-way split-run to see which coupon worked best — 10¢, 15¢, 20¢, or 25¢.

There are many more Target Marketing success stories. If you'd like to hear them, and find out how Milwaukee can work for you, call Wally Just at The Milwaukee Journal, (414) 224-2472.

MARKETING PROFILES

and will post most of its box office earnings in 1979. The studio said in late 1978 that a $4,000,000 campaign was planned for "Deer Hunter."

▪ Had the near unanimous predictions for a "Battlestar Galactica" hit tv series come true, the "Battlestar Galactica" movie would have had a tremendous springboard. But ABC-TV canceled what has been billed as tv's most expensive series (also filmed at Universal Studios), deflating plans for merchandise tie-ins and the movie.

As it is, Universal Pictures mounted a sizable advertising campaign in 1979 to promote the movie, which consists primarily of footage from the tv series pilot. Another feature in this category during 1979 is "Buck Rogers in the 25th Century," which was originally filmed as a made-for-tv movie, but never broadcast.

Universal Television, with revenues of $348,175,000 in 1978, is billed as the "busiest" tv studio in th U. S. and possibly the world. MCA TV handles syndication of off-network programs and a new unit, MCA TV Program Enterprises, was created in 1978 to develop products with independent producers.

Virtually all advertising of Universal tv products is done by producers and broadcasters that purchase syndication rights, both of which are outside of the MCA organization.

▪ Products geared to contemporary life style tastes of mass consumers and sold through catalogs and stores brought revenues of $167,540,000 to Spencer Gifts, headquartered in Atlantic City, N. J.

Forty-seven new stores opened in 1978 brought the division's retail outlets located in shopping malls in 42 states to 343. Spencer Gifts plans to add 40 more stores in 1979.

Revenues of $131,467,000 from MCA's records and music publishing activities in 1978 were about $31,000,000 higher than the year before, but about the same as posted in banner years of 1974 and 1975. "A new regime" was installed in January, 1979, headed by Bob Siner, to better the five platinum and two gold album performance of MCA Records artists in 1978.

MCA Records more than doubled its roster of country artists with the acquisition of ABC Records in March, 1979. Barbara Mandrell, The Oak Ridge Boys, Conway Twitty, Loretta Lynn, Merle Haggard, Roy Clark and Tanya Tucker make MCA Records' complement of country artists one of the strongest in the music industry.

Other leading acts include Elton John, The Who, Poco, War, Olivia Newton-John, The Crusaders, The Dramatics and B. B. King.

▪ MCA established Infinity Records in New York City during October, 1978, as an autonomous label, separate from MCA Records in the Los Angeles area. It has one gold record to date. Another autonomous division, MCA Distributing, was also created in 1978 to distribute products of MCA's labels and other labels.

The in-house agency Lankershim Advertising of MCA Distributing administers the advertising budget, which was concentrated in spot tv during 1978.

Columbia Savings & Loan Assn., with 24 branches in Colorado, is the largest advertiser among MCA's financial holdings. Its $400,000 advertising expenditures are concentrated in spot tv.

Two other Colorado savings and loan associations are in the process of being acquired by Columbia.

MCA also owns Mid Continental Computer Services, which is involved in financial transactions.

Book publishing activities involve two MCA divisions. The G. P. Putnam's Son subsidiary handles "quality" books through Coward, McCann & Geoghegan, Richard Marek Publishers and Paragon books.

Mass market appeal books are concentrated in the B. J. Publishing group that consists of Berkley Publishing Corp. and newly acquired Jove books. Publishing divisions spent $140,000 in advertising during 1978.

MCA's recreation services division operates the Universal Studio Tour, the Universal Amphitheater, Yosemite National Park and Curry Co., and Landmark Services tours.

Attendance on the Universal Studio Tour rose 5% to 3,300,000 in 1978, making the tour of the studio lot the fourth largest theme park in the nation, according to MCA. The recreation services spent more than $100,000 in magazine and outdoor advertising.

A new venture likely to grow substantially in the future is MCA's home video system, dubbed DiscoVision. Launched in two test markets late in 1978 and early this year, DiscoVision enjoyed brisk sales in which demand reportedly exceeded supply.

MCA indicated the home video system would be marketed nationally in 1980. The DiscoVision home unit is manufactured by Magnavox through a cooperative venture.

An industrial model is made by another company, owned jointly by MCA and Pioneer Electronics Corp. of Japan. In February, 1979, General Motors Corp. agreed to purchase a minimum of 7,000 industrial units, which will occupy production of Universal Pioneer Corp. for the balance of 1979.

Mars Inc.

	1978	1977
Sales*	$837,400,000	$790,000,000
Advertising*	60,180,000	51,000,000

*AA estimate

Mars Inc., McLean, Va., pushed its advertising expenditures in 1978 to an estimated $60,180,000, an 18% increase, making this marketer of candy, pet foods and rice products the year's 67th largest advertiser. Sales are estimated to have climbed 6% to $837,400,000.

Only Mars' corporate headquarters is in McLean, outside Washington, D.C. Located elsewhere are its major divisions: M&M/Mars, Hackettstown, N.J.; Kal Kan Foods, Los Angeles; Uncle Ben's, Houston, and Snack-master, formerly Jack's Candy, Albany, Ga.

Despite its size, Mars is privately held, one of the largest private companies in the United States. Without legal requirements for public financial reports, Mars pursues a tight-lipped policy of not divulging advertising and sales data.

▪ It's known that available estimates of Mars' advertising underestimate actual amounts by perhaps a third, or more. AA's estimates of total Mars advertising has been adjusted upward to more accurately reflect actual ad activity by the company.

Measured spending on individual brands and in particular media, estimates obtained from outside the company, have not been adjusted upward, however. The difference between AA's estimated total and the estimated total for particular media is reflected in the "unmeasured" category.

With millions in new ad dollars to spend, Mars placed the bulk of its extra marketing power squarely behind its M&M/Mars candy division, where ad spending last year soared 51% to an estimated $26,676,500 from $17,665,400. Ad spending by Mars' other three divisions was stable or dipped in 1978, by comparison.

The sharp rise in support for its major candy unit, estimated by industry observers to have annual sales of as much as $500,000,000, is proof of much sharper competition for a shrinking candy market.

Industrywide sales of candy bars priced from 15¢ to 25¢, where Mars is deeply involved, slipped to 596,100 pounds last year from 612,921 in 1977. Unit price hikes produced an increase in dollar sales, however, to $761,000,000 from $733,00,000 in 1977, according to government figures.

▪ Against softening demand, Mars is encountering more active competition from such competitors as Hershey Foods, which has only in recent years begun advertising for its candy bars. Hershey has even brought into test a product positioned against Mars' flagship M&M's candies: A peanut butter filled product named Reese's Pieces, a spin off from the established Reese's peanut buttercup.

Last year, Mars sent ad spending for M&M's right through the roof, up 70% to an estimated $7,350,600 from 1977's estimated $4,334,200. Nearly all of the increase went into tv: Network buys were up 57% to an estimated $4,479,300, and spot buys climbed 53% to an estimated $2,064,300. But magazines prospered from the big M&M's push, too. Magazine buys for M&M's were up fivefold to $807,000.

Other long-time Mars brands also got much more ad backing in 1978. Milky Way bars, the second most heavily advertised brand behind M&M's last year, posted an even more breathtaking budget jump: Up 128% to an estimated $5,223,100.

Unlike M&M's, spending on network tv for Milky Way was stable, at around the $2,000,000 mark, but spot tv buying, barely visible in the estimates for 1977 finished 1978 at almost $3,200,000.

Savings are a snap at the Kmart Minolta sale
$262
$224

K mart Corp., in its attempt to emphasize quality in its lines, features name-brand products in its advertising.

Ad support behind Snickers jumped 67% to $3,880,500 last year from an estimated $2,322,500. Once again, the new ingredient was spot tv, absent in 1977 but about $1,700,000 last year. Ad spending on Three Musketeers was up 33% to an estimated $3,039,900 due also to higher spot tv use.

▪ On the down side, support for Starburst Fruit Chews was off 15%, to about $3,000,000 in 1978, while the ad budget for Forever Yours bars slid 45% to about $1,250,000. Still in test markets last year were two candy items seen by some as a preliminary step to entering the cookie product category: Twix, supported by an estimated $433,000 in spot tv last year, went national this spring; and Summit, which had a tripled ad budget of $769,000, all in spot tv, in 1978.

A continuing uncertainty last year and this concerns what action the Federal Trade Commission may take against candy advertising in children's tv programing. An initial proposal written by the FTC staff suggested an outright ban on tv ads addressed to children that promote products potentially harmful to health, including dental health.

A final decision is not likely before 1980. Less drastic steps, such as dental health disclosures, are possible.

Long a powerhouse pet food marketer in Europe, Mars positioned itself for a run for the money in the growing U.S. dry dog food market last year with the national roll cut of Mealtime brand by its Kal Kan Foods unit. The Mealtime drive soaked up half of Kal Kan's estimated ad spending in 1978, $7,756,000 of $13,271,000.

The division this year is moving out of California test markets and into ten western states with Crave brand dry cat food. Ad spending on Crave slid to $644,600 last year, off 22% from 1977 when it was first introduced into California.

Mealtime finished 1978 ranked ninth nationally in dry dog food sales, according to analyst John C. Maxwell (AA, June 18). The category leader was Ralston Purina's Dog Chow.

▪ Kal Kan canned dog food, No. 2 in that category behind Liggett Group's Alpo last year, had its ad support trimmed to an estimated $3,234,900 from $3,723,600 in 1977. Network tv spending was up, to about $3,200,000, but spot tv was slashed to $200,000. Since 1976, ad spending on Alpo canned dog food is off 37%. Spot tv took the brunt of the cuts.

Kal Kan canned cat food moved up a notch in 1978, to third from fourth in national estimated sales, edging out a Ralston Purina brand, Purina Variety Menu, according to pet food analyst Mr. Maxwell. The category leader is still Heinz' 9 Lives. Spot tv support was cut in 1978, but offset by an estimated $1,500,000 in network tv. Total ad spending for the brand was estimated at $1,522,000, off 21% from 1977.

Kal Kan added D'Arcy-MacManus & Masius, St. Louis, to its agency list last year. The D'Arcy St. Louis office, long associated with Ralston Purina brands, was assigned MPS Chunks canned dog food, transferred from Honig-Cooper & Harrington, Los Angeles, and Thorofed canned dog food, transferred from Ted Bates & Co., New York.

Both Thorofed and MPS Chunks had little ad support last year, according to estimates, but MPS Chunks is reported to be available in ten western states with two new flavors added this year: "Country cuts" and "extra hearty."

▪ The Honig shop retains Mealtime and Crave; Bates keeps Kal Kan canned dog and cat foods plus Whel-Pup, a seldom advertised puppy food. D'Arcy, New York, has a number of Mars candy brands and, along with Bates, is one of Mars' worldwide agencies.

Among rice marketers, Uncle Ben's saw its ad spending drop last year, to $2,641,000, off 10.3%, according to estimates. That comes after an 11.8% ad spending decline in 1977.

The division has two new products in test, however. SunCrisps, a frozen french fry made from rice ("the tastiest fries under the sun," say introductory ads) entered Cleveland, Denver, St. Louis and Minneapolis in April of this year.

The division also has introduced Uncle Ben's International Style flavored rices: British Style for beef, Greek Style Rice Pilaf, French Style rice for chicken and Indian Style curried rice. Its roster of national brands includes Converted Rice, Quick Rice, Long Grain, & Wild Rice, Fast Cooking Long Grain & Wild Rice, Brown Rice, Stuff n' Such Stuffing Mix and flavored rices.

▪ Ad spending at Snack-master, Mars' smaller candy division, was down to an estimated $2,278,200 from about $3,200,000 in 1977. Most of that, $1,484,000, went to support the Marathon candy bar, off 38% from 1977.

Other brands are Lockets, a medicated cough drop with real honey center (imported from Britain); Bounty coconut bar, made in Holland; Pacer's Punch Chews, imported from England; Skittles Fruit Chews, also an English product, and Munch peanut bars.

Mattel Inc.

	1978	1977
Sales	$493,563,000	$436,645,000
Earnings ...	30,061,000	28,837,000
Advertising	37,900,000	35,500,000

Mattel Inc., Hawthorne, Cal., the 83rd largest national advertiser, increased its advertising by an estimated 7% last year to $37,900,000.

In a year of diversification aimed at lessening its dependence on the seasonal and at times volatile toy business, Mattel increased sales by 13% to $493,563,000.

Toy sales by the world's largest toy maker were $399,835,000, an increase of 14% over the previous year.

Mattel's entertainment division also posted significant sales gains. Net entertainment sales were $49,524,000, compared with $43,493,000 in 1977, with Ringling Bros. and Barnum & Bailey Circus contributing substantially increased revenues from its traveling units and network tv specials, and Ringling Bros. and Barnum & Bailey Circus Florida theme park recording a 35% increase in attendance and an operating profit for the first time since it opened in 1974.

- The major diversification move was acquisition of Western Publishing Co., Racine, Wis., the nation's largest publisher of children's books under the Golden and Whitman labels and also a maker of puzzles, games, and hobby and craft products. Its sales last year were $275,000,000.

Mattel also acquired Holiday on Ice, Shipstads & Johnson Ice Follies and Concept 2000, which markets a line of radios, calculators and electronic musical toys for children featuring the Sesame Street, Disney, Peanuts and Raggedy Ann licensed characters.

This last acquisition was aimed at both broadening the Toy Products Group's preschool line and extending Mattel's electronic toys line.

Mattel established a new electronics division during 1978 and prepared for a major entry into the programable videogames and home computer market this year.

Mattel will offer a line of these products under a new brand name, Intellivision. The new electronics division has an advertising budget this year of about $8,000,000.

- The new electronics division was the object of agency competition between Ogilvy & Mather's Los Angeles office, which handles all other Mattel advertising, and several other major agencies. Ogilvy came out the victor in a final review that matched it against Botsford Ketchum, San Francisco.

The company described itself as "cautiously optimistic" about toy sales this year and listed several toy product introductions as having strong sales potential.

These included a new Spinout 360 Caster Wheeler with casters for rear wheels and a low center of gravity for stability, and two electronic musical instruments, the Bee Gees Rhythm Machine and the Magical Musical Thing.

Mattel's Barbie doll, the largest selling toy brand in history, was prepared for her 21st birthday this year with the introduction of an "A"-frame style Barbie doll Dream House three feet high and more than four feet long. Mattel's toy execs are also enthusiastic about a Kissing Barbie that has been added to the World of Barbie line.

- In the large doll category, Mattel introduced Baby Grows Up, described as "two dolls in one" that "grows" from a baby to a little girl with simulated feeding from a bottle.

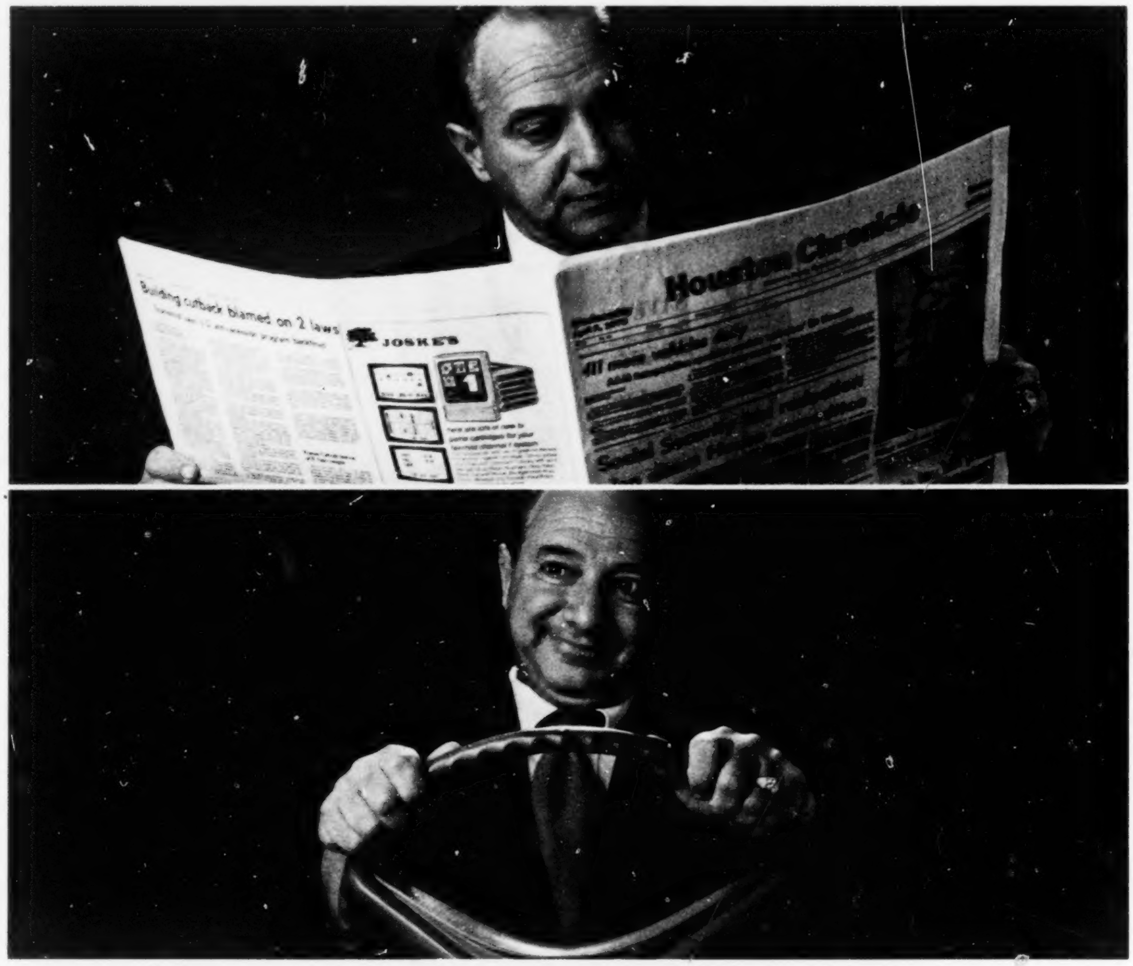
Also added in this category was Baby Magic Tender Love, which children can manipulate to perform tricks. Added to the Tuff Stuff toy line was a Tuff Stuff Workshop for creative play.

Citing increased demand for radio-controlled racers, Mattel has introduced a Drive Command Porsche 935 and a Lancia Statos with steering wheel control transmitters.

Missing from the list of products discussed by Mattel execs in their report to shareholders this year was the Mattel line of toys based on characters and space vehicles from ABC-TV's "Battlestar Galactica" series.

In one of the few mentions of the line since its introduction, Mattel president Samuel Meason told analysts in January that he expects vehicles and planes, including the "Galactica" line, to decline somewhat this year. The "Galactica" toys were redesigned after the death of a child who swallowed a rocket pellet from one of the toys.

Mr. Meason also told analysts he expects Mattel's miscellaneous category to jump to 20% of total



Houston Chronicle
Building cutback blamed on 2 laws
JOSKE'S

Because we move papers faster, you move cars faster.

In Houston, The Chronicle gives you the leadership you're looking for. In circulation, in readership and, consequently, in advertising linage.

As a comparison of the latest ABC Audit Report shows, The Chronicle leads the other Houston newspaper by more than 24,755 copies daily, by nearly 58,707 on Sunday!

That's why The Chronicle walks off with the lion's share of the advertising linage in Houston. Every day of the week.

Nearly 57% of the total newspaper linage ends up in The Chronicle, including 54% of all automotive advertising.

If you're selling in Houston, The Chronicle is the only newspaper you need. Only The Chronicle can give you 62% penetration of all daily newspaper households in Houston. Because The Chronicle gives Houstonians what they want. A newspaper that's timed to arrive when there's time to read a newspaper, weekday evenings, weekend mornings.

Houston Chronicle

Dollar for dollar, you get a lot more out of The Chronicle.

revenues this year, paced by substantial gains by hand-held electronics games, and that Mattel aims to keep its share of 10% of the total toy market.

Early this year, Mattel announced it will team with Jerrold Electronics to market videogame and computer software through cable tv rental in five test markets this fall.

■ Cable subscribers will purchase Mattel's $500 Intellivision game/-computer through cable salesmen, then hook into a library of game and computer programs by changing channels and pushing buttons.

McDonald's Corp.

	1978	1977
Sales	$4,575,000,000	$3,738,000,000
Earnings ...	162,669,000	136,696,000
Advertising	136,803,000	122,157,600

McDonald's Corp., Oak Brook, Ill., the 23rd largest national advertiser, boosted its ad expenditures by 12% in 1978, and increased its share of the fast-food market to 19.5%.

The company published an advertising figure of $180,000,000 for 1978, but this sum includes local spending which is not included in ADVERTISING AGE calculations.

Systemwide sales reached $4,575,000,000 last year, up 22% over the 1977 total of $3,738,000,000. Earnings rose to $162,669,000, up 19% from the 1977 figure of $136,696,000. Sales outside the U.S. totaled $726,994,000, more than eight times 1973 sales of $87,203,000. Net income as a percentage of corporate revenues was 9.7%

■ The company opened 514 restaurants last year to bring the worldwide total to 5,185 units, with 171 restaurants (45 in international markets) under construction as the year ended. Of this total, 4,465 are located in the U.S. and 720 in 24 other countries. Franchised outlets number 3,573, and 1,406 are company owned.

In 1978, McDonald's opened its first outlet in Belgium and its 5,000th restaurant worldwide in Fujisawa City, Japan, in October.

Sales volume for McDonald's restaurants opened 13 months or more averaged $942,000, an increase of 9.5% over 1977. In 1977, the increase over the previous year was 8.7%.

Published reports indicate that in those months, sales were up only 5% from the previous year, despite an 11% price increase that went into effect last year.

McDonald's management has said that they expect sales in stores opened 13 months or more to average $1,000,000 in 1979.

During 1978, McDonald's opened restaurants in the chic Michigan Ave. shopping district in Chicago, in Atlanta's Omni International hotel/convention/-shopping/recreation center and in Houston's Galleria Mall.

McDonald's number of U.S. "drive-thru" restaurants increased in this, the third year of the concept, to 1,834.

Advertising, through the year, stressed the following themes: Quarter Pounder People; promotions for breakfast and sundaes; "Families of America," with a "free family reunion" promotion; "Big Mac keeps you comin' back"; "Keep your eyes on your fries," and "There's more in the middle of an Egg McMuffin than an egg in the middle of a muffin."

In a presentation to the franchisees across the country, exec vp-marketing Paul Schrage said that the company's share of all eating out dollars was 5.45%, while the share of fast-food market was 19.5%. This compares to an 18.5% share in 1977. In the last quarter, he said the share increased to 20%.

■ Breakfast, which in 1977 became an official part of the McDonald's menu, made up 15% of sales in 1978. Also last year, hot fudge, hot caramel and strawberry sundaes were extended into all of the North American restaurants. On May 7, 1978, McDonald's sponsored Kid's Day on which each of the 7,000,000 children who visited the restaurants received a free sample-size sundae.

The marketing department at McDonald's includes 40 ad managers and assistants located in regional offices. In addition to national agencies, 80 other shops implement local marketing programs, created and directed at the national level.

Virtually all restaurants voluntarily contribute a percentage of sales to OPNAD, the Operators' National Advertising Fund, which is used primarily to purchase network tv time. The corporation pays the production costs of these commercials.

■ Marketing efforts outside North America almost tripled over 1977 expenditures. The 1978 advertising total abroad was $35,000,000, up from $13,000,000 in 1977. McDonald's uses tv in countries where it is available. In other markets, a combination of radio, outdoor, newspapers, magazines, cinema and direct mail is used.

In May, 1979, the company launched advertising with a new theme—"Nobody can do it like McDonald's can." The campaign has a new jingle and focuses on a new strategy termed "seize restaurant superiority."

The McDonald's Mini Mac restaurant is no longer being tested, but now is officially operating in some smaller markets. The Mini Macs—abbreviated versions of regular McDonald's—have limited seating and menu (no breakfast or sundaes) and drive-through windows.

New products currently in test include the McFeast, a chopped beef sandwich with lettuce and tomato; McChicken, deep fried chicken patty on a hamburger roll, and Onion Nuggets.

Miles Laboratories

	1978	1977
Sales	$536,983,000	$479,129,000
Earnings....	18,060,000	16,419,000
Advertising .	62,258,000	46,500,000

Miles Laboratories, Elkhart, Ind., the 63rd largest national advertiser, boosted ad spending last year to $62,258,000, a 33% increase over 1977 U.S. ad expenditures.

The spending hike includes a jump in magazine spending to more than $4,000,000 from just under $1,000,000 the year before. Most of the magazine dollars went into ads for the company's Alka-Seltzer and Morningstar Farms meat substitute line.

Miles, officially a wholly owned subsidiary of Bayer AG Leverkusen, West Germany, since February, 1979, saw its worldwide net sales climb 12% last year as earnings jumped 10%. Outside the U.S. Miles had '78 consolidated sales of $172,647,000, a 17% rise, and a figure that equaled 32% of corporate sales. The company's research expenses rose 6% last year to $27,528,000.

Miles markets home medicines and vitamins nationally under the Alka-Seltzer, Alka-Seltzer Plus, Alka-2, One-A-Day, Chocks, Flintstones, Bactine and Miles Nervine brand names. Other consumer products are S.O.S cleaning product, Morningstar Farms and Worthington textured vegetable protein food products.

■ Outside the consumer arena, Miles markets professional pharmaceuticals, diagnostics, dermatologicals, medical instruments, laboratory supplies, industrial chemicals, enzymes and food ingredients.

Miles sells its products through four operating units: Consumer products group, industrial products group, professional products group and Dome division (prescription pharmaceuticals).

The consumer products unit encompasses a consumer products division—home medications and multivitamins—and a grocery products division—household and food products. In 1978, the unit had its best growth in several years, according to Miles' annual report.

Sales rose almost 9% to $246,000,000. Even with that increase, the company notes, however, that consumer products sales accounted for only 46% of total sales, down from 66% a decade ago. This follows Miles' continuing plan to diversify.

■ The industrial products group accounted for 21% of corporate sales last year with sales of $112,000,000, a gain of 17% over its '77 performance. Early last year, Miles reorganized the group into three divisions: Citro-Tech, Marschall dairy ingredients and enzyme products.

A new ventures department was created to explore new business opportunities for the industrial group. This had led to the formation of a new flavor department.

The professional products group had sales of $179,000,000 last year, nearly 14% above '77 sales. The group contributed 33% of sales to Miles' total. The group includes Ames division, Lab-Tek division, research products division and Life Science Instruments.

Dome division, which was included in '78 sales figures of the professional unit, was set up as a separate unit in anticipation of the addition of Bayer AG pharmaceuticals in the U.S. The division's U.S. sales force was doubled to 160; supporting marketing services have been added, Miles said. Among the division's over-the-counter products is Sungard lotion which screens out ultraviolet rays as it permits tanning.

In January, '78, Dome introduced Candex lotion and cream for skin infections with medical journal and direct mail support.

While Miles is no longer a one-product company, its Alka-Seltzer effervescent antacid line continues to be the top contributor to company sales. Last year, the product accounted for 17% of total Miles sales, compared with 23% in 1974.

■ It is estimated that Alka-Seltzer's share of the $95,000,000 effervescent antacid market is about 80%; Warner-Lambert's Bromo-Seltzer is put at about 10% and Brioschi, a powder product that is not distributed nationally, has about 5% on a national basis.

Late last year, Brioschi launched a comparative tv campaign, playing off the Alka-Seltzer ad theme with a line that asked, "What good is the plop, plop when all you need is the fizz, fizz?"

Alka-Seltzer, meanwhile, spread its "plop, plop, fizz, fizz" message last year with nearly $17,000,000 in measured media support; tv got the lion's share with $9,700,000 going to network and $3,757,000 in spot. More than $1,000,000 was put into outdoor and more than $1,300,000 went to magazines. Sammy Davis Jr. was a major spokesman for '78 ads.

Miles also used a women-oriented execution for Alka-Seltzer that portrayed women in jobs from welder to astronaut and with a tag line that called Alka-Seltzer "one small step for womankind."

■ Alka-Seltzer signed as a big contributor and supplier to the U.S. Olympic Committee for the '79 Pan American Games in Puerto Rico, and both Summer and Winter Olympics in '80. Spots for Alka-Seltzer are scheduled for NBC-TV's coverage of the Moscow summer games, and the company is authorized to use the official Olympics symbol and the title of "official sponsor" in ads and promotion.

The company says in its annual

into living.

$20,000 + household incomes; 27% hold professional/managerial positions.

Shouldn't your advertising take advantage of this opportunity? Call your local Z-D Magazine Network salesman, or Advertising Director Jim Kopper. (212) 725-7606.

report that it is "anticipating that international sales of Miles consumer products, and particularly Alka-Seltzer, will be boosted by our participation as a sponsor" of the Pan American Games and the Moscow Olympics. Alka-Seltzer, which is marketed in over 100 countries, showed greatest overseas strength last year in Latin America, the company said.

Alka-Seltzer Gold, a no-aspirin companion added in 1974, continues to be marketed with minimal ad support (measured media listings show $1,000 in '78 spot tv backing) but has not proven to be a key item for Miles.

- Alka-Seltzer Plus cold medicine, on the other hand, was one of the consumer products unit's big percentage gainers last year, Miles says. The company attributes growth to big cold seasons and a new formula containing "increased antihistamines and decongestants."

The brand is estimated to hold around 8% of the market. Ad support last year was bolstered to $4,276,100, almost exclusively in tv. In '77, Miles put less than $2,000,000 behind the brand.

Ad backing last year for Alka-2 chewable antacid fell significantly to about $282,000 from over $2,000,000 in '77.

The newest Miles vitamin entry, with added minerals, reflects growing emphasis on nutrition.

The market has seen an influx of high-potency vitamins of late and heightened activity by established high-potency vitamin makers.

- Two established brands in that category, Theragran from Squibb and Myadec from Parke-Davis, are turning to consumer ad support to meet challenges from Lederle Laboratories' Centrum and J. B. Williams' Mega, both of which moved on the market with big ad plans.

It is estimated that this segment of the vitamin market is about $50,000,000 through drug outlets. The entire vitamin market is put by some sources at upwards of $500,000,000.

Miles' One-A-Day line is believed to hold about 18% of the multivitamin area.

Special Buffered Aspirin

Television support for Miles Laboratories' Alka-Seltzer amounted to more than $13,000,000 in 1978.

The other big consumer products unit sales gainer last year was the children's chewable vitamin line, Miles says. This included Flintstones and Chocks-Bugs Bunny varieties, which the company says, provided growth momentum for a category that has been declining in recent years with the U.S. population trends.

Flintstones vitamins continues to get heavy tv support, as other competitors dropped out of the medium, Miles reports. Ad messages for Flintstones, which is believed to hold a share in the mid to high 20s, have noted that U.S. research studies reveal most children do not get recommended daily allowances of certain vitamins and minerals and that this can be prevented with multivitamin supplements to the diet.

- Last year, Miles put $3,713,700 into tv for Flintstones vitamins; the lion's share was in network. In 1977, Flintstones got about $2,000,000 in tv backing. The Chocks-Bugs Bunny line gets no tv support.

Miles' adult vitamin lines—One-a-Day, One-A-Day plus iron and One-A-Day plus minerals, remained "steady" in sales, Miles said. The company, which was a pioneer in the vitamin field, continued to back its brands with heavy ad support. Over $9,500,000 went into tv for the brands last year, and $250,000-plus promoted a sweepstakes in magazines. Spending for One-A-Day in '77 was $7,500,000.

Bactine skin wound cleanser remains "the largest-selling advertised brand" in its category in the U.S. Miles says sales of both liquid and aerosol Bactine "increased" in '79. In January of this year, the aerosol variety was changed to nonfluorocarbon propellent.

Behind the ad theme, "Helps the hurt start healing," Bactine was promoted with about $1,300,000 in tv, up slightly from '77 spending levels.

- In May of last year, Vic Galef moved from marketing director of Wyler Foods, Northbrook, Ill., to take the new Miles post of group product manager for nutritional and hygiene products (vitamins and Bactine).

The main product in Miles' grocery products unit—S.O.S steel wool soap pads, continued as the largest seller in U.S. and Canada. Miles reports '78 sales in the U.S. "were up modestly" and noted that increased ad support was planned for this year. In 1978, S.O.S pads received over $2,500,000, all in tv. The product is just beginning to be introduced into some overseas markets. It is being sold door-to-door in Japan.

New products were added to Miles' foods lines last year and ad support for the Morningstar Farms line of cholesterol-free, textured vegetable protein meat substitutes was $2,376,000 in magazines and spot tv, compared with $1,300,000 in '77.

Leanies, frankfurter-like, and Grillers, hamburger-like, joined the Morningstar Farms line with introduction into western states.

- The original products—frozen links, patties, slices and strips—were reintroduced after reformulation last year. Miles says an "active research program is under way to improve the taste and texture" of all the products.

Morningstar Farms sales were "down moderately" last year while Worthington Foods, aimed at people who decline meats for religious reasons, posted "modest sales growth."

Miles voluntarily withdrew its Nervine sedative line from the market this year after government lab findings identified the commonly used ingredient methapyrilene as a possible cancer-causing agent in rats. Miles is continuing with plans to reformulate Nervine, which receives no media support.

In addition to measured media, Miles uses heavy p.o.p., medical and technical journal support, couponing, direct mail and dealer films for its proprietaries and vitamins, plus solicited sampling for new proprietaries.

Mobil Corp.

	1978	1977
Sales	$37,331,000,000	$34,443,000,000
Earnings	1,126,000,000	999,000,000*
Advertising	163,043,300	142,772,470

***Restated by company**

Mobil Corp., New York, the 15th largest national advertiser, increased its ad spending in 1978 by 14%, from $142,772,470 to an estimated $163,043,300.

Net earnings for the company increased almost 13% in the year to $1.13 billion, on sales which increased 8% to $37.33 billion. Montgomery Ward, in its second full year under Mobil ownership contributed $5.01 billion to Mobil's total revenues, up 10.5% over 1977. Net income for the retailing and catalog subsidiary climbed 12%, to $105,000,000.

Mobil's energy operations worldwide continued to account for the lion's share—84%—of the company's earnings, up from 80% in 1977. Mobil chemical operations added $86,000,000—about the same as a year earlier—and accounted for 7.6% of the parent's earnings.

Container Corp., the paperboard packaging concern purchased by Mobil in 1976, contributed only $5,000,000 or 8.5% to Mobil's earnings, down $40,000,000 from 1977. The sharp reduction, the company said, was due to provisions made for antitrust litigation settlements related to the unit's folding carton and corrugated container operations in years prior to Mobil's acquisition.

While oil and natural gas exploration in previous years began to pay off last year—especially in the Gulf of Mexico, the North Sea and Indonesia—the company's worldwide crude oil and natural gas liquids production fell to its lowest point in the past five years, 2,117,000 bbls. per day. While Mobil owns a 7% interest in the Iranian oil consortium, the cutoff of oil exports from that country had little effect on 1978 results.

- Mobil said it improved its competitive posture in the U.S. market with the introduction of its Super Unleaded east of the Rocky Mountains late in 1978. Though the entry of the premium no-lead product follows a similar entry by Amoco Oil (Standard Oil of Indiana), demand for Mobil's product "substantially exceeded expectations," according to the company.

Ad spending for Super Unleaded totaled $3,759,000—primarily in network and spot tv. (Shortages of the product early this year resulted in the company pulling all national advertising.)

In engine lubricants, Mobil 1 continued to enjoy a leading position in the fuel-efficient category, which is expected to grow rapidly this year. The company spent $3,933,000 for Mobil 1 in 1978, up slightly from year-earlier spending of $3,867,000.

- In the chemical division, Mobil almost doubled its measured spending for Hefty plastic trash can liners, from $3,858,000 to $7,155,000.

Otherwise, the company continued its often-controversial public affairs ad program on the pages of the country's most influential newspapers.

Mobil caused a flap last August when it attacked ABC-TV's "20/20" coverage of natural gas deregulation, calling it a "shocking spectacle" and "another chapter in an apparent anti-business vendetta." Spending for the program totaled $1,200,000.

Other public affairs spending, including an "Observations" column running in various publications, cost the company $2,500,000.

Mobil also continued its "Mobil Showcase" series of syndicated tv programs, initiated in 1977 with "When Havoc Struck" and "Between the Wars"; the 1979 production was "Edward the King." The company also sponsors "Masterpiece Theatre" on PBS, "Masterpiece Radio Theatre on NPR and two classical music programs for WQXR radio in New York.

- Montgomery Ward, an operating unit under Mobil's Marcor subsidiary, continued to pare away unprofitable or marginal stores in 1978. But while the number of retail stores dropped from 427 to 411 and catalog stores decreased from 298 to 284, the company announced an expansion program over the next four years that will bring in 101 new stores and produce a 31% increase in retail selling space.

Catalogs, which brought in 21.8% of Ward's sales, were bolstered in 1978 with increased emphasis on fashions. The company's spending for catalogs increased 10%, from an estimated $83,000,000 to $91,300,000.

Otherwise, Ward's continued its almost exclusive use of spot tv in 1978, spending $27,389,000 in the medium compared with $24,700,000 in 1977. In addition, Ward's spent an estimated $115,000,000 in local newspaper advertising and about $33,000,000 in direct mail (not included in national ad spending estimates).

In 1979, Mobil Corp. agreed to buy General Crude Oil Co., an exploration and development subsidiary of International Paper Co. for about $800,000,000. And last fall, Mobil bought W.F. Hall Printing Co., which prints the Montgomery Ward catalog, among others, for $50,500,000.

Philip Morris Inc.

	1978	1977
Sales	$6,632,463,000	$5,201,977,000
Earnings	408,581,000	334,920,000
Advertising*	236,851,000	184,000,000

*Estimated by AA

Philip Morris Inc., the 6th largest national advertiser, increased its advertising almost 29% to an estimated $236,851,000 in 1978, a year in which its cigaret and brewing operations continued to pace the company's record sales and earnings growth.

Consolidated sales rose 27.5% to $6.6 billion in 1978. Earnings were $408,581,000, a 22% gain over 1977. For the first quarter of 1979, sales were $1.90 billion, up 36.8% over the 1978 quarter, while earnings increased 25.6% to $109,915,000.

Consolidated operating revenues from tobacco products accounted for 64% of operating revenues and 78% of consolidated operating profit in 1978.

▪ Miller Brewing Co.'s contributions to consolidated revenues and operating income were 28% and 16%, respectively. For the fifth straight year, Miller continued to pace the industry. Miller's 29.1% increase in barrel sales in 1978 strengthened the brewer's hold on second place in the industry behind Anheuser-Busch, St. Louis.

The company's U.S. and international cigaret sales increased to 369 billion units, or 8.8% of the world market total of 4.2 trillion units in 1978. Philip Morris U.S.A., the company's largest operating unit, boosted its domestic cigaret output to a record 168 billion units, or 27.8% of the U.S. market, whose volume totaled 605 billion units in 1978, according to the Maxwell Report.

PM acquired Seven-Up Co., St. Louis, early last year via a tender offer which saw PM pay $48 per share for all 10,700,000 outstanding shares of the nation's No. 3 soft drink company. The $515,000,000 purchase price made it one of the largest cash acquisitions on record.

Seven-Up Co. increased its operating revenues and operating income 19.5% and 0.3%, respectively, in 1978.

▪ Seven-Up Co. dumped its agency of 36 years, J.Walter Thompson Co., Chicago, in early 1978, apparently rethinking its position in the $12 billion soft drink industry. In the following three months, Seven-Up introduced Quirst, a bottled lemonade, and committed a development investment of $20,000,000 which saw 7UP introduced in Cairo.

Following a brief hold out by stockholders, PM took over Seven-Up in late May, which affected the lineup of agencies eager to secure the $15,000,000 Seven-Up account.

N W Ayer ABH, New York, a dark horse among bidding agencies, was selected as the agency for 7UP and Sugar Free 7UP following a showdown with Leo Burnett, Chicago, which was given new product business or about $5,000,000 in ad dollars.

In late 1978, Seven-Up announced that its ad budget would jump from $20,000,000 to $48,000,000. As part of the hike in ad billings, Seven-Up changed the name of its Sugar Free 7UP to Diet 7UP.

▪ Philip Morris U.S.A. remained the fastest growing cigaret marketer in terms of unit sales growth on an absolute basis.

The U.S. market (including export totals), according to the Maxwell Report, was divided up as follows in 1978: R.J. Reynolds, 32.9%; Philip Morris, 27.8%; Brown & Williamson Tobacco, 15.2%; American Brands, 11.7%; Lorillard, 9.1%; and Liggett Group 3.3%.

Lorillard and PM were the only companies showing any share growth among the six companies last year. A share point in the cigaret industry last year translated to about $87,000,000 at the manufacturer's level.

Although Marlboro is still the premier brand in the PM cigaret family, the largest selling brand in the U.S. and the world was upstaged by the continued success of Merit, which is threatening to knock R.J.Reynolds' Vantage smokes out of the leading position in the low-tar segment. Lorillard's Golden Lights is the other chief competitor in the rapidly expanding market.

▪ The recent introductions of a myriad of low-tar regular and menthol brands by all manufacturers has not cooled off Merit, whose unit sales climbed 24% to 16.97% billion units in 1978. The continued growth of Merit is partially attributed to the addition of Merit 100s regular and menthol to the line.

The America's turning 7up Sweepstakes.
Win $50,000 plus...
Save 15¢

Philip Morris acquired Seven-Up Co. early last year. Seven-Up's America's Turning 7UP campaign via its new agency, N W Ayer, is running on tv, radio and in print.

Domestic unit sales of PM brands are as follows: Marlboro, 101.0 billion (up 4.2%); Benson & Hedges 100s, 27.6 billion (up 5.4%); Merit, 17.7 (up 24%); Virginia Slims, 9.75 billion (up 2.4%); Parliament, 8.03 billion (down 5%), and Saratoga 120mm cigarets, 2.15 billion (down 0.9%).

PM U.S.A. invested the following amounts in measured media for its brands in 1978: Marlboro, $28,710,100; Benson & Hedges 100s and Benson & Hedges 100s lights, $18,809,500; Merit, $23,298,100; Virginia Slims, $10,250,800, and Saratoga, $2,223,400.

In an effort to gain a further hold on the growing low-tar market, PM introduced Basic 6mg tar cigarets into test markets in Arizona and Missouri. Billed as the cigaret with "double-aged tobacco," Basic was scratched from the PM cigaret roster late last year following a poor performance in test.

Industry sources suggest that a revamped version of the Basic brand may break later this year.

▪ All of the six major cigaret companies continued to battle for supremacy in the low-tar market. Accordingly, PM introduced Virginia Slims Lights 100s into Indianapolis, Denver, Jacksonville, Fla., and Portland, Me., this summer.

The 9mg tar line extension of the nation's No. 1 selling women's cigaret is being billed as "The low-tar cigaret, slim cigaret made just for women."

PM is known to be working on an ultra-low cigaret, the introduction of which might put pressure on Lorillard, a company that has had two ultra-low entries, Triumph and Kent III, in the past year. Like other cigaret companies, however, PM is reported to be having problems producing an ultra-low entry that delivers the taste PM prides itself on offering in its brands.

According to Philip Morris' annual report, world cigaret (excluding the U.S.) sales increased 2.7% to 3.64 trillion units in 1978.

▪ Philip Morris International, which sells more than 160 brands of cigarets in over 170 countries and territories, increased its share 5.5% last year compared with 5.2% in 1977. Marlboro accounts for about one-third of PMI's volume.

In June last year, Liggett Group, parent of Liggett & Myers Tobacco Co., sold its international cigaret business for approximately $108,000,000 to PMI. PMI acquired Liggett's international trademarks and rights to the following brands: Lark, L&M, Chesterfield, Eve and Decade.

Miller Brewing Co., Milwaukee, continued its winning ways. Following the 1977 ouster of Jos. Schlitz Brewing Co., Milwaukee, from second place in the beer industry, Miller increased its operating revenues 38.2% to $1.83 billion in 1978. Miller's 29.1% increase in barrel shipments to 31,274,000 gave it an 18.9% share of the 65,600,000 bbl. domestic market.

According to the parent company's annual report, Miller High Life, Miller's largest selling, premium-priced brand, continued to be "the fastest growing premium brand in the U.S." Lite, the nation's leading low-calorie beer, continued to maintain its "dominant share" of that segment.

Lowenbrau, Miller's super-premium entry, gave Miller what industry sources say is a strong position in this segment.

Miller Brewing and Anheuser-Busch, perennial archrivals, engaged in more horn-locking early this year in a legal right which saw Miller accuse A-B of misleading consumers into believing that its beers are natural products through use of the word "natural" in both its Natural Light and Chelsea advertisements.

The "natural" argument follows a 1978 marketing donnybrook in which A-B accused Miller of falsely implying that its domestically brewed Lowenbrau was still imported. The Federal Trade Commission refused to enter the case, but suggested that A-B make its case to consumers in its own advertising. The Lowenbrau file is still open, according to the FTC.

Miller High Life ad support, principally in network and spot tv, totaled $24,390,000, compared to $14,595,000 in 1978. Lite's support totaled $23,332,200, virtually all in tv.

After a year and a half in test, Miller's extra light beer entry, Player's, was discontinued in its test markets—Durham/Raleigh, N.C., Little Rock, Ark., Lincoln, Neb., Nashville, Sacramento, Cal., and Tucson—early this year.

MortonNorwich

	1978	1977
Sales	$656,733,000	$609,303,000
Earnings	36,938,000	31,683,000
Advertising	36,182,000	36,102,000

MortonNorwich, Chicago, the 86th largest national advertiser, reports U.S. ad expenditures of $36,182,000 in 1978. This is an increase over the $36,102,000 spent the previous year, but because U.S. advertising was cut 5% in 1977, the total still lags more than $2,000,000 behind 1976 expenditures of $38,200,000.

Advertising outside the U.S. in 1978 rose 17% to $2,376,000 from $2,026,000 in 1977. Total advertising worldwide was $38,558,000, which is a $430,000 increase over 1977.

Sales of $656,733,000 in fiscal 1978, ended June 30, represented a 13% increase over $609,303,000 sales in fiscal 1977. A 17% hike in income, to $36,938,000 during fiscal 1978, represents a $5,255,000 increase over fiscal 1977.

The $553,052,000 sales recorded

MARKETING PROFILES

for the first nine months of fiscal 1979, ended March 31, indicates a 12% increase in sales over the first nine months of fiscal 1978. Income rose 25% to $39,188,000 during the first nine months of fiscal 1979.

■ Morton Salt, the only company that markets salt on a national scale, holds more of the market than all competitors combined. The company also reported that Morton Salt Substitute maintained its market share and Morton Lite Salt showed continued growth. Morton water conditioning salt products boosted their market share.

During the year, key salt brands were supported by three major grocery products promotions: Salt sculpture, keepsake collection labels and all-brands sweepstakes. All three promotions were supported by advertising, which included space in women's service, shelter and regional publications, as well as craft publications for the salt sculpture promotion. Ad expenditures in measured media during 1978 totaled $778,000 for salt products.

Mainly emphasized during the holidays, the salt sculpture promotion was a continuation of the "Dough-It-Yourself" promotion. It included a new expanded instruction booklet offered for $1.50 or four 26-oz. size labels and 50¢.

Suggested by consumer interest, the keepsake collection label promotion featured 25,000,000 packages with labels from the 1914, 1921, 1933 and 1941 container designs. All four were displayed on grocery shelves and consumers were encouraged to collect a full set.

■ The all-brands sweepstakes promotion was formulated to boost market shares for "flanker" products, including Morton salt and pepper shakers, Morton Lite Salt, Morton Salt Substitute and Morton Nature's Seasons. Another all-brands sweepstakes is planned for this year.

Three national consumer promotions, supported by newspaper ads in selected markets, were used to help increase market share for the water conditioning products.

In February, 1978, MortonNorwich and Rhone-Poulenc S.A. of France signed a 10-year reciprocal cooperation agreement giving each other rights to manufacture and sell in the U.S. and France, respectively, pharmaceutical products developed by the other.

The French company already held 600,000 MN shares and, under a stock purchase agreement also signed in February, 1978, another 800,000 authorized but unissued shares of common stock were sold to Rhone-Poulenc for $24,800,000.

The stock agreement limits R-P, which now holds 10.5% of total outstanding shares, to purchases equalling no more than 20.5% of voting securities of the company during a 10-year period ending February, 1988. With 10.5%, R-P already is MortonNorwich's largest shareholder.

■ Morton Quality Products unit, which processes and sells about 20 product lines of portion-packed condiment servings to institutional users and food service suppliers, was sold last year for $3,500,000. MortonNorwich also sold its Brazilian salt interests for $7,000,000. In December, 1977, the company's acquisition of its subsidiary, the Canadian Salt Co. Ltd., was completed.

MortonNorwich also purchased Shell Chemical's No-Pest Strip insecticide for $12,000,000. No-Pest Strip, with sales of about $12,000,000 a year, reportedly is the dominant product in the solid insecticide market. In total measured media last year, Shell Chemical spent $2,314,100 on advertising for the No-Pest Strip. Most of that money, almost $1,590,000, went for network tv.

Eaton-Merz division last year introduced Encare contraceptive vaginal suppository, which is believed to be one of the largest selling otc contraceptives. Touted in b&w spreads as "The most talked about contraceptive since the pill," it broke a major campaign in consumer magazines in late 1978, spending $295,000 in December alone. It also received substantial support in medical journals.

Texize household products division reported total sales of $136,000,000 in 1978. Compared to the previous year, this represents a 5% increase, which was accompanied by a 15% increase in pre-tax profits. The division's largest selling brand name, Spray 'n Wash, gained market share and the nonaerosol patented trigger spray pack and refill, introduced in 1977, continued to show consumer acceptance gains.

■ Fantastik held its No. 1 position in the spray cleaner segment of the household cleaner market while Glass*Plus moved to a stronger No. 2 position in the glass cleaner market. A 24% increase in sales was reported for Glass*Plus last year.

Texize's Pine Power pine oil disinfectant, a familiar product in southeast and southwest regions of the U.S., was introduced this year on the West Coast, in Chicago and other markets. It showed a 41% sales increase in 1978. Several new products, including Yes heavy-duty liquid laundry detergent with a softener additive, went into regional test in March, 1979.

Measured media expenditures were increased this year for Texize's Glass*Plus and Fantastik brands while a little less was spent on advertising for Spray 'n Wash and Grease relief.

Of the $7,644,900 spent on advertising Spray 'n Wash, $6,830,900 went for network tv commercials. Almost $6,000,000 of the $6,474,500 worth of advertising for Glass*Plus was spent on network and spot tv.

Fantastik spray cleaner received $4,138,000 worth of advertising, over $3,170,000 of which went into network television. For Grease relief, $1,498,900 was spent on advertising, with $1,146,300 on network tv. All of the $1,121,500 worth of advertising for Pine Power went into spot tv.

Big measured media backing also was given to Pepto-Bismol liquid and Norforms feminine deodorant suppositories, both of which are Norwich-Eaton Pharmaceutical brands. Pepto-Bismol liquid, with $6,514,300 worth of advertising, put $6,125,700 into network tv. Norforms received $1,084,800 in measured media, with $697,800 in network television and $387,000 in consumer magazines.

Nabisco Inc.

Sales§	$2,197,300,000	$2,073,278,000
Earnings§	101,553,000	78,016,000
Advertising*	90,900,000	88,300,000**

§Worldwide
*AA estimate **Revised

Nabisco Inc., East Hanover, N.J., the 43rd largest national advertiser last year increased its U.S. advertising and promotional spending to $90,900,000 in 1978, up about 3% over the previous year.

Although it does not include certain of the unmeasured spending criteria ADVERTISING AGE uses in its estimates, Nabisco reported a worldwide media ad spending figure of $95,568,000 last year, an 8.3% increase over 1977. The company also reported that its advertising-to-sales ratio worldwide increased to a level of 4.4%.

Nabisco had record results in 1978, with sales up 6% to $2.2 billion and net earnings surpassing the $100,000,000 mark for the first time, totaling $101,553,000. This was a 30% increase over year-earlier figures.

■ Network television was Nabisco's single largest advertising expenditure for the year. The company spent 73% of its total measured ad budget on network tv in 1978, compared to 65% of the total budget in 1977. (However, the 1978 dollar amount was 11.5% less, due to over-all cuts in measured media spending.)

About 60% of Nabisco's total sales volume is derived from sales of cookies and crackers from its biscuit division, the largest part of the company's U.S. food operations, which also include the special products, confectionery and food services divisions as well as Freezer Queen Foods.

Over-all, the U.S. food operations achieved record sales of $1,412,100,000 in 1978, a 7.8% increase.

In the face of a cookie market that was hurt by rising costs for chocolate and other ingredients, Nabisco credited its frequent promotions and increased cookie advertising with effectively offsetting the negative impact of higher prices.

The company launched a new advertising campaign—"Nabisco—America's Cookie Jar"—in the spring of 1978 to stimulate the market, and plans to use it again in 1979.

■ The cracker market continued to grow and Nabisco had its most successful snack cracker introductions in 1978 for Chippers and Dixies Drumsticks brands. The company also began national distribution of a new snack food line packaged in foil bags, in a move aimed at penetrating the potato and corn chip section of supermarkets. This included brands that were previously boxed, like Mister Salty pretzels and Diggers, Korkers, Chipsters and Flings snack products. Nacho Tortilla Chipas were also added.

The biscuit division invested about $19,363,600 in measured media in 1978, down slightly from 1977 spending despite the bigger outlays the company made for crackers and cookies.

Among the categories leading advertised brands in the biscuit division were Nabisco crackers, $6,849,300; Nabisco cookies, $4,821,700; Triscuits, $3,085,200; Premium Saltines, $1,954,300, and Ritz crackers, $1,798,700.

■ Other leading measured media spenders within the U.S. food operations were in the special products division. They included Milk Bone dog biscuits, $3,673,900; Nabisco Shredded Wheat, $3,317,300; Cream of Wheat cereal, $2,227,200; Team Flakes cereal, $1,505,500; Nabisco Tuna Twist Salad Mixes, $1,265,700, and Flavor Snack dog biscuits, $1,062,300.

Nabisco says it has developed a sophisticated testing system to measure sales accurately by testing a very small sample of the total market. Products from the U.S. food operations that were test marketed in 1978 included Morning Power hot cereal, via Ted Bates & Co. agency, and Brown Edge sandwich cookies, Peanut Brittle cookies, Apple Crisp cookies, and Wheatsworth Stone Ground wheat crackers, all via William Esty Co.

■ Compared with its money-making biscuit division, Nabisco spent significantly more to advertise its pharmaceutical and toiletry products, which had a combined flat year in sales and earnings.

Of 20 individual products Nabisco spent more than $1,000,000 to advertise last year, nine came from the toiletries and pharmaceutical operations. This included the brand Nabisco spends the most to advertise, the Geritol line of iron and vitamin supplements.

Nabisco spent a total of $15,809,500 in measured media advertising for Geritol products last year, including the new Geritol Mega Vitamins.

■ It also put $5,517,600 behind the Rose Milk line of skin care products, the brand Nabisco blamed for the decline in sales and earnings of its toiletry products from 1977 levels. Increased competition hurt Rose Milk sales and earnings, but the company said it will continue to aggressively merchandise the brand.

Other brands in the pharmaceutical and toiletry division that Nabisco spent more than $1,000,000 to advertise included P.V.M. high protein powder (a diet aid), Sominex sleeping pills, FemIron tablets, Aqua Velva aftershave, Vivarin stimulant tablets and Serutan laxatives. Toiletries and pharmaceuticals are sold primarily through Nabisco's J. B. Williams Co. Inc. division.

■ New toiletry and pharmaceutical products introduced during 1978 included Aqua Cologne, a men's fragrance, kicked off with a $1,000,000 ad blitz in May, and the Acu-Test in-home pregnancy test, believed to have been the first such product to be advertised on television. Parkson Advertising, a J. B.

Williams house agency, handled both.

Nestle Enterprises

	1978	1977
Sales	$1,306,000,000	$1,250,000,000
Advertising	77,919,300	71,300,000
Estimated by AA		

Nestle Enterprises, White Plains, N.Y., owned by Nestle, S.A., Vevey, Switzerland, is the 52nd largest national advertiser in the U.S. Nestle spent an estimated $77,919,300 in advertising in 1978, an increase of 8.6% over its 1977 expenditures.

Those ad totals include spending by The Nestle Co., White Plains, N.Y.; Libby, McNeill & Libby, Chicago, and The Stouffer Corp., Solon, Ohio. Nestle, Libby and Stouffer are wholly owned subsidiaries of Nestle Enterprises. Nestle Co. accounts for the major portion of the ad budget.

U.S. sales for all products made and marketed by Nestle Co. rose from about $1.25 billion in 1977 to an estimated $1.30 billion last year. The parent company's worldwide sales rose about 10% to about $11 billion in 1978. Net income, registered at about $350,000,000 in 1977, increased to approximately $420 million last year.

- The FIDCO and Food Specialties division introduced and expanded a line of cheese flavors under the Spectra label. Among the flavors included are two types of cheddar, Romano and Parmesan. Spectra chicken-type flavor sold industrially for use in various food applications, was also introduced.

Additionally, FIDCO makes hydrolized plant proteins, Rogers Cheese, Maggi products, FIDBITS, Flavo-Bits and Nestle Vee-Kreme.

Among the brand names included in the division's specialty food area are Crosse & Blackwell soups and sauces, Keiller imported marmalades and confectionary products, Maggi bouillons and seasonings and Kavli Norwegian crisp bread.

Nestle's measured media expenditures on its cheese brands fell to $721,000 in 1978 from $1 million the previous year. Broken down, the company spent $441,000 to promote Wispride cheese spreads, $38,700 to push Price's dips and $241,300 for Price's sandwich and snack spreads.

- As coffee prices reached a peak in 1977 and early 1978, consumption dropped. Then, in 1978, as prices started to fall, consumption increased and soluble coffee throughout this period increased its share of the total market.

Sunrise instant coffee mellowed with chicory, expanded into approximately 50% of the U.S. and was backed by nearly $10,000,000 in measured media spending, the most for any Nestle product last year.

Taster's Choice freeze-dried coffee continued to be a dominant factor in the freeze-dried category, outselling its nearest competitor by better than two-to-one. Nescafe instant coffee continued to promote its "world's largest selling" theme with continued high value coupons, consumers' premiums and network television.

Nestle's measured media spending in 1978 for its Taster's Choice freeze-dried and decaffeinated coffees amounted to $7,415,400, mostly in network television. Measured media spending for Nescafe instant and decaffeinated coffees came to $3,874,500, some $700,000 less than 1977 expenditures.

- In 1978, Nestle introduced single-serving packets of its Taster's Choice freeze-dried decaffeinated coffee.

The chocolate division continued to promote its "real chocolate" theme for its semi-sweet morsels, cookie mix and chocolate bars, despite escalating cocoa prices and generally flat sales of packaged candy products, according to wholesalers.

Go-Ahead crunchy peanut butter bar in milk chocolate was expanded to additional areas of the United States, marketed in about 20% of the country. Brownie mix and Blondie mix were introduced in test markets in Indianapolis and Milwaukee. Each of these products promotes the real chocolate theme. The Brownie mix is the only chocolate brownie mix with real chocolate, not just chocolate flavoring.

Nestle cookie mix introduced a reformulated product and repackaged the line from a pouch to a box. These changes substantially improved the brand's market position. The four flavors are chocolate chip, developed from Nestle's original Toll House recipe, sugar, peanut butter and a new flavor, oatmeal raisin.

During the year, the company spent over $3,500,000 in measured media dollars to promote its cookie mixes.

In 1978, Nestle spent $6,481,800 on the chocolate morsels; $2,370,000 on the $100,000 candy bar; $4,881,200 on Nestle's Quik; $3,074,400 to promote the Nestle's Crunch bar; $1,452,700 on its Cocoa mix, and $1,651,800 on the Nestle's Choco Lite candy bar.

As tea mixes continued to grow, so did Nestle's Nestea mixes which include Nestea iced tea mix, Nestea low-calorie iced tea mix and Nestea Light iced tea mix.

Nestea Light, a product introduced in 1977 to help meet consumer needs regarding dietary maintenance and consumer concern about saccharin, was expanded nationally.

Nestea brands were supported in 1978 with $4,857,200 in measured media spending, the lion's share going for network tv advertising of Nestea Instant tea.

Advertising Age meets the information imperative with . . .

cite service

Your telephone index to the advertising newspaper of record

The best index of the "International Newspaper of Marketing" is produced by its library

There is no greater source of information on advertising and marketing than the library of Advertising Age, the most authoritative publication in the field. The news medium that covers the world for advertising now makes its library of news, views, data, articles, opinions and obituaries accessible to your agency or company for quick and easy reference by telephone.

Over 60,000 subjects have been microfilmed. Issue date and page number are available right away by phone in New York and Chicago.

Complete, Quick and Easy to Use

Up-to-date and complete, each issue has been annotated and indexed for names, categories and companies so you can be as specific as a particular brand or as general as "all of" a subject when you call. No more fumbling with a clumsy thesaurus or unfamiliar subject file, because whatever you need, our Cite Service researchers will find it and call you back with the issue date and page number—fast!

You'll use the Cite Service for facts, figures, recaps, projections and information support—such as

- New Account Presentations
- Current Account Retention
- New Product Introduction
- Analysis of Past New Product Promotions
- Key Personnel Movements
- Government Regulations
- Market Research
- Agency Management
- International Marketing News
- Brand Share of Market, Advertising Expenditures
- Company and/or Product Information

Inexpensive and Flexible

Our three rates provide flexible access to the Cite Service, depending on how often you plan to call. Frequent users will probably find the $500 Call Package most economical, with 52 inquiries in 12 months. Call as often as you wish, and when you use up your Call Package, just purchase another, again good for 12 months.

If you plan to call less often, perhaps the 26-call plan for $250 will suit your needs better. Call Packages give you the Cite Service for less than $10 per inquiry. Companies that require our specialized help only once or twice a year can order individual searches, as necessary, for $40 each. The Cite Service is a telephone source, but if you need copies of articles, just ask. We can supply them at 50c per page.

Send the coupon today. Do a better job for yourself and your company with the complete marketing information resources of the Cite Service. You'll save time and money—frustration, too—solving your special needs. An indispensible tool for you and your staff from ADVERTISING AGE.

MARKETING PROFILES

Plans were made to go national on Nestle's two tea mix flavors, "lively orange" and "minty lime."

In 1978, the company also moved into test with Down Home lemonade flavored drink mix.

■ Souptime instant soup has become a successful entry into the instant soup market. In 1978, Souptime had over 30% of the $90,000,000 market. There are nine varieties in the line.

Nestle spent $4,791,000 in measured media last year to promote its instant Souptime soup, mostly in network tv. Souptime accounts for approximately one-third of the $100,000,000 instant soup market, according to Nestle.

Nestle LunchTime, a three-minute casserole for one, was expanded to major markets in the East and West last year. There are five flavors in the line. The product is packaged in a serving bowl and is made by adding boiling water.

■ Measured media spending for Libby, McNeill & Libby reached over $6,000,000 in 1978, more than half for Libby's canned fruits. Well over $3,000,000 was invested in network television and more than $1,000,000 for spot tv. Magazine spending reached the $1,000,000 mark while newspapers received only $192,000 in media ad money for Libby last year.

Stouffer Foods spent $8,717,400 in measured media advertising last year. Stouffer Frozen Entrees received $3,513,700 and Stouffer Frozen Pizza garnered $2,520,200. More than $7,000,000 went to spot television.

Nissan Motor Corp. in U.S.A.

	1978	1977
Sales†	$10,437,488,000	$10,164,674,000
Earnings†	296,000,000	365,000,000
Advertising‡	61,492,200	57,000,000

†Worldwide; fiscal years ended March 31, 1979 and 1978; figures for 1977 restated to reflect current values of U.S. dollars and Japanese yen.

‡U.S. only, estimated by AA

Nissan Motor Corp. in U.S.A., Carson, Cal. (a subsidiary of Nissan Motor Co. Ltd., Tokyo), was the 65th largest national advertiser in 1978, with an ad expenditure estimated at $61,492,200, up about 8% from 1977.

In the fiscal year ended March 31, the parent company, Nissan Motor Co. Ltd., reported 1978-79 worldwide sales of more than $10.4 billion, up 2.7% from the $10.1 billion reported a year ago.

Net earnings for the year were down from year earlier figures, from $365,000,000 to $296,000,000, with the Japanese producer of Datsun cars and trucks manufacturing a total of 2,357,137 units (1.1% below fiscal 1977), 1,195,417 vehicles for domestic use and 1,161,720 for export to the U.S. and other overseas markets.

■ Nissan Motor Corp. in U.S.A., the distributor of Datsun cars and trucks, experienced an 11.4% drop in sales in calendar 1978, from 488,217 cars and trucks in 1977 to 432,700 units last year.

Management of the U.S. subsidiary attributes the reduced volume, following a record sales year in 1977, to a series of price increases caused by depreciation of the dollar.

But because of higher gasoline prices, which give Datsun's gas-thrifty economy cars an edge in today's market, and a major restyling of the Datsun line, Nissan sales executives are expecting an equally sharp rebound this year. They point to record sales set in each of the first six months of 1979 as evidence of a turnabout and better things to come.

Nissan's market share in 1978 amounted to 16.8% of import registrations in the U.S. The company ranks fourth in worldwide production behind General Motors, Ford and Toyota.

■ Datsun's 1979 model year saw continuance of its creative umbrella "We are driven," designed by agency William Esty Co. to distinguish Datsun from all other small cars and to establish Nissan as a manufacturer dedicated to quality workmanship and value.

Esty's promotional material for Datsun works the formerly unused Nissan logo into the Datsun commercial presentations, giving a higher profile to the corporate name of the parent. Several corporate ads placed by the parent company carried the line, "We are Nissan—the strength behind Datsun's growth."

Although "We are driven" continues as the primary theme on tv, radio and magazines, early 1979 saw the selective use of the "Datsun Saves" line of years past, reflecting expectations of the gasoline price hikes that were to come.

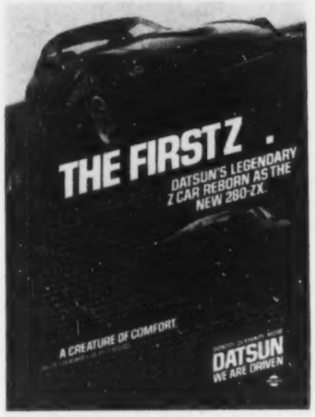
Datsun's 1979 ad campaign began with the announcement of a totally new economy 210 series consisting of hatchback, sedan and wagon as well as news of the all new Datsun 280-ZX.

The new Datsun 280-ZX' subtle refinements to the already classic "Z car" styling and its engineering innovations prompted *Motor Car* magazine to name it the "Import Car of the Year."

■ Along with these major new products, Datsun introduced a new high performance/luxury two-door sport coupe to complete the 810 series. It also continued to provide strong ad support to its successful line-up of small pickup trucks with emphasis on the King Cab model.

Close on the heels of this activity came the introduction of the all-new front-wheel-drive Datsun 310, the replacement for the F-10 series. Datsun ads position the 310 as an economical, well-appointed, fun-to-drive car with all the attributes of front-wheel-drive performance.

Going into 1979, Datsun's media plan called for the use of ABC-TV's "Monday Night Football" as the primary launch vehicle for its 1979 model introduction. Datsun's introduction of its new 310 was spearheaded by tv sponsorship of the hit motion picture "Rocky."



The Datsun 280-ZX, a refined version of the classic Z car, was named "Import Car of the Year" by *Motor Car* magazine.

The length of these tv properties permitted insertion of 60-second spots promoting full-line "Datsun Quality" and others set to the theme of "210 Economy and 280-ZX Awesome." Supporting these were 30-second "lifts" as well as separate 30-second spots for individual models within the car lines. The Datsun 310 was introduced with three separate 30-second spots.

■ Spot tv and radio selectivity continued to be refined with a gradual increase in sports franchises. But network tv accounted for the biggest gain in the 1978 ad budget, from $16,543,500 in 1977 to $19,310,900 last year. Network radio, unused the previous year, represented an expenditure of $111,200 in 1978.

Datsun's commitment to the college market, with its distribution of over 1,000,000 student Travel Guides to over 180 colleges, took an added dimension with the presentation of the Datsun Focus Film Competition Awards. The awards were made to college level students involved in the art of film making.

North American Philips Corp.

	1978	1977
Sales	$2,184,011,000	$1,916,761,000
Earnings	68,034,000	61,241,000*
Advertising	42,100,000	44,000,000

*Restated

North American Philips Corp., New York, the nation's 79th largest advertiser, trimmed its advertising 4% to an estimated $42,100,000 in 1978.

Sales increased by $267,250,000 or 14%, and earnings by $6,793,000 or 11% from 1977.

Consumer electronics products, principally sold under the Magnavox name, gained by $55,624,000 to $379,191,000; electrical consumer products, consisting of Norelco personal care products, home appliances and lighting products were up by $54,162,000 to $359,918,000; sales of additional consumer products and services, including brush products, furniture and musical instruments rose by $21,694,000 to $276,456,000.

Also on the rise were electrical and electronic components, professional equipment, and chemical and pharmaceutical products.

■ Magnavox products' measured spending totalled $7,488,800, up $312,000; more than $5,000,000 backed color tv sets. Multiproduct advertising accounted for $617,400 in spot and network tv.

The color tv-radio-phonograph combo unit was allocated $743,100 for tv time. Magnavox invested $536,500 in measured spending for its videotape systems, primarily in spot tv, with $148,500 going into magazines.

Competitive pressures from South Korea and Taiwan imports depressed color tv profit margins in 1978. A trade agreement with Japan alleviated the import problem from that nation. An agreement completed early this year with South Korea and Taiwan limits the number of imports from those countries through June, 1980, when the Japanese pact also expires.

The Philips/MCA optical videodisc player entered the Atlanta market in mid-December and Seattle in May. An optical, laser beam system using LP-type grooveless records, the disc is expected to be national in 1980. MCA's Disco-Vision has a catalog of scores of movies for the disc, from Universal's "Jaws" to Paramount's "Saturday Night Fever."

■ Within the volatile home videogame business Magnavox introduced the Odyssey^2 computer videogame system, featuring a 49-position alpha numeric keyboard which users can use for beginning computer programing, as well in a wide variety of electronic games.

Magnavox held an estimated 17.5% share of the home videogame market. The company invested $259,300 in measured spending to advertise Odyssey, all in spot tv.

Two new videocassette recorders were introduced last year: A leader model with a fixed timer for start and stop at preselected times and a high-end programable Touch-Tune model permitting the user to preset the vcr for unattended recording of desired tv programs up to seven days in advance, including four separate channel changes. A new low-cost video sound camera joined the vcr accessory line.

Eight new console stereo units were introduced and the entire modular stereo line was restyled by Magnavox, which experienced a slight decline in console stereo market share. Magnavox supported its stereo consoles with $268,500, all in magazines.

Two new portable and table model radios were introduced, as were clock radios and radio cassette players, a new turntable series, Project 7, and a new line of U.S.-manufactured audio receivers.

■ Norelco cord and rechargable Silver Rotary Razors, introduced in late 1977, remained the best sellers in that category. Sales and market share for the Norelco razor line again reached record levels, with the cord adjustable Rotary Razor again the leading brand.

Norelco invested $8,032,700 in measured spending alone to advertise its electric and cordless shavers, including $7,098,800 in network tv. An additional $122,200 was invested in magazines for the cordless shavers only.

The Norelco Curly Q mist styling wand continued as the leading seller in the market. A smaller Gotcha Gun hair dryer and a compact Curly Q with retractable curling iron and dual voltage are due this year. Norelco invested $399,600 to advertise its hand-held dryers, all in spot tv.

A strong p.o.p. campaign for Norelco coffee makers contributed to its sales increase. Express, a one-to-four-cup unit that also makes espresso, was added to the product line in 1978. Norelco put $1,157,000 in advertising behind its coffee makers, using spot and net tv.

- A $5 rebate program for Norleco's Toaster Range helped boost its sales and market share last year when Norelco invested $737,700 in Toaster Range tv advertising.

Meanwhile, sales of Norelco's mini fast-food appliances were hurt by a lessening of consumer demand in 1978. Dial-a-Blade, a new six-position slicing disk accessory for the Norelco food processor was well received.

A total of $131,400 was invested in magazines for the Burger Cooker and $252,700 in spot tv for the Lickety Split ice cream maker.

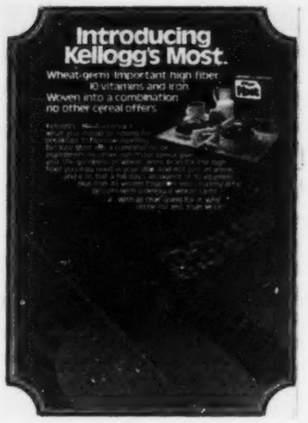
The distribution network for Norelco microwave ovens, broadened in 1978, is being further expanded in 1979. Measured spending totalled $115,000 in magazines for that line.

Norelco's Home Patrol security system, introduced last fall, was not marketed significantly until the first half of 1979. The $259.95 basic system ties together a network of wireless sensors attached to windows, doors and other points of entry. Additional sensors range from $30 to $58 each. Only $63,000, all in magazines, was invested in 1978 advertising for the system.

- A new GS600SR Genie garage door opener system in a carry-out package with do-it-yourself instructions was introduced this year. A total of $4,099,200 supported Genie last year, nearly all in spot tv.

New Norelco lighting products included an 18-watt Mini-Sox low pressure sodium lamp and 70 and 100-watt high pressure sodium lamps. Sales grew for the energy-saving Econo-Miser fluorescents. A $300,000-plus packaging and merchandising display program featured a promotional tie-in with Olympic star Bruce Jenner and the Special Olympics.

Sales of professional equipment gained 12% to $409,200,000. Earnings gains in the medical systems and government and industrial electronic equipment areas were more than offset by a provision for loss on the 1978 discontinuation of the company's data systems operations. Measured spending for Norelco dictating and transcribing equipment totalled $232,100, all in magazines.



Introducing Kellogg's Most.
Wheat-germ. Important high fiber. 10 vitamins and iron.
Woven into a combination no other cereal offers.

Kellogg's Most high-fiber cereal was its 1978 success story. The wheat cereal moved into national distribution in early 1979 after successful test marketing.

Norton Simon Inc.

	1978	1977
Sales*	$2,428,797,000	$1,807,736,000
Earnings	115,814,000	101,773,000
Advertising	144,591,000	127,115,000

***Fiscal 1978 vs. Fiscal 1977**

Norton Simon Inc., New York, the 19th largest national advertiser, increased its advertising an estimated 14% in 1978 to $144,591,000.

NSI's revenues and net income again reached all-time highs, led by strong gains at Avis and Hunt-Wesson. Revenues for the first nine months of fiscal 1979 increased 14% to $2,007,115,000, while net income advanced to $90,140,000.

In NSI's food and food service operations, Hunt-Wesson achieved new sales and operating profits highs as a result of growth in its convenience food, food service operations and profit gains in its edible oil business. The gains came despite heavy competition faced by Hunt's tomato products.

- During the year, NSI further strengthened its corporate marketing organization with the addition of a new team of marketing directors at corporate headquarters headed by Randall W. Hackett, vp-marketing, who joined the company from ITT's Continental Baking division.

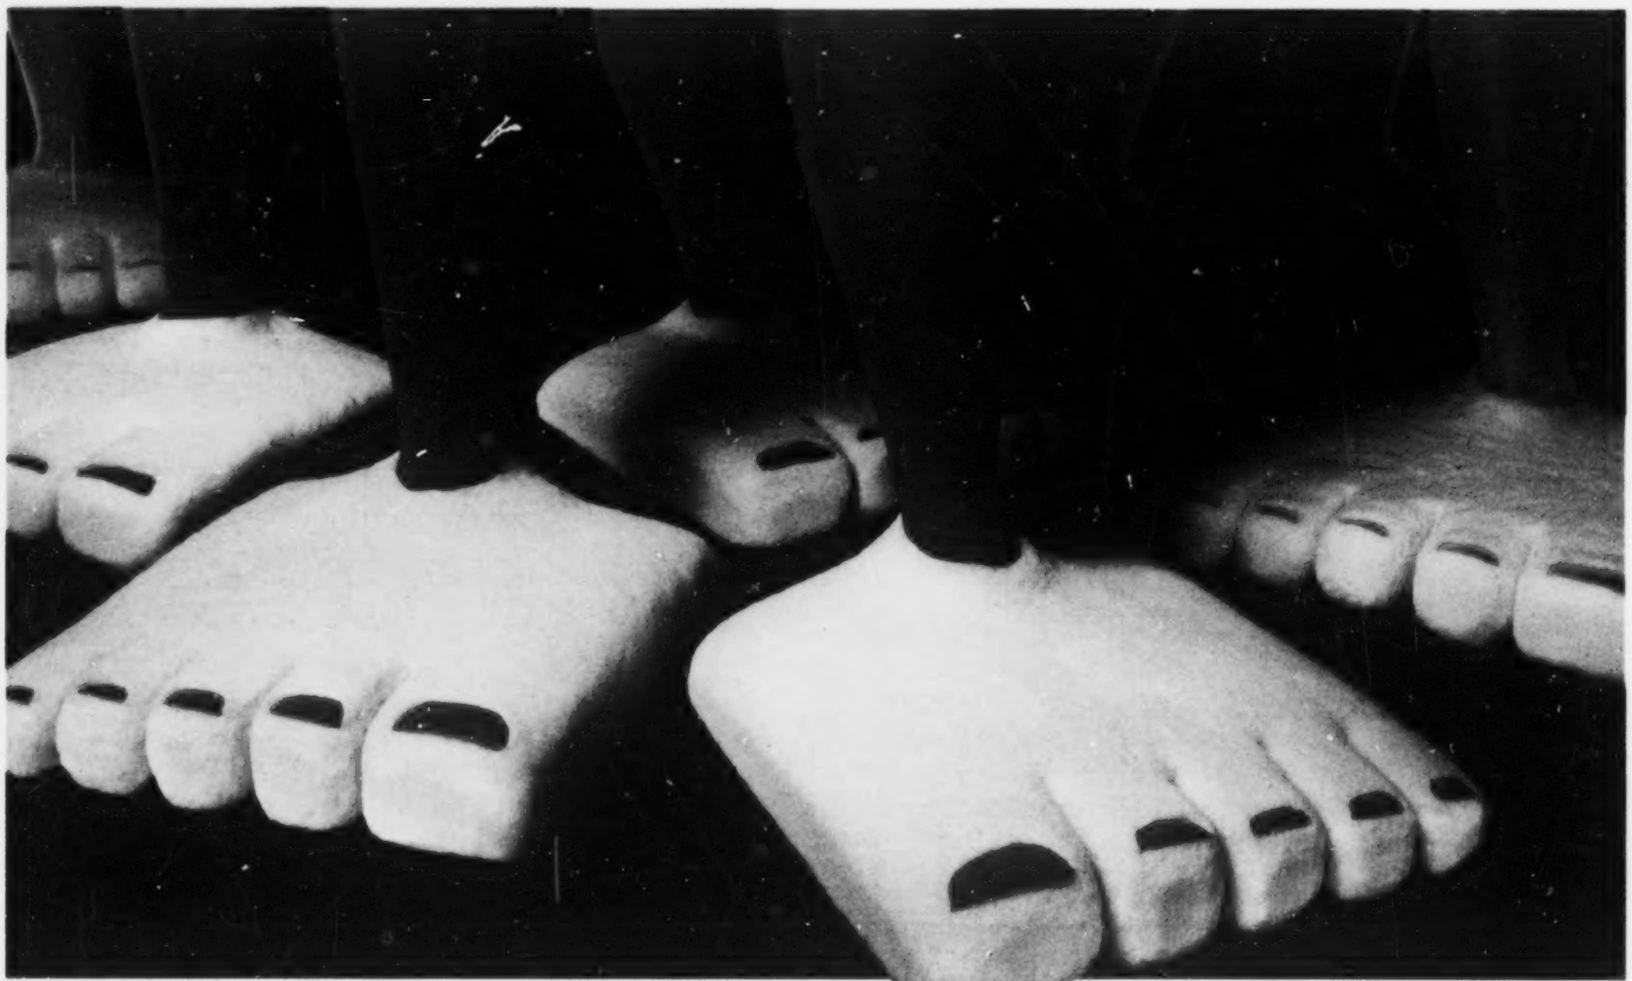
Marketing directors have been assigned to each segment of NSI's business—food and packaging, transportation and leisure, cosmetics and fashion, and beverages.

Advertising costs for Hunt-Wesson exceeded $36,000,000 in fiscal 1978, a $2,000,000 increase over the previous year's budget.

Hunt's Manwich Sandwich Sauce, Orville Redenbacher's Gourmet Popping Corn, and Wesson Oil were among the most heavily advertised Hunt-Wesson products, with measured media expenditures of $3,928,000; $4,697,300, and $4,615,100, respectively.

Hunt-Wesson spent $957,900 testing a 100% sunflower oil called Sunlite last year. Targeted to the health conscious shopper, the oil was tested originally in Denver and Seattle and will be in full national distribution by early 1980.

- A particularly successful campaign launched during 1979 was a promotion backed by tv and print called "Free for all." It reached 80% of U.S. households and offered



We have 20,000 sq. ft. and know what to do with them.

Our studio was designed specifically for photography with our feet planted firmly on the ground, all 20,000 of them.

So, whatever your photographic needs, be they studio, table top, location or complete set design and construction, we'd like to lend you a hand, or a foot.

Give us a call at 614/471-1727.

bichsel/morris
photographic illustrators inc.

187 W. Johnstown Rd., Columbus, Ohio 43230

consumers one free Hunt's tomato product with the purchase of three others.

Additionally, "Red Strategy" was developed to advertise and promote Hunt's tomato product line, using Tony Randall as spokesman.

▪ Benefiting from continued airline traffic growth, Avis, acquired in July, 1977, posted record revenues and earnings for the first nine months of fiscal 1979.

The U.S. Rent-A Car, Europe, Africa and Middle East divisions turned in especially strong performances. Growth in these markets was stimulated by both the high level of business overseas and a combined ad budget of $5,282,300.

Avis maintained its position as a leading company in the rent-a-car industry worldwide. Advertising expenses for the entire Avis network were approximately $20,000,000.

Avis' worldwide advertising and promotion relationship with General Motors, which became effective Sept. 1, 1978, has helped strengthen the company's market position. According to a company study, Avis was the only one of the three major companies to maintain its market share in the face of increased competition and heavy price discounting.

Despite the gas shortage this year, Avis reported that business was booming and that rentals were up during the fuel pinch. Industry sources said that the full tank of gas that comes with the car has become an important lure both to travelers and local drivers. During the shortage, Avis distributed brochures on fuel savings tips to help customers obtain the best possible gas mileage.

During the year, the company launched a campaign for its leasing segment in an effort to increase its share of a market that is not currently dominated by any leasing operation. The $1,000,000 campaign featured the theme, "We try harder in more ways than one." The truck rental and truck and car leasing segments are a growing portion of the company's operations.

Avis also moved off in a new marketing direction to capture a major share of the fast-growing leisure car rental market, while still seeking to improve market share among business travelers. In the campaign, Avis introduced "Supersaver" packages; a holiday rate, a weekend rate and a seven-day "see America" rate.

▪ Max Factor's measured advertising expenditures increased for the second consecutive year. Creams and lotions spent $518,300 in spot tv and magazines; lipstick, $185,300 in magazines and spot tv; Erace, $62,700 in magazines; eye makeup, $33,600 in spot tv; Geminesse creams and lotions, $59,000 in magazines; mascara, $235,400 in spot tv; multiproduct advertising, $15,700 in magazines, and nail polish, $33,800 in magazines and spot tv.

Measured advertising support dropped significantly for UltraLucent nail polish, lipstick and makeup with ad dollars for the line totaling $63,600, or 11% of the previous year's budget. Ad dollars subtracted from the UltraLucent support were undoubtedly added to the Maxi cosmetics campaign, initially launched in 1977. More than $935,000 backed the Maxi line in magazines. Network and spot tv shared the remaining $3,379,000 in eye and lip makeup billings.

Continuing support for the Maxi cosmetics line and basic makeup and fragrances categories, and the introduction of new or newly packaged fragrances and makeup lines accounted for the increase in advertising expenditures.

Last year Factor started national distribution of Whipped Creme cosmetics supported by a campaign that appeared in women's magazines nationwide. The line includes moisturizer, moist makeup, blusher and eye shadow.

Robert J. Kamerschen, who joined Norton Simon as a senior vp in January with extensive experience in sales, marketing and operations gained from prior posts as president of Chanel Inc. and Christian Dior Perfumes USA and vice president of marketing for Revlon, was named president and chief executive officer of Max Factor. He succeeded Dale Ratliff, former Revlon sales executive, who died suddenly in April.

▪ Somerset Importers sales and earnings moved up for the first nine months of fiscal 1979, due primarily to gains in volume and market share for Johnnie Walker Red and Black Label scotches and Tanqueray Gin.

The Black Label scotch was backed by a $2,314,900 print and outdoor budget plus a $304,000 magazine sweepstakes. The Red Label scotch was backed by a $3,670,600 print and outdoor budget plus a $412,700 newspaper and magazine contest. The $1,330,800 gin advertising was divided among magazines, newspapers and outdoor.

During fiscal 1979, Tanqueray Gin retail sales passed the annualized rate of 1,000,000 cases, joining 35 other domestic and imported spirits with annual retail sales of more than 1,000,000 cases.

Somerset Wine Co. appointed Avrett, Free & Fischer, New York, to handle new products, though most of the company's existing products are unadvertised.

▪ Canada Dry ginger ale and premium mixers maintained their leadership in the U.S. backed by $1,132,500 in magazines and $9,700 in outdoor. Canada Dry continued its support of Barrelhead Root Beer and Orange Spot, which were introduced into new markets in 1978.

Advertising and sales promotion spending increased for Canada Dry for the third consecutive year. In measured media, beverages divided $6,549,100 among spot tv, magazines, network tv and outdoor.

During 1979, Canada Dry launched its "2/3 of your drink" campaign in tv and print for all of its mixers. The campaign was responsible for about 66% of Canada Dry's ad spending and highlights the importance of the mixer to the taste of a drink.

Canada Dry also launched a campaign for its ginger ale urging consumers to "say goodbye to sweet soft drinks and hello to Canada Dry ginger ale." The new ad effort replaced its "Not too sweet," advertising campaign.

▪ As part of the $552,500 it spent in magazines in 1978, Canada Dry club soda aimed its ad efforts at Perrier sparkling water. The ads cited greater preference for the American water among several connoisseurs and used the headline "Au revoir Perrier" to needle the foreign marketer.

Diet beverages allocated $51,600 for spot tv advertising; tonic water, $580,000 for magazines; while regular and diet beverages spent $186,000 on spot tv.

Canada Dry introduced Wallaby Squash, a lightly carbonated lemon-flavored beverage in Kansas City this fiscal year. In bottles and cans, the entry has gotten $245,300 in tv, newspaper and coupon support.

Overseas, Canada Dry invested heavily in the Egyptian market, which attracted a myriad of soft drink marketers last year. The move was an effort to secure part of the 50,000,000 case-per-year Egyptian business.

Despite continued softness in the home sewing market, NSI's McCall Pattern Co. spent over

Do you know what it means to miss NEW ORLEANS?

We do.

What you don't know can cost you a lot in lost opportunity and unrealized profits.

If you have a need for sophisticated market research, come to us. Nobody knows more about selling to New Orleanians than we do. And we're eager to tell all.

Our data are accurate and reliable. They're available from the Belden Continuing Market Study of New Orleans as well as our own research operations and other local sources.

We've shared our 'inside' information with some of the biggest names in retailing and have been instrumental in their decisions to open new doors here.

Perhaps you have a need to know what New Orleanians buy, and from whom. We have detailed data on their shopping and purchasing patterns for appliances, clothing, jewelry, floor covering, automobiles, and automotive supplies. We also have a wealth of data on every major retailer, financial institution and regional shopping center in the area.

No matter how you slice your target audience, we can supply the demographic edge. Give us the characteristics of your prime customer and we'll custom tailor a report for you on the New Orleans market. We'll give you the market composition and our newspapers' penetration. We'll spell it out in GRPs, or net rating points, or anyway that suits you best.

New Orleans — a big time market and getting bigger. If you're not now a part of it, you should be. All we know about it is yours for the price of a stamp or phone call. Contact us today.

MARKETING PROFILES

$1,500,000 in measured media for its sewing patterns. Cheryl Ladd and Jaclyn Smith patterns were added to the successful line of Marlo Thomas and Halston patterns.

Halston Enterprises maintained its fashion leadership in made-to-order and ready-to-wear lines, and continued its expansion in licensed designs for men's and women's apparel, bed linens, towels, sunglasses, luggage, carpets and women's handbags. A new division, Halston Sportswear, introduced its first line to the trade earlier this year for sale this fall.

Noxell Corp.

	1978	1977
Sales	$156,408,000	$137,628,000
Earnings	10,491,000	9,396,000
Advertising*	34,902,400	33,255,500

*AA estimate

Noxell Corp., Baltimore, the 90th largest national advertiser, is estimated by ADVERTISING AGE to have increased its advertising expenditure by only about 5% to $34,902,400 in 1978.

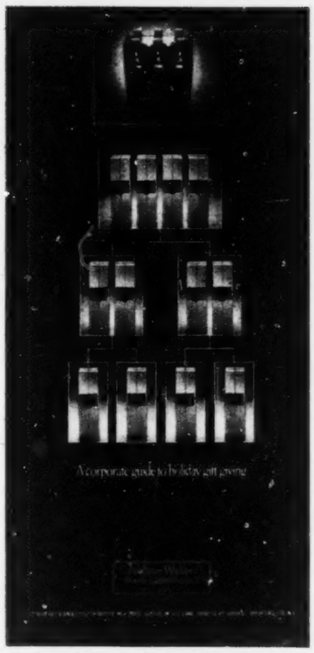
The marketer of facial makeup and skin cremes, as well as some household products, said sales climbed 13.6% to $156,408,000 while earnings increased 11.7%.

The company said that sales in its cosmetics division were strong and that every Cover Girl product increased its share of market figures. New makeup products included Cover Girl Professional mascara and Color-Matics eye shadow.

In the nail enamel category, which the Cover Girl line entered for the first time in 1977, spending was up sharply to $4,099,500 for NailSlicks, from $890,600 the previous year. In 1977, all ad dollars went into magazines, but in 1978 more than $3,000,000 was spent on net tv. The company said it doubled its introductory sell-in in 1978.

- Cover Girl makeup continued its dominance in liquid facial makeup, though ad spending was cut more than $2,000,000 to $7,457,300 in 1978. Cover Girl Moisture Wear, for women over 25, got $509,700, all in magazines.

Noxzema skin cream is said by the company to be "the most widely used product in the face cream and lotion category." Prices were increased again this year, but advertising held steady at $5,369,500 in measured media. Kathryn Crosby was introduced as spokeswoman for the brand in advertising to emphasize the importance of the mature woman as a customer.



Norton Simon Inc.'s Somerset Importers witnessed sales and earnings gains with the help of volume increases for Johnnie Walker Black Label.

After a year in test markets, Noxzema Antiseptic Skin Cleanser was launched nationally in the fall of 1978. It is a softening, but astringent, product geared to teens. Spending, all in magazines, from the fall to the end of 1978 was $193,000. "Tough on oil, but easy on your skin," is the ad theme.

Noxell's Lestoil is the No. 1 household cleaner in its marketing area, which covers most of the country east of the Mississippi. Advertising spending held steady at $1,616,500. A line extension of Lestoil was introduced nationally last year— Lestoil Deodorizing Rug Cleaner, which is geared to the pet-owning consumer. Spending was all in spot tv at the rate of $431,200.

- RainTree, a moisturizer in cream, lotion and concentrated formulas, continued its sampling efforts in its attempt to increase its share in a competitive area. Measured media spending was down almost $2,000,000 to $3,933,200, primarily going toward net tv.

In the eye makeup category, Noxell said 1978 was its best year since the introduction of the line in 1971. Cover Girl mascara added the new Professional entry with a "curl brush" to its product mix.

Mascaras got $4,553,500 in measured media spending, while other eye makeup was supported by $1,015,800 split between net tv and magazines. Another new product in this area was the Color-Matic cream-on eye shadow.

Noxzema medicated shaving cream dropped to the No. 3 slot in the market, as it was edged out by S.C. Johnson & Son's Edge. Noxell, in a move to counter Edge, introduced a new Anti-Friction cream-gel shave. It is described as a "gel that comes out foaming."

The company launched this product with a sexy spokeswoman known as Auntie Friction portrayed by Caroline Munro.

The campaign was discontinued in early 1979 due to ineffectiveness, the company said, but Auntie Friction also came in for some criticism from the National Federation for Decency. The shaving creams got $1,398,800 in spending in 1978, down slightly from the previous year.

J.C. Penney Co.

	1978	1977
Sales	$10,845,000,000	$9,369,000,000
Earnings	276,000,000	290,000,000
Advertising*	125,000,000	100,000,000

*AA estimate

J.C. Penney Co., New York, the 27th largest U.S. advertiser, hiked its national advertising 25% from $100,000,000 to an estimated $125,000,000 in 1978.

The total includes an estimated $90,000,000 for catalogs, but does not include Penney's retail advertising for individual stores in local newspapers, estimated at $185,000,000.

Penney's over-all advertising spending worldwide in '78 came to $285,000,000, up about 27% from $224,000,000 in 1977. The worldwide figures do not include local newspaper spending.

Sales in 1978 rose 15.8%. Volume of $10.8 billion broke last year's record of $9.4 billion, but increased operating expenses pushed earnings down 4.8% to $276,000,000. Excluding sales of domestic supermarkets and five Italian stores, which were discontinued in 1977, sales increased 17.8% in 1978. In November, the chain set a monthly sales record of $1.01 billion.

- The chief contributors to the sales increase were full-line stores and catalog sales. Sales of full-line stores in 1978 were $6.6 billion, or 60.5% of total company sales. Soft-line stores generated $2.5 billion, 23.2% of company sales. Both full and soft-line units suffered profit margin erosion in 1978 as a result of increased operating expenses and higher markdowns.

Catalog sales rose 20% to $1.2 billion, surpassing last year's record of $1 billion. Of this amount, $970,000,000 came from sales through catalog centers in stores, while mail order and outlet store sales of $230,000,000 made up the remainder.

Color that looks wet, even when it's dry!
Cover Girl
NAIL SLICKS.
Color that strengthens

Noxell Corp. boosted spending for NailSlicks nail enamel, part of the Cover Girl line, by more than four times from '77 to 78.

Sales of Penney's Belgian operations rose 22% to $768,000,000 in 1978 from $625,000,000 in 1977. Belgian profits for 1978, in local currency and after the effect of currency translations, improved over 1977.

The Treasury Stores registered losses for the fifth consecutive year, despite a 24.6% increase in sales over 1977.

- Drug store sales climbed to $348,000,000, up 16.7% from $298,000,000 in 1977. Penney opened 42 new drug stores and closed six in 1978.

Combined net income for the insurance operations continued to set records, advancing to $22,000,000 from $15,000,000 in 1977. Improved underwriting experience in both casualty and life insurance are credited with the increase. The number of individual policyholders exceeded 1,000,000 by the end of 1978.

The three Treasury Stores in the Chicago area were slated for sale. Two were scheduled to close at the end of March, 1979. Three stores are thought to be too few to compete effectively in the large Chicago market area.

In 1978, Penney opened 28 full-line and 33 soft-line stores. Two stores were opened in Belgium and 42 drug stores were added to the domestic chain. In-store insurance centers were opened in 13 stores, bringing the total number of centers to 33. The first catalog distribution center to serve the West Coast opened in Reno, Nev., early in 1979.

- Expansion plans for 1979 include 37 full and 26 soft-line J.C. Penney stores, 36 drug stores and three stores in Belgium. Catalog sales centers are slated for 245 stores in California, Hawaii, Oregon and Washington. A sixth distribution center, located in Manchester, Conn., is under construction.

J.C. Penney main merchandise categories are women's apparel and accessories, men's wear, children's wear, leisure and automotive equipment, home furnishings and home improvement.

Since 1974, Penney's has been changing its marketing strategy from a private label, price-conscious general merchandiser to a more moderately priced, higher fashion department store. Special efforts have been made to appeal to the store's established clientele—80% of whom are female, rather than to attract a new type of customers.

Name brands and moderate price contemporary fashions have been added to attract the growing numbers of working women and to appeal to those women who buy menswear, children's wear and household goods at Penney's, but shop for their own clothing elsewhere.

- The Women's Fashion Program, which is geared to local trends and tastes, is now in 200 stores in 27 markets. An additional 200 stores are expected to join the program in 1979.

Last year marked the integration of the "This Is J.C. Penney" theme into all Penney advertising. The catch-all phrase reinforces the new fashion-conscious, contemporary image of the store. National campaigns, predominantly in network tv, continued to concentrate on value and price, as well as style.

Approximately 20% of Penney's 1978 ad budget went to fashion-oriented items. The Fox Shirt and Plain Pockets jeans continued to be featured in national television campaigns directed to young men.

National print campaigns backed Olympic shoes, Penney's line of sports footwear; stereo components; microwave ovens, and dishwashers. J.C. Penney, Celanese and Toni Silkwave shared the spotlight in a *Glamour* summer apparel ad, carrying "the Soft Life"

If Super Dennis can't wreck Super Denims, neither will your kids.

J. C. Penney continued its campaigns for Plain Pockets jeans, which are directed to young man.

as its theme line. *Co-Ed* readers were invited to a beauty makeover at J.C. Penney via a full-page color ad, supported by additional ads placed by participating cosmetics companies.

- Men's sportswear continued to be the single most heavily advertised product area, with $10,521,500 spent in measured media in 1978, almost double the 1977 figure of $6,392,400. The battery was again the most heavily advertised single product, backed by $7,025,100 in measured media.

Of Penney's $54,644,200 in measured media, $29,674,300, or about 53% of the entire measured budget, went to network tv. The allocations: $7,863,200 for men's sportswear, $5,776,700 for batteries, $2,900,800 for women's apparel, $3,330,700 for home entertainment and $272,000 for family shoes. An additional $2,031,900 was spent on spot tv advertising for miscellaneous items.

PepsiCo Inc.

	1978	1977
Sales	$4,300,006,000	$3,649,291,000
Earnings ...	225,769,000	196,741,000
Advertising*	156,000,000	124,000,000

***Estimated by AA**

PepsiCo Inc., Purchase, N.Y., the 16th largest national advertiser, increased U.S. advertising about 26% in 1978 to an estimated $156,000,000.

PepsiCo's earnings rose 15% in 1978, to $225,769,000 from $196,741,000 in 1977. Sales for 1978 were $4.3 billion, topping the $4 billion mark for the first time and up 18% from $3.65 billion in 1977.

Pepsi-Cola, the country's second most popular cola and climbing, is the heart of this company's operations, which also include snack foods, sporting goods, food services and transportation.

With franchises added in Brunei, Liberia and Somalia, Pepsi-Cola is now available in 142 nations and territories outside the U.S. PepsiCo will be expanding its Pepsi-Cola plants in the Soviet Union from five to 10 as the result of an exchange agreement tied to increased sales of Russian Stolichnaya vodka in the U.S. Pepsi is the U.S. distributor of the vodka.

- Pepsi-Cola, which has an 18% share of the U.S. soft-drink market, compared with its archrival Coca-Cola's 25%, boosted its 1978 measured media spending for its cola to more than $33,000,000 from $24,410,000 in 1977. The bulk of this outlay was in network and spot television.

Other media spending was linked to tie-ins in an attempt to lure the youth market by promoting the show "Beatlemania," the movie "Grease" and a tv special starring Fleetwood Mac.

Under slight pressure from the National Advertising Division of the Council of Better Business Bureaus, Pepsi-Cola again agreed to revise its Pepsi "challenge" advertising. The revised ads were to state that "more people prefer Pepsi over Coca-Cola" instead of implying that those who preferred Pepsi were inveterate Coke drinkers newly swayed to the delights of Pepsi. The commercials have sparked some heated discussions on comparative advertising.

The Pepsi challenge spot is running in about 22% of the country.

- New to the corporate family of soft drinks in 1978, which also includes Diet Pepsi, Mountain Dew, Teem, Pepsi Light and On-Tap, was Aspen, an apple-flavored, low in carbonation soft drink. Aspen is designed to challenge lemon/lime as the leading noncola flavor.

The tv commercials for Aspen, which were created by Ogilvy & Mather, feature actor Patrick Wayne and former Miss USA Debbie Shelton with the theme "The new soft drink with just a snap of apple." Aspen was supported with $1,000,000 in media placement when it was test marketed in Los Angeles in mid-1978. A record $2,000,000 marketing campaign was behind Aspen when it was launched in Philadelphia earlier this year.

The Aspen introduction in Philadelphia was coordinated by J.M. Korn & Son, the Philadelphia-based advertising agency for local Pepsi bottlers.

While the company's "Have a Pepsi day" campaign went into its third year in 1978, there were agency changes for some of its other soft drinks. Pepsi rewarded its main agency, BBDO, with another piece of business, Pepsi Light, and added J. Walter Thompson Co. to the roster to handle Aspen, Teem and On-Tap.

Pepsi Light and Teem were previously at Scali, McCabe, Sloves, while Aspen and On-Tap were at Ogilvy & Mather. The brands were moved after Ogilvy took on the $14,000,000 Royal Crown assignment.

Billings on Pepsi Light are estimated at $4,000,000 as the company prepares to reintroduce the brand without sugar this year. Since its debut four years ago, the brand has been a reduced calorie but not a sugar-free entry. All of the brands assigned to JWT are either in test or in limited distribution.

As for BBDO, Pepsi wanted to reward the agency for what it called an excellent job without overloading the shop. BBDO already handles Pepsi, Diet Pepsi and Mountain Dew. Copy strategy for all the brands was to remain the same but new executions were to be created.

Pepsi was believed to be upset about having to remove Teem from Scali, McCabe since the brand, although still in limited distribution, has become the fastest growing soft drink in the U.S., according to Pepsi figures presented to bottlers at a convention in September 1978. The brand is promoted as "for the worst thirst." Scali had the brand

EYES WEST
...BIG APPLE

Keep your eyes on Bergen, the only New Jersey county in the New York SMSA. Its median household Effective Buying Income (EBI) is highest in the entire New York SMSA, and tops Nassau and Fairfield too!
Of course, The Record is the apple of Bergen's eye! It has more circulation in Bergen County — daily or Sunday — than all the New York City and Newark newspapers combined. And The Record's upscale readers have the highest median household income of readers of any major big apple newspaper — including The New York Times! For more information, phone (201) 646-4214.

BERGEN

since September, 1976.

PepsiCo's second most important category is snack foods marketed by Frito-Lay, which PepsiCo acquired in 1975.

Frito-Lay had record sales of more than $1 billion in 1978 and it was also the most successful year in Frito-Lay's history in terms of both volume and income.

Distribution of the new Fantastix snack was expanded, with introduction of the product into Chicago and Indiana in November, 1978. The company cautioned, however, that the expansion did not represent the start of a national rollout. Fantastix, a crunchy, french fry shaped snack, was backed by $428,100 in measured media spending, all of it in network and spot tv.

Doritos tortilla chips was the company's most heavily advertised snack product with $10,642,300 in media spending. Lays potato chips, the market leader, had an ad budget of $465,100.

■ In June 1978, PepsiCo widened its participation in the growing food service industry with the acquisition of Taco Bell, a major chain of Mexican food restaurants in the U.S. With the Pizza Hut merger in November 1977, PepsiCo now has a strong position in two of the fastest growing sectors of the food service industry.

The Pizza Hut system added 488 new restaurants in 1978, for a total of 3,710. Plans call for adding 400 more this year. Company-operated units rose by 297 to 1,958. Ad spending for Pizza Hut in 1978 rose to $13,517,600 from $9,060,000 in 1977. Despite the increase in advertising and the addition of new units, Pizza Hut's operating profit fell to $64,100,000 in 1978 from $73,600,000 in 1977.

PepsiCo attributed the earnings decline to "stiff competition and customer resistance to price increases." The company's Taco Bell restaurants were supported by $4,292,700 in ad spending. Taco Bell's current ad theme, "The Fresh Food Place," capitalizes on its use of fresh food products to prepare each menu item as ordered.

There is a possibility, though, that PepsiCo's acquisition of Taco Bell could backfire on the company's main product, Pepsi-Cola. According to reports circulating among fast-food people in California, the Coca-Cola sales force in the West is pointing out to Pizza Hut and Taco Bell competitors that if they serve Pepsi they're helping PepsiCo.

■ The Wilson Sporting Goods Co. subsidiary suffered another decline in earnings in 1978 with a loss of $7,500,000. Profits in 1977 were $16,400,000, down from $26,500,000 in 1976. Again in 1978, the company attributed the earnings decline to "the continued imbalance of supply and demand in the industry."

Golf sales were particularly soft in 1978, although the company's golf clubs were supported by $1,195,600 in ad spending, the most for any Wilson product. The company contended, though, that "Wilson's strong name and position . . . indicate a potential for favorable results when the sporting goods business does improve."

On the transportation front, which includes NorthAmerican Van Lines and Lee Way Motor Freight, profits increased 14% to $29,300,000 in 1978 from $25,600,000 in 1977. NorthAmerican Van Lines was able to respond to an increase in housing starts, appliance sales and office and home relocations, the company said.

They taste as good
as they crunch.

PepsiCo's Frito-Lay snack foods unit is its second most important category. Doritos chips is its most heavily advertised product, receiving over $10,000,000 last year.

Pfizer Inc.

	1978	1977
Sales	$1,042,100,000	$945,700,000
Operating income	133,400,000	114,200,000
Advertising	38,424,300	37,500,000
U.S. figures		

Pfizer Inc., New York, the 80th largest national advertiser, inched its domestic advertising expenditures up 2% to an estimated $38,424,000 in 1978.

■ Pfizer achieved record sales and earnings in 1978. Worldwide sales climbed 16% to $2,362,100,000 as earnings rose 18% to $206,300,000. In the first half of 1979, Pfizer registered worldwide sales of $1,381,300,000 and earnings of $147,700,000, both up 15% over the same period of 1978.

Pfizer segments its operations into five categories, the largest of which, health care products, contributed 50% of Pfizer's over-all sales last year while accounting for 73% of operating profits.

Most segments reported strong volume gains: Health care, up 18%; materials science, up 16%; agricultural, up 21%; speciality chemicals, up 14%, and consumer products, up 3%.

■ The consumer division, which receives the bulk of Pfizer's measured media spending, markets Coty fragrances, and through its Leeming/Pacquin division, Ben-Gay analgesics, Visine eye drops, Desitin baby care products and House in Bloom plant care products.

U.S. sales were level with last year, while abroad the increase was 8%. Worldwide sales in 1978 were $233,900,000, 10% of total Pfizer volume. Operating profits fell 6% to $13,000,000. The decline is attributed to costs associated with a restructuring of a number of Coty International businesses from direct organizations to distributorships.

With the exception of House in Bloom products, the three other large volume Leeming/Pacquin products strengthened their market positions.

Media spending for House in Bloom products was $1,308,000, up from $1,000,000. Desitin medicated lotion received $1,628,000, also up from last year. Ben Analgesique Ointment received $4,312,000 of the nearly $5,000,000 spent on the four-product Ben-Gay line, and devoted its portion primarily to television. Similarly, Visine eye drops alloted its $5,000,000 to television, with heavy money to network.

■ Leeming/Pacquin brought out two new products in 1978: Rheaban, an antidiarrheal, and Nytilax, a nighttime laxative. Both products are sold over-the-counter. Nytilax was boosted with $341,000 in ad spending, all in magazines, while Rheaban received $375,000.

McCaffrey & McCall, New York, handled these two introductions, as well as the rest of the Leeming/Pacquin line.

Sales in Coty's major product category—women's fragrances—increased in 1978, with Smitty and Wild Musk recording sales gains of over 20%. Coty products are sold primarily through major drug chains and the large mass-merchandisers.

According to Leading National Advertisers, Coty's measured media spending was around $9,000,000. Major Coty ad budgets: Emerade perfume, $2,056,700; Nuance perfume, $1,879,300; Masumi perfume, $924,600; Smitty perfume, $1,893,300, and Coty make-up, $364,200.

Coty's new prestige fragrance, Complice de Francoise Coty perfume, available only in department stores, is now sold nationally. In 1978, it was promoted with $133,000 in media spending. The agency for the Coty division is Martin Landey, Arlow Advertising, New York.

■ Pfizer put an estimated $15,500,000 into unmeasured media last year, primarily for the health care division. This segment posted 1978 worldwide sales of $1,192,000,000, up 18% from 1977, and an operating profit of $276,500,000, up 16%.

Promotional efforts of Pfizer's health care products assume various forms, foremost among which is the detail sales force which acquaints doctors and pharmacists with Pfizer's product line.

Another increasingly important form of promotion is various educational programs intended to be a part of the continuing programs physicians are required to complete in order to renew their licenses. Monographs, symposia, and films are examples.

In recent years, Pfizer has sponsored monographs on Minipress, an antihypertensive, and Vibramycin, their highly successful, broad spectrum antibiotic.

Early last year, Pfizer underwrote the cost of a "Course on Clinical Depression," a broadcast that appeared on more than 80 commercial tv stations in 35 states. The course was promoted to general practitioners, and appeared from 6:30 to 8 A.M., depending upon the market.

Such educational programs may consume as much as 20% of promotional budgets for drugs, a substantial increase from the near past.

■ Pfizer reports that sales of cardiovascular medicines increased 57% to $58,000,000. This increase was fueled by Minipress, their antihypertensive that lowers blood pressure without many of the uncomfortable side effects of earlier agents.

Minipress has been introduced in 34 countries, including nine in 1978, among which were West Germany and Austria. In many of these countries it is the fastest growing anithypertensive agent. Over the next two years, Minipress will be introduced to Belgium, Italy, France, Spain and Japan.

Sales of Vibramycin, Pfizer's major antibiotic product, increased by 25%, as the product continues to be the best selling oral antibiotic in international markets.

Pfizer will gradually be introducing into world markets the first product in a new family of anti-arthritis drugs, to be marketed under the trade name of Feldene.

Pfizer, along with other drug companies, faces a marketing challenge with the advent of the Maximum Allowable Cost and substitution programs that seek to make price the only competitive factor for drug products once they become available from several sources. Pfizer argues that this program allows new producers to borrow on knowledge procured through the developer's research, and serves to discourage the gathering of further information on the drug once it has come into circulation.

■ Pfizer increased its research and development budget by 15% to $113,100,000 in 1978, and plans to spend upwards of $130,000,000 in 1979. The largest portion is directed to a search for new prescription drugs; money was also earmarked for research into the animal health area.

In July, 1978, Pfizer officially opened the chemical division's new Technical Service Center in Groton, Conn., to funnel discoveries in the research labs into the marketplace, and to develop new commercial applications for existing products.

Pfizer acquired Shiley Inc., Irvine, Cal., a manufacturer of artificial heart valves and other health care products, in March, 1979.

Pfizer's Roland M. Hendrickson, president of the agricultural division, was named "marketing man of the year" in May, 1978, by the National Agri-Marketing Association, for his doubling of sales, to more than $100,000,000, in less than five years.

Pfizer Laboratories' Vibramycin tied for first place in the first annual *Medical World News* 1978 Triangle Award competition for the best two-page four-color ad. Klemtner Advertising, New York, handles the account.

Pillsbury Co.

	1978	1977
Sales†	$2,165,983,000	$1,704,904,000
Earnings†	83,471,000	71,334,000
Advertising*	104,000,000	85,800,000

†Fiscal years ended May 31, 1978, and 1977
***Estimated by AA**

Pillsbury Co., Minneapolis, the 38th largest national advertiser, hiked its advertising spending in 1978 to an estimated $104,000,000, up 21% over the $85,800,000 of the previous year. Almost half of the total ad spending went toward the company's Burger King fast-food hamburger chain.

Sales and earnings also were up considerably from 1977 levels. Sales totaled $2.17 billion, up from the 1977 figure of $1.7 billion. Earnings increased from $71,334,000 in 1977 to $83,471,000 in 1978.

One of Pillsbury's most important moves of the year—and perhaps of the decade—was to acquire Green Giant Co. late in 1978. Pillsbury paid $148,000,000 in cash and stock to acquire the company, which markets canned and frozen vegetables, entrees and side dishes.

Thomas Wyman, the Green Giant Co. president credited with turning the company around in recent years, accepted a post with Pillsbury as vice-chairman. He will supervise all of Pillsbury's consumer products operations.

- Pillsbury has made other efforts to diversify, including acquisition of Speas Co. and American Beauty Macaroni Co. in mid-1978.

Speas, which markets apple juice, cider and vinegar primarily in Midwestern markets, is moving its line national since the Pillsbury acquisition. Before Pillsbury bought it, Speas held about a 15% market share in those areas in which it was distributed.

The performance of Pillsbury's grocery products was not as encouraging as the activities in other businesses. The grocery products, which include baking mixes, pancake mixes, flour and frostings, yielded lower profits than the previous year. Loss from Hungry Jack pancake mix helped pull down profits as the product dropped four points in market share to 21%.

Pillsbury Plus cake mixes, which feature a pudding-base, did well in 1978 despite competition from other manufacturers with similar pudding-base mixes.

No-Bakes, a convenience pie mix that requires no baking, maintained its No. 1 status in the relatively unexplored no-bake pie field with a 42% market share.

- Pillsbury BEST consumer flour remained in its No. 2 spot behind General Mill's Gold Medal flour. BEST had a 19% market share of the $330,000,000 consumer flour market. Pillsbury's line of refrigerated doughs and biscuits continued to hold its No. 1 position in that market.

Refrigerated cookie dough received the highest measured ad spending in the grocery products division with a 1978 total of $3,332,900. Ad spending for refrigerated pastries was $2,007,000 and refrigerated roll dough received $2,267,700.

The performance of Burger King Restaurants, the nation's No. 2 hamburger chain, paced the Pillsbury resturant group. Burger King's sales, along with sales from Steak and Ale Restaurants and Poppin Fresh Pies, accounted for 36% of the company's 1978 sales. A record 297 Burger King Restaurants opened in 1978.

Although Burger King's sales didn't meet expectations in some quarters during the past two years, the addition of the Magical Burger King has apparently helped revive sales. Pillsbury plans to open a record 385 new restaurants this year.

Ad spending for the Burger King chain increased 26% in 1978 and is expected to stabilize or rise slightly in 1979. Pillsbury has also launched a program for its 2,153 franchises. Operation Grand Slam is intended to "upgrade operations and increase sales per store."

It involves introducing improved products and upgrading the appearance and service of each restaurant. In another marketing advance, Burger King is currently rolling national with a steak sandwich.

In the frozen foods-operation, Pillsbury's Totino's and Fox Deluxe pizzas grew in sales and market share. The two have about a 21% market share in the $500,000,000 industry, although the company said distribution for the two brands covers only about two-thirds of the nation.

The 1978

MARKETING PROFILES

Two Pillsbury products rolled national during 1978. Wheat Nuts, a wheat germ and soybean oil snack, went into national distribution in August in an effort to crack the $350,000,000 salted nut market.

Hungry Jack Pan Shakes, a complete refrigerated pancake mix packaged in small milk carton-like containers, also rolled national.

Polaroid Corp.

	1978	1977
Sales	$1,376,590,000	$1,061,945,000
Earnings ...	118,416,000	92,284,000
Advertising	52,752,500	38,864,000

Polaroid Corp., Cambridge, Mass., the 71st largest advertiser, increased U.S. advertising to $52,752,500 in 1978, up 36% from $38,864,000 in 1977.

Consolidated worldwide income rose 30% to $1,376,590,000 in 1978 from $1,061,945,000 in 1977. Earnings increased 28% to $118,416,000. Sales of the OneStep instant cameras and record sales of SX-70 film were again responsible for the sales gain, the company said.

Sales in the U.S. increased 27% to $817,400,000 in 1978. The company reported a 24% increase in nonmanufacturing expenses due primarily to higher marketing expenses. About 98% of Polaroid's U.S. sales were in photo products, with the remainder in sunglasses.

More than 9,000,000 Polaroid Land cameras were sold in 1978, by far the largest yearly total in the company's history. Instant film sales exceeded 200,000,000 packs, also a record, according to the company. Polaroid is believed to have some 65% of the instant camera market with two of every three instant cameras sold in the U.S. in 1978 being Polaroid. According to the Wolfman Report, the U.S. photographic market is estimated at $10,672,000,000.

- Polaroid factories produced 3,000,000 more cameras than in 1977 and worldwide shipments of SX-70 instant camera film increased 75% in 1978.

Retail sales of instant cameras increased 22% over 1977, according to an independent retail auditing service. Instant cameras now account for 41% of all amateur still camera sales in U.S., compared with less than 25% in 1975.

Polaroid's 1978 measured media spending was $40,752,500, up from $28,835,500 in 1977. Polaroid cameras received $2,412,500. The OneStep camera got an additional $15,772,900. Measured media spending for cameras plus film totaled $2,645,600, while film alone received $239,300.

OneStep became the best-selling camera in Polaroid's history in 1977 and continued as No. 1 in 1978. The fixed focus camera, which uses SX-70 film, is positioned against Kodak's Handle.

- Polavision, an instant movie system including hand-held camera, compact table-top player which plays back color images in seconds and 2½-minute Phototape cassettes, was given the biggest launch of any product in Polaroid's history when it rolled national last year.

During April, 1978, some $5,000,000 was spent via tv spots featuring actor Tony Roberts as spokesman with print ad support. Altschiller, Reitzfeld & Jackson received a creative assignment for Polavision. Danny Kaye later became spokesperson for the line.

However, the system reportedly did not sell as well as expected, with 100,000 units built and only 50,000 sold. Problems cited were low consumer recognition, high cassette cost and technological gains in videotape and video disc equipment.

SX-70 Sonar OneStep and Pronto Sonar OneStep went on sale in the U.S. last August. Inaudible sound waves are emitted from the camera and bounce off the subject, the echo returning to camera to focus the lens in fraction of a second. Actress Liv Ullmann became the first tv spokesperson for it.

Actor James Garner, who was named AA's Star Presenter of the Year (AA, July 30), starred in tv spots for the Pronto! and now OneStep camera line with Mariette Hartley.

- Polaroid also began its first network tv support this year for SX-70 instant film packs, which produce clearly developed pictures within one minute instead of four. A new experimental stereophonic sound system for Polavision was unveiled in April.

Still pending is a suit Polaroid filed charging Kodak with infringing 10 of its U.S. patents for instant cameras and film. The suit seeks injunctive relief and treble damages plus costs and other relief.

Kodak has joined issue, seeking a declaratory judgment that some Polaroid patents are invalid and not infringed, and that each of the company's patents relating to instant photography is unenforceable.

Over a million bacteria bombard his teeth with cavity-causing acid every day. Can you rely on just any toothpaste?
Colgate helps stop cavities before they start.
Colgate

Colgate-Palmolive spent $15,000,000 in measured media to maintain its No. 2 slot in the dentifrice market.

A suit that Polaroid filed against Berkey Photo, charging patent infringement and the countersuit from Berkey charging that Polaroid attempted to monopolize self-developing photographic products was settled out of court. Berkey agreed to stop selling and manufacturing The Wizard which used SX-70 film and Polaroid dropped its suit.

Polaroid co-sponsored Perry Como's "Easter by the Sea" special in 1978 as well as the CBS movie "First You Cry" and "Kennedy Center Honors: A Celebration of Performing Arts."

Procter & Gamble Co.

	1978	1977
Sales+	$9,329,306,000	$8,099,687,000
Earnings+ .	577,331,000	511,668,000
Advertising*	554,000,000	460,000,000

+Fiscal year ended June 30, 1979, and 1978
*AA estimate for calendar year

Procter & Gamble Co., Cincinnati, the perennial No. 1 national advertiser, is estimated by AA to have increased its 1978 advertising and sales promotion investment by just over 20%, to a record $554,000,000—the first time a company has spent over half a billion dollars on national advertising.

The increase reflects P&G's heavy commitment to new products; six new items achieved national distribution during '78 or early '79, and nine were put in expanded or test markets. Several of these brands represent first time category entry for the company. The 15 items cited do not include formulation changes on established brands, which sometimes receive major introductory support.

In the fiscal year ended June 30, 1979, record net sales hit $9.33 billion. Earnings increased for the 26th consecutive year, to $577,331,000.

- As the nation's largest advertiser, the company also is the top spender in both network and spot tv. Last year, P&G increased tv expenditures to $421,020,200—over 90% of its measured media expenditures—according to Leading National Advertisers. Tv spending in 1977 was $350,000,000.

Other media statistics: P&G's magazine spending went up over $12,000,000; newspaper spending increased almost $3,000,000.

P&G is probably the largest user of sampling, couponing, price-off, on-pack and other promotions. Its unmeasured media total includes estimated expenditures for these activities, and rose to almost $90,000,000 last year, an 8% jump. Also included is business press spending; P&G is the No. 1 advertiser in food service industry publications, for example.

But it is on television that P&G—known as the king of soap operas—reigns supreme. The company, through its P&G Productions unit, owns, produces and sponsors five durable soapers, considered ideal vehicles for its household cleaning, food and personal care products. They are: "Search for Tomorrow," "As the World Turns," "Guiding Light," "Edge of Night" and "Another World."

- The company has been turning its programing attentions to prime time fare, as the trend toward more working women and working mothers continues. Obviously buoyed by the success of the "Jesus of Nazareth" tv special, which it fully sponsored, the company agreed to sponsor and co-produce (with the Italian partners responsible for "Jesus") "The Adventures of Marco Polo," to be a tv miniseries.

The company also began plans for production on "The Days of Peter and Paul," which reportedly will be released abroad to theaters following its U.S. tv airing.

During the past year, a number of tv movies and specials were solely sponsored by P&G, many of them produced or co-produced by the soap maker. More are in the works.

Early this year, P&G made a dramatic return to prime time series production, with the news that it would underwrite a weekly series starring Shirley Jones. In short order, the show—called "Shirley"—won a spot in NBC-TV's fall lineup. Reports are that P&G has another possible dramatic series in the proposal stage.

- Other company tv ventures attracted attention during the past year. P&G has been experimenting with odd-form commercials, such as 45/45 spots in a 90-second slot or 45/15 in a 60-second slot, on its own daytime shows for some time. But broadcasters became alarmed when the 45-second form surfaced in other spots.

In some cases, the company asked the local station to cut in on a 60-second network slot with a P&G 45, filling out the time by inserting a 15-second public service announcement.

NBC-TV put out the word to its affiliates putting a stop to that practice, and shortly afterward P&G said its test of 45/15 had ended. But the company appears to have convinced stations that 45/45 units were not a "stalking horse" for 15-second spots, and many stations across the country are now accepting that 90-second buy.

- P&G is the innovator in segmenting a market and building new brands within it. While some company brands compete with one another, P&G mostly strives to push each into leadership in its own particular segment.

The company has 52 established consumer products (excluding expanding brands) receiving major advertising support, plus hundreds of institutional products, most of which also get heavy ad and promotion backing within their specialized fields.

Last year, according to the figures compiled by Leading National Advertisers, P&G spent about $74,630,200 for 10 laundry detergents plus Biz detergent booster. For its four dishwashing detergents, it spent $42,361,200, and $37,582,400 was put into media advertising for six bar soaps.

Other broad categories and total measured spending: Household cleaning products, $26,448,500; paper products, $54,319,100; food products (including coffee), $93,958,600, and personal care products, $95,522,100.

- The food products area stands out, because that nearly $94,000,000 is up from about $59,000,000 last year. The primary reason: Folger's coffee (all forms) received $31,351,800 in media support in '78, up from $12,800,000 the year before. (The figures exclude High Point, P&G's decaffeinated coffee line in test markets.)

Excluding the Folger's brand, Crest toothpaste still holds the top spot in P&G's brand stable, with ad support last year of $23,055,700. Crest's spending was down to $19,300,000 the year before, after having been around $23,000,000 in 1976.

Next highest was Pampers disposable diapers, with $18,636,000, followed by Downy fabric softener at $17,519,100. Tide received $16,475,400 and Cheer, $14,974,000.

Other brands with over $10,000,000 in advertising were: Bounce fabric softener, $13,324,300; Bounty towels, $11,293,100; Cascade, $10,349,300; Era detergent, $10,475,900; Ivory Liquid, $13,575,300; Pringle's potato chips, $12,982,700; Scope mouthwash, $11,332,300; Folger's regular, $11,820,400, and Folger's Flaked, $13,098,800.

Combining the spending on the various forms of Sure antiperspirant, Secret antiperspirant and Duncan Hines cake mixes gives each more than $10,000,000 as well.

Duncan Hines cake mixes received $15,772,000, a figure that includes the new Pudding Recipe line. Both Sure and Secret (sprays, roll-ons and sticks) were supported with just over $12,000,000 each.

- In addition to its consumer products, P&G markets an extensive line of items for commercial and industrial use, which primarily are related to its consumer lines through technology and research. These include fat and oil derivatives, edible oils, chemical specialties and cellulose pulps, as well as industrial soaps, detergents and waxes.

P&G also has begun marketing both pharmaceuticals and paper products to the health care field. Its prescription drug products are Osteoscan, an injected drug used to facilitate radiological diagnosis of bone disease; Didronel, a tablet for symptoms of Paget's disease of the bone, and Topicycline, a topical antibiotic for the treatment of acne. Other products are expected from the technology associated with these drugs.

Its paper products are in the fast-growing medical disposables market. Boundary, a line of surgical drapes and gowns, is now available in much of the country, excluding the Northeast. This nonwoven fabric is expected to find its way into other new products also. Attends is a disposable brief for incontinent patients, now in test market. Attends also is being tested for direct marketing to the consumer.

A number of other developments are in the works in the health care area. The company has been exploring various forms of contraceptives, and is far along on a cholesterol control drug called sucrose polyester. It is said to effectively eliminate the portion of cholesterol that purportedly contributes to heart disease, as well as having dietary uses relative to weight control. New drug approvals, however, have not been issued in these areas as yet.

■ Of P&G's established paper products, only Charmin and Pampers are available nationally, although Bounty paper towels has slowly but surely made its way into 97% of the country. White Cloud toilet tissue also has expanded, to about 86% of the nation; Puffs facial tissues is in about 50%.

Charmin holds an estimated 22% share of the $1.2 billion bath tissue business; White Cloud has over an 8% share. Scott Paper Co., with several brands, has 20%; American Can's Northern tissue has about 7%.

About 4% of Scott's total share belongs to Cottonelle, a new brand being slowly expanded into broad distribution. Cottonelle is said to have done well in its established (initial) Midwest markets, with over a 13% share. But P&G has another entry in the wings (test markets)—Certain, which is coated with a cleansing lotion.

In the disposable diaper business, the company appears to be strengthening its leadership role. Pampers, which created the market, has dropped from its peak share, but holds a strong 63%. Johnson's has begun to slip since achieving national distribution about a year ago.

As Johnson's and Pampers have declined with the entrance of new brands (Kimberly-Clark's Kleenex Super Dry and Huggies), P&G has started market expansion of its Luvs panty-style diapers.

■ Luvs, a premium-priced product, had tested in Columbus, O., and St. Louis for over two years, and this year was introduced in the major New York/Philadelphia metro region. This summer it was expanded into Boston. Luvs is battling Huggies (also elastic legs) in those areas.

Its growing share—now 3%—is helping maintain P&G's traditional share of the market. Pampers and Luvs combined are approaching a 70% share. Reports are that, in Luvs' established markets, the combined share is about 75% to 80%.

Procter also started major market expansion of Rely tampons in 1978. The company's first entry in the feminine hygiene market, Rely is now sold in the entire western portion of the U.S., and is expected to be national by early next year.

In 1978, measured media spending was about $3,000,000, but the figure represents marketing in only a handful of cities. Major territory expansion did not come until 1979. In addition to media (including a significant radio campaign), P&G is spending big for sampling and couponing on Rely.

■ Although Rely's share of the $300,000,000 tampon market is not sigificant as yet on a national basis, sources say it is "averaging" around 20% in its established markets.

Nationally, Tampax leads with about 45%, Playtex is second with between 35% and 40%, Kotex holds about 10% and Johnson & Johnson's o.b. has just under 10%. J&J also is testing a new tampon called Assure, and P&G has filed a trademark infringement suit over the name.

The company has been active in shoring up its laundry detergent business. P&G, with a 50%-plus share of the $1.6 billion market, has pumped new life into several of its top brands.

The No. 1 heavy-duty detergent, Tide, was relaunched late last year as Extra-Action Tide. The product was reformulated with P&G's recently discovered builder, aluminosilicate. Market tests have been going on in Texas for several years; but in the tests, no mention was made of the formula change (except for ingredient listing).

The new builder works especially well on particulate soils, the most common washday soil—thus the ad theme, "Get the best detergent on American soil." The new formula also works best in conjunction with phosphates, however, so the new Tide is not available in areas where phosphates are banned.

■ Behind Tide's 25% share is P&G's Cheer, with about 9% of the market. The product is in a close race with Lever Bros.' Wisk, so it too was given a boost via formula change. The company last year introduced a new "wrinkle-reducing" attribute for Cheer, and put about $15,000,000 in ad spending behind the brand.

In the $350,000,000 liquid segment, Wisk's 9% share leads and P&G follows with Era, at about 4.5%. It will face new competition as Colgate and MortonNorwich's Texize each expand into new markets with combination liquid detergent/fabric softener brands. P&G's Bold powder is being expanded as a combination detergent/fabric softener under the name Bold 3. It is not yet national, but is in significantly greater distribution (70% of U.S.) than either Texize's Yes or Colgate's Carefree.

In regular fabric softeners, P&G continues to lead with an estimated 54% share. That is a combination of No. 1 Downy, at 33%, and No. 2 Bounce, at about 21%. The company leads in automatic dishwashing detergents, with about 47% for its Cascade; in liquid dishwashing detergents, it leads with Dawn, Joy and Ivory Liquid. Dawn leads with 16%.

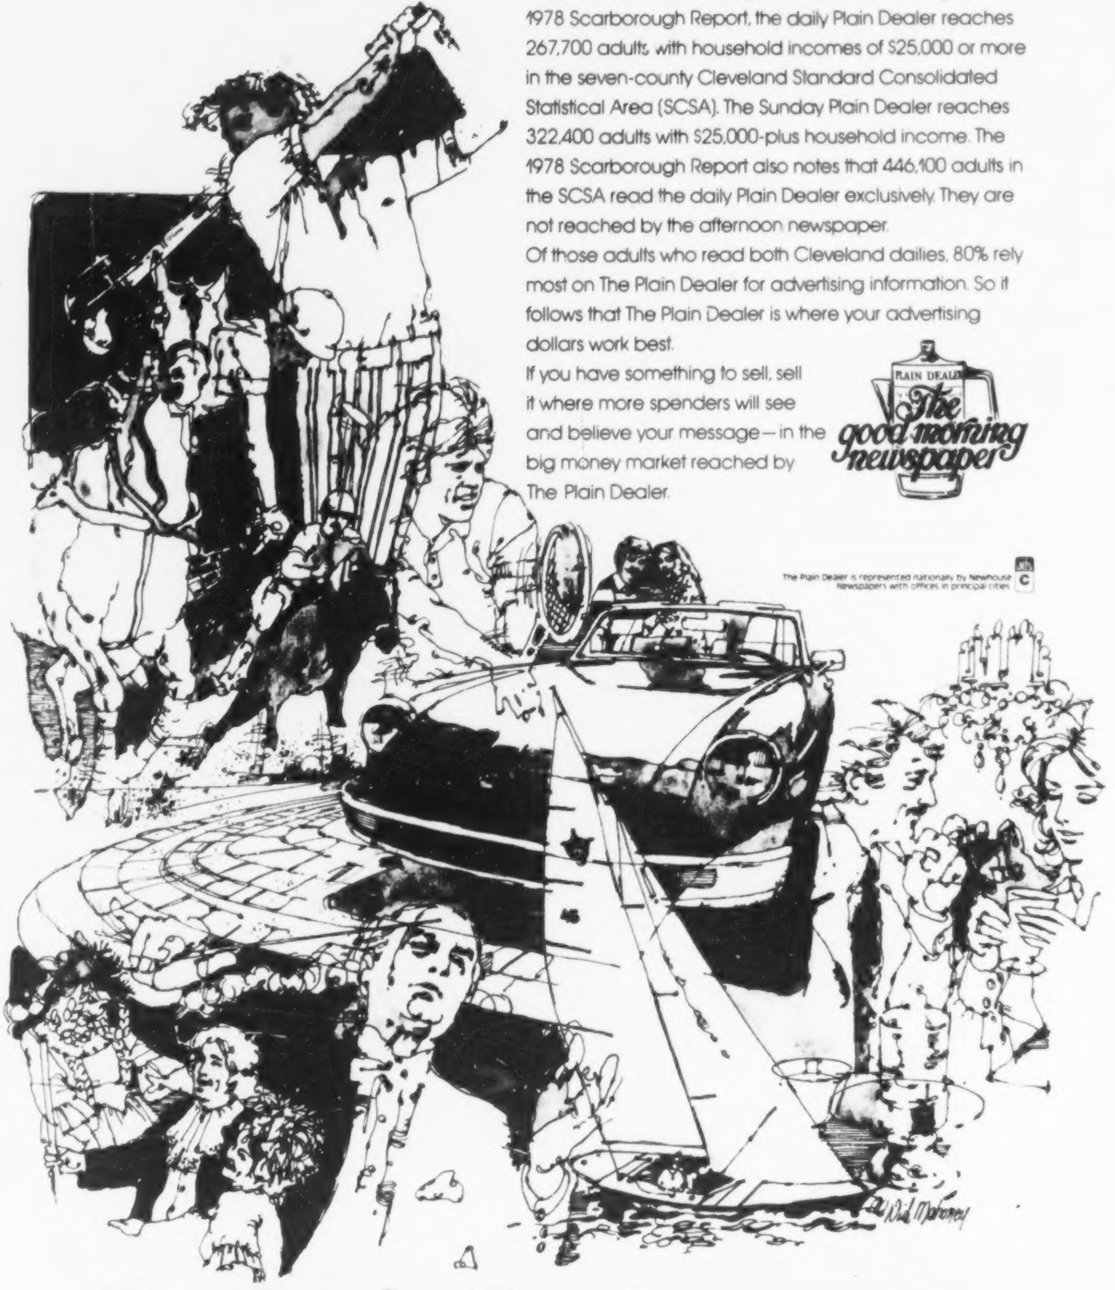
■ In bar soaps, P&G this year is celebrating the 100th anniversary of Ivory, which has led the market for 99 of its 100 years, the company says. For the remainder of 1979, Ivory advertising will feature that history and "thank" consumers for keeping the brand floating on top. A consumer promotion is being conducted as well.

A more recent success story in that $600,000,000 market is Coast deodorant soap, which has grabbed the No. 4 spot behind Ivory, Armour's Dial and P&G's Zest.

P&G is believed to be holding onto its No. 1 position in the antiperspirant/deodorant market. Sure holds about 13%, sources report, with Secret at about 11%. Each has both spray and roll-on forms, with new stick versions now in test markets. The recent growth of Secret represents a significant turnaround, since it was losing share about three years ago.

■ The company has not been as successful of late in the $300,000,000-plus mouthwash market, or the $600,000,000 shampoo market.

In mouthwashes, P&G's Scope declined slightly to a 23% share, largely due to introduction of Warner-Lambert's Listermint and Lever's Signal. The newest entry, Signal, has been the biggest winner, and is said to have attained the No. 3 slot, with about 11%.



You have to make it to spend it. And according to the 1978 Scarborough Report, the daily Plain Dealer reaches 267,700 adults with household incomes of $25,000 or more in the seven-county Cleveland Standard Consolidated Statistical Area (SCSA). The Sunday Plain Dealer reaches 322,400 adults with $25,000-plus household income. The 1978 Scarborough Report also notes that 446,100 adults in the SCSA read the daily Plain Dealer exclusively. They are not reached by the afternoon newspaper.

Of those adults who read both Cleveland dailies, 80% rely most on The Plain Dealer for advertising information. So it follows that The Plain Dealer is where your advertising dollars work best.

If you have something to sell, sell it where more spenders will see and believe your message—in the big money market reached by The Plain Dealer.

The good morning newspaper

The Plain Dealer is represented nationally by Newhouse Newspapers with offices in principal cities.

The Plain Dealer reaches people who reach for the good life in everything they do.

MARKETING PROFILES

In shampoos, both Head & Shoulders (the market leader) and Prell have suffered slight share slippage in the growing category. Several new entries have taken some of the business—S. C. Johnson's Agree and Gillette's Ultra Max—but a few established brands have shown good growth (Revlon's Flex and Helene Curtis' Suave).

To correct the situation, P&G went into two markets this year with new Pert shampoo, said to have a conditioning action. In its Wisconsin and Kentucky areas, Pert is aimed at the frequent shampooer, touting "gentle cleaning," pleasant fragrance and "light conditioning." Also, Head & Shoulders has been successfully positioned as a "gentle" shampoo, and a new version—with "new conditioning formula"—is in St. Louis test.

▪ In toothpaste, Crest continues to pace the field with about a 35% share; only Colgate comes close with 20%. P&G's other brand, Gleem, is being used as a defensive brand, and early this year got a new campaign stressing its breath freshening characteristic.

The effort apparently is designed to blunt the impact of Beecham's rollout of Aqua-fresh, which uses a similar breath freshening/cavity fighting pitch. Another reason for the campaign change is Colgate's new "clean mouth" effort.

Early this year, Procter achieved national distribution on Wondra, its new entry in the $200,000,000 hand and body lotion category. The product, called a "skin conditioning lotion," is doing battle with Chesebrough-Pond's Vaseline Intensive Care lotion.

A new version of VIC, carrying the benefits promised by Wondra, was rolled out in the late summer of 1978, and P&G apparently waited for that introductory program to subside before launching Wondra national. Wondra's national push started about March.

▪ Another major launch during 1978 was the rollout of Puritan cooking oil. Puritan, a low cholesterol entry made mostly from sunflower oil, achieved a share of from 15% to 20% in test marketing. The company's Crisco oil is currently No. 2 in the $725,000,000 business, behind Hunt-Wesson's Wesson oil. Wesson is now in the process of introducing its own sunflower-based oil, called Sunlite.

Among its other food products, P&G successfully launched a Duncan Hines Pudding Recipe line that significantly bolstered its leading position in the $300,000,000-plus category. Regular Duncan Hines cake mixes had lost some share previously because of Pillsbury's successful Pillsbury Plus line.

But, while General Mills revamped its entire line as a counter to that threat, P&G stuck with its regular line and launched Pudding Recipe as a flanker.

The strategy worked, sources report; Duncan Hines increased its share to about 38%, as General Mills' Betty Crocker SuperMoist dropped to about 30% (from 35%) and Pillsbury held at 20%.

▪ P&G also is testing two new dessert items. Duncan Hines cookie mixes are in several markets, and an entirely new product concept is in Dallas and Denver tests. Called Coldsnap, it is described as a freezer dessert maker, and a package is said to make "endless ice-creamy-tasting" frozen desserts.

Pringle's potato chips were reformulated as an "all-natural" product in mid-1978, and a third flavor was added to the repackaged line. The restaged Pringle's was then assigned to Wells, Ricn, Greene, from Tatham-Laird & Kudner.

The big story in the foods area for P&G, however, has been the national expansion of Folger's coffee. Early in 1978, P&G moved Folger's vacuum-packed coffee (long time leader in much of the U.S.) into the Northeast, the stronghold of General Foods' Maxwell House.

It expanded the newer Folger's Flaked entry at the same time, and almost automatically took the No. 1 spot in the $4 billion-plus national market (Folger's had trailed Maxwell House by only about three share points before the expansion).

Folger's over-all share is said to have reached 27% by the end of 1978, a record high. Maxwell House was put at about 23%. Both companies, however, have promised to spend heavily in the coffee battle. As noted, P&G's media expenditures for Folger's hit $31,351,800 in 1978, up from $12,800,000 the year before.

The company recently extended its Folger's instant into the Northeast corridor, and continues to test High Point decaffeinated coffee (not included in the above ad figures). High Point is expected to roll out later this year or in 1980.

In November, 1978, P&G named Charles C. Carroll, vp-advertising, as vp-toilet goods division. Robert V. Goldstein, project manager, experimental products, was named general ad manager, assuming Mr. Carroll's previous responsibilities.

PROCTER & GAMBLE

Procter & Gamble's Crest received $23,055,700 in ad spending last year, just above its 1976 level.

The company's sales increased to $1.7 billion during its fiscal 1978, up 9% from the previous year. Net income increased 9% to $73,600,000. For the first nine months of Quaker's fiscal '79, sales were $1.5 billion, compared with $1.3 billion last year. Net income was $60,500,000, compared with $52,800,000 last year. (Net sales and income for the fiscal year 1979, ending June 30, will be released in late August.)

Quaker's diversified product line includes Quaker hot and ready-to-eat cereals, baking mixes and corn products; Aunt Jemima corn products, mixes, syrup and frozen foods; Celeste frozen pizza; Wolf Brand chili products; Burry cookies and crackers; Ken-L Ration dog foods; Puss 'n Boots cat foods; Fisher-Price toys; Needlecraft yarns and art needlework supplies, and a line of specialty furan chemicals.

Additionally, the company owns and operates Magic Pan Creperies and other specialty restaurants, and markets a wide range of human and pet foods internationally.

▪ For the fiscal year '78, approximately 44% of total sales were in U.S. grocery products, 24% in international grocery products, 16% in toys and crafts, 9% in institutional foods and restaurants, and 7% in chemicals.

During the last 12 months, several of Quaker's major brands continued market leadership in their respective categories. Quaker regular and instant oatmeals lead the hot cereal business with over a 50% share.

Most of the ad support goes for instant oatmeals, which received $3,200,000 in media spending last year. But regular Quaker Oats got a new ad campaign this past winter, an effort to reposition the line as more than a hot cereal. About $630,000 was spent in print ads, which positioned the product as a natural wholegrain ingredient and offered a free cookbook.

▪ In other breakfast products, Quaker pancake mixes lead that category with close to a 50% share, down somewhat from the year before because of the introduction of General Foods' Log Cabin pancake mix. Quaker instant grits continue to lead in its area, a market largely confined to the southern U.S.

In frozen breakfast products, Aunt Jemima frozen french toast and frozen pancake batter are No. 1 in small categories; Aunt Jemima frozen waffles is No. 2 in that category, behind Kellogg's Eggo brand.

Most heavily advertised of the above was the frozen pancake batter, with just over $600,000 in media exposure.

In the $2 billion ready-to-eat cereal market, Quaker continued as the No. 4 marketer, with just under a 9% share. Its top-selling line—presweetened Cap'n Crunch—lost some ground last year, but Life cereal continued its upward movement. A flavor extension, Cinnamon Life, was rolled national late in 1978. Both Life and Cap'n Crunch received about $5,400,000 in media advertising during the year.

▪ Puffed Wheat and Puffed Rice were virtually unadvertised, but Quaker is now introducing nationally a new entry called Corn Bran. Described as having "the benefit of bran . . . the great taste of corn," the product is expected to get significant media spending.

In its initial West Coast markets, over $500,000 in spot tv was used in the first three months of 1979. Quaker 100% Natural also got increased advertising last year—over $1,300,000 was put behind a campaign featuring Jim Fixx, author and runner. The brand was not advertised in 1977.

Another area getting increased attention at Quaker is the $600,000,000 frozen pizza business. The company's Celeste brand holds about a 12% share of market, approximately fourth behind leader Totino's (Pillsbury), then Jeno's and Tony's.

Quaker boosted spending for the line, with over $3,000,000 in '78, up from $1,800,000 the year before. The thick-crust Sicilian style pizzas were rolled national following regional tests, and recently a Chicago style pizza-in-the-pan line moved into test markets.

▪ Quaker's four-item line of cookie mixes are said to hold the No. 2 spot in that $70,000,000 market, behind General Mills' Big Batch. Ad spending dropped sharply last year, to $485,700 from over $2,000,000 in '77.

Announcing the Quaker 100% Run
Lincoln Park (South Edge), Sunday, October 29, 9:00 A.M.
Run 10,000 meters with Jim Fixx, author of The Complete Book of Running.
ENTRY FORM

One Quaker Oats Co. promotion capitalized on the jogging craze and featured Dr. James Fixx, who wrote a popular book on the sport.

Marketing priority at the company continues to be pet foods, where Ken-L Ration Tender Chunks has been a significant success in the $1 billion dry dog food segment. Last fall, the company launched a beef and liver flavor flanker and a new advertising campaign featuring actor James Whitmore. Media spending was about $10,000,000 in 1978, but an equal amount reportedly was spent on promotion. Tender Chunks reportedly now holds over 10% of the dry dog food market.

In the $300,000,000 semi-moist category, Ken-L Ration burgers have declined in sales, but held a slight lead in market share over General Foods' Top Choice, which has been growing rapidly. GF's Gainesburgers have dropped to No. 3. The burger line was supported by about $1,500,000 in advertising last year, with Ken-L Ration Special Cuts receiving close to $1,000,000.

▪ Quaker's second largest advertiser behind Ken-L Ration is Fisher-Price toys. The division's sales for fiscal '78 were $230,300,000, up 18% from the year before, and ad spending increased to almost $8,000,000, up from about $6,500,000 in '77.

Fisher-Price introduced more than 40 new toys at the Toy Fair in New York early this year. Prominent among them were the Muppets' Miss Piggy doll, the Fisher-Price phonograph, Woodsey's Log House and the Hook and Ladder fire truck. The division's Talk-To-Me Player and Books was the hit of the previous selling season, and calendar year 1978 production was sold out by June of '78.

On the international front, Quaker acquired a majority interest in Chiari and Forti, an Italian food company, in March, 1979. Quaker now owns an 83% interest in the company, which markets edible oils, cake mixes and oven products.

Several key personnel changes were made, with Elizabeth D. Harrington joining the company as vp-advertising (and president of in-house agency, AdCom). She had been a vp of J. Walter Thompson Co., and succeeds Mitchell A. Seltzer, who left Quaker to pursue a career in tv programing.

Mead Montgomery joined Quaker as exec vp-restaurants and specialty retailing, and James J. Durkin was named president of the restaurants division, succeeding Frederick Montgomery.

Quaker's major restaurant chain is Magic Pan Creperies, but the unit has two newer operations—Proud Popover, a specialty restaurant with a Colonial American menu, and Engine House Pizza Co., a family restaurant with a firehouse decor.

RCA Corp.

	1978	1977
Sales	$6,644,500,000	$5,923,400,000
Earnings	278,400,000	247,000,000
Advertising	140,000,000	124,000,000

RCA Corp., New York, ranked 21st among the nation's advertisers in 1978, a year which saw RCA deliver its best annual performance since its founding 60 years ago.

RCA's domestic advertising expenditures rose 13% to an estimated $140,000,000 in a year that saw the company's global sales climb 12% to more than $6.6 billion, and earnings rise 13% to $278,400,000.

First half RCA earnings climbed $14,500,000 or 11% to $147,700,000, as sales rose 19% to $3.69 billion, fueled by gains in five of its seven business segments. The two units adversely affecting RCA's results were National Broadcasting Co. and RCA Records.

■ A "substantial" RCA loss and "accelerating expenditures" related to preparing for the videodisc's introduction ate into earnings gains made by strong color tv set sales, RCA indicated. As for NBC, "strong advertiser demand for time" could not offset "heavy" program costs, chiefly in prime time tv.

Six of RCA's seven functional business segments advanced in both sales and profits; the broadcasting segment (NBC) showed a profit decline of 20%, the result of "competitive problems" and the cost of attempting to overcome them.

The chief measure aimed at increasing the network's audience share was the hiring of former CBS and ABC "program whiz" Fred Silverman, who took office as president-ceo in June, 1978. Sales in the broadcast segment, however, gained by 11%.

■ Both domestic and overseas operations showed strong sales and profits. U.S. revenues were up 13% to $5.8 billion, yielding a slight increase in before-tax profits to $402,700,000. RCA's foreign sales increased 2% to $1.23 billion as profits rose to $110,600,000, a 57% increase.

RCA is structured into seven broad operational segments: Consumer electronic products and services, commercial electronic products and services, broadcasting, vehicle rental and related services, communications, government business and other products and services.

Incorporated under these various segments are RCA's operating divisions and subsidiaries, principally Banquet Foods Corp., Coronet Industries, National Broadcasting Co., Hertz Corp., Random House, RCA Direct Marketing, RCA Distributing Corp., RCA American Communications, RCA Global Communications, RCA Sales Corp., RCA Service Co., RCA Records, RCA solid state division and RCA picture tube division.

Foreign subsidiaries include RCA Ltd. in both Canada and the United Kingdom, and Oriel Foods, a British food company.

■ The RCA consumer electronic products and services segment manufactures, markets and services RCA television products, phonograph records and tapes and other entertainment for home and auto use.

Revenues for this unit jumped 15% as earnings rose 4%. A new ChannelLock color tuning system was introduced, eliminating the need for fine tuning. A profit decline in tv products, attributed to inflationary costs, was partly offset by the success of the SelectaVision home videocassette recorder, which established its U.S. market leadership with more than a 25% share.

The SelectaVision brand name also will appear on RCA's long delayed home videodisc players, now expected on the market some time during 1980. Herb Schlosser, the former National Broadcasting Co. president who is an RCA exec vp, is supervising the disc programing efforts; about 200 titles are planned initially, mostly movies.

RCA tv products moved from a modular chassis design to a single board concept, aimed at cutting costs and improving reliability while using fewer parts.

RCA Records posted a fourth consecutive year of new highs in sales and earnings, as sales of country music records rose 34% and classical records sales soared by 43%. Sixteen RCA albums and four singles went gold or platinum during 1978 as division president Robert Summer aimed to make RCA a more aggressive pop music label.

RCA commercial electronic products and services, showing a 23% increase in earnings on a sales gain of 10%, produces color television picture tubes, industrial tubes, solid-state and electro-optic devices, commercial broadcasting and communications systems and other electronic components for industry and business.

Color picture tubes set a new sales record, with gains resulting from strong domestic demand as well as the rising sales of RCA's Canadian, Mexican and Brazilian products, and RCA maintained its position as the U.S. market leader.

Solid state sales attained record levels although profits dipped as

The Bulletin circulates 257,261 more newspapers in the 14-County City & Retail Trading Zones than The Inquirer Monday through Sunday

If you're an advertiser and your customers live in the Greater Philadelphia area, then take a good hard look at the map above.

Because in this area, Monday through Sunday, your potential customers will get their hands on 257,261 more Bulletins than Inquirers.

Surprised? You shouldn't be.

Because last year retail and national advertisers, like yourself, placed 1,878,917 more lines of advertising in The Bulletin than in The Inquirer.

This leadership — plus our circulation dominance — make selling very simple.

It pays to put your money where your market is.

And in Greater Philadelphia The Bulletin is the market. Phone: (215) 662-7474

the result of production problems in integrated circuits.

RCA broadcast activities increased 11% in revenues, not nearly enough to offset the 20% drop in profits. Nine new mid-season series were selected from perhaps 60 series pilots in the winter following Mr. Silverman's arrival, as all the new-for-fall '77 series were scrapped.

From his June '78 arrival through summer '79, Mr. Silverman has canceled 18 series and has passed over several other spring-summer '79 tryouts in preparing the fall schedule.

NBC-TV continued to lag behind front-running ABC and runner-up CBS in the prime time Nielsen ratings battle (and was having difficulties in other dayparts too), despite such '78 programing highlights as the "Holocaust" miniseries.

A record World Series audience of 135,000,000, however, did keep NBC in second place for much of the early part of the 1978-79 season.

The first concrete response to Mr. Silverman's call for sponsors to get back into supplying prime time series, and not just specials and tv movies, came from Procter & Gamble, whose "Shirley" starring Shirley Jones is due in September.

▪ Revenues from the five NBC owned and operated stations reached record levels, helped by an all-time high in local billings; earnings were the highest since 1969. These stations, located in New York, Chicago, Cleveland, Washington and Los Angeles, sponsored a "Health Fair" in 1978 with 140,000 people receiving free health screenings.

NBC Radio, reorganized in September, posted its highest sales in 23 years, as the four am and the four fm stations gained.

NBC plans to acquire three addition am and three more fm outlets in the top 20 radio markets. NBC began testing a new youth-appeal fm network earlier this year.

RCA vehicle renting and related services consists mainly of the Hertz Corp. and its various activities. Market leader Hertz recorded its seventh consecutive year of profit highs with an increase of 17% and 12% in sales. Among its 4,000 car rental outlets, 1,400 are at airports. During '78, Hertz signed marketing agreements with Ramada Inns, Best Western, Amtrak and American Express in Hawaii.

▪ The RCA communications segment consists of RCA Global Communications and RCA American Communications. RCA Alaskan Communications was sold in 1978 to the Pacific Power & Light Co. for $200,000,000 in cash plus any 1979 increase in the company's net worth.

Sales of this segment were up 12% and earnings jumped 31% following a 5% drop in 1977, as its Satcom I and II satellites were increasingly in demand by network and non-network broadcasters.

Among RCA's other products and services are those subsidiaries engaged in food, carpet and book publishing. These include Banquet Foods, Coronet Industries, Random House (including Alfred A. Knopf, Ballantine Books, Pantheon, Vintage, Modern Library and various educational divisions) and Oriel Foods of the United Kingdom.

In measured spending, the biggest gainer was network radio, up 80%. Magazines increased 38%, newspapers 34%, outdoor 31% and network tv was up 29%. Spot radio expenditures were down by 50% and spot tv showed a 10% decline.

▪ RCA color tv sets once again claimed the heaviest advertising support with measured media spending of nearly $11,000,000, down about $1,000,000. Of this total, $7,800,000 was spent in network tv.

The Kodak Ektralite 10 camera has a convenient built-in electronic flash to catch all the action.

Eastman Kodak continues to use actor Michael Landon to make the pitch for its various lines of cameras.

Advertising for Hertz was up 28% to $10,200,000, the largest chunk—$9,500,000—going for car rental activities. Over half of this total, $5,100,000 supported O. J. Simpson's dashes through airports on network tv; another $3,300,000 supported these commercials on spot tv.

Mr. Simpson will continue as the Hertz spokesman through 1980 at least. The Hertz rental car account moved to Scali, McCabe, Sloves from Ted Bates & Co. in February. Hertz' new advertising theme, "Where Winners Rent," broke in newspapers and on network tv during March.

NBC spent over $11,000,000, mostly to promote the tv network and its programing, a 43% increase over 1977. Most of this total went into magazines.

RCA Music Service spent $5,600,000 in magazines. Another $1,800,000, mostly in spot tv, backed RCA Records, which also is a hefty p.o.p. spender. More than $4,000,000 was spent for RCA's SelectaVision system in network tv, up from the $1,500,000 invested during 1977.

Ralston Purina Co.

	1978	1977
Sales	$4,058,400,000	$3,760,000,000
Earnings	154,600,000	142,700,000
Advertising	91,000,000	80,673,900

Ralston Purina Co., St. Louis, the 43rd largest national advertiser, boosted its ad spending by about 13% in 1978 to an estimated $91,000,000, more than restoring the cutback in 1977 when advertising dropped to $80,673,900 from $87,780,000 the previous year.

Sales in fiscal 1978, ending Sept. 30, topped $4 billion for the first time, up 8%. Earnings also set a company record of $154,600,000, an increase of 8%.

Ralston Purina attributed the increased sales and earnings primarily to excellent performance in the agricultural feeds and products area—particularly feed operations outside the U.S. The cereal and pet food operations also showed improvement.

In pet foods, Purina continued to increase its sales and earnings and maintained its over-all dominance with a market share estimated at 31.6% by industry analyst John C. Maxwell. Purina is particularly strong in dry pet foods, with four of the top five brands in both dry dog food and dry cat food.

▪ Purina puts about 60% of its measured ad budget behind its pet foods, largely in network and spot tv. Among the heaviest advertised brands in 1978 were Purina Dog Chow ($9,161,000); Cat Chow ($8,099,200); Puppy Chow ($6,239,400); Meow Mix ($5,957,700); Chuck Wagon dog food ($5,846,700), and Dog Meal ($4,509,100).

Purina increased measured ad spending for Chuck Wagon dog food, but the No. 3 product in the marketplace continued to slip in sales. Ad spending on Chuck Wagon in 1978 totaled $5,846,700, up more than $2,000,000 over 1977. Market share, however, slipped from 9.8% to 8.5%, estimates industry analyst Mr. Maxwell, while dollar sales also slid.

TOGETHER IN CRUNCHEWY CHUCK WAGON DOG FOOD.
CHUCK WAGON

Ralston Purina Co. increased ad spending for Chuck Wagon during 1978 by more than $2,000,000.

Dog Chow and Puppy Chow continued to maintain a firm hold on the Nos. 1 and 2 spots in dry dog food, with dollar sales increases, but some erosion in market share.

Over-all, Purina lost about 1.1% of the pet food market, due primarily to pressure from competing products. Purina, however, also has a number of new products, which either went national in late 1978 or are on the verge of doing so this year.

▪ In an effort to counter inroads made by Quaker Oats' soft-dry dog food Tender Chunks, Purina rolled national in October with its own Moist & Chunky, backed by $1,800,000 in measured advertising its first two months. Ad support for the first year was projected at $10,000,000 to $14,000,000.

Purina is expanding out of test market with Bonz, a dog biscuit snack shaped like a cross-section of bone, which received nearly $600,000 in measured media support in 1978. Nabisco's Milk Bone biscuits still dominate that segment of the market with about 60%.

The company also added new entries to the dry cat food market, introducing Cat Chow Country Blend nationally in September. Purina also went national with Good Mews dry cat food, with an ad budget reported in excess of the $14,500,000 used to launch Fit & Trim dry dog food—which at the time was said to be the company's heaviest support for a new product introduction.

Purina's Cat Chow is in a strong No. 1 position in the dry cat food market, with a 1978 share estimated at 32% by Mr. Maxwell (down slightly from 1977). The company also holds the No. 3 spot with Meow Mix (market share estimated at 19%) and its Special Dinners are No. 4 (market share estimated at 10.7%). The company recently introduced a new Meow Mix flavor.

▪ In ready-to-eat cereals, Purina continued its inroads into the bran cereal market as HoneyBran went into test market in November, and is now rolling out. It joins Bran Chex, which, along with the other Chex cereal flavors, has an estimated 3.7% of the market share.

Ralston's children's cereal, Cookie Crisp, enjoyed good success in its first two years, moving from an 0.8% market share in 1977 to a 1.5% market share in 1978, which brought it into the top ten among children's cereals. The Chex cereals were backed by $9,181,800 in measured ad spending, while Cookie Crisp got $6,145,500.

The company's Country Stand fresh mushrooms grew in popularity after a successful 1977 national introduction. The company reports pound sales up 40% over 1977 and ad spending went from $8,100 to $134,000—all in magazines.

Despite the soaring sales, Purina said mushroom earnings were "short of planned expectations," citing severe winter weather as the cause of higher costs and reduced output in certain locations. A sixth harvesting facility was added during the winter.

▪ Results in the company's Chicken of the Sea tuna business faltered slightly for a second straight year "because of intense industry price competition and high costs," according to Purina Chairman R. Hal Dean. Chicken of the Sea received $3,586,900 in measured media spending.

Jack-in-the-Box Restaurants, run by the company's Foodmaker Inc. subsidiary, moved into battle with McDonald's for a share of the fast-food breakfast market. Early this year, Jack-in-the-Box introduced three breakfast entrees and offered a money-back guarantee if the customer wasn't satisfied with the breakfast. The restaurant chain also opened its 1,000th Jack-in-the-

Box during the summer of 1978. Ad support totaled $3,736,100 in 1978.

Purina's St. Louis Blues hockey club struggled through a losing season. But the company said it plans to improve marketing tactics for both the team and its Checkerdome arena.

Revlon Inc.

	1978	1977
Sales	$1,451,669,000	$1,143,324,000
Earnings....	129,233,000	97,794,000
Advertising*	92,000,000	80,000,000

*Estimated by AA

Revlon Inc., New York, the 40th largest national advertiser, increased its ad spending 15% to $92,000,000 in 1978 as sales and earnings again reached record levels, climbing 27% and 32.5% respectively over 1977's figures.

In its annual report, Revlon put advertising worldwide at $137,725,000 or 9.5% of sales, against $105,774,000 or 9.3% of sales, the year earlier. These figures include costs for brochures, research and maintenance of the ad department not included by AA.

Factors cited as contributing to sales and earnings gains during 1978 include new product introductions, improved marketing and sales organization and integration of previously acquired operations such as Armour, Lewis-Howe Co. and Roux Laboratories.

Approximately 65% or $944,898,000 of Revlon's volume came from beauty products sales both here and abroad, while 35% or $506,771,000 was generated by health products and services both domestically and internationally.

▪ In 1978, the U.S., Canada and Puerto Rico contributed $1.021 billion to total revenues; Europe, the Middle East and Africa, $259,311,000, and other areas of the world, $170,949,000. Beauty products contributed 64% of operating profit worldwide, while health products and services accounted for the remaining 36%.

Revlon's cosmetics and fragrance sales exceeded those of any other U.S. cosmetics and fragrance company selling through retail outlets. Additionally the beauty segment is credited with growth almost double that of the market's during 1978, giving Revlon an 18.5% share of the domestic cosmetics market and a close to 5% share internationally.

Beauty products introduced domestically in 1978 include Formula 2 Face makeup, Moon Drops Moisture Release Sports Stick, Revlon Colorfast Eyeshadow, Super Lustrous Creme-on Shadow & Super Lustrous Creme-on Blush, New Flex Light Conditioner, Flex antidandruff shampoo and corrective conditioner as well as line extensions under the Charlie name (blush, lip tint and oil free makeup) and Mitchum antiperspirant stick and nonaerosol pump spray.

The 1978 Ad Dollar Summary

Year-End Issue Only $75.00

- The only complete listing of all brands active in six major media: consumer magazines, national newspaper supplements, network and spot television, network radio, outdoor.
- Expenditures for more than 24,000 brands—listed in alphabetical order with parent company identification and media used.

PLUS

- The top 1000 companies with Ad Dollars listed by media.
- The top 10 brands in each of 243 product categories with category total.

A complete summary of Ad Dollars from the PIB Service, BAR Broadcast Services, LNA Outdoor. The official industry figures prepared for MPA, TVB, RAB, OAAA used by every major advertiser and their advertising agencies.

MARKETING PROFILES

Internally Revlon divides its beauty business into three groups, within which each consumer segment is served by a cosmetics "house" with products, packaging and marketing designed to match its characteristics.

Thus there are the popular priced houses of classic Revlon, Moon Drops, Natural Wonder and Charlie within Group I and the high fashion houses of Princess Marcella Borghese, Ultima II and Etherea Fine Fragrances within Group III.

Group II is composed of toiletries, hair care and coloring items and antiperspirants. During 1978, each group was assigned its own marketing and sales organization and president for more effective administration.

In early 1979, Revlon completed its acquisition of the Henry-Colomer Group, a European manufacturer of professional beauty care products, for $38,000,000. The acquisition marks Revlon's second purchase of an international cosmetics company in the last two years. Previously it bought Bozzano, based in Brazil.

Back in the U.S., Revlon extended distribution of its Sensor Perm, introduced in 1976, to 10,000 salons from 7,000 in 1977. Sensor Perm is part of the company's Professional Products division which supplies salons with regular and special formulations of Revlon products along with hair styling equipment.

Other Revlon efforts undertaken in the hair care area during 1978 included the reformulation of Group II's Colorsilk hair coloring, which was launched as a non-ammoniated formula early in '79 putting it head to head with Clairol's Clairesse, and the introduction of New Sensor Body Perm and Guys and Dolls Perm from the Professional Products division.

During 1979, it was also learned that Revlon is preparing to introduce a new home permanent called Instant Styling Perm through its personal products group.

■ In the ethnic hair care market, Revlon Realistic is said to have captured the lead position as supplier of relaxer solutions in the U.S.

Also it was learned that in the shampoo/conditioner market, Group II's Flex with balsam conditioner captured a 27% market share with sales rising almost 70% to an estimated $30,000,000 (factory). Although share estimates were not available for Flex shampoo, the brand's performance was termed strong by industry sources making Revlon the No. 3 marketer of shampoos behind only Procter & Gamble and Bristol-Myers. Trade sources noted conversely that the Flex anti-dandruff entry had not been turning well.

Other beauty products and fragrances also increased market share. Revlon's treatment products rose from an 11.7% share to well over 13% while fragrances posted an estimated 18.3% share. Revlon's Charlie and Jontue fragrances remained the No. 1 and 2 national brands, respectively. However, while Jontue sales continued to rise, Charlies were reported off by about 10%.

■ During the first half of 1979, it was also disclosed that Revlon plans to introduce a Norell 2 fragrance in the U.S. this fall while in Paris there are plans to launch Ivoire, a new scent from the house of Balmain.

A repackaged item from the cosmetics segment is a facial scrub bar under the Natural Wonder brand name which during 1978 was repositioned toward a slightly older customer.

The most heavily advertised Revlon cosmetics, treatments, fragrances and hair care products, according to measured media figures from Leading National Advertisers Inc., included the Flex hair care line which received $8,389,500; Charlie Perfume, $4,502,000; Jontue, $3,670,400; Natural Wonder cosmetics, $2,397,100; Formula 2 treatment and makeup, $3,275,000; and Milk Plus 6 creams, lotions, shampoo/conditioner, $2,541,200.

Among these, Flex registered the most dramatic increase in measured media expenditures, jumping from $4,535,900 in 1977. Network and spot tv were again the primary vehicles.

Norman, Craig & Kummel, which last handled Revlon Inc. assignments in 1968 started off 1978 with a Revlon reunion—the Milk Plus 6 line of moisturizers and cleansers. These were previously handled by Holland & Callaway which was dropped from the Revlon agency roster in 1978

■ From Revlon's health care group, the Ice Band Cold Compress for first aid treatment was launched nationally in July, 1978. A part of Norcliff Thayer, the company's proprietary products unit, the brand's spending for print and promotion was estimated at $1,000,000.

Oxy 10, an anti-acne preparation from Norcliff Thayer spent its first full year on the market in 1978, surpassing the substantial volume of Oxy 5 and Oxy Scrub. The Oxy line is reportedly the second largest such product group in the anti-acne market.

Norcliff Thayer also took steps in 1978 to introduce Tums to the worldwide markets. Elsewhere in the health care group, USV International and Armour International were joined together abroad to create International Pharmaceuticals.

R.J. Reynolds Industries

	1978	1977
Sales†	$6,622,100,000	$6,363,100,000
Earnings†	441,900,000	423,500,000
Advertising*	182,596,300	164,686,100

†Worldwide *U.S. only, AA estimate

R.J. Reynolds Industries, Winston-Salem, N.C., the 12th largest national advertiser, spent an estimated $182,596,300 on advertising in 1978, close to an 11% increase over 1977.

Worldwide company sales in 1978 rose 4%, to $6,622,100,000, while earnings increased 4.3%, to $441,900,000. Domestic and international tobacco sales, which accounted for 68% of corporate sales, rose 6.7% and 15%, respectively, during the year.

Shipping revenues, meanwhile, increased 15.4%, and RJR Foods saw its sales rise 4.6%. Energy revenues, on the other hand, declined 28.1%, but that was attributed primarily to the nationalization of the company's holdings in Kuwait.

R.J. Reynolds Tobacco Co., the nation's largest tobacco manufacturer, claimed 32.9% of all domestic cigaret sales, compared with a share of 33.1% in 1977. Four of the top 10 selling brands are RJR Tobacco products.

Winston, the company's top brand and No. 2 in the nation (Philip Morris Inc.'s Marlboro is No. 1), saw its market share slip slightly, from 14.7% in 1977 to 14% in 1978. The Winston Lights line, aided by the 1977 introduction of Winston Lights 100s, grew over 40% to secure a 2.8% market share as the best selling nonmenthol low-tar brand.

Measured media ad spending for the Winston brand totaled $29,272,200 in 1978, with $14,952,700 going to magazines, $5,639,800 to newspaper supplements and $8,729,700 to outdoor.

The Salem brand maintained its No. 4 position and 9% market share during the year. The line as a whole grew 35%, from a share of 2.4% to 3.5%. The Salem Lights 85s saw its share go from 1.5% in 1977 to 1.9% in 1978, while Salem Light 100s went from 0.9% to 1.2% over the same period.

Spending for the brand amounted to $25,430,300 in 1978, with $13,627,200 going to magazines, $7,518,600 to newspaper supplements and $4,284,500 to outdoor.

■ Significant news came in the Camel brand when Camel Lights, introduced into national distribution early last year, earned a 0.7% share for that first year. Camel Long Lights soon followed with an introduction early this year.

At the same time, in an effort to capture a larger share of the declining nonfilter market—estimated at 10% of the entire market—RJR began testing a new ad campaign for Camel nonfilters last year. The cigarets, which accounted for 2.7% of the market in 1978, were unadvertised for all practical purposes in recent years.

Measured media for the brand, No. 8 nationally, totaled $23,478,600 in 1978, with $12,154,400 going to magazines, $4,530,100 to newspaper supplements and $6,794,100 to outdoor.

In the low-tar category, the Vantage brand continued to move upward, with market share rising from 2.9% to 3.1%, making it No. 9 nationally. Vantage Longs, introduced in 1977, held a 0.6% share after having had a sales increase of 19.3%.

To bolster the brand's sales possibly even more, RJR in May introduced Vantage Ultra Lights into test markets in Boston, Indianapolis, Fort Wayne and Worcester, Mass.

Measured media spending for the brand totaled $15,643,000 in 1978, with $8,651,400 going to magazines, $4,143,300 to newspaper supplements and $2,848,300 to outdoor.

Real, the brand that proved to be a disappointment for RJR in 1977, saw its sales increase by 3.2%. Supported by a huge ad blitz when it was introduced in 1977, Real today holds a 0.4% market share, despite changes in ad approaches designed to bring the cigaret up to the 1.5% share expected the first year.

Real continued to see a heavy spending program with $16,935,900 going into measured media in 1978, compared with $14,569,000 the year before. A total of $8,696,200 was spent in magazines, $2,583,300 in newspaper supplements and $5,656,400 in outdoor.

Doral's sales continued to decline, 16%, in 1978. The brand, which has been unadvertised, witnessed the national introduction of Doral II during the year.

In the ultra low-tar category, Now went through an "image change," with its tar content rising from 1mg to 2mg. Instead of playing a numbers game with American Tobacco's Carlton, Now began to position itself as a choice of the affluent man and woman.

Measured media spending for the brand, which maintained a 0.5% share, amounted to $7,811,500, with virtually all of it going into magazines.

More, the 120mm cigaret wrapped in brown paper, had a 4.6% increase in sales in 1978, giving a 1% market share. Spending totaled $10,474,700 in 1978, with $5,385,900 going to magazines, $1,953,400 to newspaper supplements and $3,135,400 to outdoor.

RJR Foods, with its Chun King brand, is No. 1 in canned Chinese food and near the top in frozen Chinese food. Its Patio line is No. 1 in frozen Mexican foods. Hawaiian Punch is a significant factor in the canned drink field.

One of the most significant developments for the company during the year was its merger with Del Monte Corp., which puts RJR Foods in a leading position in fruits and vegetables and canning, both in the U.S. and in foreign markets.

In the deal, RJR paid $619,000,000 for Del Monte, which reportedly had revenues of $1.6 billion in 1977. Del Monte's ad spending was small by RJR standards. Measured media expenditures in 1978 totaled $3,085,300, with most spent in magazines or network television. RJR Foods, on the other hand, spent $15,602,900 in 1978, most of it for Hawaiian Punch.

Richardson-Merrell

	1978	1977
Sales†	**$944,961,000**	**$836,004,000**
Earnings† ..	**66,179,000**	**57,180,000**
Advertising*	**105,000,000**	**90,000,000****

†Fiscal years ended June 30, 1978, and June 30, 1977.
***AA estimate **Restated**

Richardson-Merrell, Wilton, Conn., the 37th largest U.S. advertiser, raised advertising and promotion about 17% to an estimated $105,000,000 in 1978.

Worldwide ad spending rose 21% to $179,279,000, according to the company.

Manufacturer and marketer of proprietary medicines, toiletries, ethical pharmaceuticals, animal health products, chemicals, and furniture refinishing and care products. Richardson-Merrell boosted sales 13% to $944,961,000 in the fiscal year ended June 30, 1978. Net earnings increased 15.7% to $66,179,000.

▪ The Vicks consumer products divisions reported a sales increase of 19.3%. Oil of Olay, of the toiletry products division, continued to show sales growth, though the rate was down somewhat from the previous two years.

In the health care division, sales of cold products rose substantially in response to a high cold/flu incidence. The products held or gained consumer share unit in every category.

For the first time in a number of years, cough drops—reacting favorably to strong ad support—held market share.

Clearasil continued to lead the teen skin care category, despite strong competitive challenges, but Lavoris sales buckled in the face of heavy competition.

New products introduced nationally last fall include Topex, an acne cleaning lotion; Complete, a denture cleanser and toothpaste combination, and Night of Olay, a nighttime skin cream.

▪ Good results were reported by Merrell-National Laboratories, the domestic ethical pharmaceutical division which markets a line of prescription pharmaceutical specialty products in several categories, including antidepressant, antispasmodic, anti-obesity, and antinauseant.

Merrell also markets otc products, including Cepacol mouthwash and throat lozenges, and Cepastat sore throat spray and throat lozenges. Two new drugs are now under review by the U.S. regulatory authorities.

New compounds for cardiovascular and central nervous system disorders and abnormal cell growth control are under clinical evaluation in the U.S. and abroad. In addition, the first prescription laxative, Chromulac, is about to be launched.

The recently acquired Formby's Refinishing Products continued to post profits.

In fiscal 1978, Richardson-Merrell sold two of its divisions: Tulox-Lumelite-Bradley to a group of private investors, and Jensen-Salsbery Laboratories to Burroughs Wellcome Co. In January, 1978, the biological vaccine operation at Swiftwater, Pa., was donated to The Salk Institute for Biological Studies.

Richardson-Merrell's U.S. measured media total—almost all of it spent by the Vicks division—was up about 17% to $56,086,400, a $8,058,700 increase over 1977.

Spending in network and spot tv rose 18%. Network and spot radio received $3,168,000, an increase of about 60%. Magazines got $2,597,500, a decline of 20%, and $241,100 went to newspapers.

Almost half of the measured media total was in support of Vicks cold products, with the largest expenditures directed at NyQuil Nighttime colds medicine. Of the $7,069,400 budget allotted to this brand, $5,046,800 went to network tv.

Vicks Sinex Long-Lasting nasal spray was backed by $3,216,100 in measured media, almost exclusively for network tv. Vicks Formula 44 cough syrup and 44-D cough syrup, in newly designed packages, got $3,054,000 and $2,037,200 respectively, almost all for network tv.

▪ Oil of Olay continued to receive the company's heaviest advertising support with a total measured media budget of $18,074,100, $14,621,800 in network tv. Oil of Olay's 1978 budget in measured media was down from 1977's outlay of $20,000,000.

Oil of Olay's 1978 campaigns were aimed at a younger audience, but sales continued to be strongest among women over 30. Richardson-Merrell succeeded in winning suits against five companies producing similar skin lotions.

Clearasil, which continued to dominate the acne remedy category, received less ad support than last year. Clearasil medication got $633,800 in measured media support; Clearasil medicated cleanser, $1,110,900, and Clearasil Acne Lotion, launched in July of 1977, $2,138,700.

New products promoted in various test markets and during national rollouts by R-M in 1978 include Night of Olay, a skin cream which received $136,000 in spot tv support; 60/40/20, an oil control facial cleanser; Topex acne medication, and Complete, a denture cleanser-toothpaste which received the heaviest backing of all the new products—$3,299,800. Complete, supported by print, tv and in-pack sampling captured 75% of the denture cleanser category in test.

Vicks Daycare was shifted from Benton & Bowles to Case & McGrath. Other agency changes were Complete denture cleanser from Benton & Bowles to Young & Rubicam and health care division-military market from Wilson, Haight & Welch to James E. Wagner Corp., Hartford, Conn.

THE 2-BILLION DOLLAR FAMILY.

It's alive and well and living in the Greater Miami Latin Market.

DIARIO LAS AMERICAS

DIARIO LAS AMERICAS

That's right! It's a Latin family. And it's an affluent family. As a matter of fact, it's worth $2-billion each and every year.

$2.2-billion, to be exact*. For that is the aggregate annual income of the more than half-million Spanish-speaking people making up the Greater Miami Latin Market.

Being affluent, this 2-billion dollar family spends a lot of money. On food. On entertainment. On travel. On cars. On clothes. On the home. On the whole family.

And it's a large family, averaging 3.4 members per household*.

But for you--the advertising decision-maker--the most important aspect of this 2-billion dollar family is that it speaks and reads in Spanish. Not only does it speak and read it, but it lives, breathes and thinks in Spanish. Therefore, it makes its buying decisions in Spanish.

And the place this Latin family goes to every day to get help in making those buying decisions is DIARIO LAS AMERICAS. The #1 Spanish-language daily newspaper. Particularly oriented to the Latin family.

Make sure you get your fair share of this 2-billion dollar family. Reach it by advertising in DIARIO LAS AMERICAS.

Oil of Olay continued to receive the most ad support—$18,000,000—among products in Richardson-Merrell's stable of products.

A. H. Robins Co.

	1978	1977
Sales	$357,070,000	$306,713,000
Earnings ...	29,916,000	26,801,000
Advertising .	32,886,000	31,552,000*

*Restated

A. H. Robins Co., Richmond, Va., maker of pharmaceutical, health care and consumer products, was the 95th largest national advertiser in 1978, spending $32,886,000. The company said it spent $36,886,000 in worldwide advertising in 1978.

The company's sales grew 16% in 1978, to $357,070,000, while earnings were up 12% to $29,916,000.

Health care products accounted for 69% of the company's worldwide sales, with the remainder contributed by sales of consumer products. Principal consumer products in the U.S. include Sergeant's pet care products, the Quencher line of cosmetics and Chap Stick lip balm. Robins also markets the Caron line of fragrances, out of Paris.

About 40% of the company's measured media investment (almost entirely in spot tv) went to back the Quencher line, although the $11,000,000 total was down considerably from 1977's $14,000,000. Nearly $7,000,000 backed Lip Quencher lipstick and about $3,500,000 was put behind Skin Quencher hand and body lotion.

- In the fall of 1978, the company introduced eight Countryborn colors as replacement shades in the Lip Quencher line, which continues to be the largest selling brand of lipstick in drug and food stores. In test is Quencher Nail Glaze, an nail enamel in 18 shades, which received $16,000 on spot tv in 1978.

Chap Stick products received about $4,000,000 in measured media. A new orange-flavored Chap Stick was introduced in October, 1978, and in June, 1978, Robins introduced Lip Treat, a flavored lip gloss directed toward the youth market. Available in six flavors, Lip Treats were backed by $550,000 in measured media the first six months.

The company backed its Sergeant's pet care products with more than $5,500,000 in measured media, of which $4,500,000 was put behind pet collars. Sergeant's products compete in a highly competitive market, dominated by Hartz Mountain Corp., which has more than 50% of all branded product sales.

Early in 1979, Sergeant's introduced a new fast-acting flea and tick collar in Canada for puppies, dogs and cats. It, for the first time, combines vaporizing and dusting action. U.S. registration is pending.

- Health care products are the company's most important area. Principal pharmaceutical products are drugs for coughs and colds, antispasmodic drugs for gastrointestinal disorders and skeletal muscle relaxants. The company distributes its health care products throughout the U.S., as well as in Canada, Latin America, Europe, the Far and Middle East and Africa.

Robins' Robitussin family of cough syrups is No. 1 among cough preparations sold in pharmacies. Last year marked the first full year of marketing four Robitussin formulations directly to retailers. (Two formulations are still marketed on an ethical basis, as they contain codeine.) The four formulations sold directly captured the No. 2 position among cough medicines available through food outlets.

As part of the direct marketing program, Robins initiated a program of heavy consumer advertising for these products, putting about $4,600,000 into measured media for Robitussin in 1978. The company plans an expanded program of both print and tv promotion in 1979, continuing the "Ask your docotor or pharmacist" message.

The company continues to emphasize more traditional forms of promotion for its pharmaceutical products—advertising in medical and pharmaceutical journals and detailing by sales representatives. These expenditures do not show up in measured media figures, and are estimated to account for the bulk of Robins' nearly $10,000,000 in unmeasured ad spending.

Robins ranks 22nd in the over-all health care market, and 19th among those companies marketing ethical pharmaceuticals. In addition, a 1978 research study showed that the company is No. 5 among U.S. pharmaceutical manufacturers in new prescriptions written. It had 11 products among the top 200 most widely prescribed products in the U.S. in 1978.

- In February, 1979, Robins received final approval from the Food & Drug Administration for marketing an injectable form of Reglan, a drug that increases upper gastrointestinal motility. The company is still awaiting approval for Tenathan, a new antihypertensive drug.

Robins began marketing Allbee vitamins with vitamin C and Z-Bec vitamins directly to retailers in March, 1979. Dimetane antihistamine tablets and elixer, formerly available only through prescription, were relabeled for over-the-counter use and offered to retailers at the same time.

Schering-Plough Corp.

	1978	1977
Sales	$1,082,493,000	$940,859,000
Earnings ...	193,629,000	166,652,000
Advertising*	68,000,000	63,000,000

*Estimated by AA

Schering-Plough Corp., Kenilworth, N.J., the 59th largest national advertiser, increased its national advertising investment to an estimated $68,000,000 in 1978, up about 8% over 1977.

Sales topped $1 billion for the first time, and the company also chalked up record earnings of $193,629,000.

Ethical pharmaceuticals continued as the mainstay of the company, contributing $690,000,000 in sales revenues; consumer products added $292,000,000, and home products $67,000,000.

Despite the importance of ethical pharmaceuticals to the company's balance sheet, the consumer products division easily gets the bulk of Schering-Plough's advertising expenditures.

- By far the company's most heavily advertised product line is Maybelline cosmetics, which garnered more than 40% of the measured ad investment in 1978 ($22,635,700 of $52,000,000). Most heavily advertised within this line were Mabelline mascara ($6,635,000); Maybelline eye makeup ($5,600,000); Maybelline lipstick ($2,955,000); and Fresh & Lovely Lipstick ($2,600,000).

Among the new products contributing to a significant sales gain for the line were Maybelline eye and lip Styler Pencils.

Introduced in 1978 were Maybelline Kissing Sticks, flavored, fruit-scented lip glosses aimed at the teen market. A $70,000 "scratch 'n sniff" campaign in magazines introduced the line to young readers.

Maybelline Nail color completed its first year of national distribution, backed by $2,550,000 in advertising. A tv commercial depicted a table tennis ball, coated with Maybelline nail color, being struck repeatedly without scratching or chipping.

The Coppertone line of sun care preparations strengthened its market position, backed by more than $3,000,000 in ad spending. Among the line's newer products are Super Shade, which offers maximum protection from the ultraviolet rays of the sun, and SunGer, promoted to active outdoor people.

- A disappointment to the company, however, is the Di-Gel antacid line which still has not met sales expectations—Schering-Plough is aiming for a 10% market share.

As part of the effort to increase market penetration, Schering-Plough is testing a new roll package for Di-Gel in several U.S. cities. In pilot studies are an enlarged Di-Gel tablet and a creamier formulation. Di-Gel was backed by nearly $5,000,000 in advertising in 1978.

Correctol and Feen-a-Mint boosted the company into a leading position in the proprietary laxatives market in 1978. Together the two lines received more than $3,000,000 in measured ad backing.

Duration nasal spray and nose drops, backed by $5,000,000 in advertising, were supplemented with a new menthol formulation.

Aggressive marketing programs, an expanding sales force and new and improved products were cited as major contributing factors to the more than 15% sales gain in prescription and over-the-counter products.

- The discovery and development of new pharmaceutical products continues to be of prime importance to the company. To this end, the company has an extensive research program, to the tune of some $65,000,000 spent on research and development in 1978.

Nearly 30% of the company's 1978 ethical pharmaceutical sales came from products introduced since 1970. Schering-Plough's research ability is rated among the best, and the company has been unusually successful in converting prescription drugs to over-the-counter status.

Unmeasured forms of promotion are important in the ethical pharmaceutical area. Schering-Plough allocates more than a fifth of its total ad budget to unmeasured media, including business and professional publications, point of sale, premiums, direct mail and so forth.

Schering-Plough's Garamycin antibiotic is considered the tops in its field and ranks among the top five drugs over-all in sales, with annual sales estimated at $240,000,000.

Although the Garamycin patent runs out in 1980, the company has on deck Netromycin, an injectable antibiotic. Lab tests indicate that it is highly effective against organisms resistant to other antibiotics and with a greater safety margin than other aminoglycosides, including Garamycin.

- In 1978, the company introduced a cream form of its Gyne-Lotrimin, a drug that treats vaginal infections. Lotrimin itself became the most widely prescribed topical product for the treatment of fungal skin diseases.

Also in the dermatological area, Valisone, a topical anti-inflammatory steroid, continued as the market leader in 1978, while Diprosone, a companion product, also grew in sales. The Fulvicin line of antifungals increased in market share.

In September, the company introduced Afrinol, a long-acting decongestant, into the U.S., while Drixoral, a long-acting antihistamine-decongestant became the leading oral decongestant tablet prescription product in the U.S. last year.

In the over-the-counter area, which also posted substantial sales increases for Schering-Plough, a mentholated form of Afrin decongestant nasal spray was introduced.

- Home products, marketed through the DAP division, grew 9% in 1978, aided by the introduction of several new products. Total measured ad spending for DAP and Derusto products totaled just over $1,000,000.

New product introductions included a line of colored acrylic latex caulk, available in six hues. The division also introduced a latex cement patching compound.

In 1979, the division plans to introduce a latex wood filler, interior wiping stains for wood, Pacer panel and dry wall adhesive, and several furniture care products.

The company's fm radio stations reported substantial gains in listening audience and advertising revenues. At the end of 1978, sale of Boston stations WACQ (am) and WTTK (fm) to GCC Communications was approved by the Federal Communications Commission.

■ The company also had an active year on the acquisition front. In November, Schering-Plough purchased Emko Co., St. Louis, manufacturer of contraceptive foams and personal hygiene products. Its contraceptive products were backed by about $400,000 in measured media in 1978.

Also, in April, 1979, Scholl Inc. (spending $4,330,000 in advertising in 1978) was merged into Schering-Plough. Later that month, the company acquired Burns Biotec, the animal health unit of Chromally American Corp. which markets vaccines and pharmaceuticals to veterinarians.

Jos. Schlitz Brewing Co.

	1978	1977
Sales	$1,083,272,000	$1,134,079,000
Earnings	11,961,000	19,765,000
Advertising	58,213,000	55,080,000

Jos. Schlitz Brewing Co., Milwaukee, the nation's 68th largest advertiser, increased its advertising budget by 5% in 1978, to a total of $58,213,000.

The slight increase in media support came in what added up to be another rough year for Schlitz in terms of sales, earnings and barrelage. Sales fell 4.5% to $1.08 billion while earnings declined 40%, to $11,961,000 from $19,765,000.

Schlitz's barrelage was 19,580,000 bbls., an 11.5% drop from the 22,130,000 bbls. sold in '77. Now No. 3 in the beer industry rankings, Schlitz had an estimated 11.8% share of the market in '78, trailing behind No. 2 Miller Brewing with its 18.8% piece of the pie. Anheuser-Busch remained No. 1.

■ Although the figures add up to a less than brilliant horizon, Schlitz clouds have been clearing and the company has been hard at it making its way on the road to recovery.

In the first quarter of 1979, sales were $243,000,000, compared with the $231,000,000 rung up a year prior. However, volume declined 6% to 4,200,000 bbls. and, according to the company, wholesaler sales persisted well below company expectations.

The past year was the first full year for the revamped Schlitz marketing machine under the command of Allin Proudfoot, exec vp-marketing. And with all the screws, bolts and wheels in place, the brewery sped along, introducing new products, reformulating and repacking vintage brews, and breaking new campaigns for all the brands in Schlitz's stable.

Schlitz markets four national brands: Schlitz, Old Milwaukee, Schlitz Light and Schlitz Malt Liquor.

■ The brewery's biggest seller is Schlitz—as in "beer makes it good, Schlitz makes it great"—the brand's new ad slogan. Via agency J. Walter Thompson Co., the company upped its spending for Schlitz to $22,812,900 from the $16,346,000 it spent in '77.

The spot tv expenditure, however, dropped to $1,252,700. Magazine buys fell substantially, to $28,100 from $700,000. Schlitz spent $12,700 for outdoor ads.

Old Milwaukee received $3,639,100 in ad spending—all for network tv. The brand got $5,924,800 in media support the year before. In '78, Old Milwaukee lost its old agency of Cunningham & Walsh and picked up a new shop, BBDO, and a new campaign featuring famous locations related to Milwaukee.

Schlitz Light was reformulated in '78 into a "natural light pilsner" brew and was repackaged in a tapered bottle with jazzier graphics.

With Della Famina, Travisano & Partners doing the creative, "macho man" James Coburn was bumped for a bevy of stars (*i.e.*, George Burns, Jack Klugman, Zsa Zsa Gabor and Carol Wayne) touting Schlitz Light as the brew "where less adds up to more."

Ad spending for the reduced-calories beer in the six media measured declined to $8,027,200 from the $12,545,500 spent in '77. More than $7,360,000 went into network tv.

■ Rounding out the quartet of national brews, Schlitz Malt liquor hiked its measured ad spending to $5,825,700 from $3,177,000 in 1977. The brand, under the creative direction of Benton & Bowles, picked up a new campaign theme-line: "Maybe the best-tasting beer in America isn't a beer. Taste a Bull."

Schlitz also has come up with a superpremium entry, called Erlanger and touted as "an uncommonly good beer. The absolute finest we brew." The top-of-the-line entry is in test in Denver, Hartford, Phoenix, Providence and San Diego. J. Walter Thompson Co., Chicago, is handling.

Schlitz has also added Ramlosa, the mineral water said to be drunk by the King of Sweden and the Queen of Denmark.

The product was originally assigned to Benton & Bowles, New York, but pleading a conflict with another client, General Foods, B&B resigned and Della Femina picked up the bubbling waters.

■ While the men in marketing were working on putting new life in old brews and introducing new brands, the corporate lawyers were feverishly clearing up Schlitz' quagmire of legal hassles.

The 747-count indictment handed down by a federal grand jury, charging Schlitz with violations of the Federal Alcohol Administration Act, was dismissed after Schlitz agreed to a $750,000 administrative settlement. The company also pleaded *nolo contendere* to two misdemeanors and paid an $11,000,000 fine.

With that resolved, smaller legal problems continued to crop up. For instance, over the past year, two defunct brewers, Peter Hand Co. and Canadian Ace Brewing, filed suits against Schlitz alleging violations of federal antitrust laws. Peter Hand asked for $15,000,000 in damages; Canadian Ace filed for $45,000,000 in trebled damages and $500,000 in certain consequential damages.

Scott Paper Co.

	1978	1977
Sales	$1,724,897,000	$1,520,226,000
Earnings	93,560,000	62,110,000
Advertising	33,274,000	25,502,000

Scott Paper Co., Philadelphia, the 94th largest national advertiser, increased its advertising 30% in 1978 to $33,274,000.

It was a year that saw sales reach a new high, as earnings increased by 50%, bouncing back from the 15% decline of 1977. Scott attributed the gain in earnings to improved selling prices, sales volume and international affiliate earnings.

The packaged products division accounted for sales of $1,166,559,000, approximately two-thirds of the Scott total. This was an increase of $117,015,000 over 1977.

Major advertised brands were Viva paper towels ($6,135,300 in measured spending), ScotTowels $5,251,400, Cottonelle bathroom tissue ($3,744,400), Soft 'n' Pretty bathroom tissue ($3,387,500), Job Squad paper towels($2,311,600), ScotTissue toilet tissue ($1,167,200) and Baby Fresh Wipes ($943,300).

▪ Cottonelle distribution was extended into all northeastern markets during 1978, as Soft 'n' Pretty continued its national rollout. A portable package of Baby Fresh Wipes was introduced nationally during the year. A new version of heavy-duty Job Squad entered southern markets, making it available to 31% of the U.S. population. Get Fresh moist clothettes were being tested in Indianapolis and the Quad Cities ($127,200 in measured spending) and Footman disposable mats were tested in Fort Wayne. GraphWyp, a new wiper product for the graphic arts industry and an offspring of the successful WypALL brand, was introduced during 1978.

Actor Peter Falk was used as a Scott spokesman for paper towels in business press advertising. Mr. Falk's "Columbo" image was deemed appropriate to counter the low-price claims of rivals. The estimated $250,000 campaign was aimed at purchasing agents.

The various Scott brands have more than 40% of the $750,000,000-plus paper towel market; P&G's Bounty alone has about 22%.

The S.D. Warren printing paper division, Scott's second largest unit, had sales of $419,954,000, up 9%, while earnings soared 114%; the unit was the beneficiary of the large increase in demand for printed advertising and direct mail materials. A new grade of coated printing paper, Warrenflo Gloss, was introduced for catalogs, brochures and special interest magazines.

The Brown Jordan division posted record sales and earnings and acquired the Eagle Mfg. Co., a West Coast producer of indoor residential fixtures. Cricket, a new folding furniture design, was introduced in November and new rattan lines introduced included the Rausch collection.

The foam division's earnings improved in 1978 as sales of its polyurethane foam for the carpet cushion market rose substantially. The division's more traditional product lines, including foam for sound absorption and filtration, increased modestly.

Earnings from Scott's international affiliates hit a record $25,000,000, up 67% from 1977. Sales of Japan's Sanyo/Scott rose 18%.

Other Scott foreign affiliates include Bowater-Scott in Great Britain, Burgo-Scott in Italy, Scott Paper Philippines, Thai Scott, Taiwan Scott and affiliates in Belgium, France, Spain, Australia, Mexico, Brazil, Colombia, Costa Rica and Canada.

Morgan V. Hunter, former president of R.J. Reynolds Tobacco, assumed the Scott presidency in May, replacing board chairman C.D. Dickey Jr.

Seagram Co. Ltd.

	1978	1977
Sales†	$2,272,584,000	$2,184,263,000
Earnings†	93,029,000	85,540,000
Advertising	120,000,000	78,000,000

†Worldwide; 1978 fiscal year ended July 31, 1978
*Estimated by AA

Joseph E. Seagram & Sons, New York, subsidiary of the Seagram Co. Ltd., Montreal, was the 32nd largest national advertiser in 1978, spending $120,000,000 on advertising, up about 54% over 1977.

While world sales for Seagram Co. Ltd. in 1978 rose 4% over the previous year, income was up 8.8%.

Operating income for the spirits and wine division increased 13% to $189,985,000 in 1978 from $167,687,000 in 1977. Oil and gas operating income showed a 1.5% loss to $55,908,000 in 1978 from $56,755,000 the previous year.

▪ There were two major moves at Seagram in 1978. The first involved a decision to markedly raise ad spending, primarily in magazines. The new money went to promote Seagram's major brands in an attempt at increasing brand awareness and halting eroding sales. Measured magazine spending jumped 155.6% to $69,160,400 in 1978 from $27,051,300 the previous year, according to Leading National Advertisers.

Seagram's second major move for the year was the purchase of Glenlivet Distillers Ltd. of Scotland. Seagram said the acquisition "nearly trebled the malt whisky distillation capacity of the company."

Glenlivet produces The Glenlivet, a 12-year-old single malt scotch; Glen Grant, a single malt scotch, and Something Special and Queen Ann, both blended scotches.

In 1978, the company also reorganized its American operation to form House of Seagram, a marketing division headed by Frank S. Berger, formerly president of Seagram Distillers Co. Mr. Berger resigned in April, 1979, saying that he wanted to work for a company he owned. He was succeeded by William M. Wilbur, previously exec vp-marketing.

According to *Business Week's* annual ranking of the nation's leading liquor brands, Seagram's 7 Crown whisky held on to its spot at the top of the list, but it had to share first place honors with Bacardi rum.

Both brands sold 6,200,000 cases, a drop of 1.6% for Seagram 7 Crown from the previous year's 6,300,000 cases.

Seagram's 7 was backed by $8,647,500 in magazines and $949,800 in newspaper supplements, according to LNA figures. An additional $2,325,700 was spent on a joint promotion between Seagram's 7 and 7UP soft drink.

Seagram's V.O. Canadian whisky, in the No. 4 position, increased sales to 3,875,000 cases in 1978, a 2.6% jump over 3,775,000 the previous year. Seagram's V.O. ad totals: $11,900,400 in magazines, $245,400 in newspaper supplements, $107,600 in outdoor and $817,700 in magazines for a special mail order promotion.

Seagram's gin moved to the No. 10 slot on *Business Week's* 1978 list from the No. 13 slot a year earlier. Seagram's gin sold 2,350,000 cases, up 14.6% from 2,050,000 in 1977. Ad spending behind the gin was $3,222,800, almost all of it in magazines. An additional $940,800 in magazines went to a joint promotion between Seagram's gin and Schweppes U.S.A. bitter lemon to promote a drink called the Wimbledon Whistle.

Kessler whisky dropped to the No. 19 position among all brands, from No. 16 in 1977. It sold 1,725,000 cases in 1978, 4.2% fewer than the 1,800,000 sold in 1977. Kessler ad spending included $982,200 in magazines and $1,025,100 in outdoor.

Additional Seagram brands on the 1978 list were: No. 25, Calvert Extra blended whisky, 1,475,000 cases, down 7.8%; No. 29, Wolfschmidt vodka, 1,175,000 cases, down 4.1%; No. 36, Chivas Regal scotch, 1,050,000 cases, up 5%; No. 38, Lord Calvert Canadian whisky, 1,000,000 cases, up 8.1%; No. 39, Crown Russe vodka, 875,000 cases, down 7.9%; No. 45, Ronrico rum, 675,000 cases, up 12.5%; sharing No. 53, Nikolai vodka, 550,000 cases, down 8.3%, and Crown Royal Canadian whisky, 550,000 cases, up 10%, and No. 63, Passport scotch, 500,000 cases, down 13%.

Backed by more than $1,000,000 in ad support were: Calvert Extra blended whisky ($2,045,900); Chivas Regal scotch ($6,012,800); Christian Brothers brandy ($1,354,900); Gold Seal wines ($1,462,700); Lord Calvert Canadian whisky ($5,179,900); Myer's Jamaican rum ($1,092,300); Passport scotch whisky ($1,740,200); Seagram's Benchmark bourbon ($2,167,200); Seagram's Crown Royal whisky ($7,238,400); Sir Robert Burnett's gin ($1,452,200); White Horse scotch whisky ($1,047,800), and Wolfschmidt vodka ($5,322,500).

▪ Supported by more than $400,000, but under $1,000,000 in ad spending were: Boodles British gin ($637,600); Christian Brothers wines ($755,700); Crown Russe vodka ($471,100); Eagle Rare bourbon ($409,100); Glenlivet scotch whisky ($808,600); Jameson Irish whisky ($631,400); Leroux cordials and liqueurs ($827,000) and Vandermint liqueur ($435,700).

Also this year, Seagram Distillers Co. introduced Famous Grouse scotch, imported from Scotland, into American markets. It is being priced below premium scotch brands, but above standard brands.

Sears, Roebuck & Co.

	1978	1977
Sales	$17,946,000,000	$17,224,000,000
Earnings ...	922,000,000	838,000,000
Advertising ..	417,934,900	364,999,900*

*Revised

Sears, Roebuck & Co., Chicago, the 2nd largest national advertiser, increased its national spending 14% in 1978, to $417,934,900, with 60% or $254,000,000 of that spent on catalogs and direct mail. Measured media for Sears and the Allstate Group increased 10.1% to $163,934,900.

AA's estimate does not include local retail advertising in newspapers, which last year increased 4.3% to $317,000,000.

Retail advertising, the catalog investment and national media expenditures for Sears and Allstate put the company's total 1978 ad outlay at about $725,000,000, an 8% increase over the revised 1977 total.

In its first year under new chairman Edward R. Telling, the company rang up sales of $17.9 billion, a flat 4.2% increase over fiscal 1977, with net income advancing 10% to $922,000,000. The Allstate Group, which brought in an additional $4.84 billion in premiums and financial services revenues, produced 51% or $466,000,000 of its parent's profits.

- Sales from unconsolidated international operations in Canada, Latin America and Europe totaled $2.8 billion, up 12% from 1977.

Sears, whose sales approximate 1% of the gross national product, got more than 6% of the total U.S. general merchandise business and about half of the total catalog business.

Last year, Sears' merchandise sales were 90% of net sales (down from 91.3%), including catalog counter sales in stores of 10.8% (down from 11.4%) and other catalog sales of 9.5% (up from 9.1%). Industrial sales, repair services and finance charge revenues represented 10% of net sales (up from 8.7%).

The catalog operations, from which Sears continued to derive more than a fifth of its sales, includes two large general "wish books" averaging 1,500 pages (Spring-Summer, Fall-Winter), three smaller ones (Christmas, mid-winter and summer); 16 specialty catalogs featuring particular lines of merchandise, and about 15 tabloid sales catalogs.

Last year, the company sent out 17,000,000 copies of each general catalog, and between 100,000 and 500,000 copies of each specialty and sale catalog, for a total of 375,000,000 catalogs—50,000,000 more than the company put out in 1977.

- Sears and its domestic subsidiaries employed an average of 472,000 people in 1978 and sold goods through 3,727 locations.

From 1974 until last year, Sears had wandered from high fashion merchandise lines to bargain-basement sale merchandise, often simultaneously, as it tried to meet the high-end (J.C. Penney) and low-end (K mart) competition that it believed was threatening its turf. The company heavily advertised the merchandise, especially the sale-priced, resulting in steadily growing sales, but flat profits.

But, 1978 marked a turning point for the world's largest retailer as the company reformulated its long range marketing strategy in a move to firmly re-establish Sears as "a family store for middle-class, home-owning America." The "Headquarters Merchandising Plan 1979-1983," revealed in AA last December, spelled out what Sears should and should not be:

"We are not a fashion store. We are not a store for the whimsical nor the affluent. We are not a discounter, nor an avante-garde department store. We are not, by the standards of the trade press or any other group of bored observers, an exciting store.

"We are not a store that *anticipates*. We *reflect* the world of Middle America, and all of its desires and concerns and problems and faults. And we must all look on what we are, and pronounce it good! And seek to extend it. And not be swayed from it by the attraction of other markets, no matter how enticing they might be," the internal document said in its preamble.

- Long term, the plan set goals for each merchandising group and spelled out the means to accomplish these goals. Depending on the group, the plan calls for sales increases of between 71% and 95% by 1983 (over 1977 sales).

The plan also seeks to curtail dramatically run-away ad budgets by instituting an advertising-to-retail sales ratio and lowering that ratio each year. Specifically, Sears would reduce the ratio from 3.55% in 1978 to 3.29% in 1979 and then down to 3% by 1983.

According to projections for that year, Sears will spend $670,000,000 for retail sales of $22.3 billion, and $364,000,000 on catalog sales of $6.3 billion, for a total of $1.03 billion in advertising for the merchandise group.

For the short term, however, Sears began making moves in the fourth quarter to improve profits, but at the sacrifice of sales. It pulled its 10 to 24-page spreads in women's and shelter magazines that advertised Sears home furnishings—a segment that had been heavily promoted up till then. And magazines were almost devoid of Sears advertising in the first five months of 1979.

The result was sales shortfalls, but undoubtedly much more severe than had been anticipated. Through June of this year, the company has suffered 10 consecutive months of sales declines, some soaring higher than 10%. To stimulate sales—and comply with federal price guidelines—Sears cut all catalog prices 5% in this year's Spring-Summer catalog.

- However, the profit picture has brightened. In the fourth quarter, the company reported a record 31% increase in earnings, to $330,000,000, and in the first quarter of 1979, operating income from the merchandise group increased 25% to $217,601,000.

Sears, long the biggest retail advertiser, entered the national ad arena 22 years ago with small magazine expenditures. In fact, until 1967, the largest chunk of the Sears national media total was spent by Allstate, which last year accounted for about 11%, or $18,477,000 of the company's measured media expenditure—down from 12% in 1977.

Including Allstate, Sears last year increased magazine spending 35%, to $55,930,000, even though that schedule was heavily trimmed in the fourth quarter. The other measured media (except outdoor) dropped from their 1977 levels: Network tv down 11% to $71,367,500; spot tv down 4.5% to $21,091,200; network radio down 15% to $4,388,000, and spot radio down 27% to $11,000,000.

Among the most heavily backed product lines in network tv, spot tv and network radio, according to LNA figures, were automotive accessories, down 14% to $8,842,000; Open Hearth Collection, up 52% to $6,460,000; car tires, up 19% to $5,762,000; Settlers Trail Collection, up 330% to $5,643,000; paint, down 2% to $5,234,400; major appliances, down 6% to $4,719,000; men's apparel, up 8% to $4,295,700, and Renfrew Hall Collection, up 133% to $4,273,700.

- In addition, in 1978 there were 22 other product categories for which between $1,000,000 and $4,000,000 was spent in those three media by Sears.

In 1978, the company continued its war against excessive sex and violence in tv programing by pulling its commercials from several programs, including "Three's Company" and "Charlie's Angels."

And this year, the company began the "Sears Radio Theater," a series of 45-minute programs running weeknights on about 200 radio stations, most of them CBS affiliates. The investment was expected to significantly increase radio spending.

In 1978, Sears opened 31 new stores, including 14 full-line, 14 medium size and 3 hard line stores, bringing the totals to 367 full line, 373 medium size and 126 hard line stores. In addition, the company operates 14 catalog merchandise distribution warehouses, 92 retail distribution warehouses and 211 service and parts centers.

As part of its over-all strategy, Sears plans a $2 billion capital investment in new stores over the next five years. The company plans to open 106 full line, 106 medium size and 27 hard line stores, with 100 of the new stores to be built in new market areas and 139 of them replacing existing stores.

- Homart Development Co., a subsidiary, develops and operates shopping centers as either owner or a partner in joint ventures, thus putting Sears in business as a landlord.

In 1978, Homart opened two wholly owned regional shopping centers, and sold one, along with its interest in three joint ventures. The subsidiary's net income for 1978 rose 379% to $40,700,000. In the next five years, Homart plans to open 7 wholly owned and 16 point venture centers.

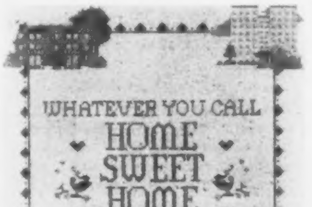
Of the company's 12,000 suppliers, Sears purchases about 24% of its merchandise from companies in which it has equity investments. Suppliers in which it has an interest of more than 20% are: DeSoto Inc. (31%), Kellwood Co. (22%), Roper Corp. (40%) and Universal-Rundle Corp (59%). Domestic suppliers account for about 94% of all merchandise purchases.

Allstate Insurance Co., world's largest stock company insurer of autos (State Farm is the largest among mutual companies), had a total ad budget of about $25,000,000 in 1978, up about 31% from 1977.

- That included direct mail, collateral, p.o.p. and advertising in the Sears catalogs in addition to measured media. Expenditures reported by Allstate were $15,400,000 in network tv and $725,000 in spot. Other spending came to $2,000,000 in magazines, $5,000 in newspapers and $775,000 in production costs.

Insurance premiums and financial services revenues for 1978 totaled $4.85 billion. However, this amount was abnormal because Allstate began converting its passenger auto insurance policies during 1978 from a 12-month term to a six-month term in most states.

On a basis comparable with 1977, insurance premiums written and financial services revenues would have come to about $5.31 billion, or a 12% increase from the $4.75 billion reported in 1977. Net income was $466,000,000, up 12% from $417,000,000.



Allstate advertising accounted for about 11% of Sears, Roebuck & Co.'s measured media total.

SmithKline Corp.

	1978	1977
Sales	$1,112,039,000	$780,337,000
Earnings ...	164,075,000	89,271,000
Advertising*	91,215,000	67,585,000*

*Revised figure

SmithKline Corp., Philadelphia, the nation's 42nd largest advertiser, spent $91,215,000 on advertising last year, a 35% increase over the 1977 expenditure of $67,585,000.

The ad spending jump was said to be a reflection of increased corporate sales performance and was also tied to introductory ad and promotion efforts behind the new drug, Tagamet.

Corporate sales increased 43% to $1,112,039,000, surpassing the $1 billion mark for the first time. Pretax income was up 95% to $261,275,000 and net income rose 84% to $164,075,000.

The product that made SmithKline's sales and profits rise so dramatically and made it a darling of Wall St. was Tagamet, a breakthrough drug for the treatment of ulcers and other gastrointestinal disorders, introduced in 1977.

- Ethical pharmaceutical sales were up 64% to $672,000,000; U.S. sales represented $350,000,000 of that figure and foreign sales tallied

$322,000,000. Gastrointestinal group sales including Tagamet sales were pegged at $315,000,000, up from $90,000,000 in 1977.

Stock dividends for SmithKline were raised twice in 1978, from 27½¢ to 33¢ and from 33¢ to 45¢ per share. The quarterly dividend rose again in January, 1979, to 60¢ and the board of directors recommended a two for one stock split at the company's annual meeting in April.

Another successful product for the ethical pharmaceutical division was Dyazide, an antihypertensive-diuretic. SmithKline's antihypertensive-diuretic group contributed sales of $114,000,000. In May 1979, SmithKline received approval from the Food & Drug Administration to introduce Selacryn, the first prescription drug to lower both blood pressure and serum acid levels.

Proprietary drug sales were up 25% in 1978 to $118,000,000 led by Menley & James' Contac cold product which is in its 18th year in the market. The brand, which claims the No. 1 spot with a 30% market share, received $13,257,000 in measured media spending in 1978, up 10% from the year before.

Contac shares the top of the market with Whitehall Laboratories' Dristan.

- Sales were also up for Sine-off sinus headache product and newer products A.R.M. allergy relief medicine and Contac Jr., a children's cold medication.

Combined spending for Sine-off products, which includes Extra Strength Sine-off, was $5,848,900 in 1978. A.R.M. support doubled in 1978 from $2,220,600 to $4,467,800.

In 1978, SmithKline created a Professional Products division to market nonprescription products previously sold in the U.S. by the pharmaceutical division. The products to be sold by this newly formed division include Teledrin timed release antihistamine allergy medicine; Ecotrin, a coated aspirin for arthritis that doesn't create stomach upset, and Ornex, a decongestant and nonaspirin analgesic/antipyretic.

SmithKline's animal health products enjoyed a good year in which sales rose 38% to $85,000,000.

The animal health products unit includes Norden Laboratories which makes veterinary pharmaceuticals and biologicals in the U.S., and Animal Health Products which sells feed additives, pharmaceuticals and biologicals worldwide.

The company ranks among the top 10 makers of animal health products in the world.

Norden introduced several new products, including Vanguard, a new line of canine vaccines to protect against hepatitis, distemper and other respiratory infections.

SmithKline's Avoset Food Corp., which had 1978 sales of $27,737,000, was sold in October 1978.

Combined sales of cosmetics and sun care products were $25,000,000, the same as in 1977.

Menley & James dropped its Love's cosmetics in early 1979. The group brought in only $9,000,000 in factory sales last year. It received less than $2,000,000 in measured media support.

The company will continue its fragrance business that includes Love's Baby Soft line which received $216,000 in measured media support and Love's Misty perfume which received $103,700 in 1978.

Sea & Ski sun care products sales were off last year, a decline attributed to increased national and regional competition. Sea & Ski tanning lotion and suntan products received a combined total of $378,500 in measured media backing, down from $525,888 in those categories in 1977.

Sea & Ski introduced First-Aid, an all-purpose topical anesthetic and it licensed the Sea & Ski trademark to swimsuit and sportswear makers.

SmithKline Corp.'s Norden Laboratories markets PR-Vac, a vaccina used in the treatment of hogs.

Squibb Corp.

	1978	1977
Sales	$1,515,882,000	$1,341,583,000
Earnings	117,255,000	112,508,000
Advertising	50,000,000	40,000,000*

*Restated

Squibb Corp., New York, the 73rd largest national advertiser, is estimated to have increased its ad spending in 1978 about 25% to $50,000,000. Squibb reported its worldwide ad expenditures equalled $75,000,000 in '78.

Net sales were over $1.5 billion, up 13% from 1977, and net income rose 4% to $117,255,000. Squibb operates four wholly owned subsidiaries: E.R. Squibb & Sons, Charles of the Ritz Group Ltd., Life Savers and Dobbs Houses.

Sales of confections reached $376,293,000 in '78, an increase of 14%. High marketing expenditures together with capital-expansion programs contributed to a decrease in divisional profits which dropped from $57,149,000 in '77 to $52,868,000 in '78.

Total ad spending by Life Savers continued to increase in '78, reaching an alltime high of $24,000,000 in support of its hard roll candy, mints, chewing gum, lollipop and bubble gum brands.

- Life Savers candy, the leading hard roll candy after 60-plus years in distribution, introduced a new ad campaign late in '78. The new campaign, themed "Coming home," builds on the previous "Part of living" advertising and uses celebrities in tv and radio spots to describe their real life memories of the product.

The introductory commercial features Henry Fonda. Total spending of $7,600,000 was placed in network tv and spot radio.

Bubble Yum maintained its position as the No. 1 bubble gum as ad spending increased by more than 50% to $6,500,000 in '78. The brand's third flavor, spearmint, was introduced in the beginning of '78 with a special ad program directed at teen agers and young adults.

BBDO resigned the Bubble Yum account in November, 1978, and subsequently announced that it had acquired Arthur Meyerhoff Associates, which handles most of the Wrigley business.

Life Savers hired Foote, Cone & Belding, New York, to handle Bubble Yum and selected new products. A new child and teen age-oriented campaign for Bubble Yum, themed "Number Yum," was developed for airing at the beginning of '79.

- Care*Free gum continued to improve its position in the sugarless gum market. By yearend '78, it was neck-and-neck with the traditional market leader, Trident.

Squibb says that by the first Nielsen food store reporting period in '79, Care*Free had overtaken Trident by registering a 43.2% unit share. Ad spending in '78 was $6,000,000, even with '77, and was split between network tv and spot radio supporting the "32% more gum" campaign aimed against Trident.

New ad campaigns scheduled in children's network tv were introduced for two younger-oriented brands, Life Savers lollipops and Fruit Stripe gum.

A new animated spokesman, Willie Whirlwind, was used to emphasize the long-lasting flavor benefits of Life Savers lollipops and to announce the new chocolate swirled flavors. Measured spending on lollipops was $2,500.

Fruit Stripe gum enjoyed a successful year in '78 due primarily to its bubble gum line extension and the use of new "Herd of flavors" ads featuring the Fruit Stripe zebra.

Beech-Nut gum received about $1,200,000 in ad support concentrated in eastern and southern high-franchise market via spot tv and radio.

- Breath Savers, a new premium-priced breath mint, began its regional rollout in October, 1978. This new entry in the growing sugarfree mint market is a blue-in-the-middle breath mint containing a long-lasting breath freshener.

Its introductory campaign demonstrates the sugarfree advantages of the new product compared to No. 1-selling Certs. Breath Savers is positioned to appeal to consumers "who want fresh breath but don't want sugar." In '78, measured media spending was $258,800 in spot tv.

Sales of the Charles of the Ritz Group fragrances and cosmetics divisions reached $183,189,000 in '78, a 25% increase over '77. Excluding the gain on the sale of the Lanvin trademark rights in January, 1978, to Lanvin S.A., Paris, profits from operations grew 24% compared to the 19% gain in '77. The company says the year's results were aided by the successful launching of two new fragrances in the U.S.: Enjoli and Yves Saint Laurent's Opium.

Enjoli was the more heavily promoted of the two, with about $3,000,000 backing its introductory campaign starting in September. Enjoli is positioned as the "eight-hour perfume for the 24-hour woman" and supported primarily on net tv and in magazines.

- Opium, introduced in the U.S. in October, spent about $113,700 in measured media in '78. But this figure doesn't come close to estimating the value of Opium's exposure in the media.

Almost from the start of its introduction in the U.S., eyebrows were raised over its advertising and marketing which some groups say capitalizes on a drug that for years was the scourge of the Chinese people.

The original Opium ad, created by Paris agency Mafia, is translated, "For those who are addicted to Yves Saint Laurent." The campaign was voted the best of 1978 by the Fragrance Foundation.

Due to pressure groups, the fragrance's advertising is undergoing a complete overhaul and the name also might be changed. In May, 1979, Opium's media buying agency, Cathy Cash Spellman, resigned. Murray Salit & Associates succeeded, and will also help create ads.

Despite its problems, Opium sales are estimated at $3,000,000 since its introduction in the U.S. and $7,000,000 during its first year in Europe.

The Yves Saint Laurent brand reached a new high in sales in '78, according to the company. Measured spending by Rive Gauche perfume was $1,794,900. Spending for YSL Cologne for Men was $96,554, all in magazines.

The Charles of the Ritz brand of cosmetics products received expanded ad support in 1978, up to just under a million from $283,800 in '77, primarily in magazines with a little spot tv. Initial response to Revenescence moist environment treatment series is extremely favorable, Squibb says.

- E.R. Squibb sales were up 8% in '78 to $723,739,000. Profits from this operation remained stable at $102,894,000 as increased spending for marketing and research and development offset sales increases.

Theragran vitamin tablets, Squibb's leading vitamin brand, received $84,000 in measured ad support, all on spot tv.

The Dobbs Houses subsidiary, the leading operator of airport restaurants in the U.S., reported sales rose to $232,661,000 in '78 from $197,285,000 in '77. No ad support was reported.

Standard Brands

	1978	1977
Sales*	$2,400,000,000	$2,124,311,000
Earnings ...	75,800,000	68,554,000
Advertising*	34,191,000	34,189,200

***Worldwide, less excise taxes**
***U.S., estimated by AA; 1977 figure restated**

Standard Brands, New York, was the 93rd largest national advertiser in 1978, spending an estimated $34,191,000 in advertising, about even with the 1977 investment of $34,189,200. The 1977 figure has been restated.

Worldwide, the company spent an estimated $51,900,000 in advertising in 1978.

The company registered worldwide sales and earnings gains for the 23rd consecutive year. Worldwide sales registered a landmark $2.4 billion, up 13% from the $2.1 billion recorded in 1977, while net income totaled $75,800,000, an 11% jump over the previous year's $68,554,000.

Domestic sales were $1.45 billion, up 5.7% from the 1977 total of $1.3 billion.

However, Standard Brands was not without its management problems as evidenced by the exodus of Reuben Gutoff last year and return of O. Lester Applegate, previously a vp with the company, as president.

- Standard Brands divides its operations into two main lines of business—consumer products and food ingredient products.

The consumer products segment is comprised mainly of the U.S. consumer products group and the beverage group. The former consists of four divisions: Standard Brands Foods, Planters, Curtiss and Pinata Foods.

The beverage group is comprised of the Fleischmann Distilling Co. division, the Julius Wile Sons & Co. division and All Brand Importers. (The Fleischmann and Julius Wile Sons companies were consolidated in 1978 into a single firm, Julius Wile Sons & Co., which is now the parent firm for all three marketing divisions.)

In the consumer products group, all categories, excluding Pinata (acquired in 1977), experienced improved sales and earnings over 1977, accounting for 80% of the company's net sales and 83% of its operating income.

The company sold S&W Fine Foods division of Imasco Corp. in 1978, after having acquired it the previous year.

- In 1978, Standard Brands food division chalked up record sales with increased earnings by both Fleischmann's and Blue Bonnet Margarines.

A new low calorie spread called Fleischmann's Light Corn Oil Spread was introduced while Fleischmann's Egg Beaters Cholesterol Free Egg Substitute was reformulated to appeal more to dieters.

Standard Brands tested its second margarine substitute, Fleischmann's Light, in various markets. At the same time, the company introduced a line of frozen Chinese foods called Royal Dragon Dimsum.

Royal gelatins and puddings experienced sales gains in 1978 in selected regional markets. A new pudding flavor called Royal Coffee Instant pudding was introduced during the last half of 1978.

Standard Brands' confectionery division continued to show substantial growth in sales and earnings, again led by industry leaders Baby Ruth and Butterfingers candy bars.

The Curtiss division was broadened by the introduction of Reggie bar in selected cities. Reggie is a new candy bar named after star N.Y. Yankee baseball outfielder Reggie Jackson. The company also introduced Sweet As You Please, an unsweetened gelatin mix.

- Saf-T-Pops, a high sugar line, was phased out during 1978, in line with the company's corporate nutrition policy. The division accounted for 12% of the company's sales.

Planters division registered record sales in 1978. Planters dry roasted peanut line was strong while record sales were attained for the dry roasted line.

A line of unsalted dry roasted nuts was introduced regionally in 1978 and will be offered nationally in 1979. The Planters line of canister-packaged snacks was expanded to include tortilla chips. Nut products accounted for 17% of Standard Brands sales.

The beverage group also ran well ahead of 1977 in sales and earnings. Fleischmann's Preferred continued to maintain its leadership position in the 90-proof blended whisky category. Canadian Ltd. and Royal Vodka sales both increased.

In 1978, Standard Brands acquired the trademark of the Ezra Brooks line of premium bourbons, including Sour Mash Bourbons. And in early 1979, Fleischmann was named the sole U.S. importer for the Metaxas line, an imported Greek specialty liqueur.

- Julius Wile Sons & Co. continued to experience volume growth in 1978 and benefited from increased consumer demand for quality imported brands. Dry Sack sherry, Benedictine, B&B liqueurs, Bollinger champagnes, Antinori Italian wines and Deinhard German wines continued strong.

The company introduced a complementary sherry brand called Cream Sack in selected markets and expanded its distribution of Souverain premium California wines nationally.

In 1978, Standard Brands acquired All Brand Importers, a leading imported beer distributor, taking advantage of the growing U.S. market in imported beer.

The acquisition added U.S. distribution rights for Foster's lager beer from Australia; Moosehead beer from Canada; Pilsner Urquell beer from Czechoslovakia; Dos Equis and Superior beers from Mexico, and Whitebread ale and Mackeson stout from England.

During 1978, the food ingredients group recorded modest gains in sales but earnings fell below previous years. The category, however, accounted for 20% of the company's total net sales.

Once again, low sugar price levels and industry over-capacity adversely affected the group's largest segment of activity, high fructose corn syrup (hfcs), resulting in only slight gains in the corn sweetener business. Still the segment remained profitable.

- Prospects for future growth appear bright as Isomerose 550 HFCS, a second generation 55% fructose product, was approved by many major soft drink manufacturers. In 1978, the company opened a new HFCS plant at Montezuma, N.Y., and expects to open a new corporate research and development center in the fall to develop new products.

Fleischmann vinegar division experienced higher sales and earnings in 1978 and maintained a leadership position in its industry. The Bakery Ingredients division began marketing "customized" margarine shortening which contains no artificial color or flavor.

The international group chalked up record sales and earnings in 1978, with strong performances in Canada and South America. Several new products were introduced in Canada by Lowney's Ltd., the company's confectionery and snack division, and new products are being developed in other areas.

- Standard Brands, in its 10K and annual reports, indicates worldwide advertising expenditures of $51,917,000, up 2.3% from $50,741,000 in 1977.

Standard Brands products received $24,253,000 backing in domestic measured media during 1978. The company's heaviest backed product, Planters nuts, received $4,788,000, while Fleischmann's margarine received $3,806,000. Spending for Planters oil went up slightly to $583,000. Total media expenditure for the entire Planters line exceeded $6,535,500.

An additional $1,549,000 was spent for Blue Bonnet margarine, while Blue Bonnet Spread Imitation margarine received $1,068,300.

The introduction of Reggie bar was backed by $805,800 in measured media spending, a figure expected to rise with increased sales. The newly acquired Pinata Mexican foods line received $1,712,500, mostly for spot television.

- Spending in 1978 for beverage operations, including Fleischmann Distillers, All Brand importers and Julius Wile Sons & Co., totaled just under $11,100,000. The company spent $1,314,300 for Dry Sack and Cream Sack, plus $1,056,800 for Benedictine, B&B and Cafe Benedictine liqueurs, and $118,300 for Pernod liqueur.

The $24,253,000 total measured media expenditure for 1978 was 15.3% lower than the previous year's $28,629,200. During the year, Standard Brands concentrated its advertising efforts in television with nearly $9,000,000 allocated to network tv and $8,500,000 for spot tv.

The two television categories combined to represent nearly 75% of the total measured media budget, up from last year's 64% allocation.

In 1978, the emphasis shifted away from radio advertising for Standard Brands, with only $502,000 spent. Measured media support reached more than $4,000,000 for magazines and $1,600,000 for newspapers.

- During 1978, Standard Brands assigned its major food products account to Wells, Rich, Greene and Doyle Dane Bernbach, both in New York, dropping Ted Bates & Co. after 40 years of service.

WRG picked up Fleischmann's margarine and spread accounts and Fleischmann's Egg Beaters, with total estimated billings placed at $7,000,000.

DDB added Smooth & Easy sauce and gravy bar, Royal gelatins and desserts, pet foods and Tender Leaf tea to its $5,000,000 Blue Bonnet margarine and spread account, for a total of about $7,000,000 in billings.

The company also assigned its Julius Wile Sons beverage division, estimated at $4,000,000 in billings, to de Garmo Inc. of New York, while Lee King & Partners of Chicago was assigned the Reggie bar account.

The Spanish Advertising Marketing Service, a division of deGarmo, was assigned Royal gelatin and puddings for Spanish-language campaigns.

In 1979, Sacks & Rosen of New York was awarded the Metaxa account while Botsford Ketchum of San Francisco was assigned Pinata Foods.

Advertising*	78,000,000	72,000,000

*AA Estimate
†Domestic
††World Wide

Sterling Drug, New York, the nation's 50th largest advertiser, spent an estimated $78,000,000 for U.S. advertising in 1978, up 8.3% from 1977. Worldwide ad expenditures were reported by the company at $174,461,000, up from $156,469,000 in 1977.

Sterling's worldwide sales were $1.3 billion, up 11% from $1.2 billion in 1977. Sterling markets its products in the U.S. and 125 other countries.

Effective April 1, 1978, Sterling shifted products between its Breon and Winthrop divisions to increase marketing, sales and distribution effectiveness. Breon became solely a specialty pharmaceutical house by transferring to Winthrop its over-the-counter products, Haley's M-O laxative, Campho-Phenique antiseptic, Bronkaid anti-asthmatics, Caroid and Bile Salts laxative and Astring-o-sol mouthwash.

In return, Breon received Isuprel bronchodilator, Marcaine, Carbocaine and Novocain anesthetics; Levophed and Isuprel emergency treatment injectables.

In an unrelated move, Winthrop's Talwin analgesic was assigned to Klemtner Advertising from BBDO's Frank J. Corbett Inc. unit.

■ A new consumer division was set up within Winthrop to market its nonprescription products. Winthrop continues to market prescription products also, including Demerol analgesic; Hypaque, Telepaque and Bilopaque radio diagnostic agents, and pHisoHex and SeptoDyne antiseptic skin cleansers.

Stering's prestige suffered a blow when the National PTA's action board early in 1979 cited the company as the "most offensive advertiser" for placing its tv spots on programs it called "low quality" and for not showing up on shows rated "exemplary efforts."

Glenbrook Labs' Bayer line, which shifted its more than $15,000,000 account in 1978 to SSC&B from Doyle Dane Bernbach shortly after Sterling received a rebuke from the Food & Drug Administration for running ads that the FDA said misrepresented an earlier FDA report on the safety issue between aspirins and nonaspirins, returned to a pure aspirin "100% pain reliever" theme. That was the first campaign SSC&B created for Bayer aspirin since it was assigned in February, 1978.

■ Of all major analgesics, Bayer aspirin has suffered the most, as Johnson & Johnson's McNeil Consumer Products' Tylenol nonaspirin captured the No. 1 slot in the $750,000,000 market. With a 20% share, Tylenol is ahead of American Home Products' Anacin (13%), Bayer (10%) and Bristol-Myers' Bufferin (10%).

The additional assignment of Bayer to SSC&B brings the total amount of Sterling business now in that shop to more then $35,000,000—enough to make it the company's major agency by far.

Nobody kills more rats than d-CON. Nobody...
d-CON

Year after year after year, d-CON has outsold all other rat bait combined. Last year, more d-CON® Rat Killer was sold than ever before. The reason's pure and simple: d-CON works.

Only d-CON has the exclusive toxicant Wincon.® d-CON wipes out everything from your biggest, toughest, most destructive rats right on down to pesky mice.

Try d-CON yourself and see why it outsells all other rat bait combined!

d-CON: America's #1 Rat Killer. Again.

Sterling Drug's d-CON rat killer was advertised in magazines and spokesman Muhammad Ali pitched it on television and in print ads.

The SSC&B assignment also includes Bayer children's aspirin, Bayer Timed-Release aspirin and Bayer cold tablets, but none of these entries is heavily advertised.

Although Sterling already markets a cold tablet—a very minor entry—under the Bayer name, it was seen considering another product Bayer Plus. A tv commercial was run in Davenport, Iowa, mainly to assess consumer reaction; no product could be found on retail shelves. A company representative said the product was in a very limited test.

Sterling increased its research and development budget 13% in 1978 to $42,000,000. Spending in this area is expected to rise another 20% in 1979, the company said.

In the area of doctor-recommended, over-the-counter medicines marketed by Winthrop's consumer products division, sales of Neo-Synephrine decongestants in 1978 were aided by the first full year of marketing of Neo-Synephrine II long-acting products.

Neo-Synephrine II nasal spray was bolstered by $1,681,200 in ad spending, the overwhelming bulk of it in network tv. That total was more than double 1977's ad expenditures of $828,000 for the product.

■ In 1978, Glenbrook concentrated its marketing activities to support products that appeared to have the most growth potential. There was a strengthening of sales of Phillips' Milk of Magnesia to record levels. Midol Caplets' ad backing was raised to $3,120,500 from $2,320,100 in 1977, boosting its sales from a record 1977.

Sterling's principal consumer products division, Lehn & Fink, markets household products and cosmetics, fragrances and toiletries under the Givenchy, Crepe de Chine, Dorothy Gray, Tussy and Ogilvie names. It also serves industrial and institutional customers with a variety of sanitary maintenance products.

Parfums Givenchy, a division of Lehn & Fink, assigned its estimated $750,000 to $1,000,000 account to Levine, Huntley, Schmidt, Plapler & Beaver. The fragrances include Monsieur Givenchy, Givenchy Gentleman, L'Interdit, Givenchy III and Le De. Previous agency was SSC&B.

Among the Lehn & Fink division's most popular consumer products are the Lysol disinfectant and cleaner line, for which Sterling spent more than $19,000,000 in measured media. Receiving especially heavy support were Lysol liquid deodorizing cleaner, $3,411,200; Lysol spray basin, tub and tile cleaner, $3,316,800, and Lysol spray disinfectant, $8,671,400.

Time Inc.

	1978	1977
Sales	$1,697,585,000	$1,249,816,000
Earnings ...	125,742,000	90,539,000
Advertising	76,348,000	45,951,000

Time Inc., New York, the 53rd largest national advertiser, increased its ad expenditures 66% to $76,348,000 in 1978, excluding the publishing of direct mail promotion or pro rata costs of advertising within its own magazines.

Measured media spending was $60,010,300 in 1978, up 34% from the $44,718,700 spent in 1977. Time attributed the increase mainly to additional magazine advertising and general promotion, added circulation promotion and the inclusion, for the first time, of a full year of Book of the Month Club advertising expense.

The largest segment of the Time Inc. ad budget went into magazines; the publisher and diversified forest products company allocated $23,391,000 for periodicals. The second largest chunk, $23,190,700, went into spot tv, duplicating Time Inc.'s ad spending patterns of the past. In 1977, the company spent $18,955,700 in magazines and $18,225,000 in spot tv.

■ Although network tv accounted for a relatively small percentage of ad dollars, it showed a dramatic percentage increase. In 1978, Time Inc. plowed $6,051,000 into network tv; a year earlier, the company spent $1,390,400 in this medium. Time Inc. also spent $5,546,000 in newspapers; $993,700 in spot radio; $815,800 in network radio, and $22,100 in outdoor.

The company's publishing operations provided 55% of revenues and 53% of pretax earnings and helped boost revenues 36% and earnings 31%.

In 1978, Time's magazines—*Time, Sports Illustrated, Fortune, People, Money* and *Life*—accounted for 34% of the company's revenues, down slightly from 37% a year ago.

Contributing the greatest share was *Time*, which for nine consecutive years has been the leading magazine in worldwide ad revenues. Last year, the company's flagship magazine raked in $260,000,000 in ad revenues. Domestically, it displaced *TV Guide* as the No. 1 magazine by attracting $199,000,000 in U.S. ad revenues.

- Saddled with rising postal and production costs, *Time* hiked its subscription price from $26 to $31 in July; in January, 1979, it raised its newsstand rate from $1 to $1.25. In February, 1979, the magazine made ad history with a 64-page Gulf + Western Industries annual report insert, the largest single ad ever to run in any medium.

The newsweekly, which held its rate base at 4,250,000, had the largest ad budget of the company's magazines. Its $12,380,000-plus was spent largely in spot tv ($10,923,500); followed by magazines ($777,000); network radio ($441,500); newspaper supplements ($212,300), and network tv ($26,000).

Sports Illustrated's ad revenues totaled $112,973,000, making 1978 the first time in the national weekly's 24-year history it broke the $100,000,000 mark. In January, 1979, *SI*'s rate base moved to 2,250,000. Last year, its subscription rate climbed to $25 from $20 and the newsstand price was raised from $1 to $1.25.

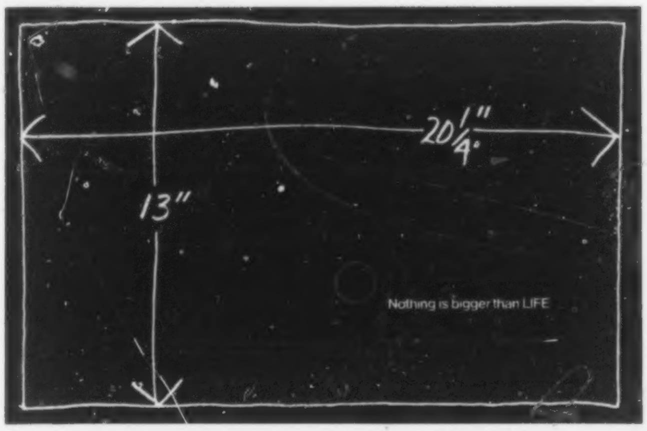
The fourth largest magazine in the U.S. in terms of ad revenue, *SI* plowed most of its $5,540,200 ad budget into spot tv ($4,367,800). The sports weekly also spent $522,700 in magazines, $418,100 in network tv; $139,200 in newspaper supplements, and $92,400 in network radio.

- *People*, which celebrated its fifth birthday last year, had ad revenues of $66,390,000, up 60% from a year earlier. Sold primarily at newsstands and check-out counters, the magazine raised its rate base to 2,300,000 in January, 1979. Last year, the weekly increased its cover price from 60¢ to 75¢.

People allocated the lion's share of its $7,107,600 ad budget to network tv, where it spent $5,270,200. The magazine also favored spot tv ($1,369,000) and also expended $281,900 in network radio; $93,600 in magazines and $92,900 in newspaper supplements.

The 47-year-old *Fortune*, which switched to an every-other-week frequency in January, 1978, upped its rate base to 660,000 in January, 1979. Ad revenues for the business magazine climbed to $41,854,000, up 43% from 1977. Last year *Fortune* parceled out $283,200 of its total $425,500 ad budget for spot tv and put the remaining $142,300 in magazines.

Money had its best year in 1978. The monthly, which raised its rate base to 800,000, pulled in $10,207,000 in ad revenues. Of its total $3,034,200 ad budget, the magazine invested $2,982,200 in spot tv. Its only other ad expenditure was $52,000 in network tv.



Time Inc.'s relaunched *Life* was supported by a $909,800 campaign that included spot and network tv, newspaper supplements and bright red magazine ads.

- The company's most dramatic magazine news was the resurrection of *Life*, a magazine which suspended publication as a weekly in 1972 and was brought back to life as a monthly devoted to photojournalism in October, 1978.

Initially the company set a rate base at 700,000, but that quickly swelled to 1,000,000 in January and is expected to go to 1,200,000 in January, 1980. At $1.50 for single copies and $18 for a year's subscription, *Life* brought in $2,499,000 in ad revenues in just three issues.

To promote itself, the reborn publication spent $909,800. Spot tv was the biggest recipient ($541,800), followed by network tv $248,700), newspaper supplements ($46,500) and magazines ($36,800).

Time-Life Books, which contributed $250,000,000 in revenues in 1978, launched three new series: An encyclopedia of collectibles, "The Seafarers" and "The Good Cook." It also publishes single titles and limited editions of photographic art.

Books spent more than any other Time Inc. division on promotion: $13,254,300, of which $10,377,600 was expended in magazines. Another $2,580,000 was put into spot tv and $296,700 was spent in newspaper supplements.

The wholly owned trade book publishing house, Little, Brown & Co., invested $1,314,900 in magazines to promote its general and children's books, legal and medical books and college textbooks. Its New York Graphic Society Ltd. spent $385,000 in magazines to publicize the art reproductions and books it publishes.

- The Book-of-the-Month Club, a wholly owned subsidiary, invested $2,715,800, all but $198,800 in magazines and the rest in newspaper supplements to promote its book club, records, graphic arts and educational programs.

Among Book of the Month Club's other operations, the Dolphin Book Club spent $27,400 in magazines; the Fortune Book Club, $157,700, also in magazines, and the now discontinued Good Health Book Club, $31,300 in magazines. There is also a Cooking and Krafts Club and Quality Paperback Service. The *SI* Book Club, operating within this division, also plowed another $146,200 into magazines.

In March, 1978, Time Inc. purchased the *Washington Star*, a 126-year-old afternoon daily newspaper in the nation's capital. Since its buy, Time has undertaken an extensive improvement of the paper and promotion effort.

In 1978, the company spent $126,400 to advertise its new newspaper. Some $112,600 went into spot tv and $13,800 into magazines. Under a separate sweepstakes promotion program, Time invested another $23,800 in magazines.

Toyota Motor Sales U.S.A.

	1978	1977
Sales[†]	**$12,767,840,000**	**$11,161,313,000**
Earnings[†] ...	**567,249,000**	**569,645,000**
Advertising[‡]	**64,575,700**	**49,175,900**

[†]Worldwide; 1977 figures restated; fiscal year ended June 30
[‡]U.S. Only

Toyota Motor Sales U.S.A., Torrance, Cal., the 61st leading national advertiser, is estimated to have increased advertising 31% in 1978 to $64,575,700, following an increase of 16% in 1977.

The company is a subsidiary of Toyota Motor Co. and Toyota Motor Sales Ltd. of Japan which reported '78 worldwide sales of $12.76 billion, up over $11.16 billion for '77; earnings, however, were down from the 1977 total of $569,645,000 to $567,249,000.

In the U.S., which accounts for 40% of the company's exports, Toyota maintained its position in '78 as the best selling import car and truck. The Japanese auto maker continued the sales pace established three years ago when Toyota overtook Nissan's Datsun import for the No. 1 spot and sold 536,682 units in '78—441,800 cars and 94,882 trucks—to put its share of the import car market at 22%.

The Corolla model again was Toyota's sales leader, but the volume of Celica sales continued to grow and now accounts for more than 31% of Toyota's total sales.

MARKETING PROFILES

Toyota continued its racing involvement with Pro/Celebrity Races for Charity at both the Long Beach Grand Prix and the Toyota Grand Prix of the U.S. at Watkins Glen. Toyota also served as the official pace car at both races.

Spot tv, newspapers and radio were used in major northeastern markets to support the company's full sponsorship of the Toyota Grand Prix of the U.S.

The company also began sponsoring another type of racing in '78—stadium motocross events. In addition to being the official truck of Team Yamaha, Kawasaki and Suzuki, Toyota also served as a primary sponsor of the $500,000 Toyota/AMA Supercross Series for '79.

And despite being headquartered on the West Coast, Toyota maintained its sponsorship of telecasts of New York Yankee baseball games in '79. The company also sponsored a series of 13 one-hour weekly radio shows.

- During '78, the company launched its "$1,000,000 Dash for the Olympics" promotion, a contribution to the U.S. Olympic Committee to help U.S. athletes train for the Moscow Olympics in '80.

The promotion was an initial effort to build a long term franchise for Toyota's $10,000,000 sponsorship of the Moscow games. This represents a substantial boost over the company's $1,600,000 tv sponsorship of the '76 Olympics.

On the heels of the Olympics promotion came a $1,000,000 contribution from Toyota (to celebrate its 20th year in the U.S.) to be used for programs to promote close U.S.-Japanese relations.

The company stayed with its "You asked for it, you got it, Toyota," ad theme last year, using the challenge, "If you can find a better built small car than a Toyota, buy it," as a backup theme.

A redesigned half-ton truck was introduced for 1979 and, at midyear, a 4x4-pickup and a new, longer and more powerful Celica—the Supra—were added to the Toyota line. The ad effort supporting the introduction of the mid-year models was the biggest new product announcement in the company's history.

Founded in 1937, the parent Toyota Motor Co. Ltd. today encompasses 12 subsidiaries bearing the name Toyota or Toyoda (the actual family name). Besides automotive products, the company manufactures machinery tools, fork lifts, spinning and weaving machines, cotton yarns, fabrics and synthetic yarns.

Trans World Corp.

	1978	1977
Sales	$3,695,000,000	$3,389,300,000
Earnings....	86,600,000	57,300,000
Advertising*	37,500,000	36,750,000

***Estimated by AA**

Trans World Corp., New York, the 85th largest national advertiser, increased its advertising by about 2% to $37,500,000 in 1978.

Widebody 1011
It's the only way TWA flies to California
TWA

TWA emphasized its routes to the Southeast and Southwest to help boost traffic during weak winter months.

Spending for Trans World Airlines alone totaled $36,267,695 in 1978, up from $35,642,115 the previous year. The remaining ad support went to Trans World's major subsidiaries, Canteen Corp. and Hilton International Co.

Corporate earnings reached an all-time high of $86,600,000, up 51% over 1977, while sales rose 9% to $3.69 billion.

The airline and two major subsidiaries, Canteen Corp. and Hilton International Co., were restructured during the year to become subsidiaries of a new parent company known as Trans World Corp., effective Jan. 1, 1979.

TWA's chairman and chief executive officer, L. Edwin Smart, said that the new structure should provide a strengthened basis for dealing with financial affairs and greater flexibility for over-all operations.

While the airline, along with most of the aircraft industry, experienced disappointing traffic growth and unfavorable profits in the final months of 1978, it recorded increased annual profits for the third year in a row (TWA lost $86,279,000 in 1975).

The pre-tax earnings of the airline increased 29% over 1977, to $35,100,000. Canteen Corp. overcame severe product cost inflation to record pre-tax profits of $21,700,000, a 5% decrease from 1977, but still the second best year in Canteen's history. Hilton's pretax earnings rose 37% above those of 1977 to $44,400,000, the best in its history.

Major steps were taken to expand the airline's route system. Several new routes were added and applications for others were filed. TWA placed emphasis on routes to the Southeast and Southwest where traffic patterns will help offset the airline's seasonal revenue cycle by increasing traffic during the historically weak winter months.

In addition, route and schedule adjustments were made to provide increased traffic at TWA's key midwestern airports, Kansas City and St. Louis.

Orders for new aircraft and equipment totaling $300,000,000 were placed in 1978. This includes 10 Boeing 727-200 jets for delivery in October 1980, as well as three Boeing 747SP long-range widebody jets, also for delivery in 1980. In addition, the airline has acquired options for 30 more 727s and six 747s for delivery in 1981 and 1982.

TWA also has options for 11 additional Lockheed 1011 widebody aircraft, and was scheduled to accept delivery during the spring months of 1979 of seven Boeing 727s ordered in 1977.

The new acquisitions were a partial step taken to remedy one of the problems facing the airline in the future. This is the fact that almost half of its 232-plane fleet consists of older Boeing 707s. By 1981, many of these will be too noisy to meet the government's increasingly strict noise regulations and so may have to be grounded.

The company's passenger traffic growth of 9.5% exceeded its capacity growth of 1.9%, and this contributed to an increase to 63.2% (from 57.4%) in its passenger load factor (the percentage of seats occupied by paying passengers).

- The airline introduced a "check in once and get two seats" passenger service feature aimed at keeping travelers flying TWA roundtrip. By making it possible to obtain seat selection and boarding passes for return or connecting as well as originating TWA flights, this service reduced the amount of time passengers had to spend in airport lines.

A special computer check-in system was installed to handle the procedure when the passengers first arrived at an airport to pick up the two boarding passes.

TWA dropped its controversial three-class service in December due to a lackluster reception by business travellers and budget-fare passengers. The fare package had been initiated in October. The service provided segregated seating, higher-priority check-in, beefed-up meal choice and extra service for the business traveler.

On the same day that TWA announced the discontinuation of the three-class service, the airline also unveiled two new promotional fares for the slack months of February and March. A child between the ages of two and 11 could fly free when accompanied by an adult during that period, and a full-fare passenger could bring along a companion for 50% of the existing coach fare. The airline also relaxed the length-of-stay restrictions on its Super Saver fares.

At mid-year, TWA's in-flight and ground service personnel began wearing distinctive new uniforms created for the airline by fashion designer, Ralph Lauren. The new uniforms, along with newly refurbished interiors for much of TWA's fleet of aircraft, were intended to give the airline a crisper, more professional appearance.

The airline currently is hiring and training several hundred new pilots, flight attendants, maintenance personnel, sales and reservations agents and baggage-handling employes to keep pace with the airline's growth expectations.

The new uniforms, interiors, and personnel hiring reflected a shift in TWA's promotion emphasis away from discount-fare packages and toward improved service. In early 1978, TWA began a new umbrella ad campaign with the theme, "TWA: The great airline to the great cities."

Of greater significance to the advertising industry was TWA's shift, on April 12, of its $30,000,000-plus advertising account to Ogilvy & Mather. Previously the TWA account had been handled by Wells, Rich, Greene. But WRG sacrificed it to acquire Gordon & Shortt, Dallas, and that company's account with Braniff.

UAL Inc.

	1978	1977
Sales	$3,890,298,000	$3,267,282,000
Earnings ...	302,255,000	135,090,000
Advertising	50,624,437	30,310,200

UAL Inc., Elk Grove Township, Ill., the nation's 73rd largest national advertiser, upped its ad budget by a whopping 67% in 1978 to $50,624,437.

UAL Inc. is the parent of United Airlines, Western International Hotels and GAB Business Services. The three companies tallied up sales of $3.9 billion in 1978, a 19% increase over the previous year. Net earnings soared 124%—to $302,255,000 from $135,090,000 the year before.

United Airlines, the nation's largest airline and UAL's largest subsidiary, can take credit for a good deal of that profit record. The '78 skies were bright for United—and only turned cloudy with labor and DC-10 problems in 1979. Last year, United pulled in $284,301,000 in net earnings, a 286% surge over '77's restated earnings of $73,694,000.

- The past year saw some significant shifts in United's executive suite. President-chief executive officer, Richard J. Ferris, took over as chairman and Percy Wood became president-chief operating officer. In marketing, Howard Putnam, group vp-marketing, moved to Southwest Airlines as president and was succeeded at United by William C. Speicher.

With Mr. Ferris at the controls, the corporation complied with the exec's plea urging increased utilization of the United fleet.

With some switches in schedules, and a host of super saver offers, United's revenue passengers were up 16.5%, its revenue passenger miles up 19.5% and 129 flights were added daily. Daily departures hit 1,700, providing 20% more seats.

In the congested 1978 airline market, United held a 24% share of revenue passenger miles—an increase of 1.5% over 1977, according to the airline.

In trunk airlines' ranking, United shimmied up to the No. 3 rung—from 6th in 1977, in terms of return on investment.

- Long an advocate of airline deregulation, United saw its crusade through the Civil Aeronautics Board, Congress, on up to Jimmy Carter and his White House. With the passage of the Airline Deregulation Act of 1978, an airline can add any destination to its route unless it can be proved it is not in the public interest to do so.

So the first thing the company did was to claim—under a provision of the new deregulation law—a route between Buffalo and Orlando which was certified to another carrier but which the other carrier did not operate.

Then United received government approval on a Seattle/-Portland to Hawaii route. The airline heralded introduction of this new Pacific route with an "Aloha Fare" that offered savings of up to 70% of regular rates. The offer ran from Nov. 1 through Nov. 19.

While other airlines confused everyone with special treatment for the business traveler, United opted to offer 20% off first class fares. After the first of the year, but before the strike, the airline applied to the CAB for a 10% increase in its Super Saver discount and a 5% increase in its Freedom Fare discount. Increasing the discounts lowered the cost to passengers and they filled empty seats during the traditionally slow February and March period.

- Last year, the world's largest airline stunned the rest of the industry with a record purchase of new aircraft—to the tune of $1.6 billion. As part of that order, United bought 30 new 767's the first of which should be in the air by mid-1982.

With the buy transacted and scheduling revamped, United appeared to face clear skies at the start of 1979.

Then at the end of March, the airline was grounded with a thud when its machinists went off on strike, forcing the airline to shut down for 58 days.

- Once back in the skies, United sent its competitors scrambling as it charged back with an offer of half-fare coupons. American reluctantly jumped on the coupon bandwagon, while the other airlines respectfully declined.

The coupons became the craze and, according to United, the ploy fulfilled the company's expectations, and planes' seats.

For the summer months, United pulled a rash of super saver fares for the whole family—and with special deals for kids, now under 18-years of age. (The cut-off age of child and adult used to be 12).

Of United's passenger advertising, $9,401,500 went into network tv, $8,378,600 into spot tv and $2,263,200 into magazines. The company spent $1,200,000 on freight advertising in magazines and newspapers.

- Western International Hotels had a record year in 1978, although net earnings slipped a bit to $14,468,000 from $16,037,000 in '77. The chain now numbers 49 hotels in 13 countries. Operating revenues were up in '78 to $330,231,000,

During the year, UAL Inc. entered United Airlines' "Fantastic Fabulous Flying Fare" into the industry's maze of discount fares.

a 26% jump over 1977's tally of $262,510,000. The Western International chain spent $1,477,700 in the six measured media in '78.

*AA estimate

Unilever's U.S. subsidiary, Unilever U.S. Inc. (which includes Lever Bros., New York, and Thomas J. Lipton Inc., Englewood Cliffs, N.J., but excludes industrial subsidiaries), was the 18th largest national advertiser in 1978 with estimated ad spending of $145,000,000, the same amount it spent in '77.

Sales increased to $1.8 billion from $1.3 billion, while earnings increased to an estimated $36,000,000.

Lever Bros., had sales of $860,800,000 in 1978, a record, while operating profits registered an $11,000,000 loss. The company attributed the loss to what it termed three positive actions taken by the company during '78: A huge investment to launch Signal mouthwash nationally; the decision to close, over the next three years, the production operation at the Edgewater plant, which had become uneconomical, and the ongoing "Project Change," a broad-scale program that encompasses Lever's commitment to the improvement of its efficiency through plant modernization.

The acquisition of the National Starch Chemical Corp. by Unilever was approved by stockholders of National Starch on Aug. 15, 1978, and was completed on that date.

- The company reported that 1978 was a turnaround year for household products, Lever's largest business unit. Last year showed a considerable rise in volume, primarily due to increased sales for laundry detergents, toilet bars, Final Touch and dishwasher All.

Wisk, the nation's No. 1 heavy-duty liquid laundry detergent, sold more than 10,000,000 cases, making it the largest single brand in Lever history, as well as the top-selling soap or detergent throughout the worldwide Unilever organization. According to Leading National Advertisers, Lever spent $10,458,500 promoting Wisk, all in tv, as it did last year.

Concentrated All, Lever's second largest brand, had a good year and remains the country's No. 1 low-sudsing laundry powder, outselling P&G's Dash more than two-to-one. Lever spent $8,187,100 promoting All powder detergent in 1978, and $1,012,100 on the liquid form.

The company reported increased sales in 1978 in its toilet bar sales, primarily due to Dove, Caress and Lifebuoy. Measured advertising expenditures for these three soaps were $5,029,400, $3,172,900 and $2,341,600, respectively.

- Sales for the personal products business were reported at record levels for the fifth consecutive year, largely due to the successful national introduction of Signal mouthwash.

The company reports that Signal's success was achieved despite hard-hitting competitors who greatly increased their promotion levels and even copied Signal's tv advertising theme (*i.e.*, effective against strong odors like garlic and onions). Lever invested $6,862,800 in measured advertising for Signal in 1978.

In the same division, sales volume of Aim, Close-up and Pepsodent continued to grow in 1978. Measured advertising for Aim amounted to $13,742,000 in 1978 (vs. $13,470,000 in '77); for Close-up, $10,586,000 (in '77, $10,924,100) and for Pepsodent, $3,470,000 (with $4,008,000 in '77). Pepsodent toothbrushes maintained the No. 1 position in the marketplace.

- The foods business unit achieved improved sales over 1977. Volume for the Imperial margarine line increased even though Lever phased out Imperial Light-Blend. Promise margarine was restaged in its strong share areas with new packaging and advertising.

Measured advertising for the two margarine brands totaled $5,472,800 for Imperial ($6,000,000 a year ago) and $1,702,300 for Promise, (up from $850,000). Lever's other margarine, Autumn, spent $144,900 in measured advertising, down from $305,000.

Mrs. Butterworth's syrup enjoyed another record year and after a neck-and-neck race with Aunt Jemima took over the No. 2 spot in the pancake syrup market, Lever invested $2,536,300 in advertising in 1978 for Mrs. Butterworth.

Unilever U.S. Inc. used a baseball tie-in to promote its Aim toothpaste.

Lipton had sales of approximately $617,000,000 in 1978, an increase from $574,572,000 in 1977. Lipton announced the acquisition of Lawry's Foods effective July 6, 1979. Lawry's is engaged in the development, manufacture and sale of a general line of specialty food products. Its ad budget is estimated at $7,500,000.

- Lipton spent $5,455,300 promoting its tea bags in 1978 and another $2,882,700 pushing its regular, instant and ice tea mixes. The company also spent $180,700 on its Filter Blend tea, which was introduced in '77 and works in automatic coffee machines.

During 1978, Lipton test marketed Lipton flavored tea bags in five varieties—cinnamon, orange and spice, lemon and spice, mint and black rum. The flavored tea market is estimated as a $20,000,000 to $30,000,000 market that R.C. Bigelow Inc has "owned" for many years.

Lipton's campaign, which featured a five variety sampler, was created by SSC&B, and backed by $637,000 in measured media.

Lipton introduced Lipton Lemon Tree Powder mix into the $530,000,000 powdered drink market during 1978. This product is a powdered version of the canned lemonade flavored drink launched last year via local bottlers.

Lemon Tree is getting tv, newspaper supplement and couponing support, with the media budget reportedly at about $5,000,000 for this year. The account is handled by SSC&B. During 1978, the Lemon Tree advertising expenditure was $1,103,600.

The soup market is Lipton's second major area of concentration, consists of canned, dry mix and single serving dry products all vying for pretty much the same customers.

Ad spending in these categories was $3,191,800 for the dry mix products and $5,984,100 for single serving entries, which includes Lite-Lunch Instant Meal in a Mug introduced in 1977.

consumer products and received the largest portion of Union Carbide's advertising dollar.

Sales worldwide hit a record $7,869,700,000, up 11% from 1977, with the U.S. sales comprising about 68% of that figure. Earnings were up 2% to $394,300,000. Sales of consumer products rose 13% to $1,356,000,000, while earnings rose 22% to $178,000,000.

Union Carbide manufactures chemicals and plastics (37% of 1978 sales and 36% of income); gases and related products (16% and 19%); metals and carbons (18% and 19%); batteries, home and automotive products (17% and 21%), and specialty products (12% and 5%). International operations accounted for 32% of sales and 27% of operating profit in 1978.

- One of the largest producers of chemicals in the U.S., the company is known to the consumer primarily through Prestone auto products; Glad plastic bags and wrap; Eveready batteries, flashlights and lamps, and Simoniz waxes and polishes.

Union Carbide spent 64% of its measured ad dollars in tv, with printed media getting 28%, radio 7% and outdoor 1%. In 1977, 73% went into tv, with 20% going into print.

For the first time in recent years, the Eveready product line outspent the Glad line, making it Union Carbide's No. 1 ad spender. Ad support for the battery brand was $9,118,900 (80% in tv, 13% in print), up 65% from 1977.

- Eveready continued to focus the majority of its ad expenditures behind the fast-growing Eveready Alkaline Power Cell. Tv spots again pitted a combative Robert Conrad against skeptical consumers, daring consumers to call the Eveready Alkaline a "regular battery."

The heavy network tv schedule was supplemented in the second half of 1978 by spot tv and outdoor in major markets. Promotions included a $1 cash refund offer which was delivered to over 33,000,000 homes via Sunday supplements in October, and a 20¢ store coupon delivered in December in r.o.p. newspapers to over 30,000,000 homes. Eveready's agency is William Esty Co.

The Glad line of plastic bags and wrap got $7,090,300 in measured ad support in 1978, about the same as in 1977. The Glad two-ply trash bag, introduced in 1977, continued its tv campaign describing the new product "like a bag-in-a-bag--two mils thick, strong and puncture resistant." Support was extended to national radio during the fall of 1978.

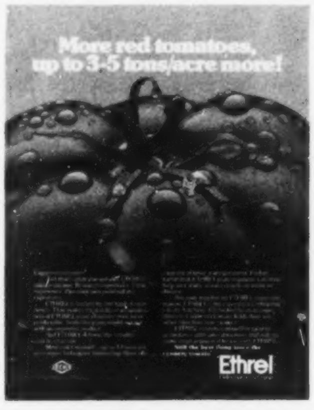
- Prestone automotive products received $2,924,700 in measured ad support last year, down (again) from the $3,661,000 spent in 1977.

Union Carbide launched its Prestone tv campaign to coincide with the start of fall sports; ads told consumers to "take out the old, put in the two, put in Prestone, Prestone Two," stressing the importance of a fresh fill of Prestone II anti-freeze for maximum protection.

A new product, Prestone Super Flush, was introduced in 1978. Packaged in a miniature Prestone jug, the new product was supported with television tags on Prestone commercials. Leo Burnett Co., Chicago, was named the new Prestone agency in February, 1978, replacing Ogilvy & Mather.

The Simoniz line of car waxes was supported by measured media dollars totalling $698,600, down from the $800,000 spent in '77. The brand was advertised in magazines ($382,000), on radio ($241,700) and tv ($74,200).

Union Cabide general promotion got $2,474,900, all in magazines, to support its "Working with nature today, for the resources we'll need tomorrow" campaign. Ads told of the many products and basic materials Union Carbide makes that go into the making of such things as cars, sporting goods and communications equipment.



Union Carbide's Amchem division advertised Ethrel plant treatment in farm publications.

At the end of 1978, this campaign was dropped in favor of a new "issues" campaign, which features original opinion research commissioned by the company, as a part of its attempt to get involved in the ongoing dialogs on issues important to the nation as well as business.

U.S. Government

	1978	1977
Sales	None	None
Earnings	None	None
Advertising	$128,452,200	$116,235,954

Reinforced military recruitment ad budgets sent the federal government's advertising total up 10% in 1978, a boost that ended a three-year string of more modest annual increases. The $128,452,200 that the government spent in 1978 made it the year's 25th largest national advertiser.

Troubles at the recruiting office are the major cause of upward pressure on federal ad spending, but not the only one.

The U.S. Postal Service is rapidly escalating its ad spending, with its market tacticians putting real ad muscle behind Express Mail service, the USPS entry in the lucrative overnight, long distance delivery market.

The continuing energy crisis looms as another influence on the government's advertising presence. The Energy Department last year took its first tentative steps toward testing the ability of paid advertising to get Americans to buy energy saving devices. The potential of a multi-million-dollar campaign for 1980 was being discussed this summer.

- The Agriculture Department, also looking into paid advertising, has let a $500,000 contract to a Cambridge, Mass., research institute and Needham, Harper & Steers, New York. They are developing a test campaign using paid ads to encourage better eating habits among children. Media plans and test markets are to be designated.

But the needs of the military remain the overwhelming determinant of the size of the federal ad budget. Nine military recruiting accounts spent more than four of every five government ad dollars in 1978.

It was the government's decision to scrap the draft in the early 1970s and rely on an "all volunteer" force that turned the federal government, almost overnight, into one of the ten largest advertisers in the country.

By 1978, however, enlistment shortfalls stubbornly refused to decline. In early 1979, for the first time ever, all four armed forces failed to meet their targets as the Air Force joined the Army, Navy and Marines in recruiting trouble. There was talk of reviving the draft.

- The problem has been most acute with Reserve and National Guard units, many of which are dangerously understrength. Never very large, advertising budgets for those services racked up big percentage increases in 1978 as marketing tactics changed: A 39% boost for the Army and Air National Guard, 36% for the Army Reserve Officers Training Corps and 33% more for the Army Reserve.

The increases put the Guard budget last year at $6,505,000, the Army ROTC at $4,900,000 and Army Reserve at $9,600,000.

The Regular Army recruitment ad budget, always the biggest account in the government, moved up 4% to $36,300,000. The Marine Corps, with fewer "glamorous" technical jobs and more combat places to fill, stepped up spending by 22% to $12,151,209 in 1978. The Air Force, where ad spending was actually cut in 1977, posted an 11% hike last year to $8,300,000.

The Navy, the government's second biggest advertiser behind the Regular Army, boosted 1978 ad spending 10% to slightly over $18,000,000.

The Coast Guard, a military service but under Transportation Department control, spent $900,000 on recruiting ad programs, off a little from 1977.

- The Pentagon supports military recruiting efforts with an ongoing marketing research program that last year had a $2,000,000 budget.

Under congressional pressure for more cost-effective advertising, the military services early this year put competitive concerns aside to launch a joint advertising program with a $9,700,000 budget put together with funds diverted from individual service ad campaigns.

The joint ads pitch military service as a chance for the high school graduate, the prime target for recruiters, to continue his or her development. Work on the campaign is split among the ad agencies already handling the individual military services.

The initial theme—"A chance to serve. A chance to learn."—was developed by Army agency N W Ayer ABH. It will be replaced this fall by new creative from Navy agency Ted Bates & Co. with the theme—"Armed Forces. It's a great place to start."

The other agencies participating in the campaign are J. Walter Thompson Co., the Marine Corps' agency, and D'Arcy-MacManus & Masius, the agency for the Air Force.

Other agencies serving military accounts are W.B. Doner & Co., Baltimore, for the Army and Air National Guard, and Henry J. Kaufman & Associates, Washington, D.C., for the Coast Guard. The Army Reserve and Army ROTC are assigned to N W Ayer ABH, the Regular Army's ad agency.

- Outside the military, Postal Service ad execs are becoming among the government's most aggressive. And the most secretive.

Postal Service ad spending slid to less than $7,000,000 in 1977 but rebounded to $8,201,000 in 1978 and has been escalating rapidly. Current plans at USPS have ad spending at an $11,500,000 annual clip for the federal fiscal year now underway.

The increase is almost certainly meant to install Express Mail solidly in the overnight intercity delivery market among a number of private delivery marketers already there.

But USPS won't say what ad weight they're putting behind Express Mail Service, not even for last year, nor are they any longer willing to break out ad figures for their other campaigns, such as the one that promotes stamp collecting (a $3,700,000 ad budget in 1977).

Young & Rubicam is the Postal Service Agency.

- Like the Postal Service, Amtrak, the national passenger railroad, competes with private sector marketers. But its advertising budget slipped $1,000,000 last year, to $8,500,000 as the managers of the heavily subsidized rail service tried to respond to congressional demands for economy.

The Carter administration is making a determined effort to force Amtrak to kill many of its money losing long distance routes, and appeared on the verge of success this summer until the energy crisis hit.

With gasoline scarce, interest in train travel soared and suddenly Amtrak found itself unable to meet demand. Telephone reservationists were hopelessly swamped, and Amtrak's response was a newspaper campaign headlined: "These days it's easier to ride us, than reach us." Copy urged travelers to get their tickets from a travel agent or at the station.

Needham, Harper & Steers, New York, is the Amtrak ad agency.

Media buys for government campaigns last year showed little dollar difference from 1977, hovering at about $60,000,000. Actual media buys are probably several millions more.

The military last year allocated $14,936,000 for use by regional and local recruiting officials, $2,000,000 more than in 1977. These funds are used mostly for local media. Breakouts on how the funds were spent were not readily available, however.

Magazines, long favored as good lead generators by recruiters, were up 11% in 1978 to $25,752,000 on a government wide basis. But newspaper buys for government campaigns slid 31% to $6,483,900, according to available figures.

- Government campaigns bought less tv last year—down 18% to $14,202,000—and shifted more heavily into radio, where buys were up 78% to $11,749,000. The Army, Postal Service and Amtrak cut tv purchases and boosted radio buys, while the Navy and Marines spent more in each. The Air Force used radio only.

Outdoor, which had been dwindling from government campaigns in recent years, practically vanished last year, with only $761,000 reported in that category. That figure could be higher, however, depending on how local recruiters used their ad funds.

Beyond the government's major ad campaigns, which rely on purchased time and space, there are more than two dozen public service advertising campaigns, many focusing on public health and safety. Others are meant to explain how Americans can use government programs targeted for them, such as Social Security or student loans.

Even the Federal Trade Commission, the government agency that polices advertising for fraud and deception, has such agencies as McCaffrey & McCall, New York, on call for ad assignments. FTC last year issued a public service campaign reminding women how to protect their ability to get credit. FTC also is making experimental use of psa's to notify consumers when advertisers cited in FTC actions make refunds available.

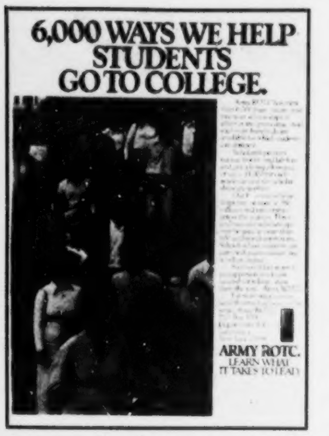
Many of these campaigns are managed for the government by the Advertising Council, a non-profit industry group which picks and chooses among the government agencies that would like its help.

The Ad Council's volunteer agencies provide top creative skills free and Council campaigns are well accepted by media officials who decide what psa's will get free time or space.

Contracts are awarded to the Ad Council on an exclusive basis without competitive bidding and range in size from around $75,000 to $250,000, and sometimes more.

Some Council drives can be crucial parts of government programs. The Council and volunteer agency Ogilvy & Mather will create a $700,000 campaign for use next year in support of the 1980 census.

Ad Council campaigns last year promoted export awareness for the Commerce Department, high blood pressure prevention for the National Heart & Lung Institute, car pooling and the 55mph speed limit for the transportation Department; employer support of the National Guard and Reserve for the



6,000 WAYS WE HELP STUDENTS GO TO COLLEGE.
ARMY ROTC.
LEARN WHAT IT TAKES TO LEAD

Ad spending for the Army ROTC was increased 36%, as the Army attempted to strengthen its Reserve and National Guard units.

Defense Department; voluntary service for ACTION (Peace Corps, Vista, etc.), and education for technical careers for the Health, Education & Welfare Department.

■ Ad Council volunteer agencies assigned to government accounts last year included Doyle Dane Bernbach; Marsteller; Lewis & Gillman; SSC&B; D'Arcy-MacManus & Masius; Foote, Cone & Belding/Honig; Liller Neal Weltin; Norman, Craig & Kummel; Leo Burnett Co.; Creamer Inc.; Ted Bates & Co.; Young & Rubicam, and Ogilvy & Mather.

For government public service campaigns that don't use the Ad Council, a formal bidding competition nearly always selects who does the work. Sometimes an ad agency is contracted to supervise the entire campaign; sometimes the government unit contracts with free lance copywriters and takes bids directly from production houses. Some government agencies write and produce their own psa's entirely in-house.

Far smaller than paid ad campaigns, some of these contracts are still big enough to be attractive to many ad agencies. The Consumer Product Safety Commission, for example, has a $450,000 contract with Grey Advertising to produce safety messages.

Among other agencies under contract to produce government psa's are Ketchum, MacLeod & Grove, Pittsburgh, for the Consumer Information Center of the General Services Administration; Porter & Novelli, Washington, D.C., for the National Heart & Lung Institute, and Lowengard & Brotherhood, Washington, D.C., for the President's Council on Physical Fitness & Sports.

Despite open bidding, the major government accounts change agencies infrequently. Incumbent agencies, who know the intricacies of the client's needs, appear to have an edge. In most cases, the competition is held because the contracting system calls for it, not because the client is dissatisfied with the current agency and actively looking for another.

In competitions last year, the Army chose incumbent N W Ayer ABH to continue handling its account and the Navy chose its incumbent agency, Ted Bates & Co., to remain on its recruit ad assignment. This year, J. Walter Thompson Co., was reassigned the Marine Corps account and Henry J. Kaufman & Associates was chosen to remain on the Coast Guard account.

Some incumbent agencies are seen as so well entrenched with a particular client that most agencies pass by the opportunity to challenge them for the business. JWT, the Marine Corps agency since 1946, drew only one rival bid in this year's "contest" for that $10,000,000-plus assignment.

While contract cancelations are rare, federal government contracting policies have been changing recently to favor allocating more government ad work to small businesses, particularly those owned by minorities.

The Transportation Department nearly refused to reassign the Coast Guard contract to Henry J. Kaufman & Associates this year when some department officials said the business should be earmarked for a minority shop. The Kaufman agency got the business, but only after promising to actively seek minority and small business subcontractors.

The Navy has a separate ad contract for minority recruitment advertising, currently worth about $1,150,000 and assigned to Burrell Advertising, Chicago. N W Ayer ABH has added a number of minority ad agencies to handle part of the work on the giant Army account.

The push to get more government ad business to smaller companies has cost the Ad Council a number of accounts. Two Transportation Department campaigns formerly at the Ad Council are with or earmarked for minority or small business companies.

The policy also has cost the Ad Council its high blood pressure education campaign for the Health, Education & Welfare Department, which went to Porter & Novelli, Washington, considered to be a small business.

Volkswagen of America

	1978	1977
Sales†	$14,110,060,000	$12,860,000,000*
Earnings† ..	303,000,000	221,000,000*
Advertising**	57,000,000	52,700,000

†Worldwide **U.S. only, AA estimate
***Restated**

Volkswagen of America (subsidiary of Volkswagenwerk AG of Wolfsburg, West Germany), Englewood Cliffs, N.J., the 68th largest national advertiser, increased its advertising slightly more than 8% to $57,000,000 in 1978, a year in which its first Rabbit assembly plant in the U.S. began production.

Sales of the Volkswagen line decreased last year due to shortages of Rabbit autos during the switchover from German to American production. Sales in 1978 for the VW line (Rabbit, Dasher, Scirocco and VW bus) totaled 239,306 units, down 8.2% from 260,702 in 1977.

The total put VW in fourth place in the import sales race behind Toyota, No. 1 with 441,800 units; Datsun, in second place with 338,096 units, and Honda, No. 3 with 274,876.

The addition of a second shift at its Westmoreland, Pa., assembly plant in January of this year—coupled with the gas shortage—has resulted in a dramatic sales increase of Rabbits for the first half of 1979.

First-half sales of the entire VW line were buoyed as well, with the total—170,061—up 44.3% over the 116,054 units in the corresponding period of 1978.

■ The Porsche/Audi division's sales for the first six months of 1979 were 20,987 units for Audi (compared with 19,873 in the 1978 first half) and 7,333 vehicles for Porsche (down from 9,455 in the corresponding period a year ago). In 1978, Porsche sales also declined, dropping to 17,017 from 19,896 in 1977; Audi sales for 1978 were up 14% to 40,878 from 35,849.

In June of this year, Volkswagen made headlines after *Automotive News*, a sister publication of ADVERTISING AGE, predicted in its June 25 edition that VW would offer close to $1 billion for Chrysler Corp., the troubled Detroit auto maker.

Toni Schmuecker, parent company managing board chairman, flatly denied the report, but later told Volkswagenwerk stockholders at the annual meeting, "Perhaps we will start a joint engine production with Chrysler in the U.S. one day. I say perhaps."

He also added that the earlier denial "doesn't rule out that we may be having other talks with Chrysler about other projects."

■ VW is planning to spend $3.1 billion over the next three years on worldwide expansion with "special attention" to North America where Chrysler has underutilized facilities. A second VW assembly plant in the U.S. is in "developmental stages," with no decision yet made to push ahead with it.

The 1979 Volkswagen model year cars were introduced in the fall of 1978, with advertising retaining the year's previous slogan, "Volkswagen does it again." Created by Doyle Dane Bernbach, the campaign covers all models except the VW bus and conveys the message that Volkswagen makes innovative products featuring performance, advanced engineering and good gas mileage.

The VW bus campaign (creative by James Neal Harvey Inc.) continued to urge people with large families to "take the bus." The ads also emphasized gas economy and roominess.

Advertising for the Rabbit, both gas and diesel, was extremely heavy nationally. The Rabbit diesel campaign—focusing on the product's outstanding gas mileage—was in full swing last year when the U.S. government released mileage figures which named the Rabbit 5-speed and 4-speed models as the No. 1 and No. 2 cars in fuel economy on the American market.

cross-country trip by a Rabbit diesel from New York to Los Angeles. The trip's fuel costs amounted to $43, VW proclaimed.

- VW also attacked its clones, or rather lookalike versions from competitors, with ads headlined, "The car everybody's trying to copy." In typical VW style, it produced an ad showing a motorist putting a gas pump nozzle to his temple. The headline merely read, "Or buy a Volkswagen."

To draw attention to the Rabbit's head room, the company this year broke ads and commercials showing former basketball great, 7'2" Wilt Chamberlain, fitting comfortably into the driver's seat of the car.

Measured media spending for individual VW models in 1979, as compiled by Leading National Advertisers, broke down as follows: Rabbit, $15,451,200, of which $8,968,300 was in network tv; Dasher sedans and wagons, $7,317,400; VW bus, $1,334,800; Scirocco, $2,682,700; Porsche, $3,106,100, and Audi, $10,109,300.

During 1978, VW maintained 52 weeks of continuous media support while still using a pulsing technique. VofA also stepped up its involvement in sports programing, thereby allowing it to reach a much larger segment of prospective small car buyers. Emphasis also was placed on youth-oriented media, as well as increased regional advertising to accelerate sales in high potential markets.

- In the fall of 1978, Porsche and Audi 1979 models were introduced, each backed with separate and distinct campaigns although both carry the message: "Porsche/Audi sells vehicles that share similar qualities in concept development, manufacture and consumer benefit." Both campaigns also share another slogan, "Porsche/Audi, nothing even comes close."

Ads for Audi focus sharply on the car, as headlines and copy feature quotas from automotive experts on the car's features and performance.

For Porsche, DDB created a campaign based on the Porsche's reputation and engineering. The first phase of the campaign emphasized engineering excellence, supported by Porsche's strong position in auto racing.

Sales	$1,309,419,000	$1,143,792,000
Earnings ...	81,882,000	66,889,000
Advertising*	47,675,300	26,349,400

*AA Estimate

Warner Communications, New York, the 75th largest national advertiser, increased its advertising an estimated 81% to $47,675,300 in 1978. (Part of this increase was due to extensive advertising and promotion for two big films—"Superman" and "Every Which Way But Loose.")

Sales rose 14% to a record $1.3 billion, and income increased 22% to $81,900,000, another record. Continued growth in WCI's two largest operating groups—recorded music/music publishing and filmed entertainment—and higher earnings from publishing contributed heavily to these results.

Recorded music and publishing was once again WCI's largest division, both in revenues and operating income. Last year it continued to set records, as revenues increased 16% to $617,000,000 and operating income rose 10% to $93,000,000. The division is comprised of Warner Bros. Records, Electra/Asylum Records, Atlantic Records, WEA Corp., WEA International and Warner Bros. Music.

WEA Corp. is the leading domestic distributor of prerecorded records and tapes and is one of the major strengths of WCI's recorded music division. WEA works closely with the three domestic WCI labels and is actively involved in selling, promotion, merchandising, advertising, warehousing, shipping, billing and collection.

- The three well-known domestic labels in this division are Warner Bros. Records, Atlantic Records and Electra/Asylum, which spent $2,768,200; $199,600, and $272,600 respectively in measured advertising during 1978. The majority of this expenditure was in magazines.

The company's filmed entertainment division also set new records in revenues and earnings. The division's revenues of $393,000,000 were up 11%, while operating income rose 38% to $80,000,000. Every segment of the division—Warner Bros., Warner Bros. TV, Licensing Corp. of America and Panavision—showed gains.

Strong theatrical revenues in 1978 reflected the box office success of Warner Bros. films such as "The Goodbye Girl," "Hooper," "The Gauntlet" and "Oh, God." Warner Bros. released "Superman" and "Every Which Way But Loose" in late 1978 and during the first three months they had shattered numerous box office records.

This year's releases that are expected to do well include "The Main Event," "In-Laws" and "Beyond the Poseidon Adventure." During 1978, Warner Bros. films spent $18,247,100 in measured advertising.

- Warner Bros. Television had a record year with total sales up 32% to $132,000,000. This division made rapid strides in 1978 in the production of series, specials and miniseries like "Roots: The Next Generations" from its David Wolper unit for the tv networks. WB-TV series on the air in 1978-79 included "Welcome Back, Kotter," "Alice," "Wonder Woman" and "The Dukes of Hazzard."

The publishing division, which consists of Independent News, "Mad Magazine," DC Comics and Warner Books, had a strong year in 1978. Revenues increased 5% to $55,000,000 and profits rose 33% to $9,600,000.

These gains reflect further improved results at Warner Books, better margins at Independent News, higher licensing income for DC Comics, and continued excellent earnings from "Mad."

Warner Books has sought to broaden its publishing of original works to lessen its dependence on the acquisition of expensive reprint rights. Warner also is expanding its trade paperback format—with larger, more profusely illustrated books that carry higher cover prices and provide potentially better margins, despite the lower unit sale typical of trade paperbacks. Warner Books spent $356,400 in measured advertising in 1978.

- Warner Cable Corp. (WCC) sales rose 19% in 1978 to a new high of $66,000,000 as operating income from regular cable increased 13% to $17,800,000. However, $11,000,000 in net development expenditures for Qube—WCC's experimental two-way cable service in Columbus, O.—caused consolidated cable division operating income to decline to $6,800,000.

Cable subscribers increased 11% in 1978, bringing total WCC subscribers to 624,000. In 1978, WCC either constructed or acquired new systems in Salem and Melrose, Mass., Sandy Valley, O., and Sedona, Ariz.

- Qube, is designed to incorporate the best features of regular CATV and pay tv. It provides the subscriber with the ability to respond via computer and to purchase special programs one at a time.

Its two-way capability can be used to register an opinion, select special programing and to test the impact of new products or commercials.

This year, a sophisticated burglar, fire and health emergency system will be available. Connected via the Qube console and computer to the city's emergency departments, this service will summon the appropriate assistance.

Houston will be the second Qube market, perhaps late this year.

The toys and electronic games division, a result of the acquisitions of Atari Inc. in 1976, and Malibu Grand Prix and Knickerbocker Toy Co. in 1977, boosted revenues to $178,000,000 in 1978 and the operating loss was reduced to $2,700,000 from $6,100,000.

The 1978 loss is after deducting approximately $8,000,000 of purchase price amortization, compared to $15,000,000 in 1977; all segments of the division were profitable prior to purchase price amortization.

- Atari had a difficult year in 1978 because retailers were hestitant to stock its programable video computer system (VCS) and cartridges in large quantities due to late shipments in 1977. Although VCS shipments were below expectations, retail sell-through at Christmas was reported excellent, aided by a substantial advertising program.

In the second half of 1979, Atari will begin production of two personal computers—the Atari 400 and the Atari 800. During 1978, $4,016,500 was spent by Atari in measured advertising.

- Malibu Grand Prix revenues and profits, although small, were reported well ahead of 1977. Malibu builds and operates miniamusement centers where scale model formula racing cars are driven on specially designed courses which safely simulate Grand Prix racing conditions.

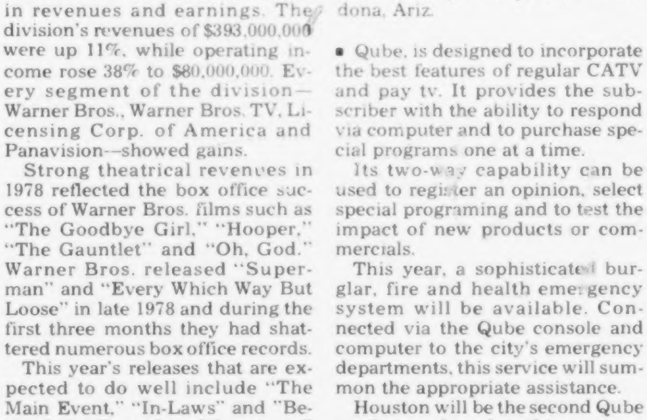
At the end of 1978, there were 20 tracks in operation against four at the time of acquisition in May 1977.

Knickerbocker Toy was reported as having a disappointing year in 1978. Although still the leading producer of rag dolls and plush animals, many of its older licensed product lines peaked in 1977.

KTC also has a new line of soft superhero dolls for boys. Last year this division spent $916,000 on advertising—all in magazines.

- WCI's other operations division is made up of the Cosmos soccer team and Warner/Lauren Ltd. The Cosmos had a successful year in 1978, both on the field, where they won an unprecedented third North American Soccer League title, and in the stands, where attendance set new records.

WCI brought in fashion designer Ralph Lauren in 1976 to form Warner/Lauren. The company's first products, Lauren for women and Polo for men, debuted in March, 1978, in top-quality department stores.



It's a Movie!
It's a Record!
It's Superman!
The Original Sound Track. On Warner Bros. Records and Tapes.

Warner Communications' movie, "Superman," released late in 1978, has been a box office smash. A sequel to the movie is in the works.

Warner-Lambert Co.

	1978	1977
Sales	$2,878,496,000	$2,542,728,000
Earnings ...	207,947,000	187,616,000
Advertising .	211,000,000	201,000,000

Warner-Lambert Co., Morris Plains, N.J., the 7th largest national advertiser, increased its advertising 5% to an estimated $211,000,000 in 1978.

Worldwide sales increased to a record $2.9 billion, while earnings increased 10.6% to $207,947,000. Sales for the first quarter of 1979 rose 19% to $764,565,000, while earnings rose 9% to $57,222,000.

Sales of its ethical health care and nonprescription products accounted for approximately 56% of net sales, topping $1.6 billion, a 13% increase over the previous year. According to Joseph D. Williams, company president, the company ranks sixth in the $45 billion world ethical pharmaceutical market.

▪ A number of W-L nonprescription health care products made major gains last year. Among the market leaders were Gelusil antacid; Sinutab, sinus relief medicine; Anusol, hemorrhoidal suppositories and Myadec, a high-potency vitamin-mineral preparation.

The company also became the first to market e.p.t., the in-home early pregnancy test kit. The e.p.t. kit began receiving network tv support in January.

In addition, W-L introduced a new line of cough-cold products under the Symptom name. Symptom 1, 2 and 3 are designed for treatment of a specific cough, cold or allergy symptom, while Multi-Symptom is designed to treat all three.

Building on the Sinutab name and market share— estimated at approximately 30%—W-L last October introduced Extra Strength Sinutab Capsule Formula.

▪ W-L's Parke-Davis division, which attracts about 20% of high potency vitamin sales, has reformulated Myadec, a high potency multiple vitamin-mineral preparation.

In addition to its new product lines, other W-L nonprescription health care products include Efferdent denture cleanser tablets; Rolaids antacid; Bromo-Seltzer, and Listerex Acne Scrub, Listerine antiseptic and throat lozenges and Listermint mouthwash.

Among the more heavily advertised products last year were Rolaids, $8,800,000; Efferdent, $4,500,000; Halls Mentho-Lyptus cough drops, $3,200,000; e.p.t. pregnancy test, $2,800,000, Sinutab extra strength, $2,900,000.

Both Rolaids antacids and Halls cough tablets maintained leading market positions last year. Halls continues as the No. 1 cough tablet in the U.S., with domestic sales in excess of $40,000,000. Rolaids leads in the antacid category.

After years of haggling between W-L and the Federal Trade Commission, W-L last September began running corrective advertising for Listerine, after the U.S. Supreme Court refused to review the company's appeal of an FTC order.

▪ The FTC ordered W-L to include a corrective statement explaining that "Listerine will not help prevent colds or sore throats or lessen their severity," in $10,000,000 of advertising beginning in September, 1978. The FTC, in reaching the decision in April 1978, contended that for more than 50 years, Listerine ads created the false impression that the product prevents or lessens the severity of colds and sore throats. The company said "breath control" is the major franchise for Listerine.

According to Leading National Advertisers W-L last year spent approximately $7,750,000 to promote Listerine antiseptic and throat lozenges. Its Listermint mouth wash received approximately $5,000,000 in support, and Listerex acne scrub received $300,000.

Sales of W-L gums and other specialty foods reached $604,000,000 last year, up from $511,000,000 the previous year. The segment includes chewing gums, breath mints, confections and the newly acquired Entenmann's specialty baked goods.

Its Freshen-up liquid center chewing gum reported worldwide sales of more than $70,000,000 last year and, according to the company, continues to gain strength outside the U.S. Freshen-up is now available in 20 countries.

Pick two, any two
efferdent
and get one FREE!

Warner-Lambert Co. used a promotion—pick two, get one free—to move several of its products at the same time.

▪ Based on the Freshen-up technology, the company last year introduced Chewels, a liquid center sugarless gum, on the West Coast.

W-L's Trident sugarless gum, continues to to be the largest selling sugarless gum, and was reformulated last year in order to eliminate saccharin.

Life Savers Inc.'s Care*Free sugarless gum, however is closing in on Trident in the $1 billion gum market. Both brands are reported to hold a low 40s share of the sugarless gum market, with less than one-half of a point share separating the two.

Meanwhile, in the bubble gum segment, W-L Bubblicious, introduced in 1977, has been improving after a slow start, the company said.

Bubblicious was introduced after Life Savers Inc., a Squibb Corp. subsidiary, reported tremendous success with the introduction of Bubble Yum soft bubble gum.

▪ In the over-all gum market, industry sources now give W-L's American Chicle division a three point lead in the second quarter, over previous front runner Wm. Wrigley Jr. Co. American Chicle now holds a 34% share of market compared with Wrigley's 31%. Life Savers continues in third place with 24%.

Last year, W-L spent approximately $11,000,000 in advertising for its Trident sugarless gum and bubble gum. Freshen-up received approximately $6,500,000 in ad support and Bubblicious $3,500,000. Care*Free sugarless gum was backed by approximately $5,000,000 in spending. Dancer Fitzgerald Sample, handles the Care*Free account.

In the $340,000,000 rolled candy/breath mint category, American Chicle took over the lead in the second quarter with 43% of the market at retail, according to industry sources. Life Savers, which previously led the category, now holds 40% of the market. W-L's Certs holds 29%, and Velamints, a sugarfree breath mint imported from West Germany by Ragold Inc., Chicago, holds 9%.

▪ Entenmann's, which was acquired by W-L late in 1978, marks its first entry into the baked goods market. With distribution in both the East and Chicago, W-L foresees Entenmann's eventually going national and possibly international.

According to W-L, Entenmann's reached approximately 20% of the U.S. population at the time of its acquisition. The company expects distribution to reach approximately 80% of the population by the mid-1980s.

Shortly after W-L acquisition of Entenmann's, the baked goods subsidiary acquired Beatrice Foods' Burny Bros., Northlake, Ill., a bakery serving northern Illinois. The Burny acquisition marks Entenmann's move westward.

W-L Schick broke new ground early this year with the introduction of its Ultrex Super II pivoting head razor with one-push cleaning. Ultrex, which followed the introduction of Gillette's Atra pivoting head razor, is receiving $14,000,000 in ad support this year.

The company also is testing a twin-blade disposable razor in Seattle, Wash. W-L, which until recently resisted entry into the disposable market, will be competing against Gillette's Good News!, twin blade disposable. Good News! reportedly leads in the men's disposable category with a 7.6% of the $425,000,000 market at retail.

Bic Pen Corp.'s Bic shaver, a single-blade disposable, holds a 7% share of the market.

In addition, W-L's personal care division last year introduced its Personal Touch razor system for women, supported by a $3,000,000 budget. It leads the category.

▪ Meanwhile, W-L filed a lawsuit against Gillette, the leader in the wet shave market, accusing it of violating antitrust laws of unfair competition and of breach of contract.

In its complaint, W-L stated that in a 1978 agreement, it agreed to pay Gillette $3,000,000 to avoid being sued for manufacturing or selling twin blade shaving systems based on Gillette's patents. The agreement, according to the complaint, said W-L planned to introduce twin blade cartridges adaptable to either or both the Gillette Trac II or Atra.

W-L contends that its new Ultrex II blades are not completely adaptable to the Atra Invitation, a line extension of the Atra pivoting head razor, and said it was Gillette's intention to design the razor in such a way that the Ultrex blades could not be used. Gillette has denied all the allegations in the W-L complaint.

▪ W-L's American Optical division has entered the soft contact lens market in a big way. The division this year broke its first national multi-million dollar campaign for soft contact lens.

American Optical which presently claims a 20% share of the soft lens market, increased its advertising from the estimated $150,000 it spent last year in order to better compete with Bausch & Lomb, the undisputed leader in soft contacts.

In June, American Optical introduced the Dorothy Hamill and Bob Griese children's eyewear collection.

▪ Ms. Hammill, an ice skaing star, also endorses the company's Eyestopper collection of women's eyeglass frames. Mr. Griese, Miami Dolphins quarterback, is the company's official spokesman.

American Optical also produces the Oscar de la Renta fashion frames for men and women and markets AOlite Ultravue progressive lenses, which replace traditional biofocals. Ultravue, introduced in late 1976, currently holds about 2.5% of the market.

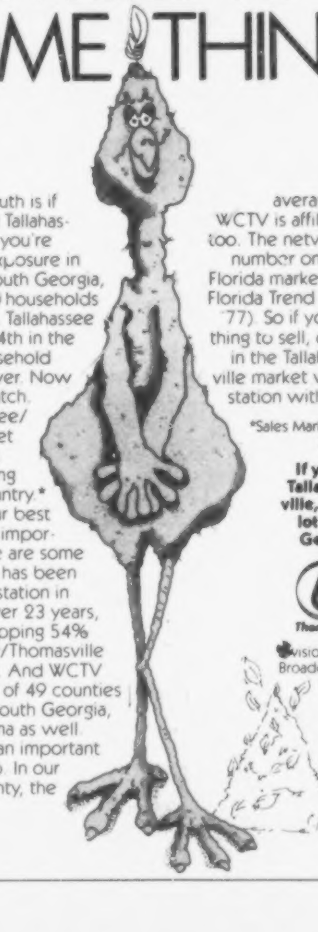
AREN'T YOU MISSING SOME THING?



The naked truth is if you aren't buying Tallahassee/Thomasville, you're missing a lot of exposure in the Florida and south Georgia, market—124,200 households (ARB-'78). In fact, Tallahassee alone is ranked 24th in the nation in per household retail buying power. Now that's a lot of scratch. And the Tallahassee/Thomasville market ranks 13th among the fastest growing metros in the country.* WCTV is your best buy to reach this important market. Here are some bare facts. WCTV has been the number one station in this market for over 23 years, delivering a whopping 54% of the Tallahassee/Thomasville market (ARB-'78). And WCTV has a wide reach of 49 counties in north Florida, south Georgia, and south Alabama as well. And we deliver an important youth market also. In our home metro county, the average age is 24.3.* WCTV is affiliated with CBS, too. The network that's a big number one in most major Florida markets, according to Florida Trend Magazine (Nov. '77). So if you've got something to sell, expose yourself in the Tallahassee/Thomasville market with WCTV. The station with real coverage.

*Sales Marketing Management Survey—July, 1978

If you're not buying Tallahassee/Thomasville, you're missing a lot of Florida, south Georgia, and south Alabama.

Wm. Wrigley Jr. Co.

	1978	1977
Sales	$445,639,000	$397,941,000
Earnings	31,828,000	29,313,900
Advertising*	37,771,852	31,036,900

***AA estimate**

Wm. Wrigley Jr. Co., Chicago, the nation's 84th largest advertiser, spent an estimated $37,771,852 on advertising in 1978, up almost 22% over 1977.

The company had 1978 sales of $445,639,000, up 12% over the previous year. Earnings rose 8.6% to $31,828,000 in 1978 after an earnings decline of 4.8% on 1977.

The company's higher sales and earnings came from higher volume, a wholesale price increase and favorable foreign currency to dollar exchange.

Wrigley's chief competitors in the gum market are the Squibb Corp., makers of Life Savers Care*-Free sugarless gum and Bubble Yum, and Warner-Lambert's American Chicle division. Industry sources give American Chicle 34% of the market in the second quarter of 1979, with Wrigley at 31% and Life Savers at 24%.

In its battle against strengthening competition, Wrigley has introduced its fifth new product in five years. Hubba Bubba, Wrigley's first entry in the ballooning bubble gum market, was introduced in Germany in July, 1978, and entered the U.S. market in May, 1979. Bubble gum is said to make up 30% or $400,000,000 of the over-all gum market.

Hubba Bubba, which is designed to compete with Warner-Lambert's Bubblicious and Squibb's Bubble Yum, has a no-stick quality that prevents its bubbles from sticking to face and hair. The new product will be supported by $10,000,000 in media advertising.

Wrigley's 1977 new product entry, Orbit sugarless gum, reached national distribution in 1978, and Orbit sugarless bubble gum was introduced in 1978.

Orbit met with early difficulties when preliminary research results suggested that Orbit's sweetener, xylitol, was suspected of causing cancer. Despite claims that the natural sweetener is safe and no comments having been made by the Food & Drug Administration, Wrigley substituted traditional sweeteners mannitol and sorbitol.

Liquid center gum is another area catching gum makers' and gum chewers' fancies and Wrigley entered that market internationally in Australia with Spurt in July, 1978. The gum comes in mint, apricot and bubble gum flavors. In January, 1979, Yusi was introduced in Germany. It is a liquid center gum with a sugar free center.

Wrigley's Amurol Products Co., taking advantage of the booming interest in active sports, completed its national rollout of MVP thirst quenching gum. That product was backed by $123,100 in national magazines and spot tv.

Amurol introduced Mork in 1979, named after one of tv's hottest series characters, Mork, of "Mork and Mindy." The product is five pieces of soft bubble gum packaged in a plastic egg. It is being introduced regionally without media support.

Amurol was also active in its dietetic food products line with introductions of several chocolate bar and wafer items that are low in sodium and cholesterol levels. The company also tested Yogurt Swirl, a conventionally sweetened yogurt and fruit flavored bar, but reported "inconclusive" results.

In the health food area, Amurol introduced several "Amurol Natural" trademarked items said to be formulated without artificial colors, preservatives or flavors.

Advertising behind Wrigley products was primarily in television and radio, with over 90% of its budget placed in those media. Most of the advertising support was behind Spearmint and Orbit. Measured media spending for Wrigley's Juicy Fruit, Doublemint and Spearmint, totaled $16,991,300.

The only newspaper or magazine advertising for Wrigley were coupon promotions for Orbit and Big Red.

Wrigley's Spearmint continued its "Hello" campaign via Needham, Harper & Steers, Chicago, in network and spot tv and radio. For the second year, the brand appeared in transit ads.

The Orbit brand also ran in national transit and New York subway ads. Orbit spent $11,947,700 in measured media; about 70% of its advertising budget was spent in spot tv and radio.

Orbit sugarless bubblegum began its rollout in August, 1978 with spot commercials on children's tv shows. The commercials featured a robot character and were prepared by Arthur Meyerhoff Associates.

Juicy Fruit's schedule included spot commercials during the last six months of the year and 15 weeks of network commercials. Its radio schedule included 22 weeks on the Mutual Black Network.

Big Red cinnamon gum continued its western theme in spot tv and network radio, spending $6,158,500 in measured ads.

Freedent, the nonstick gum, received $5,941,800 in measured media spending, the bulk of which was in spot television. That figure is nearly double its 1977 ad budget.

Doublemint was not advertised in 1978, but in May, 1979, a new campaign began via Meyerhoff with the theme: "Doublemint, there's no single gum like it."

In its drive to remain competitive in the gum market, Wrigley is restructuring its marketing organization to a more traditional brand management format. Each brand will not have a brand manager, but brands will be grouped and headed by a manager.

100 leading companies boost ad spending over $10 billion

(Continued from Page 1)

Holding onto the No. 7 plate was Warner-Lambert Co., at $211,000,000, and Ford Motor Co. remained eighth with $210,000,000 in ad spending. Also in the top 10 were Bristol-Myers Co., ninth with $192,800,000 (down from No. 6) and Chrysler Corp., tenth with $188,900,000 (up from No. 17).

■ Newcomers to the 1978 list include two entertainment companies—Warner Communications, which took the No. 48 rung with an estimated ad investment of $81,900,000, and MCA Inc., whose advertising outlay of $61,000,000 put it 66th.

Also new or returning to the list were DuPont at $70,000,000; Brown-Forman Distillers Corp., $35,000,000, and Alberto-Culver, $32,400,000.

Dropping out of the top 100 ranks were Block Drug Co., E. & J. Gallo Winery, Goodyear Tire & Rubber Co. and Shell Oil Co. Also, Hanes Corp. is no longer listed separately as it merged with Consolidated Foods Corp.—incidentally boosting Consolidated from No. 96 to No. 41.

Advertising figures listed for each of the 100 leaders include "measured media" expenditures published by various statistical bureaus and associations.

These include Leading National Advertisers, the Publishers Information Bureau, Radio Advertising Bureau, Radio Expenditure Reports, Agricultural Marketing Information Service (Agricom), LNA-Broadcast Advertisers Reports, Media Records, Institute of Outdoor Advertising and the Outdoor Advertising Assn. of America.

■ In the eight media so measured, the 100 leaders dominate, accounting for just over 54% of all the advertising dollars invested there (see charts on Pages 70 and 71).

In addition to the measured media figures, "unmeasured media" expenditures are added to get a grand total for each of the 100 companies. These unmeasured expenditures include point of purchase, direct mail, premiums and other forms of national advertising and sales promotion. All estimated expenditures are estimates by ADVERTISING AGE.

Measured media figures generally include gross space and time costs only, while production and talent costs are included in unmeasured expenditures. Exceptions are the network tv figures, which include net time and talent.

■ ADVERTISING AGE would like to make it clear that the selection of the "100 leading national advertisers" was based on measured media expenditures only. Final ranking, however, is based on the combined total of measured and unmeasured spending.

If other criteria were used, other advertisers not now on the list would need to be included. Among such advertisers would be those who spend many millions annually in local advertising, which is not measured, and who spend relatively little in national advertising. Such companies include many of the large retailers.

On Oct. 29, ADVERTISING AGE will take a look at some of these local advertisers, with profiles of the advertising expenditures and financial operations of 50 leading retailers—the top 25 general merchandisers and the top 25 supermarkets. #

U.S. agencies take major steps into Far East

Needham finds Japan tie, also moves into London

By CRAIG ENDICOTT

NEW YORK—Needham, Harper & Steers Inc. is purchasing a "substantial minority interest" (believed to be about 49%) in a London advertising agency, gaining a foothold in Japan by setting up a Far East holding company with a Japanese partner and beefing up its Canadian unit with outside talent.

Such moves on an international level, influenced by the growing business of NH&S clients abroad and the agency's desire to add product areas to its client mix, are intent on bringing international billings up to "40% of a much larger total billings figure in four years," notes chairman and chief executive officer Paul Harper.

The additional product areas would be filled by winning the domestic accounts of clients handled by another network member. Specifically, this enlarged internationalism brings timepieces, cosmetics, hotels and processing film closer to NH&S' grasp in the U.S., all areas in which it would have no conflict.

NH&S' international ratio is certainly optimistic, given the fact that billings outside the U.S. now account for only 19% of worldwide billings. Its international billings in 1978 were $61,000,000, compared with U.S. billings of $257,000,000.

NH&S' expansion abroad also comes at a time when the agency was sought by other U.S. agencies for possible merger talks. Discussions were held with D'Arcy-MacManus & Masius and Norman, Craig & Kummel, though talks never ventured beyond a meeting or two.

■ Instead, NH&S went the building-block route in starting small, especially in London, though with full intentions of building its new London arm, called BNRR/-Needham Ltd., into one of Britain's top 10 agencies, says Mr. Harper.

BNRR stands for Bellamy, Nicholson, Reeves, Robertshaw Ltd., a midsize En-

McCann joins other shops in lining up China business

By BERNICE KANNER

NEW YORK—American ad agency interest in China is starting to pay off.

McCann-Erickson Worldwide last week announced it was the first U.S.-based shop invited to meet and do business with the Shanghai Advertising Corp., the government arm responsible for import and export advertising.

At the same time, it surfaced that N W Ayer ABH was recently awarded Chinese business and that Ogilvy & Mather has been quietly and contentedly operating there since May.

Other agencies such as Young & Rubicam and J. Walter Thompson Co. are preparing to join the crusade. Compton Advertising and Doyle Dane Bernbach, which, having opened the door with an earlier visit, are now seeking clients to usher through it.

Ayer will do advertising and promotion for the National Exhibition of China, a three-city show slated to arrive here next fall. The assignment comes directly from the Peking government.

O&M has been appointed by the China Native Products and Animal Byproducts Export & Import Corp. to handle all consumer products from the Canton region. The agency currently is promoting Chinese carpets and brandy and proprietary medicines such as the Temple of Heaven Essential Balm.

Nigeria was the first market for the worldwide assignment. Ads will soon break in the U.S., said Michael Ball, O&M executive director-international. The current budget is less than $1,000,000 but "when we're geared up, the potential is massive," he added. O&M, which Mr. Ball pointed out is the first agency to place advertising in China since 1949, has run spots on China tv for Diastar, a brand of the Japanese-based Rado Watch Co., Mercedes-Benz trucks and Grundig, the Germany electronics company. The agency also has run ads for American Express Co. at

Will build silbervasser with ad muscle

Seagram out to topple Smirnoff

By JOSH LEVINE

NEW YORK—After feeling out the vodka market for two years, Jos. E. Seagram & Sons is pitting its great white goods hope against Smirnoff, the undisputed brand champion.

Though the magnitude of the leading distiller's marketing plans for Von Konig silbervasser; a German import, outweighs the resources of almost all other companies, Seagram's move could signal a time of energetic brand building in a one-brand market.

Seagram plans to take Von Konig national from its introductory markets of Phoenix, Baltimore and San Diego as quickly as possible. "We aren't willing to wait 25 years to build this brand," said a Seagram exec. Agency is North Castle Partners (AA, Sept. 24).

Despite the fact that vodka is the largest-selling liquor category, Heublein Co.'s Smirnoff vodka remains the only recognizable brand nationwide since it built the market in the early '50s. It is precisely that success that Seagram's and other distillers feel makes Smirnoff vulnerable.

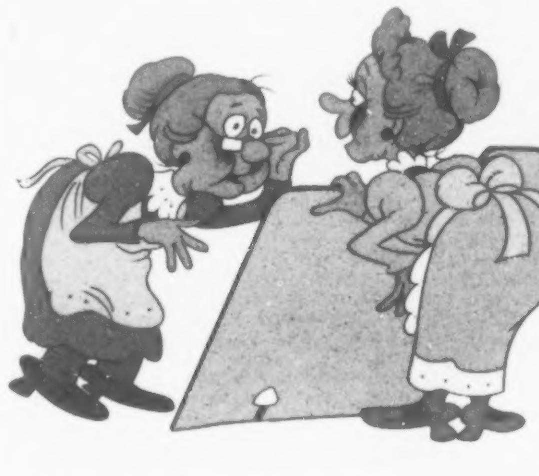
"We're going to have to make a lot of noise [about Von Konig silbervasser] to get the volume we're shooting for—more noise than any of the competition," said Gilbert Schy, exec vp-marketing at General Wine & Spirits, the Seagram division that markets the brand.

Part of the noise Seagram is making in ads that proclaim, "Makes you forget vodka," concerns the fact that Von Konig isn't really vodka at all—it's silbervasser, a form of grain neutral spirit that Seagram has registered as a new category of liquor.

The difference seems to lie primarily in Von Konig's texture, described as heavy cream to vodka's half and half.

In its pursuit of the ultimate mixer, Seagram has renamed pop-

(Continued on Page 79)



Gertrude and Gwen Green are being introduced into the Valley of the Jolly Green Giant in new tv commercials for Green Giant Co. The Green sisters will be used to sell the company's frozen entrees. That's Gertrude on the left. *(See story on Page 2.)*

Media, marketers greet Pope

By JAMES P. FORKAN

NEW YORK—Despite the religious impact of Pope John Paul II's visit to the U.S., a number of companies looked to the materialistic aspects, hoping to sell tie-in souvenir merchandise.

The pontiff's unprecedented seven-day, six-city journey also has had harried broadcasters thinking in relatively mundane terms about how much coverage to present, when to preempt regular programming and whether to sell sponsorships to defray some production and preemption costs.

So far, each of the tv networks plans 4½ to 5½ hours of live and taped coverage of the papal visit (excluding newscasts). CBS' main focus appears to be on the Oct. 2 United Nations address; NBC's on his Oct. 7 Washington address, and ABC's on the Oct. 7 pontifical mass in the capital.

■ The decision on the duration of coverage for many of the items on the agenda will not be decided until this week, network officials said. Among shows bumped so far are "Guiding Light," Oct. 1, and "Search for Tomorrow," both Procter & Gamble soap operas on CBS; "Match Game" on CBS, and

Industry watchers poised for shifts

NBC's strong start is top tv season drama

By COLBY COATES

NEW YORK—NBC-TV, still basking in the glow of its first weekly prime time ratings win in nearly a year, ran only one ratings point behind a nervous ABC-TV midway through week No. 2 of the 1979-80 fall season.

National ratings through Wednesday (Sept. 26) gave ABC the lead with a 21.1 rating, 35 share. NBC was a strong second with a 20.1 rating, 33 share while CBS-TV continued in third place with a 15.1 rating, 25 share.

▪ The first week of head-to-head competition (ABC started its new season a week before its rivals) that ended Sept. 23 had NBC in first with a 20.6 rating, 34 share followed by ABC's 18 rating, 30 share and CBS' 16.9 rating, 28 share. In turning in its best premiere week performance since 1972, NBC—offering a lineup heavily loaded with movies and specials and lacking some regular series fare—posted an average 18% ratings increase over the 1978 premiere week.

Three-city overnights for Thursday, Sept. 27, suggested ABC would win that night, but its eight share point margin over NBC in New York dwindled to three points in Chicago and two in Los Angeles. "Benson," ABC's heavily-touted, half-hour sitcom, pulled the night's biggest numbers; a night earlier NBC president Fred Silverman's pet project, "Real People," posted its best numbers ever, a 20.6 rating, 35 share.

▪ In winning week No. 1 NBC uncorked a barrage of expensive movies and specials that drew big numbers, new series such as "Misadventures of Sheriff Lobo," "A Man Called Sloane" and oldtimers like "Quincy," "Real People" and "Diff'rent Strokes" drew equally big numbers. In addition, a two-hour "CHiPs" special went through the roof as it captured a 47 share.

▪ CBS, meanwhile, won the ratings contest on Friday and Sunday, but ran last the rest of the week. "All in the Family's" successor, "Archie Bunker's Place," scored an impressive win over ABC's "Mork & Mindy" and "The Associ-

PERFECTLY DRY

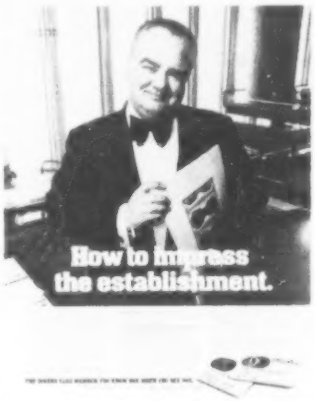
"Not too dry" is the message in 30-second spots for Franzia Bros. chablis blanc which will air in major metropolitan markets starting in October. The winery also is rolling out 12.7-oz. sizes of chablis blanc and cabernet sauvignon in glass beer mugs. (*See Page 81.*)

Diners Club plans full course campaign

By JOSH LEVINE

NEW YORK—Diners Club is putting $12,000,000 to $15,000,000 where its mouth is in the first campaign from Wells, Rich, Greene.

In its second year of aggressive marketing after a decade of "stagnation," Diners Club is attempting to stimulate higher restaurant spending by its roughly 3,000,000 domestic cardholders. At the same time, the travel and entertainment card is looking to beef up its roster of restaurant and hotel members.



How to impress the establishment.

Diners Club is returning to its roots as a charge card for dining out in seeking to sign up new eateries and promote higher spending when its cardholders patronize them.

Spot tv and magazine ads breaking today feature a troupe of eager restaurant and hotel employes courting an invisible Diners Club cardholder, whose invisible aura of affluence is implied by the theme, "You'll know one when you see one." The immediate recognition elevates the Diners Club member over an American Express member, who remains anonymous in AmEx commercials until he or she produces the familiar green card.

▪ The campaign, budgeted through 1980, will expand gradually into 120 markets. Print ads will appear in *Esquire*, *Forbes*, *Golf Digest*, *Ms.*, *National Geographic*, *New Woman*, *Psychology Today*, *Playboy* and *Vogue*, out of a total list of 17 publications.

"This campaign is a first step. We're occupying ground that we consider already ours," said James Stetler, exec vp-marketing. "Diners Club started as a charge card for dining out 30 years ago, and that's still the dominant awareness of the card among the public now. We will turn our attention to travel and resorts next year."

▪ The current campaign actually isn't the first step. That was taken last year when Diners Club hired Mr. Stetler from its major rival, American Express, to preside over its first large-scale marketing effort. An introductory campaign announced Diners Club services, such as its Doublecard feature, and a credit line up to $15,000 with Chase Manhattan Bank.

Though Diners Club continues to mention those features in print ads, the new tv commercials hark back to the motivation for almost all travel and entertainment card applications—prestige. Though American Express' worldwide base of about 10,000,000 cardholders dwarfs both Diners Club with almost 4,000,000 and Carte Blanche with just under 1,000,000, all three pluck an aristocratic chord in their advertising.

The problem, however, is finding enough aristocrats in a U.S. market that is nearing saturation. In Diners Club's case, it hopes to fill its cardholder ranks with a younger base, many of whom were introduced to credit through bank cards like Visa and Master Charge.

"We're looking at a 25 to 34-year-old age group; in our case it's more difficult to eat into American Express membership than to tap bank cardholders who want to trade up," Mr. Stetler said. "No matter what the resources of our parent [Continental Corp., a New York insurance giant], American Express will probably outspend us four or five to one for a while." #

Green Giant adds sisters to the Valley

By LARRY EDWARDS

MINNEAPOLIS—For the first time since the birth of the Little Green Sprout in 1972, Green Giant Co. has introduced some new characters into the Valley.

Jack Stafford, exec vp of the Pillsbury subsidiary, said that the animated characters—the Green Sisters—provide a "refresher" for the Giant's advertising, but more importantly are designed to handle the company's growing frozen entree business.

The Green Sisters, now appearing in Green Giant's new fall network and spot tv schedule, are two "little old ladies" portrayed as the best cooks in the Valley. As explained by William McGrath, vp-prepared foods and new products, the sisters find their reputations threatened by the entrees the Giant has been cooking up and freezing. The four commercials in the new pool feature situations in which the sisters try his products and respect them—thus endorsing them.

Mr. McGrath said the Green Sisters also verify "the flexibility of the Valley format." The company broke its first ad support for frozen entrees in late 1977, following their national rollout under the Green Giant brand (they had earlier carried the Holloway House name). But since then, spots for the entrees have featured the individual products (and the Giant, of course)—the Little Green Sprout was not used.

▪ "We were comfortable with the introductory ads," Mr. McGrath said, "but we knew we had to move on to a sustaining drive." So the company and agency Leo Burnett Co., Chicago, have been working on the Green Sisters concept for about one year.

That's not as long as it took to develop the Little Green Sprout, which took about 2½ years. But he was created to provide a "voice"—a spokesman—for the Jolly Green Giant, who has never said more than "Ho, ho, ho." And the Green Sisters "are not going to be used

(Continued on Page 82)

Vol. 50, No. 42—Advertising Age (ISSN-0001-8899) is published weekly except semiweekly the second week in March, the first week in September and the third week in December at 740 N. Rush St., Chicago, Il 60611. Second class postage paid at Chicago and additional mailing offices.

MG still battling for import market share

By LOUIS A. FANELLI

NEW YORK—While sports car enthusiasts may be mourning BL Ltd.'s plans to end production of its 50-year-old MG in 1981, the company will still be fighting for its U.S. share of the import car market in 1980. Among the competitors:

- Subaru of America, Pennsauken, N.J., will break a $10,000,000, 12-month network and spot tv consumer magazine campaign in mid-October to introduce its 1980 compact car line. A "brains and beauty" jingle will be introduced in the new campaign which stresses styling for the first time (AA, Sept. 24). The agency is Levine, Huntley, Schmidt, Plapler & Beaver.
- Peugeot Motors of America, Lyndhurst, N.J., is offering a $1,000 rebate on its 1979 top-of-the-line Peugeot 604 which lists for approximately $16,000. According to a spokesman, the rebate offer is running on spot tv, as well as in newspapers. Van Leeuwen & Partners is the agency.

Alfa Romeo USA, Englewood Cliffs, N.J., keying on the recent increase in gas prices, is offering customers 667 free gallons of gas or the equivalent of 12,000 free miles of driving with the purchase of a 1979 Sprint or sports sedan.

According to F. William Free & Co., the company's ad agency, when a Sprint or sports car is purchased the owner is given a booklet containing two vouchers. The first voucher is sent to the company and the owner receives a check for the price of 667 gals. of gas. After 12 months, the second voucher is sent to the company, and if the price of gas in their area has increased, the company will send a second check making up the difference.

Sprint, the higher priced of the two models, lists for approximately $13,500, including extras. EPA estimates Sprint gets 18 mpg in city driving and 25 mpg on the highway.

The offer runs through Oct. 31. Newspaper ads are running in New York, Los Angeles, San Francisco and Seattle.

Robert W. Burden, BL's U.S. advertising director, noted that the MG line will continue to be advertised next year and through the first quarter of 1981. Advertising, he said, will coincide with the car's production schedule. MGs will continue to be produced until next summer, with the car most likely being available until early 1981.

The company, he added, will retain the MG name in the hope there will be an MG of some kind in the future.

Bozell & Jacobs, which acquired the MG account in 1963, will continue to handle BL's Jaguar advertising. The company also manufactures Triumph and Rover cars.

According to Leading National Advertisers Inc., last year measured spending for MG was approximately $5,750,000. Jaguar spending was nearly $2,500,000.

Last year the company exported to the U.S. approximately 30,000—or 75% of all MGs produced. Negotiations are now under way, Mr. Burden said, to ship all of the 1980 models to the U.S. #

Anheuser-Busch trench warfare includes new products and ads

By CHRISTY MARSHALL

CHICAGO—Anheuser-Busch is taking its beers into the 1980s with new or revised ad campaigns, more sports tie-ins for all brands—and adding international markets. Furthermore, A-B is marking the new decade with even more diversification.

"Fight in the trenches" was the command issued from A-B execs last week to wholesalers here to review the company's latest strategies against No. 2 Miller Brewing Co. and to preview A-B's new advertising for Natural Light, Michelob Light and Busch.

Not mentioned to the wholesalers was the news that A-B execs are going to London this week to sign the final papers with Allied Breweries to export Budweiser to the U.K.. (AA, Oct. 1).

Also not discussed was the fact that A-B is now planning to go into the direct mail marketing business. According to sources, the company has a plan on the boards to market, by direct mail, a top-of-the-line collection of quality goods and call it the Clydesdale Collection. Philip Morris has a similar venture, the Marlboro Country Store.

▪ The execs did mention A-B's new line of Eagle brand snack foods (AA, Sept.17) and said the products would go into test in Boston, Atlanta and San Francisco. The salted snacks are packaged in "Pringle's-type" cylinder cans.

What was discussed, and often repeated, was what several wholesalers called "a lot of trench talk," "man your trenches," "fight in the trenches," etc. The war is obviously against Miller and, according to A-B, the biggest gun in its artillery is going to be Natural Light—nationally, the No. 2 reduced-calories beer, behind Miller's Lite.

Having already made heavy inroads into Lite's market share, A-B now is testing a new Natural Light tack that stresses what ingredients are in Natural Light—and what ingredients aren't.

Just two weeks ago, the Bureau of Alcohol, Tobacco & Firearms tossed out a complaint filed by Miller against A-B's use of the term "natural" (*see story on Page 12*).

A-B has test spots starring the regular Natural Light duo of Norm Crosby and "Ray Jay Johnson," but this time, Ray Jay drones, "You can call it hops or you can call it barley . . ." And after spending the last two years convincing consumers to call it "Natural," the company has decided now it should be called "Natural Light."

A-B's other light beer entry, Michelob Light, will be stepping outside its identity as a Michelob family member (with its "Good taste runs in the family" pitch) and even beyond the category of light beers to take on all brands. The new campaign theme line is: "Compare the taste to any beer you like," according to wholesalers at the show.

▪ A-B's former popular-price but now premium Busch beer will be sticking with its "Head for the

ABC first to shuffle; CBS program chiefs huddle

NBC rivals hot on replacement trail

By COLBY COATES

NEW YORK—With CBS-TV said to be on the verge of announcing wholesale prime time scheduling changes, ABC-TV made the first major moves of the new season by yanking "Lazarus Syndrome," moving "Hart to Hart" in that Tuesday, 10 p.m. slot, and returning "Fantasy Island" to its Saturday 10 p.m. time slot.

More significantly, in filling the former "Fantasy Island," Friday, 8 p.m. spot with specials, ABC lent a degree of credence to speculation that its backup product isn't what it should be. By contrast, much of CBS-TV's replacement series are said to be promising and sources are poised for an announcement about them, probably at the end of this week.

▪ ABC will run multi-hour sports specials and movies in the Friday 8 p.m. to 11 p.m. period for a number of weeks, but will insert a variety of entertainment specials in the first Friday prime time hour once the holiday season begins; 9 p.m. to 11 p.m. would then be filled with its normal movie.

The network also said "Lazarus" is only on a hiatus and will return sometime "with a new focus." ABC's changes begin Friday, Oct. 19.

▪ Midway through the third week of competition, NBC led with a 22 rating and 35 share followed by ABC's 20.5 rating and 32 share. CBS was third with a 17.7 rating and 28 share. Thursday, Oct. 4, three-city overnight-ratings indicated ABC would top the ratings that night.

▪ Meanwhile, sources familiar with CBS strategy sessions that continued through the weekend and included CBS chairman William Paley and the CBS Entertainment team headed by president Robert Daly say CBS has ordered six episodes each of "The Chisholms" and "Housecalls," and 13 of "Stockard Channing." Replacements ready for immediate use include six hours of "Young Maverick," six "Phyl and Mikhy" half-hours and five hour-long "Hagen's," a show starring Chad Everett.

"Chisholms" and "Stockard Channing" both played in limited runs to moderately good numbers last season. To open the door for "Housecalls," CBS will air the theatrical version starring Walter Matthau on the "Wednesday Night Movie," Oct. 24. The network's "Dallas" spinoff "Knott's Land-

Lorillard balks at Media Corp. plan

By JOHN J. O'CONNOR

NEW YORK—"We're not going to pour money down a rathole."

The words of a Lorillard exec sum up the cigaret marketer's reaction to a proposal that it pay millions of dollars into a "pot" from which creditors of Media Corp. of America would recoup a portion of the estimated $10,000,000 collectively owed to them by the financially troubled media buying service.

Instead of having all Media Corp. creditors draw from such a fund, as proposed by the creditors committee, Lorillard wants any funds it releases to reach only those creditors with outstanding bills for Lorillard ads placed during a portion of July by Media Corp. The Lorillard exec also said the company is being asked to contribute an amount "far greater" than the bills it feels obligated to settle.

▪ The fund now is said to consist of $1,200,000 in receivables that Media Corp. listed as assets. Lorillard is doubting that such receivables will ever be collected.

Singer Co.'s U.S. Sewing products division, another ex-MCA client, also is said to be unwilling to contribute to the fund. A Singer exec was unable to confirm the report and declined further comment.

Lorillard was the first to dump Media Corp. when it learned of the fiscal crisis confronting the company headed by Albert B. Shepard (AA, July 30, *et seq.*). Singer, Media Corp.'s largest client as a result of Lorillard's pullout, left some weeks later, assigning media buying responsibility to Scali, McCabe, Sloves, its agency.

Although MCA liabilities are put at $10,000,000, creditors with unpaid bills that don't show on Media Corp.'s books also are standing in line. According to a source, their claims—if verified—could boost Media Corp.'s liabilities to $13,000,000 or more.

While negotiations between Lorillard, Singer and the creditors committee continue, Media Corp. has continued to operate with a handful of smaller clients, only two of which Mr. Shepard would identify during a phone interview with ADVERTISING AGE. They are Costa Rica Travel Bureau, a new client, and *China Trader*, a quarterly English-language publication published by Sino Communication Co., Hong Kong, that focuses on the Republic of China's trade, industry and commerce.

Senate subcommittee gets tough with FTC

WASHINGTON—FTC was pressed to spell out more clearly its children's ad proposals and bluntly told to change rules covering sales of used cars and home insulation during questioning before a Senate consumer subcommittee Friday. Congress will no longer be a "silent partner" to FTC, its commissioners were warned. The commissioners resisted proposals for a legislative veto over FTC rules, but welcomed closer congressional supervision (*see earlier story on Page 102*). They also said they would consider voluntary action by networks in controlling tv ads for children.

Allied Breweries 'assisting' Anheuser in U.K.

K mart will test grocery box store

By JACQUES NEHER

CHICAGO—K mart will open an Aldi-type limited assortment food store in the Detroit area this fall—a move that could portend a major expansion into the food business and provide a fresh growth opportunity for the company in the next decade.

The success of the box store concept (AA, Aug. 20) had made the nation's No. 2 retailer "sort of curious," according to Bernard Fauber, senior exec vp and chief administrative officer of K mart, explaining the upcoming opening of the 10,000 sq. ft. food outlet adjacent to a K mart store in Pontiac, Mich.

"We heard so much about it and we had a vacant property so we decided to do one as a test," Mr. Fauber said.

Although no opening date for the yet unnamed store has been set, Mr. Fauber said it will contain only dry goods comprised of a full mix of nationally branded, private label and generic items—a setup that will make it similar to Aldi and Jewel T box stores, each of which carry about 500 items.

While he stressed that K mart has "no plans at all" to open other box stores, industry observers believe the concept "is a natural" for the retailer because it is compatible

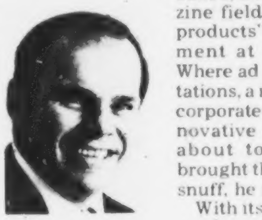
More expansion in Hearst plans

By BERNICE KANNER

NEW YORK—Gordon L. Jones' move to vp-group executive at the Hearst Corp. signals loudly and unmistakably that changes are afoot at 959 Eighth Ave. here. But the changes are not confined to Mr. Jones' specialty, business publishing.

A lot of moving and shaking, or, more specifically, adding and acquiring, is taking place in Hearst's consumer magazine division, where revenues have doubled "and gone way ahead of that in terms of bottom line" in the last four to five years, according to K. Robert Brink, exec vp-Hearst Magazines. The privately held Hearst operation remains tight-lipped about its finances, though its corporate revenues are believed to be in the $1 billion area.



K. R. Brink

So fired up by expansion goals are the Hearst execs that they have scrapped their traditional low-profile approach and shared a glimpse of their game plan with ADVERTISING AGE. "We want companies we talk to, to know what we're about," Mr. Brink said.

Further evidence of the Hearst expansion effort also came late last week as Hearst announced the purchase of three Lee daily newspapers (*see story on Page 104*).

What Hearst is about—apart from growth—is "Americana." "We have a tremendous heritage. We're part of American history," said Mr. Brink. "We've always had a sense of pride going for us," he added, also crediting, in the magazine field, Hearst's "good strong products" and excellent management at the circulation level. Where ad sales once lagged expectations, a modest training program, corporate discounts and some innovative sales packages that are about to be introduced have brought the marketing group up to snuff, he said.

With its house in order, the mammoth media conglomerate is set to become even bigger. The consumer magazine division will grow, partly through acquisition spearheaded by president Gilbert C. Maurer and partly through a unique birthing technique which enables Hearst to see a return even while it tests a new magazine. The magazine development unit, headed by Mr. Brink, expects that between seven and 10 new concepts will emerge as dummy magazines next year.

Mr. Brink's lieutenants include Mark F. Miller and Charles H. Townsend, business manager and assistant to the general manager of Hearst Magazines, respectively. Curt Anderson, coordinator-creative development-new products, and John Mack Carter, *Good Housekeeping* editor-in-chief, help steer the new publication to launch.

In at least one way, Hearst seems to be bucking a trend. Most publishers sense an ad opportunity and create a product to capture it, Mr. Brink said. Hearst tries a different tack. "We say, let's see if we can develop a product that someone will buy. Advertising will follow."

- Creating products that people buy is a hallmark of Hearst Magazines special interest publications. Of the 30 titles published in 1979, some are expected to graduate to full-fledged periodicals in time, much in the manner of *Colonial Homes*.

When it first surfaced as an annual in 1975, *CH* quickly sold out its single copy distribution of 200,000. The next year *CH* came out semi-annually with a 250,000 newsstand-only circulation. In 1978, it emerged as a quarterly. By then, newsstand circulation was up to 300,000, and the magazine development group determined it had passed the demand test. The company is now selling subscriptions and has increased *CH's* frequency to every other month. There's no guarantee its evolution will stop here.

Buoyed by *CH*'s success, Hearst Magazines tried to hit pay dirt again with *Good Housekeeping's Country Living*, which first appeared as an annual in 1978. It is now a quarterly but will come out six times next year. Then subscriptions will be sought through Hearst's own direct mail subscription group.

(Continued on Page 104)

Difficulties abound in vtr appeal

LOS ANGELES—MCA-Universal and Walt Disney attorneys face the tough task of strengthening the advertising aspect of their case against Sony's Betamax as well as freshening other main contentions if they expect to reverse the ruling here last week clearing videotape recorders of copyright infringement charges.

"Advertisers will have to make the same kinds of judgments they do now about whether persons viewing televised programs actually watch the advertisements which interrupt them," stated U.S. district Judge Warren J. Ferguson in ruling against MCA and Disney's lawsuit to halt marketing of and home use of Sony and other vtr's.

- The plaintiffs, who will appeal the ruling, had contended in their suit that the videotape machines will deprive advertisers of the audiences they want when they want them, and thus reduce the value of tv advertising and televised shows from MCA and Disney.

"They predict that if Betamax owners use the pause control to delete commercials or the fast-forward to pass them by, advertisers will pay less to networks and networks will pay less to producers and owners," the Ferguson decision said. "It must be remembered, however, that to omit commercials, Betamax owners must view the program, including the commercials, while recording," the Ferguson decision said. "To avoid commercials during playback, the viewer must fast-forward and, for the most part, guess as to when the commercial has passed. For most recordings, either practice may be too tedious."

Judge Ferguson cited a survey submitted by Sony and co-defendant Doyle Dane Bernbach showing that "92% of the programs were recorded with commercials and only 25% of the owners fast-forward through them."

The decision stated that "whatever the future percentage of legal versus illegal home use recording might be," depriving the public of "noninfringing use" by banning all use of vtr's "would be an extremely harsh remedy."

While the federal judge's ruling was not unexpected, videotape recorder marketers exercised some caution, if not restraint, in their advertising. That caution may now be unnecessary in light of the court's rejection of MCA/Disney's specific allegation—that manufacture, saie and home use of Sony Corp.'s Betamax constitutes copyright infringement. "We have not been overly constrained by the suit, but all our advertising for SelectaVision includes the disclaimer, 'Caution: Unauthorized recording of tv programs and other materials may infringe the rights of others'," said James DeVoe, vp-advertising, RCA Corp. RCA is the largest vtr advertiser, spending about $8,000,000 via Leo Burnett Co.

Other advertisers whose ads are not directed, as RCA's are, at an audience of consumers with a "serious intention" to buy a vtr but who have not yet made the commitment, may well find their options swelled by the intial resolution.

Sony, the actual target of the suit that includes other manufacturers only by implication, immediately scheduled meetings with its legal counsel after last Tuesday's ruling.

Chrysler adds Iacocca, truck rebate spots

HIGHLAND PARK, MICH.—Chrysler Corp. has added a rookie spokesman and gone into extra innings with a veteran pitchman in an ambidextrous campaign featuring both 1979 and 1980 models.

Chairman Lee Iacocca and sportscaster Joe Garagiola were on the NBC baseball playoff telecasts with different messages. Mr. Iacocca is appearing in tags to 1980 Horizon and Chrysler spots and Mr. Garagiola was performing in an encore of Chrysler's rebate program, this one for 1979 light trucks.

- The decision to air both messages came only 48 hours before the playoffs started. Mr. Iacocca had been ambivalent about appearing on camera but changed his mind after his scene was reshot.

Chrysler still had a 92-day supply of trucks on hand after the first $400 rebate program ended Sept. 30 and decided to prune the stocks further before Dodge announcement day, Oct. 19. The rebate, which excludes window vans and imported trucks, runs at least until Oct. 19, the company said.

Meanwhile Mr. Iacocca was adding two statements to Chrysler-Plymouth commercials. The cars debut a week before Dodge on Oct. 12. "I'm not asking you to buy any car on faith. I'm asking you to compare," he says in one and "If you buy any car without considering Chrysler . . . that'll be too bad for both of us" in the second.

Chrysler was able to swing Mr. Garagiola back into rebates quickly because the new "rebate countdown" commercials for trucks had been made earlier.

- "Chrysler announces the truck and van rebate countdown," Mr. Garagiola says, "Get a Dodge full-size pickup, a Ramcharger, or a van or Plymouth Trailduster and a $400 rebate check to go with it. But put it in gear. The countdown is on."

With the rebates, which included some cars, Chrysler chalked up sales of 98,767 autos and 37,279 trucks in September, up from a year ago when 82,647 cars and 34,913 trucks were sold.

"The rebates have done everything we expected them to do," said Gar Laux, exec vp of sales and marketing. "During the Car Clearance Carnival, Chrysler sold 204,923 cars and trucks," he said. #

'Los Angeles' launches effort for national ads

Los Angeles is starting a fall campaign in business publications to attract more national advertising. The drive, via Concept 3 Advertising, Toronto and New York, highlights results of a survey showing, among other things, that the magazine's subscribers have an average income of $47,980, homes averaging $200,510, and at least two cars. Theme: "If you're not in Los Angeles, they'll miss you."

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities: Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

Banks' newspaper ads take big jump in July

NEW YORK—Banks and trust companies' newspaper advertising showed an impressive 60.8% increase in dollar spending during July, 1979, compared with July, 1978, according to the July Flash Report prepared for ADVERTISING AGE by Media Records.

Of the 16 categories monitored for AA by Media Records, only one—department stores—was down in July ad volume in the 15 cities whose newspapers are measured (*see chart*).

Department stores, traditionally the newspaper industry's top dollar spenders, were down only 0.5%.

The top five categories—according to actual spending—were department stores, furniture and furnishings, amusements, general merchandise stores and food stores.

In addition to banks and trust companies, rounding out the top five for percentage spending gains were public service utilities (31.1%), sporting and leisure time equipment (22.8%), eating and drinking places (17.4%) and amusements (15.4%). #

Gibson appoints Hill

John Q. Hill, formerly account manager, Hill & Knowlton, New York, has been appointed vp-planning and business development, a new post at D. Parke Gibson International, management consulting company. His appointment is part of a reorganization at DPGI following the death of the company's founder, D. Parke Gibson, last May.

PRSA career guide is now available

The Public Relations Society of America has published a 92-page career development guidebook designed to assist individuals in discovering their potential in specific professional areas. The guidebook recommends resources for the management and administration of pr activities, communications programs and audiences relevant to pr. The manual also helps determine the skill individuals have in these areas. Copies priced at $12.50 for PRSA members and $50 for nonmembers are available from PRSA, 845 Third Ave., New York 10022.

Newcomers enter mainstream

Satellite transmission takes off

BY MAURINE CHRISTOPHER

NEW YORK—Revolution or evolution—it's here.

The new electronic technologies, glamorized by satellite transmission of words and pictures—already has shaken up the broadcast and print media establishment. And sooner than most people seem to think, the newcomers could maneuver their way into the communications mainstream. The signs are everywhere.

Look how the big money outfits are reacting to what they obviously view as a potentially fertile field for aggressive marketing. From scores of possibilities, three examples, covering American Broadcasting Co., Triangle Publications and Time Inc., should establish this point.

ABC, the leader in traditional tv, aims to be the leader in the new forms as well. ABC Video Enterprises has been created to provide softwear, presumably for cable, cassettes, disks, pay cable, subscription tv and/or other alternates still to be invented. ABC chairman Leonard Goldenson repeatedly emphasizes that he wants ABC ready to furnish the entertainment product for the home screen—however it gets into the house.

While cable's 15,000,000-plus households are small fry compared to regular tv's 76,300,000-plus homes, Triangle Publications, which has not retained a near monopoly on national tv listings for decades by showing poor business judgment, thinks the time has come to cater to the catv elite.

- Listings for pay cable and stv have been added to the New York edition of *TV Guide*, as they will be later in other editions. So far, Time Inc.'s Home Box Office, as the pacesetting pay cable network, has been appearing in more editions than Showtime and other rivals.

Meanwhile, *TV World*, hitherto source of the most complete information about cable-originated fare in the New York City area, shifted to a regional, regular tv focus to try to compete with *TV Guide* and to attract national advertisers.

The new technologies have inspired a raft of publications for the trade and consumers. Newsletters, some of them at very fancy prices, are proliferating. Due in February, Triangle's *Panorama* will seek to capitalize on the excitement being generated by the new faces and forms muscling into the video scene. This monthly will begin with a rate base of 200,000.

Freshmen in the well-populated newsletter category include "Satellite Week," published by *TV Digest* and sold at $327 per year. This should not be confused with the older "Satellite News," also based in Washington and priced at $147 yearly. Phillips Publishing, which also prints the biweekly "VideoNews" for sale at $97 per year, moved "Satellite News" from a monthly to an every two week schedule during the summer.

- Some measure of the extent of publishing activity on the trade side of the new technologies can be gauged from a readers' questionnaire in "VideoNews." There were 21 titles listed, including some old-line business papers, when the newsletter asked its readers what else they read.

Time Inc., which started in magazine publishing and still has its largest holdings there, is expected to increase its current substantial stake in a variety of new technology businesses.

As head of video, J. Richard Munro strengthened Time's operations in regular and pay cable tv programing, catv ownership and stv ownership and programing. Its subsidiary, American Tv & Communications Corp., jousts with Teleprompter to be the No. 1 catv group in the U. S. Both are in the 1,000,000 subscriber neighborhood.

Time Inc.'s investment in such technology may be further sparked by Mr. Munro's promotion to the new post of exec vp of the parent corporation, a possible steppingstone to further heights.

Gerald Levin, who used ingenious satellite distribution and slick promotion to shake cable out of the doldrums as chairman of Home Box Office, succeeded Mr. Munro as vp-video at Time. This puts two strong advocates of the new technology into the executive suite at Time, which several years ago chose to go with cable ownership in preference to conventional broadcast stations.

- HBO is moving toward the 3,000,000 subscriber mark, having added 200 affiliates in September alone. Pay tv has helped to make even tiny ma and pa systems prosperous. Most operators charge $8 to $11 per month for HBO's main service (over and above the regular basis cable fee) and take a 50-50 split with the network in revenues.

So much for how some of the communications powers are reacting to tv in the space age. What's the outlook from the advertising vantage point?

This year cable will gross about $8,500,000 from sponsors, compared to tv's $10.1 billion. This comparison is as laughable as that of tv *vs.* radio in radio's heydey and tv's infancy.

(Over-all cable already is a $1.7 billion business, with most of the revenue coming from subscribers to basic and pay program services; sources think that figure will reach $4.5 billion by 1985.)

Next year the Television Bureau of Advertising expects tv billings to pass the $12 billion barrier. Cable will make gains too as the Madison Square Garden Network expands, the Getty Oil-backed Entertainment & Sports Programing Network gets a foothold and other ad vehicles, such as the Cable News Network, go on the satellites.

- Many execs at major agencies are intrigued with the media promise of the newer forms of video; they are keeping their clients *au courant* on developments from superstationing to pay tv to cassettes and disks to locally originated cable.

Projects in the planning stage include how-to cassettes on everything from auto repair to cosmetics to be marketed with the support of one or more compatible products. Agency people assigned to pioneering in the new technology have something of the kind of unjaded enthusiasm that was evident in the early days of regular tv when agencies put together complete packages and sold them to the networks for sponsorship by their clients.

Satellites are the catalyst in this electronic revolution. They offer the hope of more choices for everyone—stations, advertisers, programers and viewers. Cable and public tv have led the way in using them for network transmission; commercial network's Big 3 will follow eventually.

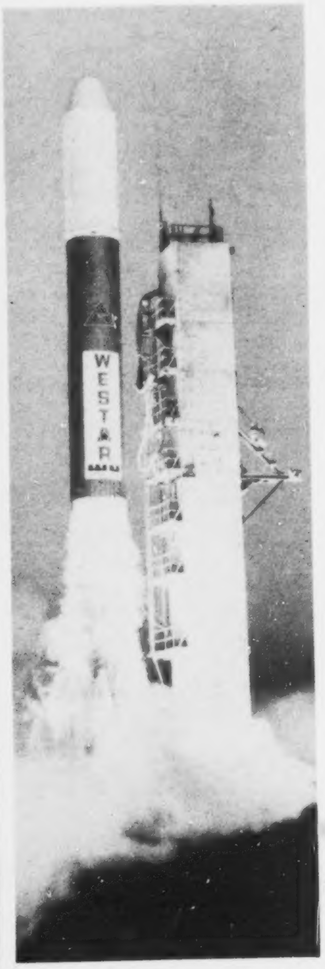
Meanwhile, the competition is tight for room on the domestic satellites. RCA American's third will go up in December, with a fourth not too far behind. Western Union has three Westars up and another ready when needed. AT&T leases Comstars and is trying, after having been kept out of the domestic satellite carrier field, to catch up fast.

Equally lively is the rivalry between resale common carriers offering superstations and other shows on the birds and between the manufacturers making the earth terminals required to receive from space. This is one industry where the law of supply and demand still seems to be functioning. The price of ground terminals for tv and cable has gone down from about $100,000 a few years ago to less than $10,000 for a simple dish today.

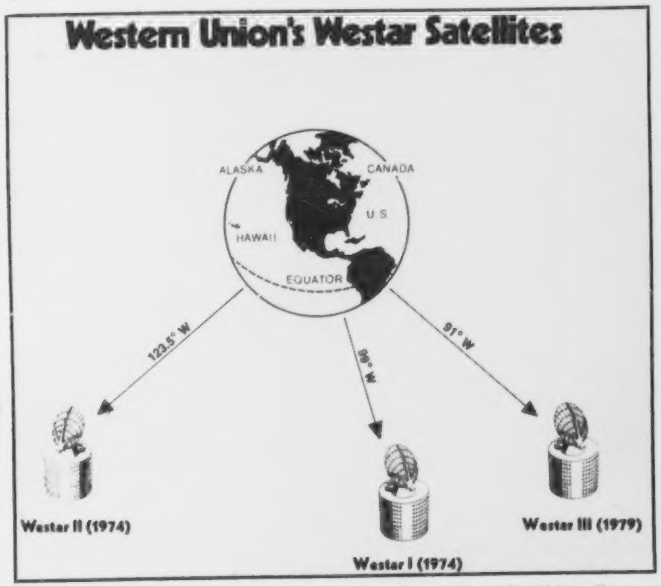
- Last, comes perhaps the most compelling reason for pronouncing the revolution here now. Satellite-to-home tv transmission, yesterday's nightmare or fantasy, depending on who's talking, has arrived.

Scientific-Atlanta, No. 1 in earth station sales to catv and regular tv, put a Homesat unit on the market and began selling them to farmers, ranchers and wealthy entrepreneurs for $20,000. In short order, Gardiner Communications Corp., a runner-up in the industrial ground terminal market, offered a household dish and priced it at about $10,000 below Homesat's. #

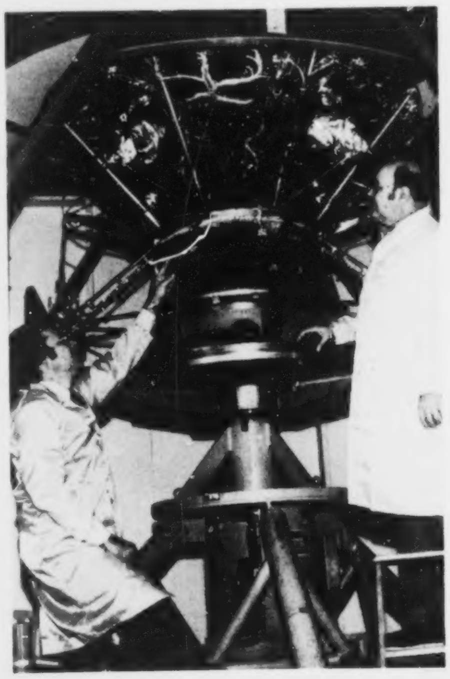
Maurine Christopher is deputy executive editor of ADVERTISING AGE.



Western Union's Westar III lifts off on its way to earth orbit where it will transmit words and pictures across the country.



Westar III, like its sister satellites, has 12 transponders. It will handle new clients as well as switchovers from Westar I, aloft since 1974.



Inside story

Western Union engineers Jack Albert and Jack Van Cleve check out Westar III at Hughes Aircraft Co. which built it. The cost to build and launch the bird was about $30,000,000.

Meanwhile, back on earth at RCA Americom's ground terminal in Vernon Valley, N.J., transmissions and satellites' orbits are monitored.

(Continued from Page S-1)

other items suggest that advertising price levels are presently somewhat lower than other price levels. Since 1967, the price rises in other sectors of the economy have been cumulatively greater than they have been for advertising. The advertising unit price index reached 221 in 1979 and the cpm index was at 194, but these are still lower than those for farm products, industrial commodities and labor.

Mass media communications are relatively even more efficient when contrasted to other marketing costs that are labor intensive or heavily affected by rising gasoline or other transportation expenses.

Advertising price levels presently compare favorably with other prices and although we expect no repetition of the 1976 explosion in rates, it is likely that media costs will rise in the future at a pace closely correlated with the economy's inflation rate.

In 1976 when television led the way with double-digit rate increases, many outraged advertisers swore that they would switch significant portions of their budgets to other media. Now, nearly four years later, it is quite apparent that television has continued to maintain its share of major media budgets.

In 1980, television's forecasted share of major media revenues is expected to be about the same as it was in 1976. Network television's share has actually grown, mainly because their price increases since 1976 have been higher than the other media.

Volume Changes

Advertising revenues in the major media have grown significantly each year since 1976. The annual revenue increase has averaged 17% for the years 1976 through 1979, which is far above the media volume increases. These data indicate that most of the revenue increase has been due to higher prices and not greatly expanded message volume.

Magazine page volume has risen dramatically, but the levels prior to 1976 were greatly depressed. Although a great deal has been heard about television "clutter," these broad volume measurements suggest that television advertising message volume has not been growing at such an alarming rate after all.

In most years, since 1976, the number of network television commercials has risen by about 2%. For spot television the patterns have been somewhat different, but the cumulative changes have been about the same. When spot rates rose rapidly in 1976, the next year experienced a drop in commercial volume and when price rises moderated, the volumes rose again in the following year.

There has been a gradual increase in the number of advertising messages distributed each year and there has also been a growth in media audience. The total number of advertising messages is rising, but there is no indication that the advertising noise level suddenly has become intolerable. The volume will continue to rise in the future, but most of the foreseeable future growth in budgets will result from the necessity to pay higher prices for space and time.

Price Trend Outlook

The trend in media prices has been up for the last two decades. The unit price indexes of all media except magazines and spot radio are presently above the 200 mark. This means that 1980 unit prices for most media, will have more than doubled since 1967. Magazines and spot radio have had lower than average increases and network television has had the highest unit cost increase as indicated by an index of 319.

In 1980, the cost of a 30-second network television commercial will be more than three times higher than it was in 1967. However, the audience of the average network television commercial has

(Continued on Page S-14)

Volume	+17	+13	+ 7	+ 3

(Continued from Page S-12)

also increased and that is why the cpm index is slightly lower at 245. Thus, the cost of buying 1,000 exposures to a network tv commercial message will be nearly two and a half times higher in 1980 than in 1967.

The prices of different media have risen at a different pace throughout the last two decades depending upon the unique developments affecting the supply of time and space and the aggregate demand for each medium's messages. When cigaret advertisers departed from the broadcast media, the demand was reduced and prices fell or they rose much slower than they had in the past.

In recent years marketplace judgments have resulted in the cost of network television messages rising significantly faster than other prices. Future market conditions will ultimately bring about shifts in the pricing patterns of the different media.

For the next few years the trend in media prices will continue to run parallel to the path of total inflation. I expect the annual inflation rate from 1981 to 1983 to be somewhere between 7% and 9%. During these years most media price changes are likely to also fall somewhere in this range. By 1984 we may again experience somewhat more extreme variation in media prices, but it will be many years before media price disruptions are anywhere near as severe as they were from 1976 through 1978. #

Newspaper evolution

to enhance this preselling effort, while the networks will continue developing their methods to maximize the advertising effectiveness of their programing.

Advertising effectiveness of television has led new and different types of advertisers to our medium, and the outlook is for this trend to continue also. Ten years ago, the fast-food restaurant business, the photography area, wines and movies were not the major television buyers they have become.

And we're expecting such items as home security systems, brand name fashions, plus other products not yet developed, to be among those products making a similar television advertising impact in the coming decade.

The influx of these new-to-television advertisers has helped transform our marketplace from a 2½-network economy a decade ago to a full three-network economy. It's a strong position; one which underscores television's ability to satisfy our clients' needs. #

How do you keep America's toughest TV audience happy for 30 years?

Give them what they like.

The 19-million tough critics in New York, New Jersey and Connecticut – you have to give them exactly what they like or you don't last.

Today, we deliver more movies, more live sports and more locally-produced programs than any other independent. As well as award-winning public affairs specials. And Europe's finest productions.

Today, WOR-TV is the favorite New York independent station of young adult critics. And third favorite with critics under 18.*

At WOR-TV, we're celebrating 30 years on the air.

The point is obvious.

Reynolds holds top spot in magazine spending

NEW YORK—R. J. Reynolds Industries retained the top spot in magazine advertising in August, a month when ad expenditures rose 14% and ad pages jumped 7%. This represents the highest page jump since April.

Reynolds held the lead with a 42% budget increase, which pushed its magazine expenditures to about $9,300,000. Second place Seagram Co. held its ground despite a 7% trim in magazine spending.

Philip Morris, which tumbled from third to fourth place in July, rebounded and increased its magazine expenditures 30%.

▪ Procter & Gamble moved up a notch, from fifth to fourth place, with a 17% magazine budget increase, and B.A.T. Industries vaulted two spots to fifth place with a 92% increase, the largest of the leading magazine advertisers.

Loews Corp., which registered the second highest increase—73%—advanced from eighth to sixth place, while General Motors Corp. slipped from third to seventh place, even though the car maker increased its magazine spending 50% over August, 1978.

General Foods also slipped, down from sixth to eighth place, though it boosted magazine spending by 11%.

American Brands held ninth position with a 4% spending boost and Time Inc. moved into 10th place, displacing American Telephone & Telegraph from the top 10. The publisher moved into the top 10 even though it cut spending by 16%.

Companies in the cigarets & tobacco category spent more than any other, and 41% more than the industry spent in magazines in August, 1978. Toiletries & cosmetics, which plowed 57% more money into magazine pages this August, surged into second place, displacing beer, wine & liquor which, d
spite a 15% increase, fell to thi
place.

More 'very strong' fare coming, Silverman vows

By MAURINE CHRISTOPHER

NEW YORK—NBC will not adjust its schedule to counter the early prime time shifts already made by ABC and CBS, Jane Pfeiffer is not leaving to return to parent RCA and this season of network tv surprises hasn't seen the last of them yet.

These were some of the more intriguing things NBC president Fred Silverman said when interviewed by phone late last week about his reaction to NBC's prime time resurgence.

While obviously pleased with the initial ratings which put him ahead in the season-to-date prime rankings, the country's most famous and highest paid network programer did not rush to predict a '79-'80 win.

"It's a long season," he said cautiously, "and one that may be talked of for years to come." His earlier forecast of NBC leadership by December, 1980, still stands, and he is well supplied if, or most likely when, midseason replacements are needed.

NBC ratings surge continues. See Page 114 . . . Klein praises Silverman. See Page 109.

In the first three weeks of head-to-head competition this fall, NBC leads the home ratings with a score of 19.7 to 18.8 for ABC and 17 for CBS.

"All I want is improvement," Mr. Silverman said, "And there is improvement." The $1,000,000 exec's detractors say NBC took the early Nielsen's by upfront loading of blockbuster movies, big name specials, sports and other nonseries fare. Such talk, he feels, obscures the fact that all along the line NBC is doing better than last year.

As examples, he cited the Tuesday leadoff hour where shares are up from below 20 to 32 or so and the "Buck Rogers" Thursday hour where the audience has doubled.

Nor does he agree that NBC frontloaded all the good stuff to get off to a fast start. "In November and December we have very, very strong, highly competitive material coming up," Mr. Silverman noted.

He mentioned a guest appearance for Victor French on "Little House on the Prairie" (the actor used to be on "Little House" before moving on to ABC's "Carter Country"), another two-hour feature for the high-rated "CHiPs"; a visit by Gary ("Diff'rent Strokes") Coleman to "Buck Rogers," and a three-hour crossover between "Sheriff Lobo" and "BJ and the Bear."

In the inventory are 30 hours of Christmas programing. NBC will offer more shows than usual in this category, since the boss sees no reason to abdicate that field to CBS.

"We've got to continue to operate as though we were No. 4," Mr. Silverman said. "This means we'll be working even harder."

Was ABC overconfident this fall when it moved some of the network's biggest hits? Mr. Silverman wouldn't comment. But he did in effect dismiss ABC by repeating his earlier forecast that the network tv power struggle of the '80s will be between NBC and William Paley's CBS.

The last available weekly national Nielsens put NBC first, as almost always, in the wakeup hours and late night; second in news, and third in daytime and the Saturday kidstrip.

Asked if he plans to devote more time to

Europeans rally behind Cook; Visa travelers check entry set

By ELSPETH DURIE

LONDON—Two moves made in Europe last week threatened to shatter the longtime American dominance of the estimated $31 billion international travelers check business and launch an era of intense competition in the industry.

A group of European banks, meeting in Brussels, announced the formation of a joint organization to issue uniform travelers checks in a number of currencies. Led by the Deutsche Bank and two other leading German commercial banks, financial institutions from 17 countries, including the Societe Generale of France, the Societe Generale de Banque of Belgium and all the leading Scandinavian banks, voted overwhelmingly to use as their main instrument the system of Thomas Cook & Sons, the largest travelers check issuer outside the U.S.

David McWilliam, assistant general manager of the Midland Bank, which owns the Thomas Cook travelers check operation, confirmed that the initiative would involve the sale of Thomas Cook's nonsterling travelers check division to the new group for a sum of approximately $50,000,000.

Cook's system already includes eight currencies, some of them issued in conjunction with various European banking partners. Mr. McWilliam said that Cook's sterling checks, as well as the separate ones now issued by the Midland Bank, would combine to form the nucleus of the British contribution to the pool.

Scarcely was the Brussels announcement out when Visa International chief Dee Hock issued a statement that Visa would actually start operation of its own interna-

(Continued on Page 114)

By JOSH LEVINE

NEW YORK—While the first Visa International travelers checks may only ripple the surface of the worldwide market when they appear next month, Visa is preparing a U.S. advertising splash for next spring to help push it toward the goal of 10% penetration by the second year of operation.

As it moves toward a direct confrontation with American Express Co., Visa has readied an initial domestic budget of $13,000,000 to support the checks and its brand name in network tv, radio and magazine ads, according to bank sources.

That figure will be supplemented by the separate budgets of Visa check issuers, which could add considerably to the total ad outlay.

▪ Visa also is considering raising the initial ante, possibly by levying a one-time advertising charge on large issuers, sources report. Issuers of checks in the U.S. pay Visa USA 0.15% of check volume to support brand advertising, a commission rate that is reduced over time.

"In time, we think we can match American Express ad spending, taking into account a budget augmented by independent banks," said Robert Sanders, vp-advertising, Visa USA.

First National Bank of Chicago will begin issuing Visa checks Nov. 1, aided by a network of sales agents—banks, savings & loan operations and other institutions—that will sell them at some 300 locations.

Visa's largest projected issuer at this point, Barclays Bank, is expected to start its own operation early next year, when, like First Chicago, it will issue checks here and abroad. In overseas markets, Visa will

petition from Thomas Cook checks, now that a group of European banks plan to take over the British company's international operations.

▪ While Visa USA, the domestic arm of Visa International, has been conducting massive direct mailings to pave the way for introduction, it will hold off on consumer advertising until the full complement of issuers and agents is under way.

For the first years of operation, Visa is counting on familiarity with its brand name—known interna-

Magazines try to sustain growth

By BERNICE KANNER

SOUTH HAMPTON, BERMUDA—Even as the industry's average pretax profits approach 10%, magazine publishers, wary of shrinking revenue and profit margins in the coming decade, are pulling out all stops to shore up their bottom lines.

With legerdermain, born of learned cost controls, the industry should continue to grow at about 13% a year in the early 1980s, shy of the 20%-plus gained in each of the past three years, but still ahead of the 10% to 11% growth expected in the national economy, based on projections of Robert J. Coen, McCann-Erickson senior vp. Separately, many publishers speculated they would hold their own during the recession, but would experience no real growth.

Such news greeted some 550 attendees—a record number—at the 60th Magazine Publishers Assn./American Society of Magazine Editors joint meeting here in a tropical floral and fauna wonderland.

▪ The postal problem that has plagued the industry in the 1970s will continue to pester it in the '80s. The scarcity of paper that has forced publishers to scamper for additional sources, pay hefty premiums and use cruder stock will fade—barring strikes—as more capacity comes on stream. For now, however, strikes cannot be barred. Just last week, workers at a Louisiana Crown Zellerbach Paper plant walked out. Hearst's magazines and CBS publishing are among CZ clients.

▪ In one panel, advertisers and agency execs explored the ways technological improvements in broadcasting could affect magazines. John Andersen, manager of advertising and merchandising services, major appliance business group, General Electric, sounded a sour note by telling publishers that increasing personalization of tv "strikes at the heart of your business. Serve your readers well while there are still plenty of them around," he said, and warned that libraries of books will be replaced by libraries of videodiscs.

Mr. Andersen also predicted that advertisers would sponsor videodiscs with money siphoned away from magazines.

last minute news

Trailways exits O&M for newly formed agency

DALLAS—Trailways Inc. moves its account Nov. 15, from Ogilvy & Mather, Houston, to Stern/Monroe, Dallas. The new shop is being formed by departing Glenn, Bozell & Jacobs execs Thomas F. Monroe, corporate creative director, and Lawrence N. Stern, account services director. Both worked on Trailways at Glenn, Bozell before the account went to O&M in 1977. Billings haven't been set, but are expected to be much lower than 1978 and 1979 levels. The busline has discontinued its advertising until next year in order to evaluate future plans.

Hefty breaks new ad splash minus Winters

NEW YORK—An $8,000,000 tv campaign for Mobil Corp.'s Hefty garbage bags breaks today, the first from Ted Bates & Co. Ads feature the theme, "Tough enough to overstuff." Comedian Jonathan Winters is no longer spokesman.

(Continued on Page 8)

Insulation ad case pits Congress vs. FTC

By RICHARD L. GORDON

WASHINGTON—Congressional sensitivity to complaints about the Federal Trade Commission has brought the Senate into a potential crossfire among rival companies intent on protecting their positions in the home insulation market.

That is the picture emerging in the wake of demands by Sen. Howard Cannon (D., Nev.), chairman of the powerful Senate commerce committee, that the Federal Trade Commission justify a key part of its rule covering insulation advertising and labeling or delay it for up to a year.

The dispute is a taste of what could be in store for marketers in the future as more and more businessmen take their complaints about FTC, often based on threats to their particular competitive situation, to a Congress more willing than ever before to intervene.

The insulation ratings are extremely sensitive to marketers in that industry since the same rule requires the ratings to be carried prominently in advertising and on labels, with point of sale information also required in an effort to make them more significant in consumer buying decisions.

Sen. Cannon has walked into a marketplace battle pitting the giants of the home insulation market—Owens-Corning Fiberglas, Johns-Manville and CertainTeed—against hundreds of small cellulose insulation makers.

The big companies—which dominate the market with their familiar rolls of mineral wool and fiber glass insulation—got Sen. Cannon's ear when they said FTC was insisting they use a new test to rate their products while other federal agencies urged delay.

FTC said the test now in use overstates the insulating ability of the fiber glass/rock wool products by 10% to 15%; giving the big companies an unfair advantage.

The cellulose industry apparently was caught off guard. While the trade association representing the fiber glass/rock wool makers made their case directly to the Senate consumer committee, no cellulose maker got to the senator or to the committee's staff.

"They [the fiber glass makers] are using the Senate committee to further their business interests," fumed Bill MacKenzie, executive director of the Cellulose Manufacturers Assn. last week. "They're asking for what amounts to another season's delay in toeing the line like everyone else has had to do."

Sen. Cannon has warned FTC that he will take whatever action is needed to see that the insulation rule does not become effective this Nov. 30 unless the commission can better explain why the one year delay is not warranted.

FTC officials last week said they will be checking with the other federal agencies involved to see if they are firm in their positions that a delay is needed. They were unsure whether the test controversy would delay the effective date of the requirement for disclosing the insulation capacity, or "R" value, in ads.

The mineral wool companies have formally asked FTC to postpone the rule, and have also complained that the disclosure requirements are so detailed that a 30-second tv spot would have to run 57 seconds to include them.

Besides the unfolding insulation dispute, there were also these developments in the continuing political battle over controlling the FTC:

- The Senate consumer subcommittee, after roasting the FTC members earlier this month (AA, Oct. 8), closely questioned Washington attorney Patricia B. Bailey, the Republican nominated to fill FTC's vacant fifth seat for a term that expires less than a year from now. She was not, however, asked for her views on FTC's controversial proposals to restrict tv advertising to children, although her appointment will provide FTC with the quorum needed to get kid ad rulemaking moving again.
- FTC's new budget remained tied up in congressional disputes involving other agencies; a provision barring FTC from finalizing pending industrywide rules or starting new rulemakings, insisted on by the House and reluctantly agreed to by the Senate, will probably last through mid-November.
- Action on proposals to give Congress a veto power over all FTC industrywide rules is still a week or more away in the House, and still further off in the Senate, where the hottest debate is expected.

MR magazine study joins fray

By LEAH ROZEN

NEW YORK—Take out the calculators, rulers and fine point pens. Magazine Research Inc., the newest entry into the magazine research ranks, releases its first full report on 166 magazines Oct. 18.

The release of the report is expected to put magazine publishers and ad agency media executives in a dither as they pore over the Magazine Research figures and compare them with those already released by rival Simmons Market Research Bureau.

Comparisons won't be easy to make because SMRB releases its figures as readers per copy and MR is releasing total readership figures for magazines and will not have its readers-per-copy figures ready until later this month or next.

What MR will be releasing this week are figures on total audience, a complete demographic breakdown of that audience (sex, age, income, etc.), and the quality of the audience (time spent reading and interest expressed in the magazine). Last week, MR released what it labeled as "top-line information" on the total audience, male and female breakdown, median age and household income of 140 magazines and magazine groups.

- Timothy Joyce, chairman of Magazine Research, said he anticipated that the release of the top-line figures and the two volumes making up the complete report will cause "a considerable amount of debate and discussion."

That debate and discussion will revolve primarily around the accuracy of the MR and the SMRB figures, their differences and the research methods used to obtain those figures. MR uses the recent reading research method; SMRB uses its own version of the recent method for 100 publications and the through-the-book method for 44 magazines.

When Simmons released its figures last month, the recent-reading-technique magazines showed readership jumps of 90%

(Continued on Page 116)

Litton plugs in new ad theme

By JACQUES NEHER

CHICAGO—Litton Microwave Cooking Products, which has been "changing the way America cooks" in its advertising since it went national and grabbed a heavy chunk of the nascent category in 1974, next month will drop that line and switch its focus to the end product—food.

Pushing the new theme, "Litton helps families eat better," the company will spend $10,000,000-plus in network tv and magazines, beginning Nov. 6. About three-fourths of the budget will go into tv, according to Richard Klegon, vp-marketing for the Minneapolis company.

- The campaign, he said, "will show off the better eating quality that microwave ovens can provide, using situations that families have encountered." Testimonial-type magazine ads, for example, will be headlined with questions like, "Do Carol Kane's frozen vegetables taste better than yours?" or "Does the Unnasch family eat better than yours?"

The tv spots also will be of the testimonial variety, stressing, among other things, the economy of reheating leftovers, which, employing a microwave oven, "are more acceptable," Mr. Klegon said.

One reason Litton may have dropped its slogan is that by 1979 it realized there were other companies changing the way America cooks. Since the category took off in the mid-'70s, Litton watched its

Section 2

To marketers, research can be the make-or-break key. Section 2/Market Research looks at the field today, as well as at the upcoming 25th annual conference of the Advertising Research Foundation—beginning opposite Page 58.

Vol. 50, No. 44—Advertising Age (ISSN-0001-8899) is published weekly except semiweekly the second week in March, the first week in September and the third week in December at 740 N. Rush St., Chicago, Il. 60611. Second class postage paid at additional mailing offices.

Pillsbury gets set to serve Pasta Perfect

By LARRY EDWARDS

CHICAGO—Pillsbury Co.'s surprising shift of its American Beauty Macaroni account last week from W. B. Doner & Co. to Botsford Ketchum, apparently was the result of a competition between the two agencies on developmental work on an entirely new product in the pasta area.

Although Pillsbury's group vp Edgar Mertz declined to discuss that product (except to say that it will be "breaking shortly"), sources reveal the company is readying an entry called Pillsbury's Pasta Perfect.

Pasta Perfect is said to be pasta in a pouch (inside a box), which is added to boiling water for cooking. Sources describe the idea as similar to Riviana Foods' Success rice, which does not have to be drained. Advertising reportedly will tout no mess, no sticking, no draining.

The new product is clearly coming from the company's American Beauty unit, but sources report the box will carry the blue Pillsbury symbol, not American Beauty's red roses. That indicates Pasta Perfect may be slated for markets outside American Beauty's current marketing territory—the western and central U.S.

(Continued from Cover)

ple, and they are shocked at what some of the jobs are going for."

Especially hard hit are companies recruiting individuals to work in smaller cities.

"The risk of changing jobs in New York or Chicago is not that great," says one recruiter, "but if someone is considering relocating to a job in Louisville, for example, he begins to wonder, 'What are my opportunities if the company decides to cut back?' "

It is generally conceded that the most crucial shortage is among marketing recruiters with three to six years experience. The belt-tightening and cutbacks in research training programs that came in the early 1970s combined to cut sharply the number of new entrants into marketing research during those years. Although many training programs have been reinstated, the number of individuals with the kind of experience needed at the middle management level is still quite low.

"A couple of years ago, it was impossible," recalls Marcia Fleschner, a recruiter with the Smith's Fifth Ave. headhunting company. Because of the resurgence in training programs, Ms. Fleschner is convinced that "in a year or so, the lack of 1970 to 1974 people won't be as much of a problem any more."

According to figures compiled in CASRO's annual survey of member survey research companies, for example, third-level project directors enjoyed a 12.3% jump in average salary from 1977 to 1978. This was the highest increase among all the management positions surveyed, and was markedly higher than the 7.8% increase posted by the companies' chief executive officers, for example.

- At the high and low ends of the market research ladder, it is much more of a buyers' market. At the top, there is a surplus of qualified individuals competing for the highest management positions, while at the entry level, one recruiter claims that, "If I put out an ad for trainees, I'd have 500 people in my office the next day." These entry level positions come with a salary of $9,000 to $12,000 a year for those with bachelor's degrees, according to various sources.

Of the many factors that can affect a market researcher's chances to be hired or promoted, most observers agree that getting an MBA degree is the single most important step an individual can take. It can also add, depending on the school and the hiring company, several thousand dollars to a starting salary.

"An MBA is critical now," says New York-based recruiter Dick Bryant. "People may be hired without an MBA, but need it to move up."

"The important degree used to be the master's in social science, but now the trend is for the MBA," agrees Mr. Werner. "Now a market researcher not only needs to be able to handle data, but also to be able to put it into a market orientation."

Communications skills also are becoming more important.

"As marketing research plays a greater role" in marketing decision-making, says Ms. Fleschner, "it becomes more important for researchers to express themselves." #

B.G. Yovovich is a free lance writer in Chicago.

"Today More Than Ever It's Critical That Marketing Research Be Accurate And Meaningful!"

Another good reason why America's largest companies choose R.H. Bruskin Associates

Decisions in business can be extremely expensive especially the wrong ones With costs skyrocketing on all fronts marketing advertising research and development business decisions can involve many millions of dollars

Because of this it is important that all decisions be based on facts solid and scund facts to maximize the chances for success

R H BRUSKIN ASSOCIATES one of America s leading marketing research organizations performs all of its research no matter how big or small the project with this in mind That s why in the past year alone some 200 companies literally a Who s Who of American enterprise have called upon our expertise

In addition to a highly professional business oriented staff of researchers the Bruskin organization offers a wide scope of services AIM a national probability omnibus service conducted among 2 500 different adult respondents each month providing low cost high quality information CTR a carefully controlled in-house central telephone facility providing national regional and local research information overnight if necessary and of course a complete range of CUSTOM RESEARCH designed to your specific corporate needs for all different types of studies

Now more than ever it is vital that your marketing research needs be handled by an organization with the highest quality and professional standards an organization that is relied upon for sound actionable research by so many of this country s largest companies

If this is the kind of marketing research you require R H BRUSKIN ASSOCIATES can provide it

Vopan voice pitch analysis research. A progress report.

It is now four years since Glen A. Brickman founded Vopan Marketing Research to apply, commercially, the voice pitch analysis research technique he developed with Dr. Philip Lieberman and a team at Brown University. What progress has been made and what experience has been gained?

Vopan' Research Programs

Vopan has now refined the technique and applied it to TV pre and post testing, print testing, advertising strategy testing, new product research and brand usage prediction. All these programs are now tested, proven and can be conducted in any city, nationwide.

Vopan Research Experience

Over 30 major national advertisers and many more regional and local clients now use Vopan's voice pitch analysis technique in their research programs. The product and service areas in which Vopan has considerable experience include: Analgesics, Automobiles, Banks, Cereals, Do-It-Yourself Products, Fast Foods, Frozen Foods and other Food Products, Health & Beauty Aids, Household Products, Liquors, Prescription Drugs, Pet Foods, Retail Chains, Soap, Soft Drinks, Sporting Goods, Tobacco, Toys and Games, T.V. Station and Program Promotion.

How and Why Does Vopan Work?

All interviews are tape recorded. Later the tapes are re-played and a computer analyzes the respondents' voice pitch during the interviews.

It is a simple fact that anyone's voice pitch changes, uncontrollably if there is emotional commitment behind their answer. The computer detects committed and valid answers from those that are just 'lip service' or confused. It removes subjectivity. Vopan has been effective for the many clients who have used it in diverse fields over the past four years because it adds accuracy and sensitivity to their research programs.

32-Page Vopan Report

If you would like a free copy of a 32-page Report describing the Vopan technique and programs in detail, please call or write to Glen A. Brickman or Larry Ramsey at Vopan Marketing Research, 264 Beacon Street, Boston, MA 02116, (617) 247-2363.

THE HARVEST FARM UNIT ANNOUNCES A NEW STATE FARM MAGAZINE.

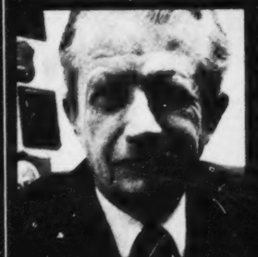
Effective January 1, 1980, the *Florida Grower & Rancher* will become part of the Harvest Farm Unit.

Florida grosses over $3 billion in farm income annually, ranking it 5th among all states in cash receipts.

Now you can reach this important farm market along with Ohio, Michigan, Pennsylvania, Kansas and Missouri, with a single unit buy…a unit that reaches over 17% of the total U.S. farm population with over 16% of the U.S. farm income.

Here are just some of the features of the new *Florida Grower & Rancher*:

· Incorporates the *Florida Field Report*.
· Locally edited exclusively for all Florida growers and ranchers.
· Standard 760-line format.
· 12-time (monthly) frequency.
· Qualifies for the Harvest Farm Unit discount.
· Controlled circulation of 32,511.



Meet Bill Deitenbeck, editor of *Florida Grower & Rancher.* Bill comes to the publication from *Florida Field Report*, now incorporated into *Florida Grower & Rancher.* His editorial efforts have won him numerous awards and honors from the Florida agricultural community and for journalism.

Bill will be headquartered in Orlando, Florida.

Spot prices up modestly for most top markets

By MAURINE CHRISTOPHER

NEW YORK—Prime time spot tv rates for the fourth quarter continue to show mainly modest gains in all the top 20 markets except Dallas, which fell 5.5% below last year's levels.

According to the October SQAD Report, street price increases for prime time 30s on network affiliates ranged from 9.5% in Washington to 1.9% in Houston. These cost per household rating point estimates are based on buys made as of Sept. 27 by a sampling of leading ad agencies.

Prices and volume were strong, but not dramatically so, said Marvin Richfield, president of Spot Quotations & Data. Price hikes, he noted, had been tempered somewhat by late buying, especially on the part of "bread and butter corporations, airlines and several other seasonal advertisers."

In general, prices tended to sag temporarily until demand picked up as the '79-'80 season got under way, he indicated. The Dallas market reportedly dipped over-all because the stations there broke the line too early.

■ The SQAD president attributed the late buying this fall to caution over the recession's possible impact on consumers and to management concern over committing ad funds that might be needed to reach their predicted profit goals.

In the weeks to come, Mr. Richfield has pinpointed early and late fringe as periods to watch, since expensive, newly syndicated programs like "M*A*S*H" and "Happy Days Again" will start their local runs.

Late fringe for October, which includes independents as well as affiliates, looked particularly healthy in Philadelphia, at a $106 cpp, and in Boston, at $101. The quotations ranged from $132 in New York to $11 in Wilkes-Barre. Early fringe went from $132 in New York to $32 in San Diego to $10 in Wilkes-Barre.

Accompanying the 51-market spot buying guide is the 200-market planners report giving day-part projected costs for the next six quarters. Forecasts for prime time in New York call for a cpp of $371 for the second quarter of 1980 and $381 for the fourth.

Comparable projections for other cities: Los Angeles $279 and $287; Chicago $194 and $200; Philadelphia $170 and $175 and San Francisco $175 and $180. #

October 'street' prices for spot tv on network affiliates

Average cost per household rating point for 30-second spot

Nielsen market rank	Prime time '79 vs. '78
1. New York	$356 (+5.3%)
2. Los Angeles	283 (+5.6%)
3. Chicago	187 (+3.9%)
4. Philadelphia	166 (+3.8%)
5. San Francisco	169 (+4.3%)
6. Boston	158 (+4.6%)
7. Detroit	127 (+5.8%)

41-50	260	5.82

Source: Spot Quotations & Data, 950 Third Ave., New York 10022. Average cpps for a 30-second spot were determined from ad agency conventional buys on affiliates as of Sept. 27. Excluded are spots bought on a 52-week basis or calling for 150-plus gross rating points weekly. These averages are a yardstick and not a listing of the market's lowest prices. Ratings used are an Arbitron/-Nielsen average. These guides can be applied to 60s—200%—and 10s—50%. Percentage gain or loss over October, 1978, is shown in parentheses.

King to buy KTVB

King Broadcasting Co., Seattle, will buy ABC affiliate KTVB-TV, Boise, Ida., from KTVB Inc., if the Federal Communications Commission approves the sale. King Broadcasting owns three tv and nine radio stations, and also operates a number of cable tv systems in the West, through King Videocable Co.

Morley leaving AmEx

American Express Co. announced the resignation of Roger H. Morley as president, a title that is being retired when he leaves Dec. 31. Alva O. Way, formerly senior vp-finance at General Electric, is moving to AmEx to assume Mr. Morley's duties as vice-chairman.

Mr. Morley, who reported to chairman James Robinson III, said he left to seek the top spot somewhere else, but sources viewed Mr. Morley's failure to secure an AmEx takeover of McGraw-Hill as a factor in his departure.

Tight Money Fallout

Ad arsenal oiled for savings battle

By JOSH LEVINE

NEW YORK—New marketing efforts on behalf of high-yield money market funds will mean a proliferation of the funds' tombstone ads, and that may signal R.I.P. for many regular bank savings accounts.

As double-digit inflation undermines the appeal of a 5½% passbook account, small savers are finding the alternatives more and more appealing. The upward acceleration of interest rates after the Federal Reserve Board's recent moves to tighten credit has focused even greater attention on money funds, where depositors can tap interest yields over 11% with as little as $1,000.

"We're going to see an incredible increase in advertising for money market funds," said Trevor Rolfe, advertising manager, Shearson Hayden Stone. "If we can make people believe that a money fund is as safe as a bank, it boggles the mind what could happen."

▪ It boggles the mind already. The Shearson Daily Dividend Income fund has reached $750,000,000 in assets in the three months it's been in existence, with only sparse advertising. Shearson and other fund brokers have been waiting for changes in Securities & Exchange Commission regulations that have proscribed the mention of interest yield in fund ads.

"So far, fund advertising has been a dog with no teeth," said Shearson's Mr. Rolfe. "Our ability to focus on yield in advertising will really put some bite into fund marketing."

▪ That's bad news for thrift institutions, but several of them are biting back. The New York Savings Bank, the city's third largest mutual savings bank, ran newspaper ads last week with the headline, "Avoid the knockout punch," a reference to the effect of "erratic investments of all kinds."

The Dime Savings Bank, New York's second largest, came out with the same message, though the tone of its page newspaper ad was less combative. Both banks played up their federal deposit insurance and the peace of mind it brings—the best of a limited choice of weapons in the thrift institution's duel with less regulated investment tools.

"I think you're going to see a lot more of this kind of thing," said Edmund Michelson, vp-director of advertising, New York Bank for Savings. "But, on the whole, savings bank budgets will probably decline slightly. I also expect to see a shift from media spending to more targeted promotions aimed at holding on to our own customer base—direct mail, in-store promotions, telephone campaigns, and

(Continued on Page 105)

Real estate chains: 'We'll grow'

An ADVERTISING AGE roundup

The burgeoning franchise real estate business, although bothered by the publicity surrounding the tight money situation, sees itself as being in the best possible position for handling the homes that will be bought. And they also see themselves growing as a result.

Century 21, the Irvine, Cal.-based giant of the real estate chains, is shrugging off the jump in interest rates and drop in mortgage availability, and plans to increase its tv ad spending next year to $24,000,000, from about $20,000,000 this year.

Bruce Oseland, assistant vp-communications, said the net effect of increased lending rates "as of today is virtually nothing. As we see it, the effect will be on new housing rather than existing housing, and resale of existing homes is our main business. It could turn out to be a plus for us."

He said Wells, Rich, Greene/-Townsend, Century 21's agency, will continue a tv and radio campaign aimed at recruiting sales people nationwide for the next couple of weeks, then return to heavy broadcast on the chain's "neighborhood professional" theme.

WRG in New York conducted research for Century 21 which Mr. Oseland said supported the planned increase in tv use next year.

He said Century 21 hadn't used network tv prior to Oct. 1, and to continue heavy network commercial airing at the $24,000,000 level next year needed documentation, since the spending comes from a trust fund of chain and franchisee ad contributions involving a network that now counts more than 7,500 offices.

▪ And, speaking of offices, that's just what some execs are pointing to as a positive outcome of the current money crunch. According to William Howell, vp-marketing at Gallery of Homes, Atlanta, his company is receiving an increased number of applications for membership from independent realtors.

"When times are bad, it is more favorable for a realtor to join a franchise," Mr. Howell said. "We're beginning to get more memberships now. But we're not as aggressive as Century 21, Realty World and ERA about going out and getting new members. We still look for quality realtors. We don't take just anybody."

Mr. Howell added that it was a "little early to tell" the effects of the new interest rates on home buying, but noted the company was experiencing "some problems with the publicity" surrounding the Federal Reserve Bank's anti-inflation action.

"This publicity is the worst thing that can happen to a realtor," Mr. Howell said.

Schoenleb explains his move to Arby's

By CHRISTY MARSHALL

CHICAGO—As the new exec vp and second-in-command at Arby's International, E. Christian Schoenleb will have a voice in all areas of the nation's leading roast beef chain—and that's more than he had as exec vp-marketing at Burger King Corp.

When asked in an interview last week why he opted for Arby's, Mr. Schoenleb told ADVERTISING AGE: "The first and biggest reason is the job offered more broad management responsibilities than I had at Burger King. I will be involved in virtually everything. I wanted more say and input to direct the company I was working in . . . I was often frustrated at Burger King."

His decision to change chains apparently caught Burger King by surprise. It said a search would be launched to find a successor to Mr. Schoenleb.

Before announcing his departure, Mr. Schoenleb hired Peter Schweitzer, senior vp and account director on the Burger King account at J. Walter Thompson Co., as senior vp-marketing. On Nov. 15, Mr. Schweitzer will assume the lion's share of Mr. Schoenleb's former duties until a successor is named.

In his telephone conversation with AA, Mr. Schoenleb said he feels he left Burger King in good shape, and "some exciting things are going to happen there in the next six months."

House nod to $30 million energy drive may spur plan

By RICHARD L. GORDON

WASHINGTON—The House of Representatives has endorsed putting as much as $30,000,000 into a major paid advertising campaign to encourage energy conservation by the public.

This is the first time either the Senate or House has gone on record in favor of the government buying media—instead of using public service ads—for a national campaign on the energy issue.

▪ Backers of the drive cite as a model the energy conservation effort mounted by the Canadian government in recent years. House energy and power subcommittee chairman John Dingell (D., Mich.) has backed the campaign, while Rep. Richard Ottinger (D., N.Y.), a member of the Dingell subcommittee, has been the chief spokesman on the House floor.

House support for paid ads came in a voice vote which amended pending Energy Department legislation to authorize a $30,000,000 ad investment this year. A week earlier, the House had balked at approving larger sums, first $95,000,000 and then $45,000,000 (AA, Oct. 15).

Recovery by NBC-TV brings strength in 18-49 age reach

By COLBY COATES

NEW YORK—Nearly five weeks into the prime time tv season, agency execs continue to marvel over NBC-TV's strength in the 8 p.m. to 9 p.m. (EDT) period, its success in reaching the 18-to-49-year-olds and the effectiveness of its print and on-air promotions.

Obviously, there are other factors influencing NBC's drive into the position of a solid competitor to ABC-TV. They include the share declines for established ABC hits and the failure of most of its newcomers, coupled with what some sources see as "the disarray" of CBS-TV's programing operation.

- Agency execs attribute a large measure of NBC's success to NBC president Fred Silverman, of whom one adman said, "Nobody in sales, programing or promotion is making a single decision without him."

For many observers, the key to NBC's resurgence is the network's spectacular, but not widely anticipated gains with the 18-to-49 age group.

Explained one buyer, "When we were negotiating upfront business with NBC it became apparent we couldn't buy NBC for a few of our biggest clients. NBC refused to give us guarantees against the 18-to-49 demographic," he said. "From the beginning, they [NBC] expected to make inroads in the 25-to-54 breakout but certainly not 18-to-49," he said. "If they thought they would score with that group (18-to-49), they would have guaranteed the estimates."

What's behind NBC's success in reaching everyone's favorite consumer? One buyer thinks "It's the way they've scheduled 'jiggle' programs." Another took that a step further, drawing a parallel to ABC's mid-1970s turnaround built around such "t&a" favorites as "Love Boat," "Charlie's Angels" and "Three's Company."

The low-brow sexiness that made these shows hits, he contended, is now turning up in NBC's "Sheriff Lobo," "Real People," "Man Called Sloane," "Buck Rogers," "Kate Loves a Mystery," and even the older skewed "Quincy," which, thus far this year, has tackled teen agers and drugs, kiddie porn and Las Vegas showgirls.

"Real People," meanwhile, has ogled the Dallas Cowboys cheerleaders and visited Hugh Hefner. "Lobo" has been up to his ears in girlie magazines and wet t-shirt contests; "Buck Rogers" is in the hands of various seductresses, and on the season debut of "Kate" (don't dare call me Columbo), "America's mom-turned-sleuth uncovers a prostitution ring involving suburban housewives," according to the NBC ad copyline.

- "Face it," said one agency exec, "these are kinds of things that grab the young viewer. And the fact is, nobody understands that or exploits it better than Fred [Silverman]."

Sources, however, insist it's a mistake to write off ABC's appeal to these viewers, while still expressing incredulity over some early NBC numbers.

For example, Nielsen data after the first two weeks of the new season gives NBC a prime time total audience advantage of 31% over CBS and 14% ahead of ABC. With total women, NBC has an 18% edge on CBS and 19% advantage over ABC. In the key 18-to-49 women demographic profile, NBC is 42% ahead of CBS and 19% up on ABC.

(Continued on Page 106)

Gaynor goes after Y&R clients

By LEAH ROZEN

NEW YORK—Following the notion that if you really want something, you have to ask for it, Gaynor & Ducas president Allen C. Falcone is asking Young & Rubicam and Marsteller accounts to move their business to his agency.

Mr. Falcone has sent letters to about 60 advertisers handled by the two agencies. His massive missive action was prompted by Y&R's acquisition of Marsteller last summer, a deal that made Y&R the nation's largest agency (AA, July 2).

Mr. Falcone wrote that he is opposed "to the development of supergiants in the advertising business." His reason for being against them: "Clients are denied the exacting search for alternatives. The entrepreneurial spirit is hobbled. And it is this spirit that spurs advertising agencies to achieve greater sales and profits."

- Mr. Falcone's letter asked Y&R and Marsteller clients to telephone him for a 10-minute chat. "And in that 10 minutes I will give you at least one fresh and exciting idea, free," he wrote.

How many have called for their free ideas since the letters went out Oct. 5? According to Mr. Falcone, he has received about 15 responses, although all have been through the mail rather than on the phone. He characterized five out of the 15 as "live prospects who are concerned about the same things I am." Mr. Falcone said he expected to hear shortly from others he wrote to, and within 30 days he expects to announce a "sizable" account switch.

The agency president said he saw no ethical breach in his actions. "Why not?" he said of the letter-writing campaign. "Other agencies do it all the time. My ac-

Sexy program content, as illustrated by these print promos for Buck Rogers and Kate (nee Columbo) segments, is credited by some observers for helping NBC-TV's early ratings.

Indie insurance unit sets ad battle plan

By JOSH LEVINE

NEW YORK—Independent Insurance Agents of America is consolidating its advertising at Hicks & Greist by adding its $2,000,000 account to the $10,000,000 tv project the agency had won earlier this fall. The move severs a 20-year relationship between the IIAA and Doremus & Co.

With the account and the separate campaign under its belt, Hicks & Greist will mount an extensive media effort designed to win back the market share lost to direct writers—insurance companies like Allstate and State Farm Mutual—which write personal insurance policies through a company sales force.

The 1980 tv project is considered independent from the IIAA's account, traditionally a print-oriented budget, because it is jointly funded by the trade organization and insurance underwriters who utilize the network of independent agents to handle their policies.

- Underwriters, including Aetna Life & Casualty, Travelers Corp. and Continental Insurance Cos., have seen their share of market dwindle to 50% in the last 25 years under a heavy ad barrage from direct writing competitors.

In automobile insurance, for instance, direct writers have nearly doubled their share of market from 25.9% in 1955 to 51.2% in 1978, according to industry sources. Though automobile insurance is perhaps the most dramatic example, other personal insurance lines in the $80 billion market, mostly property and casualty insurance policies, have undergone similar shifts.

Though studies have found a price differential working to the disadvantage of the independent agent, the prime cause has been massive ad spending by direct writing companies. The spending overmatch, according to the IIAA, could run as high as 40 or 50 to one.

The account move is effective Dec. 1.

For example, Allstate, a direct writing subsidiary of Sears, Roebuck Co., spent $18,000,000 in measured media last year. Aetna, Travelers and Continental combined spent just over half of Allstate's budget. #

Kraft to join retort pouch category with line of entrees

By LARRY EDWARDS

CHICAGO—Kraft Inc., working hard to improve what many consider a dismal new products record, will enter several test markets early in 1980 with an entree line packaged in the new shelf-stable retort pouch.

The line, which doesn't have a name yet, is assigned to an agency here, but Kraft senior vp Chester Green declined to disclose which one. Sources suggest, however, that the project is under way at N W Ayer. If so, it represents the first piece of Kraft business to go to the local Ayer office; Ayer, New York, handles Sealtest and other dairy products.

- All signs point to the Ayer assignment. Of the four local shops on the Kraft roster, two—J. Walter Thompson Co. and Needham, Harper & Steers—probably could not have taken it. JWT is the Oscar Mayer agency and NH&S earlier resigned ITT Continental Baking's retort pouch entree line at the behest of client General Mills.

Foote, Cone & Belding and McCann-Erickson, the other two on the roster, are in test marketing stages now on two other projects of Kraft's corporate marketing development department. Miracle hot dishes (FCB) are in five test markets (AA, Oct. 15) and Sausage Maker seasoning mix (McCann) is in controlled store tests (AA, March 19).

Small-agency squeeze

Voracious conglomerates, slow pay hurt; but some thrive

By BERNICE KANNER

NEW YORK—In the midst of boom times for agencies, some small and medium-size shops have lumbered onto hard times.

Now, more than ever before, say some marketing consultants, many shops which bill less than $20,000,000 are finding their cash flows clogged, their spirits dampened and their ability and interest in handling modest billing accounts challenged by the giants. Many, despairing of a change in their fortunes, are eager to be bought, even at distress prices.

On the other hand, a number of little shops have been thriving. Piloted by good management, they've fattened their bottom lines.

How pervasive are the difficulties and what has caused them?

"I can't say how widespread it is, but I'm more aware of it than ever before," said James Heekin, a partner in the Canter Achenbaum Heekin marketing consultant company. Big agencies are now going after small accounts so as to feed them into spinoff units or divisions, or handle them for creative showcase purposes, he said.

Heads of a number of small to medium-size agencies here noted that they were hearing more offers from potential buyers than ever before. Said one exec, "I've forgotten three of those phone calls in the last few months and my lawyer says if I ever get serious about selling, he's got ten agencies willing to talk to me."

The phenomenon is enhanced by a desire on the part of larger agencies to move into specialties. Examples of such moves: J. Walter Thompson Co.'s acquisition of World-Wide Agency, Los Angeles-based recruitment advertising company, and Bozell & Jacobs' purchase of Chollick Associates, an agency that is heavily into retail advertising.

"There's a certain malaise among small agencies today," said Mr. Heekin, the former president of Doyle Dane Bernbach and Ogilvy & Mather. "For many, the growth of the giants has been a downer. They've lost their entrepreneurial confidence. They see God on the side of the big battalions. They don't want to be the last guy off the beach, so they figure they should get aboard."

Hence, a strong upsurge in the number of smaller shops looking to be bought. This trend was also tracked by Edward D. Brown, former president, DDB-Canada, and vp-assistant to the chairman, Ally & Gargano. Mr. Brown recently set up a consultancy to serve small and mid-size shops.

Larger shops no longer limit their interest to clients billing at least $2,000,000, said Mr. Brown, who noted that this change in the "two-tier" policy developed as agencies became increasingly efficient. "It now takes fewer people to handle a piece of business. Therefore, smaller accounts can be more profitable than before, when overheads were greater."

Mr. Brown also claimed that the smaller agencies "urge to merge" was prompted by account growth. "When accounts grow, they often expect commensurate growth in their agencies' ability to serve. Me-

ABC leading in tv's one-week season

By COLBY COATES

NEW YORK—Circle last week—the sixth of the prime time tv season—on your calendar.

For the first time since the season started, and for the last time until well after Christmas, all three networks are having at each other with the closest thing resembling normal schedules.

Of course, normal is a relative term. Whereas ABC is rolling with all its usual series, NBC has just gotten around to moving "Diff'rent Strokes" and "Hello Larry" to their Wednesday 9 p.m. to 10 p.m. period and to introducing "Shirley" on Friday at 8 p.m. to 9 p.m.

Despite CBS' yanking of "Working Stiffs," "The Last Resort," "Struck by Lightning," "Bad News Bears" and "Big Shamus, Little Shamus" and replacing them with specials, industry cynics say it's a "normal" CBS schedule because that's how the network gets out of trouble every year around this time.

Midway through the sixth week, ABC, with most of its schedule intact, appeared headed for a ratings win and NBC was shaping up as the second place finisher to CBS' third.

NBC and CBS execs talk about new programs. Page 112.

National Nielsens for Monday through Wednesday, Oct. 24, had ABC in front with a 21.1 rating and 34 share. NBC, in second, had a 19.7 rating and 32 share with CBS third with a 16.8 rating and 27 share. Three city overnight ratings for Thursday, Oct. 25, indicated NBC would take the night. For the season to date, ABC has a 19.8 rating, NBC a 19 rating and CBS a 17.5 rating.

- A week earlier, when ABC broadcast games six and seven of

FTC backs off on two ad rules

By RICHARD L. GORDON

WASHINGTON—The Federal Trade Commission and its staff are backing off from major parts of controversial proposed rules covering how hearing aids and foods are advertised.

It took the commission only 45 minutes of public discussion last week to agree on wiping out 11 of 14 advertising sections from its rule proposed for hearing aid sales practices. And the proposal was sent back to the staff for more work with the remaining ad sections in jeopardy.

The staff itself has separately urged the commission to officially "terminate" two of the three phases of FTC's long pending package of food advertising regulations.

The food rule, first proposed in 1974, and the hearing aid proposal, born in 1975, have been intensely opposed by their respective industries. Both proposed sweeping controls over ad practices as commission staff members sought to cure most marketplace imperfections in one fell swoop.

- **Why FTC is facing its toughest fight in Congress . . . Page 3.**
- **FTC guts medical association's ad restrictions . . . Page 4.**
- **Commission details guidelines for corrective ads . . . Page 109.**

What is happening to the food and hearing aid rules in 1979, however, appears to offer evidence that the commission is lowering its sights to concentrate on narrower objectives.

- Commissioner Robert Pitofsky won agreement last week that the "heart" of the hearing aid rule had little to do with reforming ad practices, but instead involved guaranteeing customers a right to cancel the sale and return the aid for a refund if they weren't satisfied within 30 days after using it.

In the food area, the staff is suggesting that the commission scrap phases two and three of its food rule proposals because they appear to be interfering with efforts to find alternate ways to make the consumer more knowledgeable about nutrition and less vulnerable to nonspecific claims of nutrition superiority.

Phase two called for a standard food products would have to meet before they could be promoted as "nutritious."

As 3rd quarter earnings take a drubbing

Initial '80 sales worry car makers

By RALPH GRAY

DETROIT—Slow auto sales in the first 10 days of the 1980 model introduction is causing concern, but not panic, among car marketers.

Domestic sales fell 6.2% in the Oct. 11 to Oct. 20 period with beleaguered Chrysler Corp. the hardest hit car maker. Chrysler sales fell 23% from a year ago with intermediate size and big cars most affected. Yet Chrysler is sticking to its original marketing strategy with "no fine tuning," a spokesman said. "I have no reason to believe we are going to have rebates," he said. Chrysler staged two big rebate campaigns on 1979 models.

General Motors divisions that had planned heavy support for their larger cars are sticking to those plans. "We put the emphasis where it is needed from the start," a Buick official said. The full-size LeSabre needs that help—its sales were down nearly 30% from a year ago and the intermediate Century is lagging by 12.5%, although observers expect a new notchback design to help.

Chevrolet also threw its ad muscle behind Impala-Caprice, but sales are down nearly 30%. The intermediate Malibu is down 5.6%.

The sales figures for Monza (off 33.5%) and Pontiac Sunbird (off 13.7%) are deceiving since both were coming off special promotions a year ago.

▪ Just about all the manufacturers say it is too early to tell if the early slump will continue. "One 10-day sales report does not a season make," one said.

Indeed, some divisions showed gains. Ford division was up 10% over a year ago with the compact Fairmont soaring 91%. The smaller Thunderbird, "a fast starter" a year ago, topped that with a 34% gain. The regular size LTD is down 40% from its rather unimpressive levels of a year ago.

The Lincoln-Mercury division was down 11.9% with the biggest losses in its new Lincoln and Mark VI. L-M did hang in there with a 6.7% share of the market against 6.8% a year ago.

GM's Cadillac division actually set a sales period record, up 15.6%, and plans "no drastic changes." It will start talking more about electronic equipment and downplay Seville as the only standard diesel-equipped car in favor of a full-line diesel presentation.

American Motors Corp., which doesn't report 10-day sales, sold an estimated 5,600 units, up from 3,938. "We think we have the right strategy and approach and we plan no changes. That's the first time I've been able to tell you that in a while," an AMC marketing official said.

Talk of a recession seems to be inhibiting buyers, marketers agreed. Higher interest rates, even though they don't directly apply to car loans, also have a dampening effect, one marketer said.

Chrysler's problems don't appear to be hurting industry sales. "Chrysler sold cars when they rebated them and that negates the 'Chrysler uncertainty' theory," another said.

Prospects of Chrysler getting the government assistance it is seeking were brightening, even after a consultant's report said the company needs a lot more than the $750,000,000 it was requesting.

The Booz, Allen & Hamilton report presented a more conservative outlook for Chrysler market penetration and profits. Chrysler had forecast a penetration of 10.2% in 1980; the new study puts that at 10%. Chrysler had 9.1% in the latest reporting period.

The report said Chrysler is on the right path in setting up separate marketing divisions for Chrysler-Plymouth and Dodge and in targeting its advertising. "While even the best of marketing programs will not necessarily produce penetration gains, Chrysler is making positive, sound steps to improve its marketing and sales capability," the report said.

GM's third quarter earnings dropped to $22,000,000 from $528,000,000 in 1978 and Ford's U.S. operations lost $2.50 a share. The company earned $103,000,000, down from $301,000,000 the year before. GM blamed the fall on production cutbacks and increased sales incentive programs to counteract a gas shortage-induced swing to small cars. Ford said its domestic loss was caused by lower sales, including a smaller market share, the shift to smaller cars and higher marketing costs. #

IHOP drops Y&R, in-house drive set

By JENNIFER PENDLETON

NORTH HOLLYWOOD, CAL.—International House of Pancakes has begun a drive to upgrade its image that includes a major expansion of its lunch and dinner menus, and the remodeling of its 450 locations.

Included in the marketing revamp is the decision to take the $5,000,000 IHOP account in-house, dropping Young & Rubicam, Los Angeles, its agency of three years.

In an interview at the company's headquarters here, Richard Herzer, IHOP's president, described the changes as a move to make IHOP a "three meal restaurant"—making it competitive in the areas that are admittedly the chain's weaknesses, its lunch and dinner menus.

Mr. Herzer became president of IHOP Corp. shortly after it was acquired by the West Germany restaurant chain, Wienerwald.

"We want to make dining at IHOP a basic, pleasant experience," said Mr. Herzer, as he discussed the menu changes. "In the past we have not done a good job in lunch and dinner."

Included in the new expanded menu is a full range of "variety dinners"—full course meals featuring steak, shrimp, Italian entrees and crepes, among other items—with prices ranging from $4 to $5. In the past, IHOP's lunch and dinner menu was built around its crepe entrees.

In addition to menu changes IHOP is testing new interior and exterior designs at locations in Texas, California, Oklahoma and Chicago.

The interior designs introduce plants, wood paneling earth colors

AHP's house shop planning for growth

By NANCY GIGES

NEW YORK—Contrary to published reports, American Home Products' in-house shop, John F. Murray Advertising, may be adding more business instead of losing some, and that includes retaining Anacin, according to agency president Frank Donino.

In preparation, Murray is beefing up its staff, adding two new senior vps, Stuart Gottdenker as creative director and Charles Hasser as director of account services. Both admen come from SSC&B, where they have worked on Sterling Drug's analgesic and household products businesses, Mr. Donino pointed out.

The Murray operation directs placement for AHP's $170,000,000 measured media expenditures and handles creative for a number of brands, including Anacin, Preparation H, Easy-Off window cleaner and others.

Last spring the shop was thrown into turmoil when former chairman Dan Rodgers left to become president of Norman, Craig & Kummel. Mr. Rodgers took with him Frank MacNamara, Murray's vp-media director, which left the shop with three top slots unfilled; former president Earl Tyree had departed several months earlier.

▪ Mr. Donino joined Murray in July from McCann-Erickson, where he was exec vp. He told ADVERTISING AGE the shop is improving its media buying expertise by reorganizing the department into three areas—planning, spot and network buys.

John Conti has been named vp in charge of network, Bob Turner is

Turner tells 4A's net tv to be eclipsed

By JOHN REVETT

PALM SPRINGS—Superstationeer Ted Turner predicted that what he called "the incredible hulk" of commercial tv will be eclipsed in the 1980s by pay cable and the new home entertainment technology.

Mr. Turner told the western regional conference of the American Assn. of Advertising Agencies that, because energy conscious consumers will be staying home more in the '80s and will want as much as they can get from electronic media, "your tv sets will become something on which you can see anything you want to see whenever you want to see it. Not just what three nincompoops in New York decide for you."

He said superstation networks like his Atlanta-based WTBS-TV, linked to upper-income cable tv homes, will be part of a wired tv market which he predicted will reach close to half the homes in the U.S. by 1984.

He made it clear that he feels this will be largely at the expense of today's major networks, for which he had numerous barbs.

"You'll be able to target your ads much better than you can today. For instance, we have a fishing show, a lot better place for rod and

RETAIL MARKETING

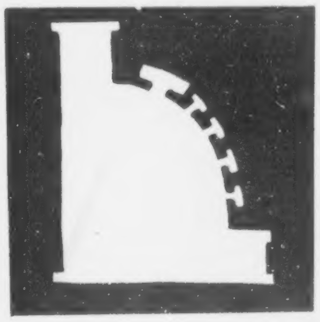
15% sales increase fuels gains

Top retailers increase ad outlays by 9%

BY LOUIS J. HAUGH

WESTPORT, CONN.—The leading 50 retailers in the U.S. increased their advertising and promotion outlays $269,000,000 last year, up 9% over the year earlier, fueled by a 15% increase in sales over-all.

At a time when consumers were leading the way in the economy, these 50 giants—25 general merchandisers and 25 supermarkets—reported sales totaling $159.6 billion, up from $139 billion the year earlier. Total estimated advertising and promotion investment was $3.27 billion, according to a survey conducted among these companies.



This 9% increase in ad spending among these retailers compares to a 17% increase among the 100 largest national advertisers compiled by ADVERTISING AGE. These advertisers invested $10.3 billion on advertising, according to AA. Ironically, some of the leading retailers have become major national advertisers, as well, led by Sears, Roebuck & Co., up 14%; K mart Corp., up 20%, and J.C. Penney, up 27% over the year earlier.

▪ Last year was a period of major changes for the 50 leading retailers.

Financial troubles plagued several companies. Among general merchandisers, this included Korvettes; Sears, which reported flat sales and earnings; City Stores, which filed for bankruptcy and dropped out of the top 25, and Gamble-Skogmo, which reorganized after a kind of palace coup.

Among the food operations, Food Fair and Allied Supermarkets were financially troubled, joining the Great Atlantic & Pacific Tea Co., which continued to face earnings and sales problems.

The face of retailing in the U.S. also is changing. Foreign interests are exhibiting more than a passing interest as, for example, British interests expanded their food store operations with Grand Union adding Colonial Stores. German interests arrived with money to help A&P and a French operation acquired Korvettes. B.A.T. Industries consolidated its retail operations through Gimbels.

There also were several mergers. Skaggs, which had been associated with Albertson's, merged with American Stores, and First National and Pick-N-Pay joined forces. There also were reports that G.C. Murphy and Marshall Field & Co. were take-over candidates.

▪ And finally, a food store, Safeway Stores, joined Sears and K mart as a truly national advertiser. Several years ago, A&P had used national ads. Safeway said it would invest $10,000,000 in a national campaign.

The top 25 general merchandisers invested $2.52 billion on advertising last year, up 8% over the year earlier. Total sales were $86.175 billion, up 16% over the year earlier. Despite substantial increases by the leaders, the top general merchandisers as a group actually spent less on advertising as a ratio of sales last year. The ratio slipped to 2.92%, down from 3.15% the year earlier. The decrease generally is the result of the growing influence of discount and specialty stores among the top 25, such as Wal-Mart, SCOA, Zayre Corp. and Rapid American Corp.

It also is felt that general merchandisers were feeling pressure on earnings, cutting back on promotion outlays in broadcast and di-

(Continued on Page S-2)

Agency head urges retailers to shift focus to marketing

BY HAROLD LEVINE

NEW YORK—I've noted in dealing with clients in all fields that they usually have little or no background in advertising, never have been employed by an advertising agency and yet they feel fully qualified to rewrite copy, design ads, criticize media plans and direct television commercials. Allow me the privilege of playing the role of outside objective critic today.

I have never owned a retail store nor have I managed one. I have never been the advertising manager of a retail store nor have I successfully handled a retail account for more than six months!

I guess with that background I can be totally objective and be classified as an expert.

At the outset, I think that what you have experienced in your advertising, as well as in the problem of positioning your store in today's competitive market, is that you continue to think of yourselves as retailers instead of seeing yourselves as *marketers*.

What do Best & Co., Franklin Simon, Broadstreets, Depinna and Arnold Constables have in common? Most of these stores were headquartered in New York and many had branches throughout the country, but they are all out of business today.

▪ On the other hand, what do stores like Bloomingdale's, Barney's, Herman's, Toys R'Us, Gucci and Zabar's have in common? They are also headquartered in New York, many with branches around the country, but all are growing rapidly with a contempo-

Sales up 15%

Top retailers hike ad outlays by 9%

(Continued from Page S-1)

rect mail in some instances.

The nation's largest retailer, Sears, which accounts for almost 20% of the top general merchandiser's total sales, increased its ad investment to $725,000,000, up from $650,000,000 the year earlier. The increase came despite changing marketing strategies designed to cut the number, length and depth of promotional sales. In a five-year plan published by AA, Sears seemed determined to return to its basic price and middle America position.

K mart continued to increase its investment last year and promised more of the same this year. K mart's spending was put at $248,000,000, up $38,000,000 over the year earlier. Other leading general merchandisers were J.C. Penney Co., up $61,000,000 to $285,000,000; F. W. Woolworth Co., up $3,860,000 to $142,860,000, and Federated Department Stores, up $5,000,000 to $165,000,000.

For the leading supermarkets, sales were up 13.3% to $73.4 billion and advertising was up 12% to $754,600,000. The ratio of advertising to sales continued an 11-year decline, slipping to 1.03% from 1.04%. Each of the top five supermarkets did hike ad spending, however.

Safeway hiked its outlays $10,000,000 to $125,000,000, primarily to support its Scotch Buy generic food products. Generic food products and no frills stores, such as Aldi's in Chicago, continued to be a most hotly debated topic in food store circles.

Other supermarket spending leaders included Kroger at $94,500,000, up $24,000,000 over last year; A&P, up $11,000,000 to $84,000,000; American Stores, up $17,400,000 to $56,300,000, and Winn-Dixie Stores, down $200,000 to $39,600,000.

The face of retailing is likely to change even more in the next decade, as drug and specialty stores expand. For example, Walgreen Co., Deerfield, Ill., (not included in the retail profiles) has begun to expand into food store sales from its base in drug store operations. Walgreen will invest $31,000,000 in advertising this year, up 14.8% over the year earlier on sales of $1.3 billion.

Walgreen shifted to an in-house agency from Eisaman, Johns & Laws, Chicago, earlier this year.

The ADERTISING AGE study of the 50 leading retailers includes advertising and promotion investment in print, broadcast, direct mail and other promotional media. It also credits the retailers for co-op funds used in advertising, even though these funds come from vendors.

AA mails a two-page letter that includes the previous year's profile to each of the companies as well as a follow-up mailing and telephone calls to those who do not reply. For those companies that do not provide complete information, AA estimates the data, based on interviews with trade sources.

Data on which these estimates for advertising and promotion outlays are based come from a number of sources including *Progressive Grocer*, Fairchild's *Financial Manual of Retail Stores*, various media information bureaus and Marketing & Promotion Services Inc. Tom Moloney, a free lance writer, assisted in the compilation of the profiles. #

Louis J. Haugh is president of Marketing & Promotion Services, Westport, Conn.

Shift retail focus more to marketing

(Continued from Page S-1)

rary identity and are in tune with today's changing lifestyles.

It isn't that the management of the first group were not good retailers. They probably were. But I suspect that they perceived their role as selling the merchandise they bought, rather than marketing a concept and a brand.

Yes, each of you has a brand—your store. As a manufacturer has a brand and as many services sell a brand, so too your store name is your brand. Your first responsibility is to sell the store, not the item. Look at yourself as though you are selling a product—that product being the totality of service, merchandise and ambiance of the physical unit called the store.

■ The first step in determining the position of your store is a careful examination of the nature of your merchandise.

Let's say you sell men's clothing. Are you a Sym's, a Barney's or a Brooks Brothers? Or perhaps none of the above? Have you researched your market to determine the specific niche that you wish to fill in your community? If you wish to succeed in the highly competitive business that you have selected, it is your responsibility to market that business the way you would market a manufactured product or service.

How do your major suppliers with national brands position their products? After careful research and development of the product, they determine the target market for that product and then develop packaging, advertising and merchandising directly focused at that target market.

■ What have you done to carefully isolate who your customer really is—or more analytically, who your customer should be? I don't doubt that you have discussed this problem with your wife or husband or even a few business associates in town. Or have gone so far as having a meeting with your buyers and merchandise managers.

But how many of you have reached out to the consumer in your community? Have you discussed the question of why people shop in your store—or, more importantly, why they don't? Have you thought of engaging the services of a market research company or, even better, talked with the head of the department of marketing of a local college or university?

Regardless of where your store is located, you can find services that will give you valuable data on how you are perceived and how your competition is perceived to determine the appropriate niche in which you can build a better business.

■ Once you have armed yourself with adequate research information, you then act forcefully on four fronts:

- The merchandise.
- The physical environment.
- The personnel.
- The advertising.

You can't do one without the other. A superb advertising campaign geared to the positioning of a store for young girls, aged 16 to 24, can be destroyed by the wrong people, wrong merchandise and the wrong ambiance. Once you have decided who your customer is by age, sex, income, life style and buying habits, then you must gear a four-front attack on that target market.

We read in the papers how teachers aren't as good as they used to be and how terrible clerks in stores are—yet children in some schools are learning more than ever and individuals report how they enjoy shopping in one store rather than in another.

Are you selecting the right people for your store and do they represent a particular point of view?

A time when what we buy and where we buy is a significant reflection of one's life style is perhaps the time for greater emphasis on human relations in a store as opposed to the cold and austere act of moving from item selection to cash register to exit.

■ Many years ago, Alvin Toffler wrote a best seller, "Future Shock." You are probably in the front line of getting the impact of that future shock. Everything is accelerated, and all industries are affected.

But as a result of future shock, people are becoming more demanding and they seem to be focusing that demand on the stores they shop in. I suspect that the reason for this is that your business has accomodated the customer more than any other business in our country.

And since you do accommodate the customer, you have to change as rapidly as the customer changes. Your business is a living, breathing entity, and as people change, your business has to change.

Unfortunately, there is a tendency in your business to look backward more often than looking forward. You check last year's sales, last month's sales, last week's sales and yesterday's sales.

How much time, money, effort and talent are you spending in looking ahead? Are you anticipating change or are you merely reacting to change?

■ There is no doubt in my mind that the stores that are successful, vibrant, growing institutions are moving ahead because they have carefully positioned themselves, marketed the concept and spent more time looking ahead than looking back.

To effectively position your store, I urgently suggest you begin to think like marketers rather than retailers. Carefully research your target market and then focus your entire store—heart, soul and mind—on that target.

Your merchandising should be single-minded, your displays should hit the emotional button of your target market, your advertising should talk to it and your personnel should have empathy for it.

Then and only then will you be selling your particular brand to your community. If you accept the concept that you and your store may very well be in business long after a particular fad or fashion is hot, or a particular manufacturer is riding high, you will recognize that your brand is more important than any single item or group of items in your store.

I know what Barney's stands for. But I didn't know what Franklin Simon stood for. Be sure that you stand for something. No one can be all things to all people and unfortunately too many individuals in your business, in an effort to meet last years sales figures, have tried that approach.

Bruno Magli—
Just for Openers

Shoes, shoes and more shoes characterize fall ads for retailers such as B. Altman, Marshall Field and Saks Fifth Avenue.

25 leading general merchandise retailers

Sears, Roebuck & Co.

Sales........................**$17,946,000,000**
Advertising.......................**725,000,000**

Sears, Roebuck & Co., Chicago, is the largest U.S. retailer and the second largest national advertiser. The company increased its national spending 14% to $417,934,900 last year with 60% of the amount, or $254,000,000, spent on catalogs and dire^t mail. Local advertising brought the total up to $725,000,000.

Sears, whose sales approximate 1% of the U.S. gross national product, got more than 6% of the total U.S. general merchandise business and about half of the total catalog business.

The catalog operations, from which Sears derives more than a fifth of its sales, includes two large general "wish books" averaging 1,500 pages (spring-summer, fall-winter), three smaller ones (Christmas, mid-winter and summer), 16 specialty catalogs featuring particular lines of merchandise and about 15 tabloid sales catalogs.

Last year the company sent out 17,000,000 copies of each general catalog and between 100,000 and 500,000 copies of each specialty and sale catalog, for a total of 375,000,000 catalogs—50,000,000 more than the company put out in 1977.

Sears and its domestic subsidiaries employed an average of 472,000 people in 1978 and sold goods at 3,727 locations.

Last year marked a turning point for Sears as the company reformulated its long-range marketing strategy in a move to firmly reestablish Sears as "a family store for middle-class home-owning Americans." According to the company's "Headquarters Merchandising Plan 1979-1983," Sears is "not a fashion store . . . not a store for the whimsical nor the affluent . . . not a discounter, nor an avant-garde department store . . . not an exciting store . . . not a store that *anticipates*. We *reflect* the world of Middle America . . . its desires and concerns and problems and faults. [We must] not be swayed . . . by the attraction of other markets, no matter how enticing they might be."

Sears is lowering its advertising-to-sales ratio from 3.55% in 1978 to 3.29% in 1979 and then down to 3% by 1983.

Sears began making moves in the fourth quarter to improve profits, but at the sacrifice of sales. It pulled its 10 to 24-page spreads in women's and shelter magazines that advertised Sears home furnishings—a segment that had been heavily promoted up to that point. Magazines were almost devoid of Sears advertising in the first five months of 1979.

The results were sales shortfalls, undoubtedly much more severe than had been anticipated. Through June of this year, the company has suffered 10 consecutive months of sales declines, some soaring higher than 10%. To stimulate sales—and comply with federal price guidelines—Sears cut all catalog prices 5% in this year's spring-summer catalog.

However, the profit picture has brightened. In the fourth quarter the company reported a record 31% increase in earnings, to $330,000,000. In the first quarter of 1979, operating income from the merchandising group increased 25% to $217,601,000.

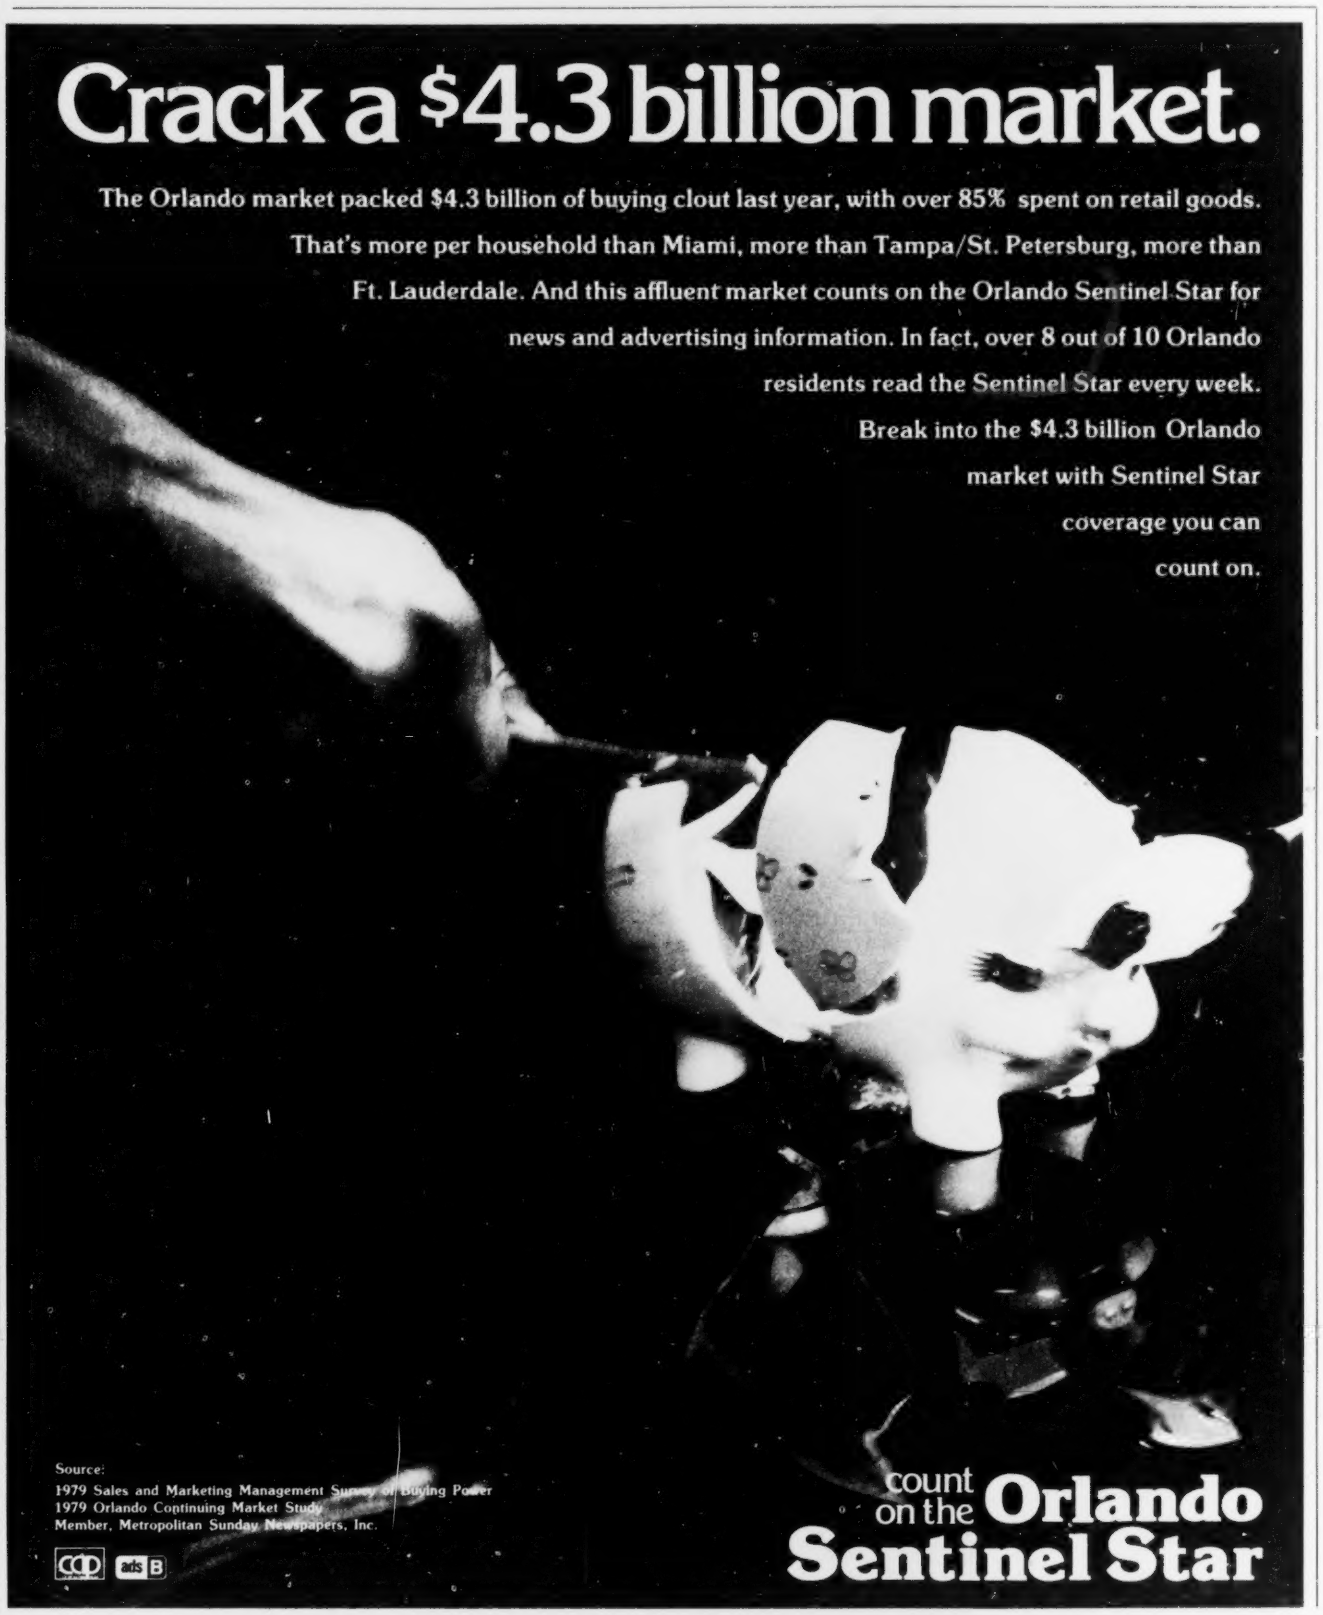
In 1978, the company continued its war against excessive sex and violence in tv programing by pulling its commercials from several programs, including "Three's Company" and "Charlie's Angels." This year the company began the "Sears Radio Theater," a series of 45-minute programs running weeknights on about 200 radio stations most of them CBS affiliates. The investment was expected to significantly increase radio spending.

In 1978, Sears opened 31 new stores, including 14 full line, 14 medium size and three hard line stores, bringing the totals to 367 full line, 373 medium size and 125 hard line stores. In addition, the company operates 14 catalog merchandise distribution warehouses, 92 retail distribution warehouses and 211 service and parts centers. The company plans to open 106 full line, 106 medium size and 27 hard line stores over the next five years, with 100 of the new stores to be built in new market areas and 139 of them replacing existing stores. (For a complete profile and agency line-up, see AA, Sept. 6, P. 149.)

Where AA got its data

The information in the profiles of the top 25 general merchandisers and top 25 supermarket chains came from various statistical services and associations and from questionnaires mailed by ADVERTISING AGE to the companies. All advertising and promotion expenditures are estimated by AA. Advertising estimates and sales figures are based on data from *Business Week*, *Progressive Grocer's Marketing Guidebook*, *Fairchild's Financial Manual of Retail Stores*, *Wall Street Journal*, the Newspaper Advertising Bureau, Television Bureau of Advertising, Leading National Advertisers and Media Records Inc.

- Retail and supermarket advertising expenditures include print, broadcast, direct mail, catalog and other promotional media. In addition, the ad totals credit the retailers for expenditures even though they may have made use of co-op funds from manufacturers. Where possible, these funds are so identified.



Crack a $4.3 billion market.

The Orlando market packed $4.3 billion of buying clout last year, with over 85% spent on retail goods. That's more per household than Miami, more than Tampa/St. Petersburg, more than Ft. Lauderdale. And this affluent market counts on the Orlando Sentinel Star for news and advertising information. In fact, over 8 out of 10 Orlando residents read the Sentinel Star every week.

Break into the $4.3 billion Orlando market with Sentinel Star coverage you can count on.

K mart Corp.

Sales........................**$11,695,539,000**
Advertising.......................**248,000,000**

K mart Corp., Troy, Mich., the country's second largest retailer and fifth largest national advertiser, invested $248,000,000 in advertising in 1978, up 18% from 1977.

The company invested $32,930,882 in measured media, including $8,936,424 in network tv; $13,172,146 in spot tv; $3,719,936 in magazines; $2,407,000 in network radio and $500,000 in outdoor.

The vast majority of K mart's ad

(Continued on Page S-6)

25 top general merchandisers

(Continued from Page S-4)

funds are funneled into newspapers. That newspaper drive is bolstered with more than 25 newspaper color tabloid inserts per year.

Worldwide, there were 1,496 K mart stores in operation at the beginning of 1979. In the U.S., K mart operates in 257 out of 275 standard metropolitan statistical areas. Some 168 stores were opened last year, bringing the total to 290 new stores in 1977-78.

K mart also operates 313 Kresge variety stores and 82 Jupiter limited-line discount stores.

In the first three months of 1979, the corporation opened 36 new K marts, up from the 18 opened in the first quarter of 1978. A total of 180 were expected to open during 1979.

At the 1979 annual stockholders' meeting, K mart chairman Robert Dewar predicted that the company's earnings would pass those of top retailer Sears, Roebuck & Co. "in the next few years." He projected sales of $16 billion by 1982 and $20 billion by 1984. K mart's ad budget is expected to grow by 20% to 25% per year.

Ross Roy Inc., Detroit, is the K mart agency. (For a complete marketing profile, see AA, Sept. 6, P. 112.)

J.C. Penney Co.

Sales	**$10,845,000,000**
Advertising	**285,000,000**

J.C. Penney Co., New York, the fourth largest retailer and the 27th largest national advertiser, hiked its national advertising 25% from $100,000,000 to an estimated $125,000,000 in 1978. This total includes an estimated $90,000,000 for catalogs. The remainder includes Penney's retail advertising for individual stores in local newspapers, estimated at $185,000,000, and foreign promotion outlays.

In 1978, Penney opened 28 full line and 33 soft line stores. Two stores were opened in Belgium and 42 drug stores were added to the domestic chain. In-store insurance centers were opened in 13 stores, bringing the total of centers to 33. The first catalog distribution center to serve the West Coast opened in Reno, Nev., early in 1979.

Penney is opening 37 full and 26 soft line stores, 36 drug stores and three stores in Belgium this year. Catalog sales centers are slated for 245 stores on the West Coast and in Hawaii. A sixth distribution center, located in Manchester, Conn., is under construction.

The Treasury stores registered losses for the fifth consecutive year, despite a 24.6% increase in sales over 1977. The three Treasury stores in the Chicago area were slated for sale, with two closed at the end of March. Three stores are thought to be too few to compete effectively in the large Chicago market.

Since 1974, Penney has been changing its marketing strategy from a private label, price-conscious general merchandiser to a more moderately priced, higher fashion department store.

Penney operates 523 full line department stores and 1,288 soft line stores. McCaffrey & McCall, New York, is the major Penney agency. (For a complete Penney profile, see AA, Sept. 6, P. 134.)

F. W. Woolworth Co.

Sales	**$6,102,800,000**
Advertising	**142,857,000**

F.W. Woolworth Co., New York, invested $142,857,000 in advertising last year, up 10% over 1977. The company operates 4,416 stores and 345 leased departments in the U.S. and overseas, excluding its majority owned enterprises in Great Britain. This includes 2,253 Woolworth and Woolco stores, 289 Richman Brothers men's clothing stores and 2,219 Kinney operated footwear and apparel units.

Newspaper investment, representing 83% of the company's ad outlays, was up 14% over 1977. The company invested $15,537,000 in spot and network tv. Magazine expenditures rose from $874,000 to $2,226,000 with the Kinney stores getting the lion's share of the increase. Its Woolco stores got $4,700,000 in spot tv and its Woolworth stores got $3,675,000. 1979's advertising outlays are expected to increase 14% over 1978.

Woolworth and its wholly owned subsidiaries are opening approximately 375 new retail units this year, almost 300 of which are Kinney operated. J. Brannan stores, a new chain of family discount clothing stores, are being opened in Dallas and Oklahoma City. A media mix of newspaper, radio & tv will be used.

The parent Woolworth Co. and its Richman Brothers subsidiary both celebrated their 100th anniversaries in 1979 with a 25% first half ad budget increase.

Advertising agency for F. W. Woolworth Co. is Sawdon & Bess, New York.

Federated Department Stores

Sales	**$5,404,621,000**
Advertising	**165,000,000**

Federated Department Stores, Cincinnati, operates about 157 major department stores and specialty stores under various names across the U.S. These units have a great deal of local autonomy in their markets.

Retail stores operated by the company include Rich's, Atlanta; Bloomingdale's, New York and Washington; Boston stores, Milwaukee; Bullock's, Memphis; Gold Circle discount stores, Worthington, O.; Gold Key, Los Angeles; Gold Triangle, Hialeah, Fla.; Lazarus, Columbus, O.;

GO WEST TO SHOP

...BIG APPLE

Shopping patterns have changed . . . big apple. Now shoppers head for suburbs like Bergen, the only New Jersey county in the New York SMSA. They have a choice of five major shopping centers in a five-mile radius, and more than five million square feet of selling space.

Annual retail sales in Bergen County top $3.6 billion. With per household retail sales of $12,246, it's a fact that Bergen ranks #1 in New Jersey and 56% greater than the New York SMSA average.

Of course, shoppers in Bergen depend on The Record. And if you want to sell to this great market, that's where you should advertise. The Record has more circulation in Bergen County — daily or Sunday — than all the New York City and Newark newspapers combined!

Let's close the sale.

(Continued from Page S-6)

Levy's, Tucson, Ariz.; I. Magnin Co., San Francisco; Rike's, Dayton, O.; Sanger-Harris, Dallas; Shilito's, Cincinnati, and Abraham & Straus, Brooklyn.

Federated agencies (with accounts in parentheses) include Telesales Inc., New York (A&S); Russell, Harris, Levinson, New York (Burdine's); Ingalls Associates, Boston (Filene's); Goodwin, Dannenbaum, Littman & Wingfold, Houston (Foley's); Modern Merchandising Bureau, New York (I. Magnin); Ogilvy & Mather, Los Angeles (Bullock's); Liller, Neal, Battle & Lindsey, Atlanta (Rich's); W.B. Doner & Co., Detroit (Richway discount stores); Byer & Bowman, Columbus (Lazarus).

Montgomery Ward & Co.

Sales	$5,013,514,000
Advertising	207,000,000

Montgomery Ward & Co., Chicago, is a unit of the Mobil Oil Co. operating 413 retail stores and 474 catalog stores. Ward operates as a unit of Marcor, the subsidiary that also includes the Container Corp. of America.

During the year, Ward continued testing the limited sale of ad space in some of its catalogs, a program originated in 1975. This concept has since been expanded to all eight of its catalogs and opened to a wider variety of noncompetitive advertisers.

Lee King & Partners, Chicago, and Media Bureau, Chicago, handle Ward advertising. (For a complete profile of Mobil, see AA, Sept. 6, P. 124.)

Dayton-Hudson Corp.

Sales	$2,981,234,000
Advertising	62,000,000

Dayton-Hudson Corp., Minneapolis, operates 45 department stores, 78 low-margin stores and 421 specialty stores, an increase of 96 stores over last year.

Its department store operations include Hudson's, Detroit; Dayton's, Minneapolis; Diamond's, Phoenix, and John A. Brown, Oklahoma City. Its discount stores are Target, Lechmere and 52 Mervyn's, a California-based soft lines chain.

Its specialty stores include B. Dalton book stores; J.B. Hudson jewelry stores, Minneapolis; Shreve's jewelry stores in California; J. E. Caldwell jewelry stores in Pennsylvania, New Jersey and Delaware; J. Jessop & Sons jewelry stores in San Diego; C.D. Peacock jewelry stores in Illinois and Charles W. Warren & Co., Troy, Michigan.

The agency line-up includes Campbell-Mithun, Minneapolis for B. Dalton; Grey Advertising, New York, for Dayton's, and Loren/-Snyder, Detroit, for Hudson's.

May Department Stores

Sales	$2,567,000,000
Advertising	75,000,000

The May Department Stores Co., St. Louis, operates 173 stores, up 10 from last year. These include the M. O'Neil Co., Akron, O.; Hecht Co., Washington and Baltimore; May-D&F, Denver; G. Fox & Co., Hartford, Conn.; May-Cohens, Jacksonville, Fla.; Meier & Frank Co., Portland, Ore.; Famous-Barr Co., St. Louis; Strouss, Youngstown, O.; May Co., California and Venture Stores, St. Louis.

The company and its subsidiaries own and operate 18 shopping centers in nine states, totaling 14,000,000 square feet. May is opening five additional department stores during 1979.

The company put an estimated $36,364,000 in newspapers and $10,839,000 in direct mail advertising. Also an estimated $12,000,000 went to spot tv advertising.

First quarter 1979 sales totaled $566,895,000, up $69,524,000 over the same period in 1978.

The agency lineup includes Grey-North, Chicago, for Venture; Byer & Bowman Advertising, Columbus, for Famous-Barr, Hecht and May-D&F, and W.B. Doner, Los Angeles, for May Co., Cal.

Rapid-American Corp.

Sales	$2,169,732,000
Advertising	14,500,000

Rapid American Corp., New York, operates 565 Lerner stores; 743 McCrory stores under the trade names McCrory, McLellan, H.L. Green and J.J. Newberry; 21 Britts department stores in 10 states and 664 OTASCO automotive and home accessory stores in 13 southern states. Record earnings were achieved by Lerner, McCrory and OTASCO stores in 1978.

A new 100,000-sq.-ft. Britts store was opened in West Palm Beach, Fla. in November, 1978. Five stores were closed, with two more closing in 1979.

Lerner opened 74 stores in 1978, of which 72 were in suburban shopping centers. This year, 75 new stores are being opened.

McCrory opened eight new stores last year and closed 33. The 12,000-sq.-ft. prototype stores are opening up in 1979, bringing the total of this type to 13.

Twelve new company-owned and 20 associate-dealer OTASCO stores last year and closed 33. Ten 12,000-sq.-ft. prototype stores are ary, Rapid Muffler Inc., opened three pilot shops in OTASCO's headquarters city, Tulsa, Okla. Twenty new company-owned stores and 25 new associate-dealer stores are opening this year.

Lerner sales were $695,000,000; McCrory $544,000,000; OTASCO $220,000,000, and Britts $84,000,000.

Star & Citizen

25 top general merchandisers

(Continued from Page S-8)

Angeles, operates 656 stores, an increase of 29 over last year. Its retail operations include The Broadway, Los Angeles; Neiman-Marcus, Dallas; Walden Book Co., Stamford, Conn.; Weinstock's, Sacramento; The Emporium, San Francisco; Capwell's, Oakland; Bergdorf-Goodman, New York; Holt Renfrew, Montreal; John Wanamaker, Philadelphia, and Thalhimer Brothers, Richmond, Va.

It also operates Sunset House, Los Angeles, which sells through nationally distributed novelty and gift catalogs.

Leber Katz Partners, New York, has the Neiman-Marcus account.

Allied Stores Corp.

Sales	$2,107,939,000
Advertising	99,000,000

Allied Stores Corp., New York, operates 149 stores. Earlier this year Allied acquired 12 Bonwit Teller stores and 32 Plymouth Shops from Genesco Inc., Nashville.

Other Allied operated stores include Block's, Waterloo, Ia., and Indianapolis; Bon Marche, Seattle; Cain Sloan, Nashville; Dey Bros., Syracuse; Donaldson's, Minneapolis; Field's, Jackson, Mich.; Gertz, New York; Hardy-Herpolsheimer, Muskegon, Mich.; Jordan Marsh, Boston and Miami; Heer's, Springfield, Mo.; Joske's, San Antonio; Levy's, Savannah, Ga.; Mass Bros., Tampa; Mabley & Carew, Cincinnati; Missoula (Mont.) Mercantile; Muller's, Lake Charles, La.; Paris of Montana, Great Falls; Polsky's, Akron, O.; Pomeroy's, Reading, Pa.; Read's, Bridgeport, Conn.; Stern Bros., Paramus, N.J.; Titche's, Dallas; Troutman's, Greenburgh, Pa.; Wren's, Springfield, O. and Almart-J.B. Hunter, Wilmington, Del.

Smith-Patterson, Boston, is the Jordan Marsh agency; other units handle their own advertising.

Gamble-Skogmo

Sales	$1,954,644,000
Advertising	23,971,000

Gamble-Skogmo, Minneapolis, was significantly restructured and reoriented in 1978 to better focus on long-term growth and profitability in its merchandising and financial services business.

Thirteen retailing divisions comprise a total of 3,263 company-owned and dealer-owned stores located in 35 states and Canada. Gamble sells at wholesale and retail a wide range of consumer products, including durable goods, fashion apparel, food and pharmaceuticals.

The merchandising group includes Aldens, Chicago, the nation's fifth largest mail order house; Gamble department stores, Chicago, 19 stores in medium-size cities from coast to coast; Gambles, Minneapolis, 40 company and 903 dealer-owned stores in smaller towns in the Midwest and Rocky Mountain states; Howard's, Monroe, La., 84 discount stores in 10 Sunbelt states; JM McDonald's, Hastings, Neb., 68 clothing stores and 74 fabric stores in Western and Plains states. The list continues with Leath-Maxwell, Chicago, 49 home furniture stores in the Midwest and 81 Maxwell Home Furnishings outlets in the Carolinas and Florida; Women's World shops, La Mesa, Cal., 56 higher-price women's clothing stores in major metropolitan markets; MacLeods, Winnipeg, Manitoba, 75 company and 197 dealer-owned hard line stores in the Western provinces; Mode O'Day, Burbank, Cal., 28 company and 685 dealer-owned lower-price women's clothing stores plus 21 Double Up junior fashion outlets. The merchandising group also includes Rasco, Burbank, Cal., 90 large discount stores, 41 Toy World stores and 29 Rasco-Tempo department stores; Red Owl, Hopkins, Minn., 88 company and 279 dealer-owned retail food outlets in the Midwest; Snyder, Hopkins, Minn., 45 company and 69 dealer-owned drug stores in Minnesota and Wisconsin and Stedmans, Toronto, 53 company and 210 dealer-owned stores in all Canadian provinces.

The company liquidated its Tempo-Buckeye division, which reduced 1978 earnings by $6,974,000.

Inter-mark Inc., Des Plaines, Ill., is the Aldens agency.

R.H. Macy & Co.

Sales	$1,834,100,000
Advertising	114,500,000

R.H. Macy & Co., New York, operates 76 stores. In addition to Macy's stores in New York, San Francisco and Kansas City, the company operates Bamberger's, Newark, N.J.; Davidson's, Atlanta, and LaSalle's, Toledo. It also operates several regional shopping centers.

The company positions its stores as middle income to upper middle income department stores, concentrating on fashion merchandise and apparel and home furnishings. It has six autonomous divisions.

Macy's sold its six J. Homestock furniture warehouse showrooms to the Levitz Furniture Corp. for $5,304,000.

Melville Corp.

Sales	$1,747,371,728
Advertising	15,000,000

Melville Corp., Harrison, N.Y., operates 3,812 units in the District of Columbia, Puerto Rico and 49 states (Alaska is the lone exception). Melville-operated stores include 1,189 Thom McAn shoe stores, 1,397 Meldisco footwear departments in all U.S. K marts, 400 Foxmoor young women's apparel stores, 356 CVS health and beauty aid stores, 326 Chess King young men's apparel stores, 55 Marshalls promotional stores and 48 Vanguard men's shoe stores.

In 1978 a total of 382 stores and footwear departments were opened and 104 were closed. The company is opening 405 new units this year and closing approximately 44.

The Marshalls' stores received spot tv support in addition to newspaper.

Associated Dry Goods Corp.

The other half of the marketing mix

...It picks up where your advertising leaves off.

You've spent months shaping and refining your advertising strategy. More months converting it into provocative ads or commercials.

Great. But it's a long way from the magazine page and the TV screen to the cash register.

That's where we come in.

At Elliot J. Axelrod Associates, Inc., we provide **the other half of the marketing mix.** Ideas and materials that close the gap between where your consumer advertising leaves off and the sale begins.

We motivate your salesmen to sell better, help the trade to merchandise better, create excitement and heighten consumer trial at the point of sale.

Our services include promotional programs, packaging, audio/visual presentations, sales aids, creative premiums, point of sale material, and incentive programs.

We believe these services are too important to be handled piecemeal. They deserve the same caliber of creative thought, the same degree of marketing insight that characterizes your advertising.

At Elliot J. Axelrod Associates, that's what they get. And it all gets some pretty outstanding results for our clients.

To learn more about us, call Elliot Axelrod, Ken Marden or Peggy O'Brien at **212-889-5553.**

Advertising	9,000,000

Zayre Corp., Framingham, Mass., operates 254 department stores, 34 apparel specialty stores, 44 fabric shops, 10 discount food stores, 95 gasoline stations and 87 women's apparel stores.

Gimbel Brothers

Sales	$1,058,860,000
Advertising	25,750,000

Gimbel Brothers, New York, is a subsidiary of the Brown & Williamson Retail Group, formed in February. It is made up of four Gimbel department store divisions: New York, Philadelphia, Milwaukee and Pittsburgh, plus 30 Saks Fifth Avenue specialty stores across the country.

Gimbel department stores use a media mix of newspapers, direct mail, radio and tv. Direct mail and tv have seen the greatest growth over the past year.

Many existing Gimbel stores have been updated and renovated in an effort to establish a headquarters approach to the moderate price fashion businesses, while continuing to stand out in the home areas.

Saks Fifth Avenue uses a media mix consisting of newspapers, national magazines, city magazines, radio, tv and direct mail. Tv activities have expanded from four markets in 1978 to nine markets in 1979 and a tenth market will be added in 1980.

Saks will open a new store in South Coast Plaza in Orange County, Cal., and a replacement store on Worth Ave. in Palm Beach, Fla., in November. In 1980, Saks will open a new store in the Fairlane shopping center in Detroit and a replacement store in the Sunrise shopping center, Ft. Lauderdale, Fla.

A Gimbel's fall fashion campaign saluted New York City with the theme, "New York, New York . . . It's a wonderful world."

Mercantile Stores Co.

Sales	$922,141,000
Advertising	17,000,000

Mercantile Stores Co., New York, operates 85 stores. Its operations include Bacon's, Louisville; Castner-Knott Co., Nashville; de Landrecies, Fargo, N.D.; Grayfer's, Mobile, Ala.; Glass Block, Duluth, Minn.; Hennessey's, Butte, Mont.; Jones Store Co., Kansas City; Joslin's, Denver; Lazarus, Wilkes-Barre, Pa.; Lion, Toledo; McAlpin's, Cincinnati; Grayfer's Montgomery Fare, Montgomery, Ala.; People's, Tacoma, Wash.; Right House, Ontario, Can.; Root Store Co., Terre Haute, Ind.; White's, Augusta, Ga., and Columbus, S.C.

Wal-Mart Stores Inc.

Sales	$900,298,000
Advertising	15,000,000

Wal-Mart Stores Inc., Bentonville, Ark., operates 229 stores in Arkansas (54), Illinois (11), Kentucky (3), Louisiana (6), Mississippi (13), Missouri (61), Oklahoma (42), Tennessee (10) and Texas (20). Most stores are located in smaller communities of 5,000 to 25,000.

The company's 1978 sales of $900,298,000 were up from the $678,456,000 of 1977. Wal-Mart sales have increased nearly thirty-fold since 1970.

Effective Oct. 1, 1978, the company acquired the Hutcheson Wholesale Shoe Co. of Fort Smith, Ark. Hutcheson operated leased departments in 190 Wal-Mart stores at that time.

Wal-Mart established a fully-owned, separate division for distributing hobby and crafts merchandise. It also started a fully-owned and operated in-store pharmacy division with seven units and a jewelry division in 48 stores.

Thirty-four new stores were opened in fiscal 1978 and 40 are planned for fiscal 1980. A new 390,000-sq.-ft. distribution center is under construction in Searcy, Ark.

The company utilizes four primary advertising media: Newspapers, multipage circulars, tv and radio. In 1978, 13 full-color circulars were created announcing companywide special bargains and concerted sales programs. For each event, 3,500,000 copies were printed and distributed. Every home within a 20-mile radius of any store can be reached through one or more of the company's advertising outlets. Advertising is handled in-house.

SCOA Industries

Sales	$780,333,000
Advertising	11,709,000

SCOA Industries, Columbus, O., operates approximately 900 shoe stores and leased departments, footwear manufacturing plants, 42 appliance outlets, 76 department stores and 86 domestic goods stores and fabric shops. These include Gallenkamp Shoe Stores, Columbus; Hills, Canton, Mass.; Rudnick Co., Hamden, Conn.; The Dry Goods, Claymont, Del., and Kelly & Cohen, Pittsburgh.

The company invested $2,150,000 in spot tv, up from $1,417,000 in 1977.

Last year was the fourth record year in a row for the company, with profits rising 50%. The company has paid consecutive quarterly cash dividends since 1929 and, on Sept. 15, 1979, paid an increased dividend of 25¢ per share, the sixth quarterly dividend increase in succession and the tenth increase in less than four years. The quarterly rate has more than tripled during the four-year period. The company's stock split three-for-two in January.

Hills, the company's largest and most profitable division, opened five new units in 1978 and plans to open a record 15 in 1979. Moderate expansion is planned for the remainder of the company in 1979.

John Zook Advertising, Columbus, is the agency for corporate advertising; Morris Saffer Advertising, Toronto, and Byer & Bowman, Columbus, are agencies for the footwear division; Canton Advertising, Canton, Mass., is the agency for Hills and Rudnick; Norman Roberts Associates, Philadelphia, is the agency for The Dry Goods and

The Wins, Places and No-Shows. Not everyone can be first, but in New Orleans there's ample room for many winners.

Whether you're in the circle of winners or left at the gate depends a great deal on how you size up the competition and the track. Our Belden Continuing Market Studies cast a clear light on the competition and the market. We know who the competition is, where they've come from, and where they are now. And we've a pretty good idea of where they're going.

What's more, we ve the key ingredients for your success — the New Orleans consumer. For every major retailer and shopping center we deliver 7 out of 10 (or better) of the shoppers every weekday. On Sunday's, 8 out of 10 or better.

RETAILING in the 80's

So, before you start jockeying for position with new marketing and media stratagems, check with us. It could make the difference between a win or a no-show.

Marc & Co., Pittsburgh, is the agency for Kelly & Cohen.

Marshall Field & Co.

Sales	$762,590,408
Advertising	20,000,000

Marshall Field & Co., Chicago, operates 54 stores, including the new store, Marshall Field, in Houston, expected to open in November, 1979. The company includes Frederick & Nelson, Seattle; Crescent, Spokane; John Breuner Co., Northern California, and Hall's, Cleveland.

In 1978, the company acquired five Frederick & Nelson stores and 14 John Breuner Co. stores.

Plans are proceeding on stores in Houston and Dallas for a new southern division and the company expects to open five stores in that region within five years.

Kenyon & Eckhardt, Chicago, is the Marshall Field agency.

G.C. Murphy Co.

Sales	$711,996,000
Advertising	16,600,000

G.C. Murphy Co., McKeesport, Pa., operates 480 stores in 24 states and D.C. Its general merchandise stores include Murphy's Mart, Murphy, Terry Ferris, Bruners Junior department stores and Cobbs specialty stores.

The company closed 68 stores in fiscal 1978 and opened 12 units, for a net loss of 56 stores. Twelve new stores are being opened in 1979 and a few stores are being closed.

Murphy has developed separate advertising formats for each type of operation. Sunday supplemental circulars, which had been used to build traffic in all stores, are now utilized exclusively for Murphy's Marts. This permits Murphy's Marts to intensify promotion of higher-price merchandise not regularly carried by some of the company's smaller conventional stores. The company's variety stores now utilize daily newspaper advertising in their local papers and feature basic, staple merchandise that customers expect to find in these stores. The new advertising formats were introduced last October.

Frank Neish Advertising Co., McKeesport, is the in-house agency.

Korvettes

Sales	$600,000,000
Advertising	30,000,000

Korvettes, New York, operates 50 stores in New York, New Jersey, Pennsylvania, Maryland, Washington, D.C., Virginia and Michigan.

In April, the Korvettes chain was acquired for about $42,000,000 by the Agache-Willot Group of France from the Arlen Realty and Development Corp. At that time, Agache-Willot named Alain Mathieu as chairman, a new post, and Nicholas Palinhich president, succeeding David Brous who resigned.

The new owners have not changed the successful Korvettes advertising campaign built around the "Other Korvettes" theme. The theme focuses on merchandise other than the store's traditional lines, which account for about 55% of the chain's sales.

go west

Macy's introduces Mojave Flowers and captures the drama of the desert.

Macy's stresses style in ads for bed coverings.

Korvettes has denied reports that it planned to close its store on New York's fashionable Fifth Ave.

Grey Advertising, New York, handles broadcast creative, although Kelly, Nason-Univas, New York, is rumored to be in line for the $30,000,000 account.

Levitz Furniture Corp.

Sales	$498,194,000
Advertising	45,000,000

Levitz Furniture Corp., Miami, Fla., operates 70 showrooms in 26 states, including 62 large stores in population centers of at least 750,000. Five new stores are planned for fiscal 1980. Fiscal 1979 sales were up 16.3% over the previous year.

Currently 8% of the company's sales volume is spent on advertising. The 24-person in-house advertising department produces print ads for newspapers and national magazines as well as videotaped tv commercials, plans ad campaigns and strategies and buys media space and time.

Newspaper advertising accounts for over half of the Levitz ad budget, although tv expenditures have been increasing during the past few years. Four-color rotogravure inserts are used extensively. Image ads are placed in women's national magazines directed at women 20 to 45 years of age. Newspaper ads emphasize price and special promotions.

Levitz purchased six J. Homestock warehouse-showrooms from R.H. Macy & Co. for $5,304,000.

Cook United

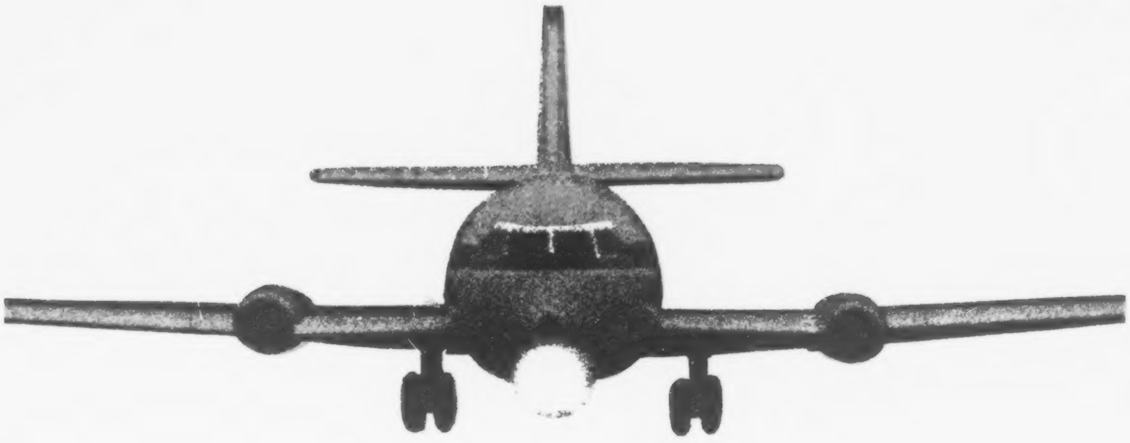
Sales	$405,000,000
Advertising	12,500,000

Cook United, Maple Heights, O., operates 70 discount stores in 14 states. Operations include Uncle Bill's, Cook's, Clark's, Consolidated Sales and Ontario's. It also operates J.P. Snodgrass fashion stores and has automotive, major appliance and catalog showroom operations.

Advertising outlays for the company included an estimated $10,000,000 in newspapers and spot tv.

Lang, Fisher & Stashower, Cleveland, is the Cook agency.

Baltimore means Business



Business is coming to Baltimore. In 1978 alone, Icelandic, North Central and Carribean Airways have begun service to Baltimore through the newly expanded Baltimore-Washington International Airport. A $70 million modernization project now makes BWI capable of handling over 11 million passengers each year.

Look into Baltimore . . . it means easy access to 2.2 million people with $12.7 billion Effective Buying Income in the nation's 14th largest market. It means business for you.

Top 25 retail food chains

Safeway Stores

Sales	$12,550,569,000
Advertising	125,000,000

Safeway Stores, Oakland, Cal., the nation's largest food retailer and second largest retailer over-all, operates 2,436 stores—an increase of two over 1977—in 29 states, Washington, D.C., Canada, Australia, West Germany and the United Kingdom.

- During the year, 111 new stores were opened while 103 were closed. This included 12 new stores opened and 11 closed overseas and in Canada. Safeway's 443 non-U.S. units includes 274 in Canada, 83 in the United Kingdom, 60 in Australia and 26 in West Germany.

Safeway was the first retail food company to hit $10 billion in sales, more than doubling its sales over the past eight years when it overtook A&P as the leading supermarket company in the U.S.

Safeway introduced its new low-price Scotch Buy line of 34 grocery and household products in September, 1978 with a $10,000,000 tv, print and in-store campaign featuring dancer/actor Ray Bolger. The company expects eventually to offer 200 Scotch Buy items. Safeway offers 5,600 private label products, an increase of 300 over 1977.

The company's new corporate image advertising made its debut on July 15 throughout the company's operating areas in the U.S. and Canada. The corporate slogan is "Everything you want from a store and a little bit more." The new ad campaign is being promoted mainly through tv showing the "little bit more" that's provided at and by Safeway.

- In addition to 30 and 60-second versions of the theme commercial, six 30-second spots will feature meat, produce, Safeway brands, value and quality, customer service and one-stop shopping variety. Radio and newspaper commercials support the tv spots. The program was developed by Botsford Ketchum, San Francisco. The image campaign will unite Safeway advertising with a common identity. However, the autonomy of Safeway's retail divisions' advertising programs will continue. Each of the company's 26 U.S. and Canada retail divisions has its own advertising department and hires its own ad agency to purchase local media time for the new image campaign.

Kroger Co.

Sales	$7,828,071,000
Advertising	94,500,600

Kroger Co., Cincinnati, operates 1,202 stores in 21 states, up 14 stores over last year. Kroger also operates Super RX drug stores.

Kroger sold off its controlling stock in Top Value Enterprises to Baldwin-United Corp., a diversified company involved in musical instruments, banking and real estate. Kroger stopped issuing Top Value stamps at its food stores about five years ago, and while some competitors like A&P returned to trading stamps last year, Kroger did not.

Kroger's "price patrol" comparative ads were found misleading by an FTC administrative law judge in June. Judge Montgomery Hyun, in an initial ruling in the two-year case (AA, July 25, '77), recommended requiring that future price surveys by the supermarket chain meet methodological standards. Also, he said, future price survey ads should note when major food categories are excluded and carry the disclosure that "whether you save and how much you will save will depend on what you buy." Kroger said it would probably appeal to the full FTC.

Campbell-Mithun, Chicago, is the Kroger agency.

Great Atlantic & Pacific Tea Co.

Sales	$7,288,577,000

Test the U.S. in Phoenix.

When you test Phoenix, America's mobility and our ever-growing sunbelt migration give you opinions from Chicago, Poughkeepsie, and Oakland as well.

Phoenix gives you less than 5% deviation along all national demographic lines, and has the additional plus of a highly mobile population: the folks who pulled up roots from back home and are willing to try something new, including your test product.

Phoenix Newspapers dominate this major urban market with 81% weekly penetration metro households for a combined daily circulation of 301,000 and 308,000 on Sundays. No spill-in, no spill-out. You get contained, controlled testing with a near perfect statistical base. Our only blemish is that the people who read our newspaper tend toward the higher income levels, reflecting (as Phoenix will so well for you) a national trend.

For more information and a free copy of our new "Inside Phoenix" contact Howard Ruby, The Phoenix Newspapers, P.O. Box 1950, Phoenix, AZ 85001. He'll help you buy the best test in the West, the Midwest or the U.S.

THE ARIZONA REPUBLIC / *The Phoenix Gazette*

Represented Nationally by STORY & KELLY-SMITH, INC.

New York Philadelphia Atlanta Boston Chicago Dallas Detroit Los Angeles San Francisco

third largest food retailer, operates approximately 1,800 stores. Its advertising investment includes an estimated $60,000,000 in price/item newspaper ads and $16,000,000 in broadcast, where A&P ties its corporate umbrella theme, "You'll do better at A&P," into more specific local efforts.

A&P has been experimenting with a modified co-op ad effort. Instead of the tv commercial in which retailers are listed at the end of a spot prepared by a manufacturer, the new co-op commercial involves only one retailer—in this case A&P—and the advertised brand. A&P, working with Ed Libov Associates on this program, so far has involved products from Bristol-Myers, Oscar Mayer, American Home Products and Richardson-Merrell.

A&P's 1979 ad budget is expected to be approximately 10% below that of 1978.

▪ The company began phasing out its trading stamp program early this year in about half of the 600 participating stores, including those in Milwaukee and in some eastern states. A&P will continue to use stamps in Chicago and other midwest cities.

The company is investing $80,000,000 this year to remodel stores, including 50 or more "limited-assortment" stores featuring a limited line of products.

A German supermarket chain, the Tengelmann Group, has invested up to $78,000,000 in A&P, buying about 42% of the outstanding shares of A&P from the John Hartford Foundation, the McIntosh Foundation and two individuals. A&P's vp-advertising, Michael Rourke, said in a February interview that the German firm is not expected to take a role in day-to-day operations of the company. Mr. Rourke noted that the fact that a foundation is not a major stockholder is a plus for A&P.

First quarter 1979 sales were $1,662,888,000, down from $1,808,319,000 in 1978. With 289 fewer stores than in first quarter 1978, an A&P representative said that on an identical store basis sales were up 2.3%.

McCann-Erickson, New York, is the A&P agency, with Hawkins, McCain, Blumenthal, New York, handling its private label brands, including Ann Page, Eight O'Clock coffee and others.

American Stores Co.

Sales $5,138,404,000
Advertising 56,328,000

On July 28, 1979, American Stores Co. was merged into Skaggs Cos. and immediately thereafter Skaggs, the surviving company in the merger, changed its name to American Stores Co.

American Stores is a holding company which, through Acme Markets Inc., Alpha Beta Co., Skaggs Stores and other companies, operates 689 food stores, 238 super drug centers and drug/-grocery combination stores. Acme operates 370 stores in seven eastern states. In California and Arizona, Alpha Beta has 319 food stores, 44 restaurants and three discount department stores. The Skaggs super drug centers and drug/grocery combination stores are located in 21 western, midwestern and southeastern states. Rea & Derrick is the drug store operator in Pennsylvania, New York and Maryland. Hardee Northern operates 11 Hardee's fast food outlets.

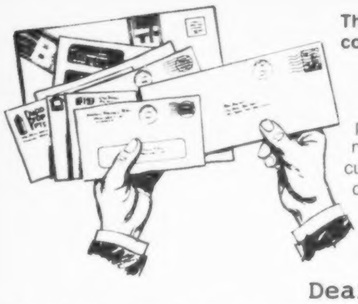
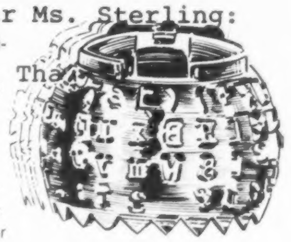
If you know your prospects' names . . .

send them personal letters!



There's no other form of marketing communication that works as well. Your message comes across on a one-to-one level. One identified person talking to another. That's probably the way you communicate now with a select few prospects and customers. Wouldn't it be great if you could send a *personally typed* letter to everyone on your mailing lists?

Dear Ms. Sterling:



Now you can use this powerful communications tool to reach hundreds . . . thousands . . . of your prospects. Wordex makes it possible. We're not talking about computer letters, offset letters, chesire labels . . . or anything else with the obvious mass-produced look that gets lowest priority for reading time. We produce individually typed, addressed and signed letters on your letterhead. Every one looks exactly as if your secretary typed it and you signed it.

Wordex can do everything . . . including affixing stamps and mailing. And we'll maintain your lists, track performance and handle follow-up. All for significantly less than it would cost you to do it yourself.

Personalized communication commands attention . . . and gets response. Wordex will personalize your communications to all your lists, whatever the size. Call or write for complete information on Wordex services.

Let WORDEX work for you.

THE 2-BILLION DOLLAR MAN.

He's alive and well and living in the Greater Miami Latin Market.

That's right! He's Latin.
And he's affluent. As a matter of fact, he's worth $2-billion each and every year.

$2.2-billion, to be exact.* For that is the aggregate annual income of the more than half-million Spanish-speaking people making up the Greater Miami Latin Market.

Being affluent, this 2-billion dollar man spends a lot of money. On food. On liquor. On cigarettes. On entertainment. On travel. On cars. On clothes. On his home. On his family.

Oh! Yes, he's very much family-oriented. His activities revolve around his family. And it's a large family, averaging 3.4 members per household.*

But for you — the advertising decision-maker — the most important aspect of this 2-billion dollar man is that he speaks and reads in Spanish. Not only does he speak and read it, but he lives, breathes and thinks in Spanish. Therefore, he makes his buying decisions in Spanish.

And the place he goes to every day to get help in making those buying decisions is DIARIO LAS AMERICAS. The #1 Spanish-language daily newspaper. Particularly oriented to him and his family.

Make sure you get your fair share of this 2-billion dollar man. Reach him by advertising in DIARIO LAS AMERICAS.

Winn-Dixie Stores

Sales	$4,930,538,000
Advertising	39,643,000

Winn-Dixie Stores, Jacksonville, Fla., increased its advertising outlays more than $6,793,000 in the fiscal year ending June 27. The company operates 1,174 stores throughout the Sunbelt, up from the 1,169 stores of a year before.

The company invested more than $26,915,000 in newspapers and $12,728,000 in spot tv.

William Cook Advertising, Jacksonville, is the Winn-Dixie agency.

Lucky Stores

Sales	$4,658,409,000
Advertising	35,000,000

Lucky Stores, Dublin, Cal., operates approximately 1,175 stores. Its store names include Lucky, Eagle, Food Basket, Magnamart, Gemco, Memco, Sirloin Stockade, Hancock Fabric, Fabric Warehouse, Dorman's, Kragen, Mays and L&G Sporting Goods. About 60% of its sales are from department stores.

The company opened 150 additional stores during 1978, adding 2,300,000 sq. ft. of space. This includes 23 new Kragen & Dorman's automotive stores in California; 24 Sirloin Stockades in the South, Midwest and far West; 7 Gemco and Memco stores in the far West, Texas and Virginia; 50 Pick-A-Dilly and Its-a-Dilly in the West and the Southwest, and four L&G sporting goods stores in California.

About 31% of the company's sales are in supermarkets and 35.1% in discount stores. Advertising is handled in-house.

Jewel Companies

Sales	$3,516,352,000
Advertising	43,471,000

Jewel Cos., Chicago, operates 364 food stores including Jewel Food Stores in Illinois and Wisconsin (223), Buttrey Foods in Montana (48), Eisner Foods in downstate Illinois (32) and Star stores in Massachusetts (61).

It also operates home service routes, 254 Osco drug stores, 216 White Hen Pantry convenience stores and 92 Brigham's Ice Cream/Candy parlors and sandwich shops.

Supermarkets account for 76.3% of Jewel sales, with general merchandise 16.6% and other operations 7.1%. Supermarkets account for 68.7% of its operating income, with general merchandise 21.0% and other operations 10.3%.

Jewel was the first national chain to offer generic foods to its customers. Over 130 generic products are on its shelves. Its Jewel T line of discount grocery products includes about 500 items in 29 stores.

Star Markets is conducting an agency review for its $1,500,000-plus account. Five or six area agencies, including incumbent Schmalenberger & Nargassans, have been asked to pitch for the business. S&N handles broadcast advertising for Jewel's 25 Osco drug stores in the New England area. Grey-North, Chicago, handles broadcast for the remaining 229 Osco stores, while print is done in-house.

The Southland Corp.

Sales	$3,090,094,000
Advertising	18,500,000

The Southland Corp., Dallas, as of June 30, 1979, operates and franchises 6,712 7-Eleven convenience stores, up from 6,445 a year earlier. In addition, the company operates 105 Gristede's and Charles & Co. stores in the greater New York City area.

The company processes milk, ice cream and related dairy products under 12 regional brand names in 34 states and the District of Columbia. Southland's special operations group includes the chemical, Reddy Ice, Hudgins truck rental, Tidal Systems and Chief auto parts divisions. Chief auto parts, which includes 119 stores in Northern California, was acquired in December. Sales of the stores group were $2.8 billion in 1978.

Broadcast remained the company's major advertising vehicle, with spot radio over approximately 500 stations getting 29%; network tv 24%, spot tv 7% and about 200 newspapers 7%. Point-of-sale and other promotional media accounted for the balance. The company's first prime time network tv commercial was aired before Super Bowl XII. Advertising is handled in-house.

In addition to its U.S. stores, Southland has operations in Canada, Mexico, Japan, Great Britain, Sweden and Australia. A typical 7-Eleven carries more than 3,000 items. Self-service gas pumps are a feature in one quarter of the stores, accounting for 13.4% of 7-Eleven sales. Average store merchandise sales are about $350,000 per year.

The first New York City 7-Eleven was opened last September at 34th Street and Lexington Ave. Stores were also opened in Boston and San Francisco.

Food Fair

Sales	$2,785,899,000
Advertising	31,000,000

Food Fair, Philadelphia, operates approximately 348 stores under the Pantry Pride, Food Fair, Penn Fruit and Hills names besides the 79 J.M. Fields stores. The company has been involved in federal bankruptcy proceedings since filing for protection under Chapter 11 in October, 1978.

The company closed 42 Hills and 47 Pantry Pride stores in the New York metropolitan area, affecting 3,700 employes. Food Fair's New York market share had fallen to below 4%. The closings meant a loss of $1,200,000 in advertising revenue for city and suburban newspapers. It also cut out about $800,000 targeted for circulars.

TULSA'S DOWNTOWN IS ON THE WAY UP

As other cities downtowns are on the decline, Tulsa's central business district has become a model of what can be done through public and private enterprise.

A massive revitalization program has turned 9 blocks of deteriorating buildings into a new 400-room hotel with adjacent shopping mall and parking facilities; a central pedestrian system has replaced vehicular traffic with fountains, trees and open space; and a river parks project will soon turn the Arkansas river into a recreation area through a series of low water dams.

This beauty and livability serve only to reinforce Tulsan's belief in themselves and their city. It's the same spirit that turned Tulsa into a booming oil town, an aircraft and aerospace center, a diversified industrial center, a data computer capital, and into America's newest inland port city.

If you want to reach this evergrowing market, contact the medium that penetrates it most effectively. The daily newspapers.

Reach the Terrific Tulsa Market!

TULSA WORLD ★ The Tulsa Tribune

Two independent and separately owned newspapers represented nationally by Branham

The company's stores now are located in the Baltimore, Jacksonville, Miami and Philadelphia areas.

Pantry Pride stores in the Baltimore-Washington area ran newspaper page ads last spring promising to pay "double the difference" if its prices were higher than competing stores. The ads were backed by radio support and tv spots.

Jack M. Friedland was forced to resign as president-ceo last year because of the chain's financial troubles. He was succeeded in January by Grant C. Gentry, former A&P president. Mr. Gentry, under a five-year contract, will receive $350,000 a year plus stock options allowing him to buy 200,000 shares of Food Fair common at $2 per share.

The company has an in-house advertising agency.

Grand Union Co.

Sales	$2,600,000,000
Advertising	39,000,000

Grand Union Co., Elmwood Park, N.J., operates 849 stores. It also operates 14 Grand Way discount stores and nine Grand catalog showrooms. Cavenham Ltd., Great Britain, owns all of Grand Union's common stock. Cavenham operates food stores in Britain and continental Europe.

In September, 1978, Grand Union acquired control of Colonial Stores, an Atlanta-based supermarket chain operating 370 stores in seven southeastern states. Colonial sales are $1.1 billion with ad outlays of $14,000,000. It operates 370 stores from offices in East Point, Ga.

The company is involved in a $150,000,000 expansion program to open 100 large supermarkets by 1981. It has closed some 200 stores in the last six years since Cavenham acquired control of the company.

Sales and advertising are combined estimates for Grand Union and Colonial. Liller Neal Weltin, Atlanta, handled Colonial.

Albertson 's Inc.

Sales	$2,268,969,721
Advertising	14,500,000

Albertson's Inc., Boise, Id., operates 374 units, including 53 combination food and drug stores through its southeastern U.S. subsidiary. All other stores are located in 11 Western states. Albertson's owns and operates nine manufacturing and distribution facilities. It has 24,000 employes.

Advertising mix remained approximately the same with newspaper and tv as the two major media. The company's theme: "It's Joe Albertson's supermarket, but the (meat, produce, bakery) department is mine."

Forty-seven stores in Southern California were acquired from Fisher Foods during 1978. The company celebrated its 40th anniversary Aug. 1. Founder J.A. "Joe" Albertson currently serves as chairman of the executive committee.

Foote, Cone & Belding/Honig, Los Angeles, handles broadcast. Newspaper ads are handled through 11 division offices.

Supermarkets General Corp.

Sales	$2,117,477,000
Advertising	28,500,000

Supermarkets General Corp., Woodbridge, N.J., operates 119 Pathmark supermarkets in five eastern states. It also operates 92 drug stores, 20 Rickel home centers and 40 specialty stores. The specialty stores include Hochschild, John Steinbach and Howland department stores.

Venet Advertising, New York, is the Pathmark agency. Pathmark newspaper advertising tries to feature as many products as possible to provide the consumer with a "shopping list." It also makes use of roto inserts in Sunday papers as well as some spot tv.

Stop & Shop Cos.

Sales	$1,762,144,000
Advertising	25,650,000

Stop & Shop Cos., Boston, operates 157 Stop & Shop supermarkets. It also operates 40 Medi Mart drug stores, 76 Bradlees discount department stores and 47 Charles B. Perkins tobacco shops.

According to Leading National Advertisers, the company had measured spending of $2,191,300 in 1978. The company makes heavy use of direct mail and newspaper supplements in its trade areas in New England, New York and New Jersey for its food, general merchandise and drug store outlets. It also uses some r.o.p. advertising for its drug operations.

Its supplements for Bradlees are in full color and its food store supplements are typically used to promote a continuity offer along with in-ad cents-off coupons.

Schmalenberger & Nargassans, Boston, is the new agency for Stop & Shop supermarkets, previously handled in-house. Maxi Media, Boston, handles media buying for all divisions.

Publix Super Markets

Sales	$1,672,229,000
Advertising	12,600,000

Publix Super Markets, Lakeland, Fla., plans to be operating 240 stores by the end of 1979, all in

(Continued on Page S-20)

FIRST IN RETAIL

Of all the cities in the 8 Southeastern States, Jackson Mississippi has the highest retail sales per household. While over-all U.S. retail sales grew 67% since 1970, Jackson's retail sales soared 331%. That's why the world's second biggest food outlet is in Jumpin' Jackson. That's why Jackson Mississippi is the "Super-Market" of the South.

Jackson also delivers more retail sales per household than Des Moines, Daytona Beach, Dallas-Fort Worth, or Nassau-Suffolk.

And the retail media that keeps Jackson Jumpin' is The Clarion-Ledger and the Jackson Daily News. They cover Jackson with a daily penetration of 64% and rising. That one buy gives you 32% penetration of Jackson's ADI and 13% penetration of the entire State of Mississippi.

25 top food chain retailers

(Continued from Page S-19)

Florida. Fourteen new stores and 19 new bakeries are being opened this year. Six new stores and nine bakeries were opened during 1978.

Publix is an employe-owned corporation (some 15,000 stockholders among some 25,000 employes) operating over 200 Publix Markets, a division of Food World supermarkets, and over 100 Danish Bakeries.

The company invested over $8,500,000 in newspapers during 1978, about 68% of its over-all media budget. The balance was invested in radio and miscellaneous advertising. Publix utilizes some 125 print publications, 19 tv stations and about 70 radio stations throughout Florida. Publix promotes itself as "the place for everything."

Always known as a national brands supermarket operation, Publix has, in recent years, become more aggressive in private label merchandise. Indicative of this position is a multi-million-dollar dairy plant under construction in Lakeland.

W.M. Zemp & Associates, St. Petersburg, Fla., a division of Young & Rubicam International, is the Publix agency.

Dillon Cos.

Sales	$1,470,081,000
Advertising	11,500,000

Dillon Cos., Hutchinson, Kan., operates 266 stores in 11 western states. Its supermarkets include King Soopers, Colorado; Dillon stores in Kansas, Arkansas and Oklahoma; City Markets in Colorado, Wyoming and Utah; Fry's in California, and Gerber supermarkets in Missouri.

The company also operates Kwik Shops and Quick Stops convenience stores and Calhoun department stores.

Fisher Foods

Sales	$1,451,676,000
Advertising	13,000,000

Fisher Foods, Bedford Heights, O., operates 201 food stores in California, Illinois, Kentucky, and Ohio. It has Fisher-Fazio stores in Ohio and Dominick's Finer Foods in Illinois. The company discontinued its aggressive price war promotions begun in 1975.

First National Supermarkets

Sales	$1,111,691,000
Advertising	11,000,000

First National Supermarkets, Maple Heights, O., was formed in May, 1978 through the merger of First National stores, Somerville, Mass., and Pick-N-Pay Supermarkets, Maple Heights, O. The company operates 274 stores as follows: Boston division-75, Cleveland division-58, Hartford division-52, New York division-52 and Portland (Maine) division-37. Store names include Pick-N-Pay, Finast, Big Buy and Edwards. Distribution centers are located in Maple Heights; Windsor Locks, Conn., and Springfield, Mass. The company also operates a full-line bakery in East Hartford, Conn., and has a 50% ownership interest in Dinner Bell Meats, Cleveland.

The company's eastern headquarters were moved from Somerville, Mass., to Hartford. Chairman Julie Kravitz died on May 2 and was succeeded by Richard J. Bogomolny. The company has a policy of not offering generic products, believing that consumers prefer higher quality to lower price.

Fox & Associates, Cleveland, is the agency for the Pick-N-Pay stores and Multi-Media, Cleveland, is the agency for Edwards.

Giant Food

Sales	$992,359,000
Advertising	13,000,000

Giant Food, Landover, Md., operates 115 stores, up from 112 a year earlier, in Maryland, Virginia and Washington, D.C. It sold its four Giant department stores to Woolco in January, 1978, but continues to operate other retail outlets. The company is opening six new stores during 1979-80.

The company has installed computerized checkout scanners in about 70 of its stores.

The company began a joint promotion with the National Heart and Blood Institute with newspaper and p.o.p. to support better diets. The store's scanner will monitor sales to measure the campaign's success.

Denniberg Advertising, Washington, is the Giant agency.

Von's Grocery Co.

Sales	$975,000,000
Advertising	11,000,000

Von's Grocery Co., a division of Household Finance Corp., is located in El Monte, Cal. It operates 139 food stores in Southern California.

Waldbaum Inc.

Sales	$941,479,000
Advertising	9,000,000

Waldbaum Inc., Central Islip, N.Y., operates 129 food stores in New York, Massachusetts and Connecticut.

Waldbaum's broke a $500,000 tv campaign Jan. 29, the chain's first major use of tv. Different commercials focus on price, convenience, delicatessen items and fresh, quality meats. They include the slogans, "More than the price is right" and "Waldbaum's is part of every good meal."

The campaign is designed to attract new customers between the ages of 25 and 49 with families and to reinforce the chain's image with existing customers. Creative and production were handled by American Dream Productions.

Fred Meyer Inc.

Sales	$927,110,000
Advertising	11,000,000

Fred Meyer, Inc., Portland, Ore., operates 61 stores, as well as shopping centers and department stores in Alaska, Montana, Oregon and Washington. It also operates a wholesale grocery business and 24 Fred Meyer Savings & Loan institutions located in-store.

The company invested approximately $5,500,000 in newspaper advertising last year.

Natio al Tea Co.

Sales	$918,635,000
Advertising	5,000,000

National Tea Co., Chicago, operates 100-plus stores. Its major U.S. operation is in St. Louis.

The company is controlled by Loblaw Cos. Ltd., Toronto. Another Loblaw operation, Loblaw Inc., operates stores in upstate N.Y. and other eastern markets.

Allied Supermarkets

Sales	$712,000,000
Advertising	6,500,000

Allied Supermarkets, Livonia, Mich., has filed for reorganization. The 114-store chain operates stores in 12 states, including Wrigley supermarkets, Great Scott stores, Ideal food stores in Kansas and Humpty supermarkets in Oklahoma.

Allied's second half 1978 sales of $346,591,000 were down 17.1% over the same period in 1977. The company showed a loss of $3,625,000. Allied doesn't plan to close any stores and said that advertising is the "key to survival."

Borman's Inc.

Sales	$775,190,000
Advertising	8,000,000

Borman's Inc., Detroit, operates 85 supermarkets and 29 drugstores under the Farmer Jack and Arnold Drug names. The company also operates several Food Fair minimarts.

S.M. Flickinger Co.

Sales	$869,508,000
Advertising	8,000,000

S. M. Flickinger Co., Buffalo, N.Y., operates 49 Super Duper and Market Basket stores in upstate New York, Ohio, and Pennsylvania. It also operates a substantial wholesale business that sells grocery products to more than 700 stores.

Shift focus to marketing

(Continued from Page S-2)

As an advertising person, let me say a few words about retail advertising and how that relates to the positioning of your store. There was a period of time in our country when great copywriters grew out of the retail business. They sharpened their skills daily by writing retail copy.

Retail advertising is a demanding craft. You are tried and tested every day.

Let's bring back creativity to retail advertising. If you define a position for your store, your advertising will improve immediately. It will have a focus, direction and a point of view. You will no longer say to your advertising agency or advertising department, "I need an ad for Thursday," but rather, "I need a campaign for 1980." #

LAS VEGAS SUNBELT BUYING POWER

How does a market ranked only 100th in population show up as 34th in retail sales per household? By having a corresponding rank in Consumer Spendable Income of 39th. The Las Vegas metro C.S.I. of $20,833 is the highest among the next 15 larger markets. Four of them are well known high growth Sunbelt metros. Las Vegas own Sunbelt in-migration is at the rate of about 2,500 people per month. So it should come as no surprise how fast retail sales are rising. In 1978 they jumped up 17%. This year's gain is 18%. Next year . . . by the way, are you in this market?

Ad exec's film plan gets approval from Paramount

By JAMES P. FORKAN

NEW YORK—Barrich Productions, formed last summer by two Paramount Pictures advertising and marketing execs, has sold the studio on backing a comedy called "High Finance."

The property was penned by two young ad agency execs, Frank Schwartz, formerly vp-account supervisor, Scali, McCabe, Sloves, and Bruce Feirstein, previously copy supervisor, Ammirati & Puris. Both left their posts a few weeks ago.

Barrich's Gordon Weaver and Steve Rose, who left Paramount as senior vp-marketing and vp-advertising (AA, July 16), hope to start production late this year or in January for release next August or September.

Although the scriptwriters would not divulge much of their plot beyond—"It's a broad-based comedy about people trying to get ahead" in the business world—they said that, unlike most first efforts, "nothing of our past is in our film" and "there are no ad jokes."

Mr. Schwartz, who worked on Hertz, Bantam and other accounts at Scali, and Mr. Feirstein, who wrote copy for BMW and Sony hi-fi components and before that was a Scali copywriter on Pioneer hi-fi components, said they have been working on their script each night and weekend for about a year, having decided to "get into movies and out of advertising."

- Like the Barrich founders, Messrs. Schwartz and Feirstein wanted a script that "could be provocative and could be sold, like a product." Initially, they had mulled some sitcom ideas for network tv but scrapped those to focus on the movie script, said Mr. Feirstein, who has a couple of Clio Awards to his credit.

Messrs. Weaver and Rose, who have some other ventures in various stages of development for the studio, presented Paramount brass with the "High Finance" script along with some ad approaches. The headline on a proposed ad poster was contributed by the two former admen, who said they plan to make advertising and casting suggestions, although final word rests with Barrich and Paramount.

The scriptwriters and Barrich probably will discuss potential merchandising tie-ins such as a board game within a month, said Mr. Schwartz. Mr. Feirstein joked, "We'd like the whole 'Saturday Night Fever' tie-in treatment."

Even as they await production on "High Finance," the two men have developed a second idea, also a comedy, which they and Barrich have presented "in general terms" to Paramount. #

Banks & trust companies	1979 1978	1 053 123	652 756	+400 367	+61.3

This Flash Report of newspaper advertiser investment, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 35 dailies and 25 Sunday editions in 15 cities—Atlanta, Baltimore, Boston, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, Miami, New York, Philadelphia, Pittsburgh, San Francisco and Washington. The report indicates marketplace strengths and weaknesses.

Note: For comparability, New York not included in this report due to strike affecting city papers in August 1978.

Utilities hike newspaper $ 78.5%

NEW YORK—Public service utilities newspaper advertising rose 78.5% in dollar spending during August, 1979, compared with the same period last year, the August Flash Report prepared for ADVERTISING AGE by Media Records Inc. shows.

Not far behind was the banks and trust companies category, which registered a gain of 61.3% for the same period.

The two led the way as all 16 categories monitored for AA by Media Records showed gains in ad volume for the last month of the summer. Measurements are based on the newspapers of 15 major cities (see chart). Comparability measurements do not include New York, since its three major papers were affected by a strike in August, 1978.

Department stores, newspapers' leading dollar category, increased 6.6%. It was followed in the top five listing for total ad dollars spent by furniture and furnishings, food stores, general merchandise stores and amusements.

Percentage gains of 20% or better—much better in the aforementioned cases of public service utilities and banks and trust companies—were turned in by the following categories: Sporting and leisure time equipment, up 36.3%; eating and drinking places, up 30.5%; building materials and hardware, up 22.4%; real estate, up 22%, and building contractors, up 21.2%. #

McDonald's told to alter claim

Nobody can do it in kid ads

By CHRISTY MARSHALL and RICHARD L. GORDON

WASHINGTON—The National Assn. of Broadcasters turned thumbs down last week on clown Ronald McDonald's claim that "Nobody can do it like Ronald can."

In response to a complaint filed last June by J. Walter Thompson Co., New York, with the knowledge and approval of its client Burger King Corp., NAB has ruled that McDonald's Corp. advertising featuring Ronald is in violation of the children's section of the NAB code. Specifically, it runs counter to guideline I-P, which states: "Competitive/-comparison/superiority claims or techniques are disallowed."

McDonald's Corp. appealed the decision, but the appeal was overruled and the nation's leading fast-food chain has been told to change the campaign in 30 days, according to sources.

▪ The final decision was reached by the NAB code board at a recent two-day meeting held in Orlando, in which JWT, McDonald's and Needham, Harper & Steers, its agency, presented final arguments.

When contacted, McDonald's execs declined to comment.

According to sources, the Mighty Mac is following orders, however. Needham is now readying a new campaign theme lined "We know Ronald can do it. We know Ronald can." The commercials feature Ronald saving the day with fantastic feats not possible by regular human beings.

ABC and NBC have yanked the "Nobody can do it like Ronald can" spots off children's programs, while CBS is judging the commercials individually. If the spot shows Ronald leading children in a parade, for example, the net will leave it on the air, but if he is using the claim to sell a product, the spot is pulled.

▪ JWT vp-legal counsel Howard Abrahams said it was "very unusual" for his agency to press a complaint with the NAB, but that Thompson was convinced the McDonald's line "was definitely telling children that McDonald's was doing something that's better than the competition.

"We don't like to bring challenges of any kind concerning advertising, but, at the same time, these guidelines—at least as they are applied to JWT clients—are strictly enforced," Mr. Abrahams said.

Burger King is especially aware of this I-P guideline, since that code point has prohibited BK from targeting its current "We've got the best darn burger" line to young viewers for the exact same reason—making comparative claims.

A company spokesman in Miami said, after viewing the Ronald spots, it was readily apparent to him "there was no way that that would go."

McDonald's has recently stepped up its attack on the children's market as a result of inroads made by Burger King (AA, Feb. 19). According to McDonald's research, Burger King's superior premiums have been swaying young customers away from the Golden Arches.

"It's nice to be the one they are reacting to," a Burger King spokesman said. #

Anacin may stop ads rather than run correctives

By NANCY GIGES

NEW YORK—American Home Products might stop advertising regular Anacin entirely rather than run corrective advertising if it loses its current battle with the Federal Trade Commission, a former AHP exec has indicated.

A consideration to switch all ad support to Maximum Strength Anacin from regular Anacin came out during testimony involving a McNeil Laboratories' suit against AHP, alleging false and misleading advertising for Maximum Strength Anacin.

David McLain, former vp-marketing of AHP's Whitehall Laboratories until joining Carter-Wallace as exec vp of Carter Products last May, stated that corrective advertising could be "ruinous" to Anacin in today's hotly competitive market. That fact was part of the rationale for introducing Maximum Strength Anacin.

Mr. McLain testified the feeling at AHP was: "If we go out there and tell people what we told them before was not true and that there was no substantiation or proof that we are any more effective than aspirin, I think we are going to raise further questions . . . [and] many consumers might agree we are not as effective as aspirin."

▪ The strategy for Maximum Strength Anacin, a 500mg tablet (the same strength as McNeil's Extra Strength Tylenol), was being developed in the fall of 1978 just as a FTC administrative law judge ordered $24,000,000 worth of corrective advertising. The full commission has not yet issued a final order.

Separately, McNeil sued in U.S. district court here last summer when AHP began airing tv commercials claiming Maximum

(Continued on Page 99)

FCC staff gives passing grade to kid ad reforms

WASHINGTON—The future direction of Federal Communications Commission pressure on children's tv was steered toward programing issues last week and not advertising.

A team of FCC staffers studying children's tv turned over an 800-page report that, among its findings, said tv has generally complied with the advertising reforms called for in a children's tv policy statement issued by the commission in 1974.

▪ The report left to the Federal Trade Commission controversial allegations that tv ads to kids were inherently "unfair" or promoted products that were "harmful" to children. FTC is considering whether a children's tv advertising rule is needed and is looking at a wide range of options that include doing nothing, requiring new disclosures or banning outright certain categories of tv ads to kids.

The same FCC staff group, however, said tv had made little or no progress toward increasing the amount of educational and instructional programing for kids, another key part of the 1974 FCC policy statement.

The staff reached the controversial conclusion that only a direct order from FCC would increase the amount of this programing because advertiser interest in child audiences was not enough to move commercial broadcasters.

The staff said that more children's programing might get on the air if advertisers were permitted to sponsor some of the kids' series the government finances through the Department of Health, Education & Welfare.

HEW has spent $52,000,000 on 28 tv series for kids—11 still in production—but they have gotten little air play on commercial tv sta-

New routes keep airline ads on course

By JOSH LEVINE

NEW YORK—While a retreat from advertising might cushion an airline against a 1¢ per gallon rise in the price of fuel, deregulation has indirectly made an airline's ad budget as inviolate as its fuel.

With considerable increases in air fares still lagging behind the unflagging march of fuel prices, airlines must rely on healthy traffic and profitable routes to keep them in the black.

While marketing approaches vary, most airline execs agree that the job cannot be accomplished without advertising.

Many airlines, given new freedom on route selection, are still sorting out the routes they plan to add and those they intend to vacate. And while discarded routes had received little advertising support, the new routes drive ad budgets up with the necessary introductory announcements.

"We've increased our budget 20% to 25% this year to cover the new routes we started serving," said Bryan Moon, vp-advertising, Northwest Airlines. "That's the biggest advertising increase in Northwest's history."

Trans World Airlines, which is ironing out a lopsided east-west route system with some 40 daily flights to Florida, is currently in the midst of a major vacation promotion, via Ogilvy & Mather.

Eastern Airlines, a predominantly north-south carrier, is reversing TWA's route pattern by inaugurating new flights to Denver, Phoenix and Albuquerque. The ad budget for the fourth quarter has been augmented to promote them. Eastern's agency is Young & Rubicam.

Pan American World Airways is awaiting Presidential approval of its CAB-sanctioned merger with National Airlines to give it a domestic flight network. That means more advertising.

One exception is United Airlines, which excised 25% of its fourth-quarter budget but, here again, added flights from Chicago and Denver to Florida are expected to restore those cuts next year. Leo Burnett Co. handles.

"I'm sure that most airlines would like to save money on advertising, just as they'd like to save money on whatever they can, but the intense competition that has resulted from deregulation tends to militate against a cutback on the promotion side," and Alfred Norling, an airline analyst with Kidder, Peabody & Co.

A greater intangible than the size of ad budgets, however, is their target, and here airline marketers differ on the most productive audience for their messages. On the one hand, leisure travelers are traditionally viewed as more likely victims of a recession than business fliers. And yet, airline research also shows that it takes more advertising to switch a business flier from one airline to another than to convert a vacationer.

"I think airlines are going to rediscover the business flier," said William Dowse, vp-advertising, Eastern Airlines. "The business segment has not been as well covered as it might have been."

American Airlines, National and TWA, in seeming agreement with Mr. Dowse, are devoting substantial portions of their ad budgets to boast of improved airport service.

Airports are the most visible example of the chaos and confusion resulting from route aggrandizement. Unlike last year's abortive attempt at a separate business class on airplanes, airplanes are also the area of operations where improvement is most feasible. #

last minute news

J&J going into test with Sure & Natural

HILLTOWN, N.J.—J&J's Personal Products Co. is moving into Florida with new Sure & Natural feminine napkins, the "super slim" napkin expected to hit the U.S. following earlier introduction in Europe (AA, Sept. 17). Product will be on retail shelves in about three weeks, with a multimedia ad campaign to start in December. Agency is Cadwell Davis Savage. Sources believe the Sure & Natural name will aggravate the company's legal battle with Procter & Gamble, which sued J&J claiming Assure tampons infringe on its Sure brand (AA, March 5).

'Esquire' plan: Ad money returned for clutter

NEW YORK—*Esquire* is offering a two-pronged, no-clutter guarantee whereby an advertiser doesn't pay if his full-page ad faces another page ad, or if the over-all editorial ratio dips below 57%. The men's magazine, acquired by 13-30 Corp. six months ago and converted from fortnightly to monthly, plans to drop all regional and metro editions and may drop Magazine Network, publisher Christopher Whittle said.

Magazines primed for audit battle at ABC

By BERNICE KANNER

NEW YORK—A contingent of publishing execs calling for audits of magazine demographic editions and renewal rates may ignite some sparks at the annual Audit Bureau of Circulations meeting.

At the meet in New Orleans this week, *Scientific American* and others will "make noise to smoke this thing out," vowed vp-ad director John Kirby.

This "thing," shrouded in controversy, first surfaced in 1976 when *SA*, *The New Yorker* and *Business Week* fought to have demographic editions of the newsweeklies, against which they compete, audited.

At the same time, they sought to have voluntary disclosure of renewal percentages made mandatory. Currently, only these publications, plus *National Geographic* and *Reader's Digest*, voluntarily disclose renewal information.

The brouhaha resulting from this year's disparate, and some say suspect, syndicated magazine research reports, plus the fact that two of the three magazine seats on the 33-member ABC board are up for election, seem to have fanned the fiery issue.

But so far, none of the candidates seeking election have made it an issue. They include incumbent Jim Narbor, from Meredith Corp.; Mary Zogott, *New York*; Larry Crutcher and William Deyoe of Time Inc. and *Golf Digest*, respectively. They are vying for the post made vacant by the retirement of *Newsweek's* F. E. Davis. William Campbell, Hearst Magazine circulation director, retains the seat he won in last year's election. A term runs for two years.

What peeves *SA* publisher Gerald Piel is that the first ABC publishers statement in 1948 requested 42 lines of publisher responses. Now it's 18, a drop which "hides significant tests of quality from the media buyer. Major magazine circulations are sold without any audit whatever by ABC on its time-honored standards of either quantity or quality," just "claims of economic identity and social status for subscriptions not submitted" to audit, he charged.

Furthermore, after a one-time full audit of *Time B* and *Newsweek Executive* issues, neither has since "responded to the telltale questions about price, channel and duration of subscription sales," he said.

The reasons, according to the publications gored, have to do with money and propriety.

"We don't feel it's proper to show," said Joseph Acerno, vp-circulation director, *Newsweek*. "You're talking about 125 pink sheets for us. You're talking about megabucks here." Mr. Acerno estimated auditing each edition would cost *Newsweek* at least $100,000.

"I'm not so sure this has value to advertisers. You can extrapolate renewal rates by looking at historical trends, but it's really a moot question," he continued, noting other indicators, such as arrears, show how a magazine is doing. In the 1976 audit "we proved and showed there was no hype in our numbers and that everything that was intimated was untrue. We got a clean bill of health from ABC and don't see any reason to go through it again."

Mr. Acerno's words were echoed by Ted Emery, assistant to corporate circulation director, *Time*, who called Mr. Piel's posture "grandstanding. Disclosing renewal rates doesn't make any sense because it's bound to be inaccurate, and how can you compare apples to oranges? *Seventeen* or *Bride's* has, by nature, a different turnover rate than *Forbes*," he said.

"If a renewal race were set off, everyone would be tearing hair out," trying "to artificially boost re-

(Continued on Page 102)

Sugarman ad takes on FTC

CHICAGO—Direct marketer Joseph Sugarman will take on the federal bureaucracy this week in newspaper ads that claim the Federal Trade Commission is trying to blackmail his company into paying a $100,000 fine.

In page ads scheduled to appear in Tuesday's ***Wall Street Journal*** and ***Washington Post***, Mr. Sugarman details the legal battle he has been waging with the FTC since last winter and urges consumers and elected officials to push for new laws that would strip bureaucrats of their power and return it "to Congress and the people."

▪ Mr. Sugarman, president of JS&A Group Inc., a Northbrook, Ill.-based direct marketer of consumer electronics, claims the FTC slapped a $100,000 fine on the company because it failed to abide by an FTC rule that forces direct mailers to ship their products within 30 days of receiving a consumer's check. However, he notes, the FTC knew the violation occurred because of a computer breakdown and that eventually all the parcels were shipped.

After refusing to pay the penalty, the ad says, JS&A received a subpoena requesting documents requiring "months to gather," "designed to harass or force us to accept their original $100,000 request," a move that Mr. Sugarman said, "sounds like blackmail."

"Federal regulation and the whims of a few career-building bureaucrats is costing taxpayers millions, destroying our free enterprise system, affecting our productivity as a nation and as a result is lowering everybody's standard of living," he writes in the ad.

He adds that he intends to run similar ads "in hundreds of magazines and newspapers during the coming months." #

FIRST OF A SERIES

FTC Revolt

Vowing to fight "blackmail" by the FTC, direct marketer Joseph Sugarman fires the opening shots this week with newspaper ads, while promising more in the future.

Vittorini marches over to 'Parade'

By BERNICE KANNER

NEW YORK—Fourteen months after Carlo Vittorini jumped ship as Charter Publishing Co. president to carve a U.S. magazine empire for Harlequin Enterprises, he's taken another leap. This time it's to Parade Publications, where he'll be president-chief executive officer.

The 50-year-old magazine luminary succeeds Thomas H. Ferguson, who takes over the long-vacant post of president, *Washington Post*. (*See related story on Page 102.*)

Mr. Vittorini, who cut his teeth on the original *Look*, *Farm Journal* and the *Saturday Evening Post* and sharpened them during 13 years at Charter, takes over what is billed as the world's largest circulating publication at a time when it is experiencing solid growth. The Sunday newspaper magazine, distributed by 129 Sunday newspapers with a total circulation of 21,500,000, is expected to rack up more than $140,000,000 in ad revenues this year. Last year the weekly took in just over $121,000,000, 17% more than it did in 1977.

▪ *Parade* strengthened its sales force last year by adding Garey T. Symington as vp-ad sales (AA, Oct. 2, '78) and promoted Matthew Carr to vp-marketing. Mr. Symington had been ad director at *Us*; Mr. Carr was *Parade's* director of planning.

C. Vittorini

Equipped with a fat corporate purse, Mr. Vittorini, who has gained the reputation of a stern and capable leader, laid the foundation for a Harlequin magazine group. His first buys were Laufer Co., the Los Angeles publisher of *Tiger Beat*, a monthly for teens, and Rona Barrett Publications, a monthly for tv fans.

In November, he bought *Texas Woman*, an about-to-be-born entertainment and cultural monthly for women of the Lone Star state. In May, he put together a joint venture with American Baby Inc. to publish *Weight Watchers*. In June, he negotiated for a majority position in *Photo Life*, a three-year-old Toronto-based monthly earmarked for U.S. distribution soon, and in July he announced that Harlequin had bought a 49% interest in *Artnews* and a 60% interest in *Antiques World*.

Why then, after just over a year, has Mr. Vittorini, a man easily recognized by his silvery crew cut—the same hairstyle he has worn for nearly two decades—moved on?

▪ "It's not easy to leave here," Mr. Vittorini acknowledged. "Things were just starting to pull together. But *Parade* is the single biggest print medium, Newhouse is a unique company, and the job will allow me to get back into the marketing end of things." Newhouse Newspapers purchased Parade in

HEALTH CARE MARKETING

'From mom and pop to supermarkets'

Health services discover marketing

BY JEFF DeBRAY

NEW YORK—The health care services business has mushroomed in the past 25 years and, increasingly, the companies that attend to such needs have turned to advertising to enhance their positions and boost revenues.

So-called hospital management companies have come into their own since the 1950s mainly as a result of skyrocketing hospital costs, due largely to ever more sophisticated and expensive technology.

These investor-owned concerns provide a plethora of services, from the most basic, such as inventory planning, to financing, design and administration.

"Hospitals have gone from mom and pop shops to major supermarkets," says Joan Webb of Webb & Silberg, a Los Angeles-based agency that handles corporate advertising for American Medical International, the No. 3 company in the hospital management field.

▪ Traditionally, religious groups, universities, groups of doctors, nonprofit organizations and governments have dominated the hospital field. All that is changing.

The largest of the hospital management concerns are listed on the New York Stock Exchange and are expanding nationally and internationally, but the field is peppered with smaller concerns, such as the New York-based American Practice Management, which offers a smaller range of services in this expanding and highly profitable field.

Humana Inc., founded in 1961, is the largest provider of health care services. This Louisville-based concern expects to post revenue for fiscal 1979 ended Aug. 31 of about $1.1 billion, marking the first time any hospital company has attained the billion-dollar level.

"Our goal is to provide top quality hospital care at reasonable cost," says Humana's communications manager, Brenda Bryant. In 1978, Humana acquired American MediCorp., another hospital-management concern that is expected to contribute significantly to earnings in fiscal 1980, according to Humana's chairman and chief executive officer, David A. Jones.

Humana owns 92 hospitals in 23 states and in England. Three years ago, the company retained its first major agency, Eisaman, Johns & Laws of New York. Charlie Tepele, director of communications for Humana, says that most ads are designed to attract potential investors and are placed in such financial publications as *Barrons*, *Forbes* and the *Wall Street Journal*.

One of Humana's top rivals is American Medical International, Beverly Hills, which expects to post fiscal 1979 revenues of more than $500,000,000—up from fiscal 1978 revenues of $419,182,000 and fiscal 1977 revenues of $341,274,000.

AMI has more than 14,000 health care professionals in over 400 communities on five continents. It owns 45 hospitals in the U.S. and manages or is developing an additional four. Worldwide, AMI owns six hospitals and manages or is developing ten more.

Formed in 1956, AMI is "the most diverse and has the most international capabilities," says Ruth Gallatzer, assistant vp. Webb & Silberg has mounted an aggressive marketing campaign for AMI, with ads in such outlets as *Business Week*, *Dun's Review*, *Money*, *Nation's Business*, *Newsweek*, *Sports Illustrated*, *Time*, *U.S. News & World Report*, *State & County Administrator*, *Modern Healthcare*, *Institutional Investor*, *Fortune* and the *International Herald Tribune*.

▪ "Our corporate identity campaign for AMI was the first such campaign for a health care services company that addressed market places outside of the industry itself," says Ms. Webb, who's been handling the account for about three years. Webb & Silberg has divided the markets for AMI into seven categories: Community, government, physicians, hospitals, the general business community and the international business and government communities.

"The way AMI has made it so big is by going international," says Ms. Webb, who refused to disclose AMI's ad budget.

Drug companies weather recession

BY DAVID SAKS

NEW YORK—Now that leading economic indicators suggest a recession for the domestic economy, it's important to consider the impact of such an economic climate on the $13 billion U.S. drug industry. In each of the past four recessions (1961, 1967, 1970 and 1975) the industry's profit growth decelerated to an average rate of approximately 5% growth. Depending upon the severity of the recession, U.S. corporate profits in general declined from 5% to 15% during these same intervals. Thus, while the drug industry is not recession proof, it has demonstrated an ability to prosper moderately during tough economic periods.

In the past, profit growth at Syntex and Upjohn has shown the greatest sensitivity to recession. Syntex showed two down years coincident with recession while Upjohn had two down years and a single flat one.

Somewhat less vulnerable were Merck, Pfizer and Warner-Lambert, for each registered only one year of down earnings coincident with recession. American Home, Johnson & Johnson and Schering-Plough, on the other hand, showed excellent performance during each recession.

During the projected recession, the drug industry will record exceptionally strong earnings progress compared to a decline for corporate profits. In 1979, the profit gains for drug companies are expected to average 18% above 1978 levels, *vs.* 10% growth projected for U.S. corporations.

Unlike past recessions, the drug industry's underlying fundamentals appear to be sufficiently strong—so that each company in the core group is expected to record positive earnings comparisons. Dividends for the drug group probably will grow in line with earnings whereas the payout ratio had contracted during the past four recessions.

Several fundamental changes have occurred in the drug industry environment since the 1975 recession. The changes relate to five factors:

- Research productivity—Each major drug company has at least one soon-to-be-introduced drug that has worldwide sales potential in the range of $100,000,000 to $500,000,000 per year.
- Relative size of drug operations—In most companies, these segments have increased in recent years, reversing the prior diversification trend. In the current environment, this should aid profit comparisons.
- Government activities—Regulatory enforcement powers on safety, efficacy and testing requirements for new and existing drugs are being streamlined and made more

Strong underlying fundamentals

Drug companies weather recession

(*Continued from Page S-1*)

constructive. Congressional pressures are now aimed at stimulating drug innovation and expanding availability to medical care, whereas in the past such pressures were exerted to constrain innovation and profitability.

- Demographics—The increasing number of elderly and newborns together (representing a substantial percentage of the population), with constantly expanding health insurance coverage, should minimize economically motivated cutbacks.

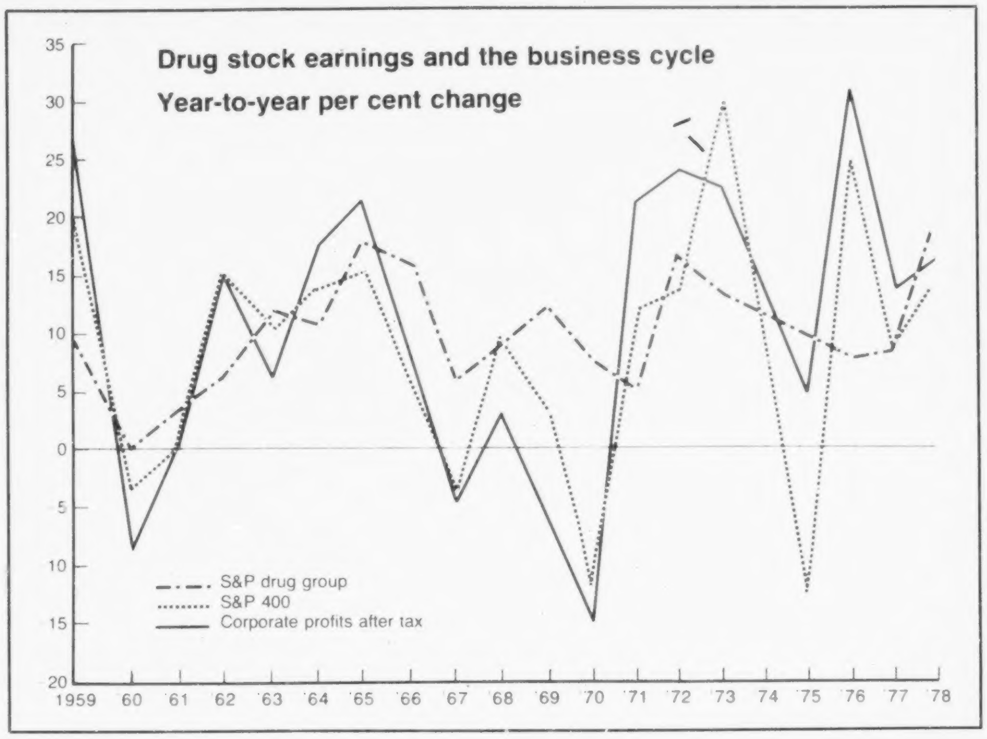
Older people tend to spend considerably more on medical care than any other group (except for newborn babies) and their numbers are increasing substantially within the total population. There are some 35,000,000 Americans over 60 and about half suffer some chronic disease. Drugs for the geriatric market (such as Tagamet, Aldomet, Dyazide, Clinoril) have high refill rates and represent repeat purchase for many years.

- Pricing strategies—Individual products such as newly approved prescription specialties are commanding substantial premiums, sometimes 50% to 100% above established, patented products. Drug companies also have been "price aggressive" on established brands.

Recent major successes include SmithKline's Tagamet and Merck's antiarthritic agent, Clinoril. Other successful new launches are Lilly's Mandol and Nebcin; American Home's Ativan; Merck's Timoptic and Mefoxin; Pfizer's Minipress and Syntex's Naprosyn.

Potential market winners over the next couple of years include Lilly's Ceclor; Merck's Dolobid; Pfizer's Feldene; Schering's Netilmicin; Searle's Aspertame; Squibb's Corgard; Syntex's Anaprox, Upjohn's Halcion and Sterling's Amrinone. Over the longer term the clinical studies now progressing on antivirals, immunosuppressants, prostaglandins and recombinant DNA betalactam inhibitors and enzymes could dramatically affect the sales.

Lastly, earnings generated from the pharmaceutical sources are dependent upon the sale of proprietary (usually patented) products rather than on the extraction of natural resources or the intense use of physical plant and labor, all of which could be subject to unexpected problems, particularly during a recession. Yet almost all drug companies also are financially cushioned and benefit from the unusual strong financial condition and high levels of profit returns. #



Top marketers spend $540,000,000

BY NANCY GIGES

NEW YORK—The 25 largest national medical advertisers invested more than $540,000,000 in medical journals, direct mail and detailing in 1978.

These companies sold an estimated $10.3 billion worth of drugs, devices, diagnostics and other nonconsumer health care supplies last year in this country. Where U.S. figures were not broken out by the companies, they were estimated by ADVERTISING AGE.

The amount of money spent in journals, mail and detailing is estimated to account for at least 60% of the total promotional budgets of these companies. Unlike in the consumer field, these companies included spending for activities such as symposia, conventions, sampling and a variety of educational programs in their promotional budgets. pending for all these activities is not included in AA's estimates.

- The top 25 companies were selected on the basis of their journal ad spending, according to figures published by *Perspectives*. Ad spending in all three areas was then estimated by AA from responses to a questionnaire mailed to the companies and from other statistical data. The companies were then ranked according to that spending figure.

Of the 25, a total of 12 ranked among the top 100 leading advertisers in the U.S. because of their consumer businesses and are profiled in greater detail in AA's 100 Leading National Advertisers issue (AA, Sept. 6).

American Home Products, which has three major health care subsidiaries, Ayerst, Wyeth and Ives Laboratories, topped the list with an ad spending of $50,000,000. Swiss-based Ciba-Geigy was No. 2 with $45,000,000 in spending, followed by another Swiss company, Hoffmann-La Roche, which invested $35,000,000. Roche, unlike any of the other companies, devoted half of its budget to journal advertising, making it the biggest journal spender of the group.

According to *Perspectives*, the big news in journal advertising in 1978 was Pfizer, which boosted its spending more than three-fold in two years. McNeil, a Johnson & Johnson subsidiary, also showed a considerable increase, as did Syntex. The most widely promoted therapeutic class of drugs in journals in 1978 was tranquilizers, followed by antihypertensives, antiarthritics, broad and medium spectrum antibiotics and psychostimulants, *Perspectives* reported.

Lederle

American Cyanamid's Lederle division uses journal ads to promote medication for mental illness.

Abbott Laboratories

U.S. Sales **$840,000,000**
Advertising **$20,000,000**

Abbott Laboratories, North Chicago, Ill., tied as the nation's 13th largest medical advertiser, invested $20,000,000 in 1978 to promote its professional pharmaceuticals and nutritional, hospital and laboratory products.

Of the total, an estimated 75% went into detailing, 19% into journals and 6% into direct mail. During 1978, Abbott introduced Depakene, described as a major advance in anticonvulsant therapy, and Abbokinase, a drug given intravenously to dissolve clots in the lungs, eliminating the need for surgery in some patients.

Abbott's major established drugs include Erythrocin, the second most frequently prescribed brand-name antibiotic in the world; Tranxene, a mild tranquilizer, and Enduron and Enduronyl antihypertensives. Erythrocin was given a boost in recent years as an effective treatment for legionnaire's disease.

Abbott's U.S. health care products sales are divided almost equally between professional pharmaceutical/nutritional products and hospital/lab products. Of the latter, major products include the Aminosyn line of protein i.v. solutions, LifeCare i.v. pumps, Butterfly winged infusion sets and Abbocath-T catheters.

During 1978, Abbott began marketing Hydron burn bandage, a synthetic bandage used to treat severe burns. Among diagnostics, Abbott created the hepatitis testing market with Ausria, Auscell and Ausab. The company is also a leader in thyroid diagnostics, and during 1978, it introduced Triobead and Thyroscreen to maintain that leadership.

Abbott also markets diagnostic instruments and its ABA bichromatic analyzer line is believed to be used more than any other single-channel chemistry analyzer. Most recently, Abbott introduced MS-2, an automated microbiology system that indicates which antibiotic will most effectively combat infection, and ADC-500 differential cell counter, which will reduce the cost of running a white-cell differential count in a typical large hospital by more than 25%.

American Cyanamid Co.

U.S. Sales **$363,922,000**
Advertising **$18,000,000**

American Cyanamid Co., Wayne, N.J., tied as the nation's 15th largest medical advertiser, invested $18,000,000 in 1978 to promote its pharmaceutical and professional products.

Of the total, an estimated 75% went into detailing, 19% into journals and 6% into direct mail. During 1978, the company introduced Centrum, a multivitamin, multimineral supplement.

Major pharmaceuticals include Minocin minocycline, an antibiotic, and Orimune, a polio vaccine.

(*Continued on Page S-4*)

Health care advertisers

(Continued from Page S-2)

Another major product is Dexon, the first synthetic absorbable suture.

In addition, sales of American Cyanamid's standard products, which are dispensed and developed by the Lederle Laboratories division, were up during the year.

The company has said that its major efforts in the medical business will be concentrated on therapy advances through its research.

American Home Products

U.S. Sales	$860,883,000
Advertising	$50,000,000

American Home Products, New York, is the nation's largest medical advertiser, with 1978 ad expenditures of $50,000,000.

Of the total, 67% was spent on detailing, 30% went into journal advertising and 3% purchased direct mail. In 1978, Wyeth introduced Simeco, an antacid containing simethicone, in the U.S. and two antibiotics: Wymox, a penicillin, and Wyamycin liquid, a nonpenicillin antibiotic for infectious conditions. Ayerst introduced Riopan Plus chew tablets, a companion product for Riopan Plus antacid, which combines magaldrate and simethicone.

Ives Laboratories, a subsidiary, reported record sales in cardiovascular and analgesic markets as Isordil, reportedly the leading product in the coronary nitrate market, continued to increase its market share. Corometrics Medical Systems, which also recorded a record sales volume, is a leading producer of fetal monitoring instruments and accessories.

Boehringer Ingelheim Ltd.

U.S. Sales	$82 000,000
Advertising	$10,000,000

Boehringer Ingelheim Ltd., Ridgefield, Conn., the 23rd largest medical advertiser in the U.S., invested $10,000,000 in advertising in 1978.

Of the total, 69% went into detailing, 23% into journals and 8% to direct mail. Affiliated with Boehringer Ingelheim GmbH, Ingelheim on the Rhine, West Germany, the company was established in this country in 1971. Earlier, from 1956 to 1962, three of its well known products—Preludin appetite suppressant, Dulcolax laxative and Persantine coronary vasodilator—were licensed to the Geigy Corp. in the U.S.

Since 1971, sales have grown to $82,000,000; the sales force exceeds 450 people. The company's biggest drug in the U.S. is Persantine. Other major products are Alupent, a bronchodilator; Catapress, an antihypertensive, and Combipress, an antihypertensive including a diuretic.

Bristol-Myers

U.S. Sales	$584,298,000
Advertising	$20,000,000

Bristol-Myers, New York, tied as the nation's 13th largest medical advertiser, invested $20,000,000 in 1978 to promote its professional and pharmaceutical products.

Of the total, an estimated 71% went into detailing, 24% into journals and 5% into direct mail.

In 1978, Bristol Laboratories introduced Platinol and Lysodren, additions to its line of anticancer products. Bristol-Myers is considered one of the leaders in this field. The laboratories division also continued its development of antibiotics.

Major products in this line are Amikin, a molecular engineered aminoglycoside, and Cefadyl, an injectable cephalosporin. Other major products are Tegopen and Prostaphlin, two antistaph penicillins, as well as Salutensin, an antihypertensive agent, and Naldecon, an antihistamine and decongestant.

Bristol-Myers' Mead Johnson & Co. is a major producer of infant formulas, adult nutritional products, pediatric vitamins and pharmaceuticals. Among pharmaceuticals, Mead Johnson produces Cytoxan and Megace, both anticancer drugs. Other products include Vasodilan, used for vascular disorders; K-Lyte, a potassium supplement; Colace and Peri-Colace, both anticonstipants; Quibron, a bronchodilator, and Ovcon, an oral contraceptive. During the year, Duricef, an oral cephalosporin for urinary tract infections, became Mead Johnson's first antibiotic.

Unitek Corp., Bristol-Myers newest subsidiary, produces orthodontic and dental materials. Considered important products are brackets and buccal tubes for the "Twin Torque" technique and Dyna-Bond bases for the direct bonding of attachments to tooth surfaces.

Zimmer USA manufactures and distributes orthopedic, surgical and hospital equipment, as well as patient care products. In 1978, Zimmer introduced the Micro-Grain Zimaloy, a high strength implant alloy, for use in the TR-28 and Muller type total hip replacement systems. Other products include the Geo-Patella and the Multi-Radius, which complement the division's line of total knee replacement systems. The Key-Free compression hip screw and the Haig nail are innovations in the treatment of hip fractures.

Westwood Pharmaceuticals, which produces and markets dermatological products, saw its Keri lotion and Alpha Keri bath oil adopted for use in many hospitals as therapeutic moisturizers. In addition, Westcort cream, a topical steroid, was introduced in 1978. It is used to relieve inflammatory symptoms that result from contact dermatitis, eczema and psoriasis. Other prescription products include Capitrol cream shampoo, Halotex cream and solution for fungal skin infections and Tacaryl tablets and syrup, used to relieve itching caused by certain allergies.

Burroughs Wellcome Co.

U.S. Sales	$200,000,000
Advertising	$20,200,000

Burroughs Wellcome Co., Research Triangle Park, N.C., the nation's 12th largest medical advertiser, invested $20,200,000 to promote its drugs in 1978.

Of the total, an estimated 65% went into detailing, 30% into journal advertising and 5% into direct mail. A wholly owned subsidiary of the Wellcome Foundation Ltd., London, the company has a detail staff of more than 550 representatives. Although some of the company's drugs are sold without prescription, Burroughs maintains an ethical image for all its products, including Empirin analgesic, Neosporin ointment for topical infections, Marezine for motion sickness and Sudafed for nasal congestion.

Ciba-Geigy Corp.

U.S. Sales	$225,000,000
Advertising	$45,000,000

Ciba-Geigy Corp., Summit, N.J., the second largest U.S. medical advertiser, invested $45,000,000 to promote its pharmaceuticals in 1978.

Of the total, 68% went into detailing, 20% into journals and 12% into direct mail. Worldwide, Ciba-Geigy claims to be the fourth largest pharmaceutical company, with sales of $1.5 billion in 1978. The company reported that it spent close to $30,000,000 in research and development last year for its U.S. operations.

During 1978, the company introduced Lopressor, the first beta-blocking agent approved for medical use in the U.S. in over a decade. The company believes this drug, used for the treatment of high blood pressure, has the potential of becoming the No. 1 product in the Geigy line. Also last year, Ciba took over distribution and marketing of Ocusert ocular therapeutic system, manufactured by Alza Corp. The system is used in conjunction with a drug for treatment of glaucoma.

Other major drugs marketed by Ciba-Geigy include Serapes for treatment of hypertension, Rimactane for tuberculosis, Tofranil for mental depression, Brethine for bronchial asthma, Lioresal for muscle spasticity, Ritalin for minimal brain dysfunction, Butazolidin for rheumatoid arthritis and gout, Tandearil for rheumatoid arthritis, Slow-K for potassium deficiency, Tegretol for epilepsy and Privine and Otrivin for nasal congestion.

DuPont Co. (Endo Laboratories)

U.S. Sales	$75,000,000
Advertising	$8,000,000

DuPont Co.'s Endo Laboratories, Garden City, N.Y., the nation's 24th largest medical advertiser, invested $8,000,000 to advertise its medical products in 1978.

Of the total, 66% went into detailing, 21% into journals and 13% into direct mail.

Endo Labs sells more than 12 prescription drugs, including Percodan narcotic analgesic, Coumadin anticoagulant, Narcan narcotic antagonist and Symmetrel flu vaccine. Its most recent introduction, which came in the summer, was for a new injectable analgesic called Nubain. The drug is touted as an advance because it has the analge-

sic potency of morphine with a low incidence of side effects and low potential for abuse.

Other medical products marketed by DuPont include Cronex X-ray films, an automatic clinical analyzer that can make dozens of clinical tests, centrifuges used in blood banks and microtomes, which help prepare tissue for analysis.

Hoffmann-LaRoche

U.S. Sales	$750,000,000
Advertising	$35,000,000

Hoffmann-La Roche, Nutley, N.J., the third largest medical advertiser in the U.S., invested $35,000,000 in 1978 to promote its medical products.

Roche invested half of the total in journal advertising, 32% in detailing and 18% in direct mail advertising. The company, a subsidiary of F. Hoffmann-LaRoche & Co., Basle, Switzerland, is the largest non-U.S. based pharmaceutical marketer.

The company's Valium tranquilizer is the largest selling drug in the world, with sales estimated at $600,000,000. In the U.S., Valium and another Roche tranquilizer account for about $350,000,000 in sales annually. Other major Roche drugs include Dalmane, a sleeping aid, which accounts for about $50,000,000 in U.S. sales annually, and Librax, a stomach relaxer, which accounts for $40,000,000.

Although Roche does not market any branded vitamins, it is the leading U.S. supplier of vitamin ingredients to marketers. The company is also the leading U.S. spender in medical journals, and unlike other health care companies devotes a significant portion of its budget to this medium.

ICI Americas (Stuart Pharmaceuticals)

U.S. Sales	$97,000,000
Advertising	$22,000,000

Stuart Pharmaceuticals division of ICI Americas, Wilmington, Del., the nation's 11th largest medical advertiser, invested $22,000,000 to promote its drugs in 1978.

Of the total, an estimated 49% went into detailing, 10% into journal advertising, 9% into direct mail, 4% into educational programs and 28% into others. During 1978, the company introduced Nolvadex, an anti-estrogen for the palliative treatment of advanced breast cancer; Kasof, a high-strength stool softener, and Alternagel, a high-potency aluminum hydroxide antacid. Stuart's other major products include Mylanta antacid and Sorbitrate anti-anginal.

Johnson & Johnson

U.S. Sales	$935,000,000
Advertising	$25,000,000

Johnson & Johnson, New Brunswick, N.J., the nation's seventh largest medical advertiser, invested $25,000,000 in 1978 to promote its professional and pharmaceutical products.

Of the total, an estimated 75% went into detailing, 20% into journals and 5% into direct mail.

During 1978, J&J introduced its first product from the professional products division of the Baby Products Co. The drug, Pancrease, is used to treat pancreatic enzyme deficiency. Its leading pharmaceuticals include Ortho-Novum oral contraceptive; Retin-A acne treatment; Haldol, a neuroleptic used in mental illness, and Tylenol with codeine pain reliever. Other recent introductions include Imodium, an antidiarrheal; Tolectin, an anti-arthritic, and Vermox antiworm tablets. The company holds about 4% of the $8.5 billion domestic pharmaceutical market.

J&J's professional products include ligatures, sutures, diagnostics, dental products, surgical dressings, instruments and other surgical specialties. Recent introductions include Ethibond sutures, Micro-Touch surgeon's gloves and Proximate disposable skin stapler.

J&J holds more than 70% of the suture market, but its share has been declining in recent years with growing competition from American Cyanamid. The company also holds 35% of the disposable linen market and 10% of the domestic diagnostics market.

Eli Lilly & Co.

U.S. Sales	$650,000,000
Advertising	$23,000,000

Eli Lilly & Co., Indianapolis, tied as the nation's eighth largest medical advertiser, invested $23,000,000 in advertising in 1978.

Of the total, 82% went into detailing and the remainder into journal advertising. Lilly is the leading marketer of cephalosporins, a segment of the antibiotic market, in the U.S. The company introduced the first injectable cephalosporin, Keflin, in 1964, and it remains the market leader, with about one-third of the nearly $300,000,000 domestic market. Keflex, an oral cephalosporin, holds about 40%, and two other less important (in sales) drugs, Loridine and Kafocin, hold small shares.

Last year Lilly introduced another major cephalosporin, Mandol, which is expected to surpass Keflin within another several years. Another oral, cefaclor, is awaiting FDA approval and has yet to receive a brand name. Lilly also markets another antibiotic, Nebcin, which competes in the more toxic aminoglycoside segment.

Darvon, Lilly's nonnarcotic pain killer, accounts for about $70,000,000 in sales worldwide. At one time, it was the third most prescribed drug in the U.S. The company also sells insulin and the Salk antipolio vaccine.

Recently, Lilly has diversified into the anti-inflammatory market

When it comes to in-school sampling, GIFT-PAX is in a class by itself.

FREE!
FREE!
GIFT PAX

Just ask over 8 million college, high school, and junior high school students

For over twenty years, Gift-Pax has led the way in product sampling to students. And when you consider that the median age of a college student is 20.9, high school 16, and junior high 13.3, that's an extremely important present and future market.

Gift-Pax has the unique ability to give you geographical selectivity in reaching these prospects, product exclusivity, and the "trusted touch"—personal delivery that makes a Gift-Pax sample something special.

We pass the test in colleges.

Gift-Pax is distributed on over 2500 campuses, supervised by the registrar during registration or orientation. Your product can be offered selectively to male or female, freshman or upper-classman, with maximum penetration to dorm and off-campus students.

And to ensure even tighter control, signed receipt cards are collected from each student sampled.

No wonder Gift-Pax gets top honors in college sampling.

The "trusted touch" for younger students.

Gift-Pax gets good marks in sampling to younger profiles, too. In 6500 high schools and 5000 junior highs, your product can be hand-delivered by the students' teacher, selectively to either male or female.

So if your product has a younger skew, give Gift-Pax a call. Take a look at the research, the histories of satisfied clients.

You'll find that when it comes to making student sampling work for you, we've done our homework.

with Nalfon and in the cardiovascular area with Dobutrex, an injectable for treating strokes.

Merck & Co.

U.S. Sales $770,000,000
Advertising $30,000,000

Merck & Co., Rahway, N.J., the nation's fifth largest medical advertiser, invested $30,000,000 in advertising in 1978.

Of the total, 64% went into detailing, 32% into journals and 4% into direct mail.

Known as an innovator in the drug industry, Merck reportedly maintains the largest research and development budget in the industry. The r&d figure for 1978 approaches 8% of the company's sales.

In 1978, Merck introduced Timoptic, the first beta-blocker for treatment of glaucoma; Clinoril, a nonsteroidal antiarthritic that reduces the chance of gastrointestinal side effects in such treatments, and Mefoxin, a new type of antibiotic effective against a particularly resistant strain of bacteria.

Pfizer Inc.

U.S. Sales $524,480,000
Advertising $32,000,000

Pfizer Inc., New York, is the nation's fourth largest medical advertiser, with 1978 outlays of $32,000,000.

Of the total, about 72% went into detailing, 24% into journals and 4% into direct mail.

In the U.S., pharmaceutical revenues rose 12% in 1978. The company recorded a 57% worldwide increase in the sale of cardiovascular medicines, outperforming 1978 sales for antibiotics (16% increase), psychotherapeutics (13%), antidiabetic agents (20%) and antiparasitic agents (19%).

Pfizer owns Howmedica Inc., producer of hospital products such as bone and joint prostheses; Shiley Inc., which manufactures and markets heart valves and was added to Pfizer as a subsidiary on March 8; Pfizer Medical Systems, which manufactures and markets computerized tomographic scanners, and Radiologic Sciences, which manufactures Microfocus X-ray systems.

New pharmaceuticals introduced in the last three years include Quantrel brand of pyrantel pamoate and oxantel pamoate; Bacacil brand of bacampicillin, an injectable form of penicillin, and Coptin brand of cotrimazine.

Revlon Inc.

U.S. Sales $110,000,000
Advertising $11,000,000

Revlon Inc., New York, the 22nd largest U.S. medical advertiser, invested $11,000,000 in 1978 to promote its pharmaceuticals and other health care products to professionals.

Of the total, 78% went into detailing, 22% into journals. According to Revlon, its ethical pharmaceutical sales rate outpaced the industry's to establish a new record. Hygroton, a leading diuretic antihypertensive, had an especially good year. Since 1974, sales of this drug have tripled. In 1978, Hygroton 25, a lower dose form, was introduced. Another antihypertensive, Regroton, also showed a rise in new prescriptions last year.

The Armour Pharmaceuticals division, acquired in 1977, introduced Tussar DM, a new cough/-cold remedy, and prepared to apply for a new use of Calcimar for treatment of certain bone diseases. Calcimar continues as a leading drug of choice in the treatment of Paget's disease, a chronic bone condition.

The Reheis division continued to lead the market in light metal compounds, the active ingredients in most major brands of antacids and antiperspirants.

Revlon participates in the diagnostic and research laboratories field through its National Health Laboratories, and last year it acquired American Biological Corp. Its Meloy Laboratories is a contract research organization that conducts high technology studies to determine the nature and mechanism of certain diseases. Revlon also markets ophthalmic grinding equipment, supplies for optical dispensing laboratories, prescription eyeglass lenses and other professional ophthalmic products through its Coburn Optical Industries.

Richardson-Merrell

U.S. Sales $150,000,000
Advertising $15,000,000

Richardson-Merrell, Wilton, Conn., the nation's 19th largest medical advertiser, invested $15,000,000 to promote its professional and pharmaceutical products in 1978.

Of the total, an estimated 75% went into detailing, 17% into journals and 8% into direct mail. During 1978, the company introduced Cepastat mouthwash and gargle and Cepastat lozenges.

U.S. sales were down in 1978, a condition the company attributed to its withdrawal from the vaccine business. Its entire biological vaccine operation, located in Swiftwater, Pa., was donated to the Salk Institute for Biological Studies, a nonprofit corporation based in San Diego.

Increases in '78 U.S. sales, on the other hand, were recorded for the following drugs: Tenuate, an antiobesity agent; AVC, a treatment for vaginal infections; Quinamm, used for nocturnal leg cramps; Clomid, used to induce ovulation in selective cases of infertility, and Cehulac, used to prevent and treat portal-systemic encephalopathy (a condition that results from malfunction of the liver). In addition, sales of Cepacol were reported to be well ahead of 1977 levels.

Meanwhile, Richardson-Merrell planned to resume clinical studies this fall of Aldaban, a nonsedating antihistamine. This would go along with continuing testing of Azadol, a new hypertensive agent, and Buronil, formulated to treat anxiety and confusion among the elderly.

A.H. Robins Co.

U.S. Sales $165,000,000
Advertising $17,000,000

A.H. Robins Co., Richmond, Va., the nation's 18th largest medical advertiser, invested $17,000,000 in 1978 in advertising to health care professionals.

Of the total, an estimated 70% went to detailing, 20% to journals and 10% to direct mail. Among the company's major prescription products are Dimetapp antihistamine/decongestant combination, Dimetane expectorants and Quinidex Extentabs antiarrhythmic. Its products sold to hospitals include Robinul injectable, an anticholinergic; Dopram respiratory stimulant, and Heparin, an anticoagulant.

William H. Rorer Inc.

U.S. Sales $75,000,000
Advertising $7,000,000

William H. Rorer Inc., Fort Washington, Pa., the 25th largest U.S. medical advertiser, invested $7,000,000 in advertising in 1978.

Of the total, 72% went into detailing, 18% into journals and 10% into direct mail. Although the company is considered a pharmaceutical house, the majority of its dollars are invested in the professional promotion of over-the-counter products, Maalox antacid and Ascriptin buffered aspirin. The company also markets Ananase, an enzyme, and Camalox, an antacid.

Hospitals turn to marketing

(Continued from Page S-1)

"The problem about being in such a field is that people think it's pretty awful to spend hospital money on advertising. Ads seem insensitive to some people," she says, adding that the job has been done "very frugally."

- It's not only spending money on ads that makes some people wonder about hospital management concerns, but the fact that private investors are, essentially, profiting from the illness of others. President Carter's proposed hospital cost containment legislation could put a crimp on those profits, and hospital management concerns don't like that one bit.

"We don't feel this is the proper way to go," says AMI's Ms. Gallatzer. "In fact, the bill is a revenue cap. It is not cost containment. It would put hospitals on the road to rationing services," she adds.

Humana's Ms. Bryant agrees. "The legislation would amount to a rationing of services and technology," she says. The Federation of American Hospitals, based in Washington, D.C., is lobbying hard against the proposed legislation, which, if enacted, might dilute investor interest in the hospital management field.

Ms. Webb says that a much more sensible approach to the issue is adoption of a catastrophic health care bill, which would cover only major illnesses.

- The specter of cost containment legislation hasn't dampened the industry, however, and even the smaller concerns in the field are gearing up for increased operations.

American Practice Management, which started in 1973, expects 1979 revenues to approach $5,000,000, says Jim Kagen, vp-operations.

"We've doubled our staff in the past 12 months. It's a growing field," he says. Mr. Kagen says American Practice, which doesn't own any hospitals, is "poking around" for its first major ad agency. The core of American Practice's business is its consulting efforts, although it also provides management services and implements projects.

"Hospitals depend on repeat business. We are in the business of discovering about the care patients want and helping hospitals provide that. We will stress the hospitals' strengths through advertising," he says. "It's not unlike the marketing of other consumer services, just slightly more sensitive," he adds. #

Sandoz Pharmaceuticals

U.S. Sales	**$175,000,000**
Advertising	**$23,000,000**

Sandoz Pharmaceuticals, East Hanover, N.J., tied as the nation's eighth largest medical advertiser, invested $23,000,000 to promote its pharmaceuticals and those of Dorsey Laboratories, also part of Sandoz.

Of the total, 63% went into detailing, 32% into journals and 5% into direct mail. The company's biggest selling drug in the U.S. is Mellaril, a sedative that has sales of about $50,000,000 annually. The company also markets Hydergine, a cardiovascular drug. Dorsey markets the professionally promoted over-the-counter Triaminic line of cold remedies.

Schering-Plough Corp.

U.S. Sales	**$405,000,000**
Advertising	**$18,000,000**

Schering-Plough Corp., Kenilworth, N.J., tied as the nation's 15th largest advertiser, invested $18,000,000 in 1978 to promote its pharmaceutical and professional products.

Of the total, an estimated 67% went into detailing, 27% into journals and 6% into direct mail.

The company's major pharmaceutical products include Garamycin, an antibiotic; Coricidin and Drixoral, cold preparations; Celestone, Diprosone and Valisone, anti-inflammatory steroids; Afrin, a nasal decongestant; Fulvicin, Tinactin, Lotrimin and Gyne-Lotrimin, antifungals; Trilafon, an antihistamine; Vanceril, a prescription antiasthmatic, and A&D hand cream, a dermatological.

G.D. Searle & Co.

U.S. Sales	**$450,000,000**
Advertising	**$12,000,000**

G.D. Searle & Co., Skokie, Ill., tied as the 20th largest U.S. medical advertiser, invested $12,000,000 in 1978 to promote its non-consumer medical products.

Of the total, 70% went into detailing, 30% into journals and 10% into direct mail. Worldwide, Aldactone and Aldactazide drugs for high blood pressure accounted for close to $200,000,000 in sales. Other major drugs include Norpace for treatment of irregular heartbeats, three oral contraceptives—Demulen, Enovid and Ovulen—and Flagyl for vaginal infections. Searle markets Cu-7, the most frequently prescribed intrauterine contraceptive in the U.S.

In 1978, Searle introduced Diulo, a new diuretic for treatment of high blood pressure that can be taken once a day, and acquired rights for Tricandil, a drug for treatment of vaginal infections.

Searle's medical products group manufactures and distributes a wide variety of products, including reusable garments, disposable gowns, surgical drapes, masks, caps, latex gloves, urological products, medical kits and trays.

SmithKline Corp.

U.S. Sales	**$408,142,000**
Advertising	**$23,000,000**

SmithKline Corp., Philadelphia, tied as the nation's eighth largest medical advertiser, invested an estimated $23,000,000 in 1978 to promote its professional and pharmaceutical products.

Of that total, about 67% went into detailing, 22% to journals and 11% to direct mail.

Much of the company's sales success has been attributed to Tagamet, a drug used internationally in the treatment of ulcers and gastric disorders. SmithKline says evidence suggests that use of Tagamet will reduce the need for gastric surgery.

Other major pharmaceuticals include Dyazide, used to treat hypertension and related cardiovascular conditions, and Ancef, an injectable cephalosporin antibiotic. The company also holds great hope for Selacryn, an antihypertensive diuretic for which it holds the U.S. marketing rights.

Among SmithKline's stable of medical instruments are diagnostic ultrasound equipment, products used in clinical laboratories and physicians' offices and Hematrak, an automated differential blood cell counter.

Syntex Laboratories

U.S. Sales	**$112,000,000**
Advertising	**$12,000,000**

Syntex, Palo Alto, Cal., is tied as the nation's 20th largest medical advertiser, with 1978 ad expenditures of $12,000,000.

Of that advertising total, 70% went into detailing, 20% into journals and 10% into direct mail.

The company's principal product, an antiarthritic product called Naprosyn, reportedly accounts for about 25% of sales and about 50% of net income.

Upjohn Co.

U.S. Sales	**$568,000,000**
Advertising	**$18,000,000**

Upjohn Co., Kalamazoo, Mich., tied as the nation's 15th largest medical advertiser, invested $18,000,000 in 1978 to promote its pharmaceutical and professional products.

Of the total, an estimated 80% went into detailing and 20% into direct mail.

Among Upjohn's major pharmaceuticals are Motrin, an antiarthritic compound, and Cleocin, an anaerobic antibiotic.

Warner-Lambert Co.

U.S. Sales	**$768,096,000**
Advertising	**$28,000,000**

Warner-Lambert Co., Morris Plains, N.J., the nation's sixth largest advertiser, invested $28,000,000 in 1978 to promote its professional and pharmaceutical products.

Of that total, an estimated 77% went into detailing, 18% to journals and 5% to direct mail. During the year, Warner-Lambert received marketing approval for Vira-A, a treatment for herpes simplex encephalitis.

Major pharmaceuticals include Fluogen, an influenza vaccine; Dilantin, an anticonvulsant; Choledyl and Brondecon, xanthine bronchodilators; Elase, a topical proteolytic enzyme; Anusol, a hemorrhoidal preparation, and Pitocin, an oxytocic.

The company says it is the leading supplier of empty gelatin capsules, which other manufacturers use in drug production. It also does considerable business in sales of diagnostic products. Hospital products include medical-surgical products, orthopedic products and Deseret products, which include catheters for intravenous procedures. #

250,000 Best Reasons To Advertise in HEALTH CARE PRODUCT NEWS

Because 250,000 reader inquiries prove HEALTH CARE PRODUCT NEWS delivers big ad results. HCPN is the hospital/nursing home market's #1 authority on products and services. That's why, 250,000 times a year, decision-makers respond to what they read in HCPN.

There are other excellent benefits when you use HCPN. Quick exposure to 80,000 administrators and specifying/buying department heads. Exclusive product news atmosphere. Market-penetrating extra services from the magazine to you. All designed to deliver results . . . because advertiser results have helped make HEALTH CARE PRODUCT NEWS the fastest-growing publication in its field!

J&J new products a Sure way to irk P&G

By LOUIS A. FANELLI

NEW YORK—If you want Procter & Gamble lawyers to see red, let them find out you are planning to use the word "sure" in your brand name.

Johnson & Johnson has tried it—twice—and it is about to be slapped with a second trademark infringement suit in federal district court here.

Although embroiled in a year-old trademark suit with P&G over the use of Assure deodorant tampons, J&J plans to test Sure & Natural feminine napkins in Florida within the next three weeks (AA, Nov. 5). P&G lawyers now claim the Sure & Natural name is a further abuse of its "Sure" trademark.

■ Cincinnati-based P&G has said the Assure name infringes on its Sure deodorant trademark. In addition, P&G claims it has marketed Sure tampons since 1964, and also has its own Assure mouthwash and shampoo.

Plans to file a second lawsuit came to light last week after Thomas Calder, a P&G lawyer, asked Judge Pierre Leval of the southern district of New York, to incorporate proceedings against J&J's use of the Sure & Natural name into the ongoing Assure trial.

Mr. Calder said he first became aware of J&J's new product from an inquiry by an ADVERTISING AGE editor early this month. He said he didn't believe the report to be true until an item appeared in AA last Monday. A J&J marketing exec, who was being cross-examined by Mr. Calder, confirmed the accuracy of the report.

The trial, which was to be concluded at the end of this week, has been postponed until Dec. 10. P&G lawyers asked for the time to go through a discovery proceeding on J&J's use of the Sure & Natural name.

In response to the planned Sure & Natural introduction, Mr. Calder said, "What started out as one infringement now looks like trademark rape."

Responding to P&G's charges that the Sure & Natural name is an infringement of the Sure mark, a J&J spokesman, in a prepared statement, said, "We do not believe our use of the trademark Sure & Natural for this nondeodorant, ultra-thin, feminine protection product in any way infringes on the rights that P&G has to the Sure trademark as it applies to an antiperspirant."

In its original complaint, P&G alleged that because Assure tampons have deodorant properties, there is

Tough Senate bill would kill many FTC ad cases

By RICHARD L. GORDON

WASHINGTON—The Federal Trade Commission would be limited to regulating only ads that are both false and deceptive under legislation which the chairman of the Senate's consumer subcommittee hopes to push through the Senate before Thanksgiving.

This is only part of the radical surgery proposed in an omnibus FTC revision bill which also wipes out FTC's children's tv ad rulemaking, together with some of FTC's other most controversial projects.

Unveiled by Sen. Wendell Ford (D., Ky.) last week, the change represents a basic departure from existing FTC law by establishing tougher restrictions on FTC's jurisdiction over advertising than over other trade practice situations.

■ The present law, amended by the Wheeler-Lea Act of 1939 and the Moss-Magnuson Act of 1975, gives FTC power to act against any unfair or deceptive act or practice, including advertising, in or affecting commerce.

Sen. Ford's plan is to change the basic FTC law and the Moss-Magnuson Act by specifying that ad cases or advertising rules are possible only if there is both deception and falsity.

The new Ford definition of when FTC could act against advertising would wipe out the commission's current power to challenge any ad or advertising practice as "unfair." Such a step, if approved by Congress, could force FTC to remake many of its industrywide rule proposals which rest largely or in part on unfairness allegations. These would include the children's tv ad rule, but also rules proposed for proprietary drug ads, eyeglass ads, vocational school ads and hearing aid sales, to name a few.

■ An aide to Sen. Ford said the restrictions reflected the senator's concern that FTC meet tight requirements before regulating constitutionally protected "commercial speech."

He also predicted that neither FTC nor its critics would be happy with his approach. He was right.

FTC chairman Michael Pertschuk expressed doubt that his agency could protect consumers or insure fair competition under the Ford formula. But William Hesse, Washington vp of the American Assn. of Advertising Agencies, said he was deeply disappointed that the senator refused to endorse the FTC reform backed by Four A's and some other business groups: The one-house congressional veto

CBS reportedly buying 'Family Weekly'

NEW YORK—CBS would neither confirm nor deny that it is negotiating to buy *Family Weekly*, but sources say the deal is all but set with a purchase price of $54,000,000. The newspaper supplement reportedly turned down an earlier offer from a major newspaper chain. *Family Weekly* execs were unavailable for comment.

McClure named Ford division ad director

DETROIT—Douglas T. McClure has been named ad director at Ford Motor's Ford division, succeeding Ray Ablondi, who became director of the marketing research office, corporate marketing staff. Succeeding Mr. McClure as division merchandising manager is Terry L. Davis, formerly special [illegible] sales group.

Coke $$ up; food unit active

By NANCY GIGES

ATLANTA—Coca-Cola Co. promises to increase emphasis on its flagship brand in the U.S. to boost Coke's performance in the take-home market, and at the same time it plans to conduct a variety of new programs for other soft drinks and products of its foods division.

Company officials discussed these plans at a meeting with financial analysts here last week. Highlights of the meeting were:

• Media spending worldwide will be 20% to 30% higher this year than last year, which showed a 47% hike over 1977. Expenditures next year will be up between 10% and 20% in the U.S. for soft drinks.

• Early indications show that awareness of the new Coke "smile" campaign is the highest in more than four years.

• Six senior officers have been named vice-chairmen, and the office of the president, vacant since August, will not be filled.

• The foods division plans new campaigns for several existing products and will test several new items. Among the ad efforts will be a comparative push against General Foods' Country Time.

• The company has bought 9.5% of the shares of Coca-Cola Bottling Co. of New York, valued at about $15,000,000, a purchase described as "solely for investment purposes."

• Unit sales of company soft drinks in the U.S., in both the third quarter and first nine months of 1979, have been hurt by the slow economy, gas shortages, reduced tourism and subsequent reduced away-from-home eating.

• The company is testing the nonnutritive sweetener aspartame for sugar-free formulations in Canada, where saccharin has been banned. The G. D. Searle & Co. sweetener is expected to be approved there soon.

Worldwide and in the U.S., Coca-Cola's share of the soft drink business continues to range between 35% and 40%. Donald Keough, head of the Americas group, noted that the U.S. take-home market, which accounts for 30% of its U.S. soft drink business, remains highly competitive. He pointed out that for the past 36 years Coke has been the No. 1 brand for 18 years and rival Pepsi has led the other 18 years.

■ Another official noted that Pepsi has beefed up competition in Germany and Spain by introducing a 1.5-liter bottle for the same price as Coke's 1-liter bottle. Coke has responded with a 1.5-liter bottle in addition to its 1-liter size.

In the U.S. away-from-home market, the fastest growing segment, Coca-Cola leads its nearest com-

A feeling for ads

Toyota is taking the unusual course of announcing its commercials like programs in four quarter-page ads in the current *TV Guide*. The "all this week" prime time blitz on ABC-TV is the first of three peak spending points for Toyota over the coming year. The leading import car maker and agency Dancer Fitzgerald Sample boosted spending to the 500 grp level for the week (AA, Oct. 15).

Get back in touch, EurAm urged

Can't build up consumer trust from ivory towers: Henkel exec

FRANKFURT—Advertisers have been "extraordinarily reluctant" to defend the cause of advertising and its role in the free enterprise system, says Dr. Helmut Sihler, exec vp for consumer goods marketing for Henkel KGaA, West Germany's leading detergent and household products marketer and second largest advertiser.

Possibly a reason for such anemic efforts, he suggested, is, "There are no more advertising and marketing giants—the leaders we used to follow in the '60s—the era of the grey flannel suits in which you could at least see people. You can't see the faces anymore in today's blue jean-and-bearded crowd, Dr. Sihler told delegates attending ADVERTISING AGE's EurAm 4 conference last week in Frankfurt.

"It is time for advertising to be again the creation of people, addressed to people, expressed in human terms," he said, urging listeners to "get closer to their products.

"How long ago was it that you saw the product produced, and the people who produced the product which you advertise?" he queried, promoting an end to a certain aloofness and "better-than-thou" attitude permeating the industry.

Dr. Sihler noted that much of society's distrust of the advertising profession can be traced directly to deep-seated anxieties and indirectly to advertising's inability, so far, to address these anxieties.

The future runs deeper than the superficial economic analyses might suggest. He termed the oil crisis, for example, as one such superficial condition, and said a return to pre-1973 economic conditions would not wipe the consumer's anxiety slate clean.

Dr. Sihler cited three factors that contribute to the anxiety of today's consumer: "First, there is a psychological uneasiness arising from our traditional attitudes toward material goods and comfort . . . Secondly, there is a conflict between traditional material and emerging values. A conflict develops in our value system as increases in consumption identify more and more the pursuit of happiness with the pursuit of worldly goods. Advertisers hould not shrug off this development that produces so much pessimism in our culture. .

"The third reason for pessimism is ideological. Those who live in a capitalistic system are often accused of bearing a wrong consciousness, and are manipulated by advertising. Students are persuaded along these lines, as are media in Germany, which attack advertising unfairly in their editorial columns while deriving their living from it.

"The time has come," says Dr. Sihler, "for the advertising and marketing community to explain its role to the public—to explain that advertising respects and defends the public's values and champions the public's right to consume as constituting a part of happiness." It must "expose the causes or reasons for current fears and uncertainties, so it can defend itself from unfair or inaccurate editorial/political attacks. The ad community should tell consumers that their right to choose products is an integral part of their freedom."

There are ways to attack the causes of the consumer's pessimistic outlook, he said. "Advertisers must respect our value system and actively support voluntary efforts ensuring that the ethical codes of a majority are not violated. More importantly, we must speak up," he noted. "When there are so many prospects for gloom, why not give space to some positive thoughts?"

Nets ready ax for low raters

By COLBY COATES

NEW YORK—While local affiliates anxiously await the results of the critically important November national ratings sweeps, top network execs are at work deciding what programs should be swept from their schedules.

Replacements for about a dozen shows that haven't mustered a passing Nielsen grade will begin to join prime time schedules next month as network tv plunges into part two of the 1979-80 tv season.

NBC-TV execs met in Los Angeles last week, and are continuing to review new product here this week. ABC-TV, meanwhile, has converged on the West Coast while the CBS contingent, led by chairman William S. Paley, is now hashing out their moves in the Bahamas.

▪ The early betting line favors CBS being the first to reveal its strategy. Some agency sources think that while CBS will have to do the most shuffling, making the right moves could give it the sweetest rewards.

"Now that NBC has spent the first month or so chipping away at ABC's shares, CBS can make a serious run at the top if they solve their Wednesday, 8 p.m. to 9 p.m. [EST] and Saturday night problems," said one agency programer.

Though ABC chewed up its rivals with the first tv showing of "Jaws" in the seventh week of prime time competition, CBS followed up with its win of a week earlier to finish second with an 18.8 rating and 31 share.

Leader ABC had a 21.3 rating and 35 share (Sunday's "Jaws" telecast on ABC was the week's top-rated program with a 39 rating and 57 share) while NBC sank to a 16.5 rating and 27 share.

What CBS and its supporters continue to point out—and what serves as the basis for optimistic projections about its ratings future—is the enduring strength of regular series now concentrated on Sunday, Monday and Friday nights. Thus, agency observers in-

Publishers called to private delivery

NEW ORLEANS—Private delivery, an alternative to the U.S. Postal Service, is no longer in the testing stages for magazine publishers, but a reality the industry should actively support.

That was one of the main messages some 450 attendees heard at the Audit Bureau of Circulations annual meeting here last week.

Lawrence Flynn, director of customer service for Hearst Magazines, called private delivery "the only viable counterforce to runaway postal costs," noting that Hearst has increasingly delved into private delivery since June, 1978, when a private company was commissioned to deliver 4,000 copies of *Good Housekeeping* in one market. Last month, 174,000 copies of *Good Housekeeping*, *Popular Mechanics*, *Harper's Bazaar* and *Sports Afield* were delivered in 17 markets with the help of seven delivery companies, he said.

Mr. Flynn noted several negatives of private delivery: Delivery quality is not consistent due to personnel turnover in private companies; weather affects private delivery, while not the Postal Service; and efforts to deliver in apartment or townhouse complexes are often made impossible by locked doors (delivery in mail boxes is prohibited by law).

Nevertheless, Mr. Flynn said private delivery, over-all, is "acceptable" in quality and timeliness of delivery, "ranking between seven and nine on a scale of 10" with the Postal Service getting a 10 rating.

▪ Besides reducing costs, private delivery also affords the publisher an opportunity to know who he's dealing with, Mr. Flynn said. "I have greater dialog and greater leverage with the private carrier."

Private delivery, Mr. Flynn said, is necessary "to keep the Postal Service on its toes and competitive," and asked fellow publishing companies to "make a new commitment to alternate delivery to build the numbers in present markets and new markets. We can't afford to lose this new delivery and marketing potential."

Noting that more than 1,200,000 magazines are privately delivered each month, he warned that if more publishers don't participate, "the concept may not be possible because we will not have sufficient density or penetration in the various markets to make it appealing to advertisers."

▪ Raymond Mitchell, director of alternative distribution for Time Inc., agreed that private delivery, which *Time* has tested since 1972, "has arrived."

"We have been fortunate in having carriers who have a sense of urgency for the timeliness of our product . . . What we need now is a transportation network to string

Political uses of tax cuts influence economic forecasts

By JOHANNES GROSS
Editor-in-chief
Capital

The West German economy has turned in a stronger performance this year than the thundering herd of forecasters dared believe. In the coming year we stand a good chance of seeing the forecasters pleasantly upset once more. For once again they are telling us to be gloomy, and yet they are overlooking some important positive factors.

I don't want to play down the clouds that are on the horizon, but I do want to point out that the forecasters, as behooves them, are basing their views on the conventional assumption of no change in government policies. If allowed to breach this convention, every economist would rush to assume that policy will change in 1980, because it is an election year here. Moreover, the campaign is already on, a year in advance, and both the conservative opposition and the governing coalition parties (Social Democrats and Liberals) are falling over each other to offer tax cuts to the electorate.

At present, both sides are shadow-boxing over the technical issue of whether parliament should cut income taxes by Jan. 1, 1980, as the conservative Christian-Democrat/Christian-Social-Union suggests, or by Jan. 1, 1981, as the governing parties insist in a coy flourish of fiscal conservatism. My own prediction is that legislative action will come before the elections due in October 1980.

▪ That way, the tax reduction can be nicely timed to give a boost to the economy just when it could well be running out of steam. Even an optimist, of course, has to agree that at some point next year the economy will start levelling off, with a risk of downturn, in the absence of a timely change in fiscal policy.

The debate over tax cuts may seem a bit out of keeping with the other issues in the election campaign: both sides promise to fight inflation and reduce the government's debt. This paradox is explained by the fact that the German revenue system produces a large "fiscal drag" in which tax revenues grow proportionally more rapidly than the economy. Without some reduction next year it's quite likely we would have a deflationary budget just when the economy was levelling off. Some of the presently strong upward forces in the economy should begin to peter out during 1980:

1. Industrial capacity is now being stretched and in some sectors, such as building, it is overstretched.

2. Fiscal stimuli from last year are beginning to wear off.

3. Moderately restrictive credit policy may soon slow the investment boom in manufacturing and in building.

4. Economic slowdown among some of our major trading partners, especially in Europe, should take some of the edge off our buoyant exports.

▪ Given these negative factors, a lot of forecasters predict a sharp slowdown in Germany next year from a 4.5% growth in real gross national product that now seems certain for 1979. The pessimistic estimates vary from 1.5% growth to just over 3%, which suggests "negative growth" late in the year.

But the German Central Bank (Bundesbank) and the government's forecasters in Bonn believe that the present recovery will continue at least to next summer. Although there's no official forecast before December, the early estimates in Bonn suggest the average growth next year could reach 4%, given the government's flexibility on tax cuts, of course. This figure could become a self-fulfilling target.

The major differences between the pessimists and optimists are in their evaluation of the effects of higher oil prices, of export prospects, and of labor union behavior. Pessimists believe that the higher oil prices will cut deeply into spending as consumers try to offset the higher costs of heating oil and gasoline. But the Bundesbank, for instance, believes consumers will simply reduce their savings and maintain a reasonable level of spending.

▪ On the question of exports, I think pessimism is being overdone. The argument is that the transfer of revenues from industrial countries to oil exporting countries will bring a sharp slowdown in some of our major European markets. But by next year the oil exporters will be spending much more of their revenues on capital goods, and Germany is a traditional supplier of capital goods. Already for 1979, a fall-off in exports was forecast, and it seemed certain after the loss of major contracts in Iran earlier this year. Yet our exports this year are growing at close to 10%, and order books are full for delivery well into next year.

The behavior of labor unions in the wage negotiating round that starts in December can influence the 1980 growth appreciably. Industry came through the last wage round with a reasonable overall settlement—about 4.5% average by the time the round closed last spring. Since then, however, the inflation rate has increased, and there has been general concern that the unions would try to make up their losses in buying power next winter. This could turn into a wage explosion that would certainly frighten industry into slowing down its capital spending programs for the coming year.

But so far the major unions have been behaving marvelously. The leadership of the confederation of German unions has gone on record opposing any kind of renegotiation

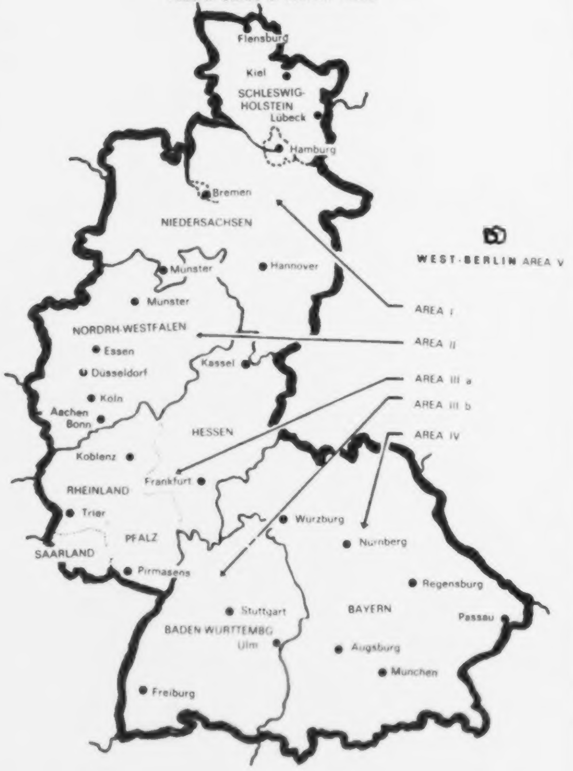
Mr. Gross joined the German business monthly, Capital, *five years ago after a career in daily journalism, radio and television.* Capital, *founded in 1962, now has a paid circulation of more than 200,000, and boasts that it is read by every second senior manager, every fifth company director and every sixth company owner.*

The Federal Republic of Germany

Federal States & Nielsen Areas



Machine, auto exports foster economic health

West Germany has the largest population in Western Europe; with 247 inhabitants per square kilometer, the country is one of the most heavily populated in Europe. The metropolitan areas which have built up around the capital cities in the individual federal states are especially densely populated; over half of the German population is concentrated in these areas. The population contains an unusually high number of single-person households (28%), by far the largest such figure in all Western European nations.

The average net monthly household income is about $1,300, whereby approximately 60% of all households have only one wage-earner. The share of employed women in the population has reached 32%; among women aged 20-29, this figure climbs to about 55%.

The major employers in the West German economy are the trade and service sectors, which together provide employment for 49% of all employed persons in the country. The manufacturing industries, however, account for 48% of the total gross domestic product, the largest single amount.

▪ With an export volume of DM273 billion in 1977, the Federal Republic of Germany is the largest exporting nation in the world. The most important export sectors are finished products which require technical know-how: automobiles, electrical engineering products, machines of all kinds, construction projects, instruments and tools, precision and optical products.

Private consumption accounts for more than half of the GNP; the share of governmental spending in a state like the Federal Republic of Germany is, however, constantly increasing.

About 27% of private expenditures are spent at present on food, beverages and tobacco; with an increasing standard of living this share has been falling in favour of recreational goods and services. #

Demographics data bank on W. Germany

POPULATION AND BASIC DATA

Population:

☐ Total inhabitants = 61,6 million (247 per sq/km)
☐ Inhabitants (over age 13) = 45,7 million
☐ Men/women (over age 13) = 46/54%
☐ Number of cities with population over 100,000 = 69
☐ Governmental form: democratic-parliamentary federal states
☐ Administrative regions = 11 federal states (including West Berlin)
☐ National language = German

Age structure:	in %
14–19	11
20–29	16
30–59	49

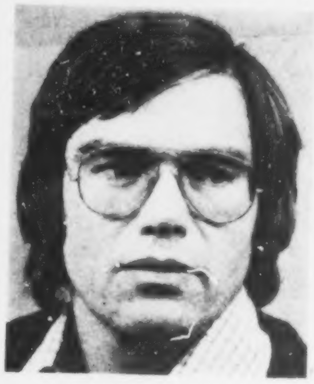
German retail distributors entrenched for '80s



By HEINER HUNSINGER
Marketing Executive
Deutscher Fachverlag

At the Food Market Institute convention in the U.S. last spring, the owner of a a big midwestern supermarket chain asked me who would be the next German retailer to tackle the U.S. market. I suggested a few names. Then he asked me what the retailing scene in Germany was like. I began to describe it.

We got to talking about manufacturers and couponing. I said that sort of thing would be unthinkable with us, because German retailers set their own prices and won't let industry tell them when to cut prices or how much, or when to accept promotion material and when not.

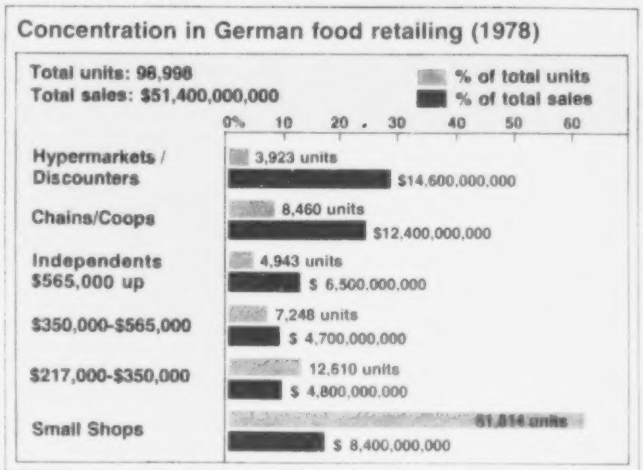
My friend was incredulous. He asked twice if he'd heard me correctly, and I assured him he had. The intent group of retail executives surrounding us nodded wistfully and sipped their ice water.

▪ This anecdote illustrates the fundamental difference between the American and German retailing landscapes, whose contrast is based not so much on types of outlet as on how German retailers see themselves. This contrast affects decisions related to the market and to suppliers.

To show where the German and American retail trade resemble each other, a few general remarks are in order.

German retailing will see no revolutionary changes in food outlets in the 1980s. All the distribution systems are operative and the streams of demand flow through them in an orderly fashion. Supermarket, small-space discounter, box stores of all varieties up to self-service department stores—all have undergone their baptism by fire and are in full operation. In the late '70s, forced by state building codes, a type of operation between 10,000 and 20,000 sq. ft. flourished. Though an offshoot of the traditional supermarket, it catered more to discount demand.

▪ Large and small outlets will be able to fortify their respective competitive positions because the cost advantage of the large outlet in purchasing and distribution is offset by the small outlets' nearness to the consumer, their greater flexibility, and their ability to meet high specific buying needs. Chart at right shows a breakdown of the market by type of distribution.



These figures represent today's situation; it does not show that in the past 15 years some 70,000 independent retailers, organized in voluntary chains and cooperatives, have dropped out. In recent years, however, the mortality rate has definitely declined. In the future this slower process of melting away will hit chains harder than the comparatively solid cooperatives.

Barely hidden behind these figures is a competitive struggle that has swept over the operators in the market like a raging fire, and is still smoldering. With all due modesty, no other country in the world has experienced anything like it.

▪ The competition has forced those German retailing organizations that are bent on survival to build up their resistance by way of mergers, affiliations and takeovers. In recent years huge retail groups have come into being with a concentrated purchasing power that was unthinkable 10 years ago.

Such massing of demand power promptly brought the government into the act. Increased control of mergers and a ban on discrimination are no mere glittering catchwords in Germany, but have very real substance. The big boys defend themselves vehemently against such government intervention and reproaches from the public. Klaus Wiegandt, general manager of the Leibbrand group, a chain with $2.5 billion in annual sales, explains it like this:

"In a highly industrialized society with mass production like ours, the retail distribution machinery cannot retain medieval structures. Modern, highly efficient distribution systems with a variety of outlet forms on the store front today call for tremendous investments of capital and management. Anyone who confronts this economic task of distribution is compelled to strive for unit sizes leading to growth processes that begin by crowding out competitors.

"But this concentration in food retailing comes to a halt in good time even from an economic standpoint, because the locations necessary for mass distribution are in limited supply, and optimum unit sizes generate their own administrative limitations. Accordingly, some 50% market share will remain permanently in the hands of small business, which must concentrate on the weaknesses of the big organizations."

▪ Do you see what I'm talking about? Actually you can't, unless you know the following:

Germany has never had a Wright Patman[*], and so, retail size here means power—easily demonstrable, constantly demonstrated buying power—not only with respect to the quantities of individual products, but particularly to the terms on which individual products are purchased. In other words, each retail group negotiates its own, highly individual terms. Those with insufficient power get poorer terms.

Accordingly, competition aims to drive rivals out of the market, using such weapons as merger, takeover, and frantically aggressive growth. The process of boiling down still continues under full steam.

▪ A great American detergent combine (in Germany the group is believed to have invented marketing), proud of its corporate philosophy and exemplary in its German operations, has finally had to concede, after years of stubborn resistance, that nothing goes in defiance of the newly powerful retailers. The company's profits shrank substantially in 1978, and while it used to sell only 20% special-priced merchandise, the figure today is 80%. It is having more and more trouble with its principle of concentrating on selling out and requiring the retailer just to have the goods available.

But while its German execs are battling the retailers brilliantly on the market front and still encountering problems, the American parent evidently declines to approve more flexible strategies. Whatever works in the United States, the reasoning goes, must necessarily work in Germany.

Naturally, that company is not alone in its battle for market shares. In practically every field of production, overcapacity assures intense pressure for distribution. And the interchangeability of practically all products within classification of merchandise inevitably leads to aggressive undercutting in terms.

A man in the retail camp chose to describe the present situation: "Today we're so strong that we can extort practically any terms from any manufacturer."

▪ To sum up, the battle for distribution in Germany has grown fiercer than the battle for the consumer. This dog-eat-dog struggle for survival already has led to many cases of self-multilation in both retailing and manufacturing, bringing about quiet liquidations and spectacular collapses.

What might be called public documentation of the new brutality of retailers' mercantile relationships is the so-called register of offenses drawn up by the Economic Ministry to combat abuses in terms. It should be remembered that individual forms of rebate, some examples of which are listed at left, are not merely used interchangeably, but usually several are demanded at once.

▪ To be sure, industry is no less active in devising new forms of allowance in order to maintain a pretense of straightforward negotiation. It would, however, be disastrous, and unfair as well, to explain the growth of "Knapsack wholesalers" into huge concerns merely by citing their ability to negotiate terms more rigorously.

When the German public mentions retailing, it is fond of talking about power, but seldom about performance. And it is this capability that has made of the abovementioned Leibbrand group, with $250,000 in 1961 sales, a corporation that this year will do about $2.6 billion.

Aldi, Wertkauf, and Tengelmann (now, of course, also in business in the U.S.) may be mentioned as three examples among many of entrepreneurial talent. Suppliers in Germany have come to realize that you can't fight this kind of dynamic drive—not with conventional push-and-pull strategies, not with couponing. They realize also that new forms of cooperation will help both participants in the market. And this, I believe, was what my midwestern friends were thinking of as they wistfully sipped their ice water. #

Heiner Hunsinger has been involved with German trade journals throughout his working life; he is now a member of senior management in charge of marketing at the Deutscher Fachrerlag in Frankfurt, the largest German trade paper publisher with about $50,000,000 in sales this year, 30 journals, and a payroll of some 500. Among its main publications is the weekly, Lebensmittel Zeitung, *the leading food trade sheet, which is read by all wholesale and large retail outlets in Germany.*

---

[*] U.S. Rep. Wright Patman is co-author of the Robinson Patman Act of the early '50s which outlawed price concessions or other "advantages" in doing business under the guise of advertising, sales or promotional allowances, special brokers' fees and commissions, volume discounts not offered to the trade in general, and rebates.

Examples of marketing by rebate in Germany

- Customer demands payment for including vendor's products in assortment.
- Customer demands "shelf or space rent" from vendor for displaying his merchandise.
- Customer demands contribution for his advertising (catalogs, newspaper ads, poster space, etc.) from vendor.
- Customer demands special consideration from vendor when opening new stores.
- Excessive accumulation of special rebates is demanded of vendor.
- Customer demands a future, specified increase in rebates granted as "sales bonuses" by vendor.
- Customer demands that vendor, under threat of sanctions, provides personnel for "inventory assistance."
- Customer makes regular stocking of vendor's line contingent on payment of fees.
- Customer imposes *ex post facto* penalties for failure to reach sales quotas, without previous warning or contractual stipulation.
- Loans are demanded of vendor, on terms not available on market, for expansion or new investments by customer.
- Vendor is required to subsidize new investment or expansion.
- Vendor is asked to share costs of fitting out customer's premises.
- "Fines or penalties" are charged to vendor for errors in shipments, regardless of their importance.
- Customer demands excessively lenient payment terms in general or on particular occasions (*e.g.*, store opening or initial orders).
- Purchaser demands that vendor accommodate retail organization, *e.g.*, by adopting the former's skid dimensions, item numbers, or invoice forms. With a variety of customers the vendor is thus prevented from organizing his own operations with maximum effectiveness.

Hoechst reports '80 capital expenditures

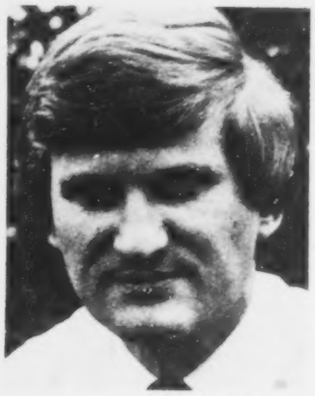
Germany's Hoechst Group, with 459 companies worldwide, plans to invest $1.14 billion worldwide in 1980, an increase of 21% over 1979.

About 50% will be spent in West Germany while approximately 15% will be invested each in the United States and Western Europe.

In the U.S., modernization and expansion will continue for the polyester fiber production facilities of Hoechst Fibers Division of American Hoechst. Outside Germany, capital investment in 1980 will concentrate on pharmaceuticals, fibers, and synthetic resins. Main emphasis will be on pharmaceuticals.

About 15% of total 1980 capital expenditures, or about $171,000,000, will be directly for environmental protection. In addition to this, other capital projects will provide more funds for environmental protection. #

German admen think legal before thinking creative



By VOLKER NICKEL

Why should there be a substantial difference between advertising in Germany and in the United States? Of course, the West German market of 60,000,000 consumers is considerably smaller than that in America. But what the Germans know about advertising they learned from the mother country of modern marketing, the U.S.

America supplied the impulses and provided an advertising grammar for all European business. Many a French, German or Italian advertising man, particularly in the 1950s and '60s, found the American sense of mission getting on his nerves—the glittering, sometimes gaudy externals of the doctrine of advertising salvation, made in U.S.A. But no matter: the thrust and accomplishments of advertising as the motor of marketing continue, even in Germany, to rest on the discoveries of the advertising pioneers from overseas.

Two different ad worlds

Nevertheless, the German advertising scene is completely in contrast to that in the States. Reason No. 1: the media in America are differently structured; their range is wider, and each medium's relative importance is different.

For example, tv advertising plays a far greater role in the U.S., particularly at the expense of magazines, which rank only fourth in advertising income, after newspapers, tv and radio. In the Federal Republic, on the other hand, newspapers have a 46% share of total income, general magazines 18%, direct advertising 12% and tv 10%.

The second difference, as recently expressed by a spokesman for the worldwide ITT group, is that "Germany is the most demanding market there is. It has the highest requirements with respect to product design and quality and technological development. Whatever succeeds in the German market will succeed anywhere." If this opinion is correct, obviously advertising in Germany must be different, too.

Regulations vs. creativity

American ad people always shudder when they hear German colleagues discussing questions of advertising law first and creative problems second in planning advertising activities. And therein lies the third reason why the American and German advertising scenes are so difficult: German advertising legislation is the world's strictest and most specific. Anything and everything is regulated by law.

More than 25 special legal requirements substantially restrict advertising options and lead to a perennial battle between regulations and creativity. The most important 10 laws:

- Law against Unfair Competition, a set of rules that makes up a sort of constitution or central law for the advertising industry.
- Act for the reorganization and amendment of the law governing commerce in foodstuffs, tobacco products, cosmetics, and other articles of daily use.
- Law of Medicaments.
- Law governing advertising in the therapeutic field.
- Federal Data Protection Act.
- Rebate law.
- Ordinance governing price labeling.
- Ordinance of the federal economic minister governing summer and winter clearance sales.
- Model state ordinance governing going-out-of-business, clearance and other special sales.
- State press law.

ZAW

The German advertising industry shows a high degree of organization. Its umbrella organization, the German Advertising Federation, comprises 37 member groups from industry, banking and retailing (8); advertising media (19) and agencies (2), and advertising professions and research (8).

The ZAW represents the entire German advertising industry to the public, and—more significantly, to legislative bodies and public agencies. Within its own industry the federation assures the coordination of interests among the various branches of advertising.

Voluntary booby-traps

Producers and suppliers of goods and services in Germany have to meet not only legal requirements, what might be called outside supervision, but voluntary agreements, internal supervision. Rules of conduct are supposed to prevent harm to the consumer, and also to the ad industry, with its 300,000-odd employees and over $5 billion in 1978 recorded net sales (including those in the zone between permissible and legally prohibited advertising). The filter of self-discipline has three layers:

1. The International Rules of Conduct for Advertising Practice (which have no great significance in the Federal Republic, since they merely elaborate on the existing law here). The guidelines establish as the basic principles of fair advertising that every measure adopted must be in accordance with public morals and truthful.

2. The activity of the German Advertising Council, the self-supervisory institution established in 1972 by the ZAW. This group is the central body for self-supervision in advertising. It steps in on its own initiative or after outside suggestions or complaints, in matters of illegal and dubious advertising on the fringes of legitimacy, and in case of other abuses. The Advertising Council keeps all groups in the advertising industry constantly informed of developments in consumer policy.

In addition, this central institution develops guidelines for advertising. They serve to "prevent aberrations and encourage advertising that does justice to the consumer." The Advertising Council and the media police the observation of these guidelines.

The most important two are:

- Rules of conduct for advertising to and with children on commercial radio and tv (1973). Here the entire German advertising industry undertakes to refrain from any direct appeal to children to buy anything.
- Rules of conduct governing the advertising of alcoholic beverages (1976). This requires, for instance, refraining from minimizing the effects of alcohol consumption and prohibits the use of young people and athletes in alcohol advertising.

3. Special agreements within particular lines of production and commerce also regulate special forms of advertising in the Federal Republic on a voluntary basis.

Obviously, if the Germans impose on themselves this highly perfected advertising legislation with additional voluntary restrictions, the situation will be much the same with respect to advertising supervision. Even advertising practitioners in West Germany find it harder and harder to keep track of who, aside from the state, is supervising advertising. There are more than 50 central institutions and organizations, some with additional networks of regional and local bodies, policing German advertisers. In addition, press, radio and tv follow advertising events with a highly critical eye. Each year the mass media print and broadcast consumer information valued at some $1.5 billion.

Consumer-slanted legislation

One thing America and Germany have in common is their consumer-slanted legislation. Protection of the consumer has absolute priority, whereas in times past the maintenance of competition was the main consideration. There may be trouble with the courts even if statements in advertising are objectively true. What is "true" is determined not merely by the facts in the ad copy but by the opportunities to mislead the consumer with truthful but confusing information.

For example, in a suit between two manufacturers of electric shavers, the Federal Court (the German Supreme Court) stated that even truthful advertising could be misleading and therefore prohibited. The point was that Company X advertised its dry shaver with the truthful assertion that it was "the world's most popular." Company Y, which sold the most dry shavers in the Federal Republic, succeeded in preventing Company X from advertising its world leadership in the German market. Said the Federal Court: Advertising "world leadership" gives a not inconsiderable share of average consumers the misleading impression that this also applies to the German market.

In other words, only the judgment of consumers decides whether the advertiser's objective truth also constitutes truthfulness for the consumer. To determine the opinion of consumers on advertising messages in disputed cases, German courts even conduct opinion surveys. If less than 15% of the consumers interviewed understand the message in the misleading sense claimed, German courts usually dismiss the complaint. With more than 15%, the advertiser must expect to be found guilty, with sentences ranging from fines to a maximum of a year's imprisonment.

All quiet on ad front

All of this sounds pretty terrible. But the German advertising industry has long since adjusted to the situation. Accordingly, advertising missteps are extremely rare. True, this caution of advertising executives prevails at the expense of creativity. German advertising is not nearly as witty and sparkling as American. But what the agencies in Duesseldorf and Hamburg, Frankfurt and Munich turn out is beamed straight at the public ear and taste. And that, after all, is what advertising is about.

The elaborate legal safeguards imposed on advertising in Germany have an additional effect: criticism of advertising from the angle of social policy has never attained a rank such as it holds in the U.S. In this sense, all is quiet on the German advertising front.

Opponents of free enterprise and advertising have by now pitched their tents in Brussels, the headquarters of the European Community. They now attempt to achieve through the EEC advertising bans that won't stick in Germany, but their chances of creating the silence of the grave on the German advertising front are extremely slim. This is because the citizens of the country have no more desire for a planned economy à la Marx and Lenin than have the political parties, unions, churches and other influential social groupings in West Germany.

On the other hand, the prospects for advertising being produced in Germany less with the law code in mind and more with creativity and humor are not bright either. At the moment, no further advertising restrictions are in sight, but the German Parliament is refining the above-mentioned Law against Unfair Competition.

But still, we shall hardly see ad agencies turning into law firms. Even German perfectionism finds its limits at the point where regulations destroy the market mechanism. #

Volker Nickel, 36, heads the Communications Department of ZAW, the German Advertising Federation, in Bonn. After learning the journalist's trade in Berlin, he worked in the information section of the Central Marketing Corporation for German Agriculture (CEMA), and in 1972 started building up the communications department of ZAW.

Advertising Age's Top 25 German Agencies by Gross Income in 1978

Rank Agency	Gross Income (000)	Billings (000)
1. H.K. McCann Co.	$28,919	$192,791
2. Lintas	25,765	171,853
3. Team/BBDO	22,800	152,000
4. J. Walter Thompson	20,090	134,000
5. wilkens wpt	16,533	81,457
6. Gramm & Grey	16,288	108,586
7. Young & Rubicam	14,849	99,043
8. Heumann, Ogilvy & Mather	11,868	79,083
9. Doyle Dane Bernbach	11,501	76,659
10. Dr. Hegemann	10,000	66,761
11. Intermarco-Farner	9,995	66,666
12. Benton & Bowles und Partner	9,923	66,188
13. D'Arcy, MacManus & Masius	9,847	65,676
14. MWI, Norman, Craig & Kummel	9,690	64,600
15. Foote, Cone & Belding	9,472	63,180
16. Slesina-Bates	9,248	61,681
17. GGK Duesseldorf	8,408	56,055
18. Troost-Campbell-Ewald	8,076	53,867
19. R.W. Eggert	5,600	37,400
20. Guenter Blaese	5,081	33,892
21. Luerzer, Conrad	4,939	32,926
22. Compton	4,710	31,410
23. Westag Werbeagentur Prigge, Hawel	4,146	26,674
24. Spiess & Ermisch	4,090	27,300
25. DFS + R Dorland	3,689	24,596

The sheer power of German advertising agencies as money makers is most evident when comparing their gross incomes with those of agencies across the Continent.

Of Europe's Top 25 agencies in terms of gross income, 13 are from Germany, according to ADVERTISING AGE's foreign gross income and billings tabulations for worldwide agencies in 1978.

- Leading the agency pack in Europe is H. K. McCann, followed by other German behemoths, No. 3 Lintas, No. 4 Team/BBDO, No. 8 JWT, No. 10 wilkens, No. 11 Gramm & Grey, No. 12, Y&R, No. 18 Heumann, Ogilvy & Mather, No. 19 DDB, No. 22 Dr. Hegemann, No. 23 Intermarco-Farner, No. 24 Benton & Bowles, No. 25 D'Arcy-MacManus & Masius.

German agencies in Europe's second 25 are No. 26 MWI/NCK, No. 27 FCB, No. 28 Slesina-Bates, No. 33 GGK Duesseldorf, and No. 35 Troost-Campbell Ewald.

Admenting switches to Nissan/Datsun

After seven months without an automobile account, Admenting, D'Arcy-MacManus & Masius of Frankfurt has a car client again. Nissan/Datsun Ltd. of Tokyo has tapped Admenting for a Europe-wide campaign, covering activities for the introduction of new models and sales promotion.

Tv may grab headlines, but press snags the ads

By BERND SCHIPHORST

From Chancellor Helmut Schmidt's cabinet and from parliament, from commissions and conventions one gets the impression that an era of unrestrained television mania has dawned in Germany.

Pundits in this "nation of poets and thinkers" point in horror to the perfidious influence likely to be exerted by cable and satellite on the nation, not to mention the revolutionary aspects they may have on the country's already highly-regulated broadcast media.

Chancellor Schmidt has apocalyptic visions: "We must not stagger into perils that are more acute and more dangerous than nuclear energy." If the country were flooded with private cable and satellite programs, according to the chancellor, this might "change the structure of our democratic society." Many other politicians say amen to the chancellor's words of alarm.

▪ As a result, total cable tv business in Germany in 1979 will be zero DMarks. Although cable tv was installed at least five years ago and test cities selected, it has not been put into practice. Politics seem to always bar the door.

German tv also seems void of the treachery ascribed to it. The Germans have a daily choice of only three channels. Advertising is confined on these networks to five minutes four times a day, and banned on Sundays and holidays. Tv programs are even under supervision of the ruling political parties.

Satellites might change things a bit, but not if Mr. Schmidt holds his ground. Already, he has obtained promises from France that France would join Germany in blocking an attempt by Radio Tele Luxembourg to lease a channel on a French-German television satellite for broadcast of German-language tv programs to Germany. RTL is majority-owned by the French government.

▪ While an important medium, tv's importance as an ad medium hardly measures up to the headlines it is getting in the national press (newspapers), which alone accounts for 43% of total advertising in Germany.

Where else can a citizen choose from among six national dailies? The biggest is *Bild*, a pure newsstand tabloid, 5,000,000 net paid, bought by almost one household in four. The smallest is executive reading, a business and financial paper called the *Handelsblatt*.

Four quality national papers boast between 200,000 and 300,000 net paid. The left-leaning, liberal *Frankfurter Rundschau*, which became a part of the nationwide alternative reading of young people during the student revolt in the late '60s, is now having trouble maintaining its daily national distribution; and *Die Welt*, which is Axel Springer's flagship, has just swung sharply away from the dry, dullish style of the quality papers. While the editors of the *Handelsblatt* (which is published every stock-market business day) read the *Wall Street Journal*, they do not attain its journalistic standard. As a result circulation is static at about 80,000.

▪ Local and regional dailies have a great tradition in Germany. Their economic position at present is in no danger: They reach over 70% of the adult population daily, and advertising is thriving. But this may take a turn for the worse.

Many cities and rural districts have only a single daily left as a result of the concentration during the '60s. With no real competitors, the editors don't put their back into it, the critics say. And the small retail advertiser complains that the local paper today covers too wide an area, and ad rates have risen too high.

In this situation the traditional local press is under pressure from above and below. From above comes the big national tabloid *Bild*, which is digging into more and more regional markets and pursuing an aggressive editorial policy there. From below, local "shoppers" are crowding in: given away to all households, they offer split-run down to the smallest area, a single section of a city.

It took a bit of time for the newspaper publishers to recognize the danger and turn the tables by using the methods of the opposition. They started their own shoppers or bought them up, and when this worked, they turned it against Axel Springer of *Bild*. They published giveaways with topical editorial matter on Sundays. Until then Sunday had belonged solely to two big national papers, both published by Springer: *Bild* and *Welt*.

▪ Even greater is the transformation of advertising sales. In the field of traditional brand-name advertisers, the dailies run a poor third and the trend is static. In 1964 they drew 20% of their ad revenue from that source; by now it is hardly 10%. On the other hand something like 50% of the business now comes from regional retailers—box stores, department stores, shopping centers and chain stores. These are pure special-sale ads.

Whatever the dailies may have lost in the post-war period, the general interest magazines have gained it back twice and three times over. The slick paper business is booming probably more than in any other country in the world. With a share of 45% in the total $3.75 billion of total advertising expenditure in the classical media, the general interest press is the cornerstone medium in Germany.

German and foreign titles from Gruner + Jahr, the big Hamburg publishing house.

Such magazines as *Stern* and *Spiegel* average 120 pages of advertising week by week during the year. Individual issues in the busy seasons of March-May and September-November have already hit the mechanical production ceiling. What *Stern* has done is to remove parts of the issue (weighing several pounds, as it is) and insert them as separate supplements—the only possible recourse in dealing with excess demand.

▪ Unusual as this situation is for a magazine, the media planners at German ad agencies are used to standing in line, thanks largely to German tv in which commercial time has been rationed since the beginning of tv, as follows:

- to 20 minutes a day;
- to the time slot between 6 p.m. and 8 p.m.—outside of prime time here, as in other countries;
- to ordinary working days; a ban on Sunday and holiday tv was imposed out of consideration for the churches' position as active members on the boards of the broadcasting networks;

Under pressure from moralists and political health fanatics who have pushed through regulations banning bare bosoms, cigarets and pipe tobacco. Alcohol is advertised only under strict guidelines, and advertising to children is permitted only if the commercials do not urge buying.

This is the cage that tv creatives and film producers move in. Thank goodness they are not reminded every other day that only two-thirds of the population has color tv. In 1978, *Stern* ad manager Rolf Grimm provided proof to American media planners in a study, "The Media Scene in Europe," that "television in Europe is not the basic medium American style: No medium in Europe is marked by so many restrictions, varying from country to country, as tv."

The *Stern* study would not have been needed if all that was involved had been the redistribution of advertising money. This the German politicians had already taken care of. Reason: While the post-war German press developed an extreme reserve toward the state (a subsequent justification of the licensing policy of the Allies from 1945 to 1949), tv fell at once into the hands of the media policy-makers. And German media politicians have a reputation for knowing much more about politics than about media. "In no other sport," grumbles the general manager of a big church weekly, "is amateur status so strictly maintained as in media policy."

The professionals in the magazine trade, on the other hand, had a clear track and exploited it to the

(Continued on next page)

Bernd Schiphorst, who was for some years editor of the German advertising trade newsletter Der Kontakter, *is now at Gruner + Jahr, Hamburg magazine publishers.*

Canada Dry to H&P

Canada Dry, a subsidiary of Norton Simon Inc., has named Herrwerth & Partner, Munich, to handle its recently dormant German account. Distribution build-up will precede general advertising.

"Run-of-the-mill stuff"

Submarines, toupee tape offered in 'Made in Europe' publications

Hermann Reisner of Made in Europe, left, shown with U.S. Secretary of Commerce Luther Hodges at the Hanover Fair in 1961.

"The real sport is what our advertisers want to sell and what our members want to buy," comments Hermann E. Reisner, publisher of a catalog operation in Frankfurt, whose ability to match product to customer the past 25 years has been just short of phenomenal.

"Run-of-the-mill stuff is nylon horseshoes, collar casks for St. Bernard dogs, toupee tape, crapshooting pads, thrones for sheiks in Dubai, submarines for coral-gathering, canvas water bags for Mecca pilgrims," continues Mr. Reisner, who with a staff of five and an ironing-board for a desk, put out in 1954 the first issue of a trade journal planned to sell European consumer goods to North American department stores and importers.

That publication is the English-language *Made in Europe*, distributed only to members of the Made in Europe Organization. Subsequently, Mr. Reisner was to reach out for producers' goods with a TEC Technical Equipment Catalog, and most recently a monthly load of over 200 ad pages per issue has forced him to split the parent book into "General Merchandise" and "Furniture & Interiors."

- Alone among European "export magazines," the *Made in Europe* books have a net paid circulation of some 13,000 around the world, including one hardy subscriber from Kandahar in Afghanistan.

He's a merchant and his business is passenger transportation. On his annual package pilgrimages to Mecca he sets out with a convoy of 10 to 15 used Mercedes buses, including several spares. Not spare parts, spare buses. Some usually fall by the wayside. He is always in search of used Mercedes buses.

"You've heard about the guy who used to sell Brooklyn Bridge to hayseeds. My turn came when Duesseldorf planned to replace the main bridge across the Rhine with a new, wider one. They told me I could try to sell the old bridge, buyer to remove his property. I will say for us that my editorial on the subject pulled enquiries from as far away as Tasmania, but we couldn't compete with the price of scrap: It rose so high that the bridge was worth more as junk.

- "Our most urgent foreign enquiry came by telephone from the middle of a North African desert. They needed a shipload of hay. It seems some progressive Third World authorities had imported large herds of cattle to boost milk production; the only thing they'd forgotten was fodder.

"Of course we can't always tell whether the advertisers are going on results or hope, any more than the enquirers. But our first advertiser in 1954 was Albert J. Thewalt, a producer of beer steins. He's still with us (like 23 more of our original 64 advertisers). And we've never had an issue from then to now without ads for beer mugs of one kind or another.

- "The biggest company among our advertisers, the $4.5 billion Quelle mail-order house, does a lot of business all over the world, and evidently we've been contributing our share. I don't think Quelle advertises on hope.

"I was pleased to see that my friend and fellow native of Berlin Gerardo Joffe—the man who made a sensational success with the Haverhill's and Henniker's mail-order operations in San Francisco—recently wrote a book succinctly called 'How you too can make at least $1 million (but probably much more) in the mail-order business.' One of the things he advises doing is subscribing to *Made in Europe*." #

Tv gets headlines, ads go to press

(*Continued from page 34*)

full. Today the 78 major general-interest magazines reach 90% of the adult population. The 20 biggest—apart from the free membership publications of the ADAC automobile club, two building-and-loan societies, and the German Red Cross—are four tv program magazines, sensational press, five women's books, the general-interest weeklies *Stern* and *Bunte*, a young people's magazine, and *Reader's Digest*.

The bouquet grows ever more varied. In 1978 some 270 publications were launched and well over 100 were discontinued. The year before, the figures were 150 and 100. Main themes are culture, electronic entertainment (hi-fi and phonograph), with a continuing trend toward motoring; in the leisure sector, hobbies and sports; and as always, comics.

Not only that. The special issues and one-shots that had blossomed during the advertising recession reached a total of about 200 titles in 1978, with an aggregate circulation of 40,000,000. Not until this year has the upward curve leveled.

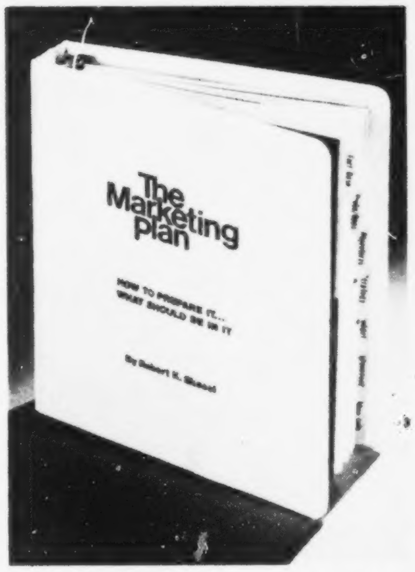
And since brand-name advertisers don't give their business to a publisher for his bonny blue eyes, the publishing houses spend a fortune on research: Two big annual media analyses financed by the advertising industry as a whole, plus out-of-the-ordinary studies (for instance describing target groups by psychological rather than demographic characteristics) and analyses of small special markets, such as the business press. Reader analysis is important because the major part of all circulation still goes through newsstands and moves into unknown channels without market research.

The perfection of the magazine system, the excellent printing of the books, and the high editorial level have given the Germans such self-assurance that a German publisher, Gruner + Jahr, has, for the first time, begun to export its magazine ideas. The monthly *Geo*, started only three years ago, has been recognized as a model of modern magazine and direct marketing; it spread first to France and added a U.S. version.

Even the new electronic media no longer scare them. The magazine market has grown so specialized, with most gains in segments of high-level readership, that tv with its average consumer structure hardly poses a threat.

Besides, cable and satellite tv must still clear the hurdles of political approval. Chancellor Schmidt even wants to make the impact of news media on social policy into an issue for his 1980 election campaign. According to Chancellor Schmidt: "That might be a theme like Prof. Schiller's revaluation of the D-mark in 1969."

Let's hope it doesn't boomerang on the Chancellor. #



Marketing Plan Guidebook

Here, for the first time, is a manual devoted entirely to the process of preparing The Marketing Plan. It tells how to organize the Plan, what should be in it and how to write it.

Unlike heavy textbooks . . . this manual gets right to the point.

It guides the planner through the proper establishment of the current market situation . . . analysis of problems . . . recognition of opportunities and listing of objectives.

Explains the procedure for developing and analyzing strategies . . . forming a budget and providing management with a forecast.

64 pages; 8½ x 11 $24.95
Easy-to-use quality loose-leaf binder

MONEY BACK GUARANTEE

Order your copy today. Compare it with other marketing plan preparation manuals you may have seen. If you're not convinced that having this manual will help you prepare a better marketing plan, return it within 15 days postpaid and you money will be refunded.

MAIL THIS NO-RISK COUPON TODAY!

Mail to: CRAIN BOOKS / 740 Rush Street / Chicago, IL 60611

Please send me ______ copies of *The Marketing Plan* at $24.95 each.

U.S. far from top in most ad regulations

FRANKFURT—"Americans like to think of themselves as always being first and foremost in everything. But we have historically lagged behind the Europeans in areas of consumer policy and advertising regulations," according to Graham Molitor, president of the Maryland-based think tank, Public Policy Forecasting.

The countries to watch, he told a EurAm session, are Sweden and Norway, where most innovative legislation begins. Generally it is picked up by the United Kingdom and Germany, and makes its way to the U.S. with a time lag of six to eight years. "The world is a laboratory," he points out.

"Within the U.S., the same pattern can be traced. New jurisdiction comes out of New York and Dade County, Florida, and is picked up by California and Massachusetts, and from there filtered down to the other states."

Mr. Molitor was joined in his session on "Government, the Uninvited Partner" by moderator Dr. Eduard Grosse, chairman of Foote, Cone & Belding International; Keith Monk, manager of advertising and sales promotion services, Nestle, and Peter Gilow, J. Walter Thompson Co., Frankfurt. He demonstrated that patterns in consumer legislation can be anticipated; by the time the government arrives on the scene, there has usually been a long warning period.

- "I have never seen any issue that didn't have a 20-year time frame before legislation," he said. For instance, the massive ban on cigaret and alcohol ads could have been predicted many years ago. Currently, Mr. Molitor's institute is monitoring 3,000 consumer issues not yet implemented by the U.S. Government.

Areas where warning signals are up, he says, include nutrients, vitamin requirements in food, foods high in fat (especially saturated fat), salt, sugar and alcohol. The whole junk food controversy he sees as having ominous implications for the food industry.

In Europe, he says, vitamin standards vary enormously from country to country. For example, requirements for Vitamin C in breakfast foods in England are 30mg, and in West Germany, 75mg.

He also pointed out that runaway technological capabilities make it possible to do a breakdown analysis on a product like coffee, to reveal an estimated 3,000 individual chemicals. The presence of just one of these chemicals could put coffee on the ban list in certain countries. According to Mr. Molitor, the coffee scenario demonstrates only too well the folly of zero tolerance prohibitions. "It's frightening," he says, "that almost any product now could be indicated for posing risks."

What can be done in the face of government's determination to become more obtrusive and eager to save us from all possible ills?

Mr. Molitor is none too optimistic about voluntary self regulation. Historically, he points out, it always gives way to government-mandated standards. His solution is to nip the problem in the bud by anticipating signals, reformulating products or developing new sources of supply.

- A happier view of the situation came from Peter Gilow. "Why not invite the uninvited partner to join us?" said Mr. Gilow. His words were echoed by the European panelists, all of whom seemed to feel that if you can't beat 'em, join 'em.

Mr. Gilow proposed a three-point plan: (1) More organization to find out in advance what legislation is planned; (2) more cooperation between industries, agencies and media; and (3) more research to influence the government and get its cooperation.

In conclusion, Mr. Gilow said that very much the same approach had been used to convince the EEC to redraft certain consumer legislation. "We found out in Brussels that we could talk to each other." #

David says O&M ads can be laughing matter

The word has gone out from David Ogilvy to Ogilvy & Mather copywriters across the world: Humor is okay.

The grand old man of advertising, whose personal reputation for humor is hard to beat, revealed this major new switch in his ad thinking in the opening address to the 4th annual EurAm conference.

It is now one year since Mr. Ogilvy came out of retirement to head up the Ogilvy offices in Frankfurt. He only had to hop a cab to join the meet.

"Always in the past I've persecuted copywriters who wrote funny commercials," he told the audience," I used to have the awful ordeal of going to conventions and seeing the Y&R reel, all as funny as hell. Made the audience laugh, made the clients want to go to Y&R. And I wouldn't let our people do it. I said you may not be whores.

"But I always envied Y&R," he continued. "Thank God, now we can be funny, too. Our new research reveals that humor can be very effective if the humor is concentrated on the product."

Quickly discarding his red silk-lined coat—all the better to show off the red suspenders—David Ogilvy let 'em have it, as usual.

"Advertising as practiced today is inefficient—grossly, extravagantly, obscenely inefficient," he began. Among his bits of advice: "Don't be cute" in headlines. Put the brand name in the headline, put the promise in the headline, he urges.

"Avoid couples walking through woods, happy families at dinner, sunrises and sunsets. Every food manufacturer wants his commercial to show a family, preferably a very large one, eating huge tonnage of his product." This turns the viewer off, he says.

The most common crime in advertising—next to dullness—is to conceal the name of the product. Polls reveal the shocking numbers of consumers who cannot name the brand in commercials they've just seen. "Identify your brand in the first 10 seconds, repeat it time after time. Play games with it."

The wrong technique won't kill the really big idea, but the odds against people having a big idea are 999 to 1 because there are not many big ideas. "I've been in this trade for 30 years—written as much advertising as anyone alive. In 30 years I had nine big ideas. It's not many, is it? But it's more than most people."

November 'street' prices for spot tv on network affiliates

Average cost per household rating point for 30-second spot

Nielsen market rank	Prime time '79 vs. '78
1. New York	$362 (+ 4.9%)
2. Los Angeles	285 (+ 5.2%)
3. Chicago	192 (+ 3.2%)

20. Indianapolis	56 (+ 7.7%)

Market combinations at a glance — cpp

Ranked by market size	Prime time November	cpm
1-10	$1,700	$6.87
11-20	823	8.69
21-30	519	7.93
31-40	303	5.83
41-50	258	5.77

Source: Spot Quotations & Data, 950 Third Ave., New York 10022. Average cpps for a 30-second spot were determined from ad agency conventional buys on affiliates as of Oct. 27. Excluded are spots bought on a 52-week basis or calling for 150-plus gross rating points weekly. These averages are a yardstick and not a listing of the market's lowest prices. Ratings used are an Arbitron/-Nielsen average. These guides can be applied to 60s—200%, and 10s—50%. Percentage gain or loss over November, 1978, is shown in parentheses.

Henkel exec urges return to human approach

(Continued from Page 2)

he continued.

Advertisers should tell the public that the right to choose between products is a part of freedom, Dr. Sihler said. "Why not explain the correlation between advertising and growth and employment? Do we contrast often enough the socialist liberty 'to want' with the capitalist liberty 'to have?' If each advertiser gave an interview to the local paper or spoke before a school class or wrote a letter to a paper or called up an editor," he suggested, "this would mean a change. Furthermore, why shouldn't advertising agencies create advertising for advertising, media donate space and advertisers support the effort with additional funds?"

Picking up on Dr. Sihler's emphasis on social responsibility, Albert Brouwet, managing director of J. Walter Thompson, Brussels, told a luncheon gathering that public service advertising should bring about changes in traditional product advertising approaches.

Mr. Brouwet, who helped stage Europe's first conference on public service advertising two months ago in Brussels, said that with the growing need for communication in our society—which has certainly manifested itself in public service advertising—advertisers will have to think "public service" at the point of conceiving the product advertising.

"Can cigaret and alcohol advertisers continue to simply promote their products and ignore communications aimed at preventing or avoiding abuse of these products? Can advertisers of bicycles and motorbikes continue to simply advertise their products without promoting the creation of public infrastructure such as urban cycling paths and related facilities which maximize both the user's enjoyment and public benefit that these products can advance?" he posed. #

Spot tv sales sag seen

(Continued from Page 3)

ers face tougher and more expensive financing terms.

Without checking the record, Bud Hirsch, vp, NBC Spot Sales, had the impression over-all November retail sales on NBC owned tv stations are not down from last year, even with some local categories off. For example, auto dealership spending has fallen in California.

The quarter, he said, "will be no bonanza, but it looks comfortable," despite the fact that '79, like '78, did not produce the stimulus from substantial political spending and from NBC World Series telecasts.

There was a similar upbeat report from Jack Bonanni, vp-sales, ABC owned tv stations, who pointed to strong retail activity both from incumbent customers and from new ones being developed. As examples of lavish spenders, he mentioned Macy's in New York, and Marshall Field in Chicago.

A voice from the Midwest was less optimistic. Robert Schmidt, vp-general manager of KAYS-TV, Hays, Kan., said his national spot business in November and December is "very soft," with the first quarter outlook equally unpleasant. "I don't think it's based on network ratings," he said, "but I have to think it represents a certain amount of indecision by advertisers."

Compared to last year's prices, November SQAD prime estimates this year in the top 20 markets were up everywhere (modestly in most cases), except Tampa, where there was no change. The sharpest rise of 13.2% in Minneapolis Mr. Richfield attributed to marketplace activity generated by heavy promotion for a three-network affiliation switchover. (In passing, he said that NBC's improved evening rating position has tended to raise the average prime time fees for spot buyers.)

- Atlanta, still profiting from superstation attention, was second highest in the this-November-*vs.*-last analysis with an 8.4% rise. Late news, in particular, looked strong in Atlanta with a $57 cpp, higher than the level for a number of larger markets. Indies are not included in the prime and day cpps for SQAD, but their costs are factored into estimates for the other day parts in these monthly reports.

Looking ahead to 1980 budgets, SQAD's planners' guide offers these forecasts for prime time 30s for the first and second quarter of next year: New York—$308 and $353; Los Angeles—$244 and $279; Chicago—$162 and $186 and Philadelphia—$139 and $159.

This guide for advertisers and agencies offers cpps projections for all day parts in 200 markets for the next six quarters. #

AAF enters fray

FTC siege by Congress to run into '80

By RICHARD L. GORDON

WASHINGTON—Congress last week began the process of taking the Federal Trade Commission apart piece by piece but the surgery may drag on into the new year before it's over.

FTC critics in the House easily swamped commission supporters to approve an amendment that would kill FTC's proposed funeral sales rule. The vote was 223 to 147.

The House broke off action on FTC until after Thanksgiving, however, shifting the political action to the Senate this week where the commission faces even more serious trouble.

The American Advertising Federation jumped into the Senate fight by throwing its support behind a controversial bill that would not only kill more of FTC's controversial rule proposals—such as the children's tv ad rulemaking—but also rewrite FTC's basic authority over advertising.

Senate consumer subcommittee chairman Wendell H. Ford (D., Ky.) introduced the legislation earlier this month (AA, Nov. 12). While he delayed pressing for a vote last week, his aides said the senator is determined to have the full Senate commerce committee vote on his plan this Tuesday.

■ Senate and House leaders aren't banking on an early resolution of the FTC debate. They have lined up behind an emergency FTC budget measure that would keep the commission in cash through next March 15, giving Congress more time to debate its FTC options. FTC's current spending authority ends this Tuesday.

While suggesting technical improvements, the AAF is standing behind the most controversial sections of Sen. Ford's bill that would: Bar FTC from acting against "unfair" ads and limit the commission's advertising author-

(Continued on Page 92)

Elsie moo-ves back into ad limelight

By SAM HARPER

NEW YORK—During the Great Depression she was a mere calf, in the '50s she graced milk containers with her cheerful face and daisy-chain necklace, and in the '70s she all but disappeared.

But starting next year, Elsie will return as the central character in Borden Inc. dairy and services division's marketing plans.

"Borden is going to get back to basics," said Thomas Hagerty, vp-marketing for the dairy division. "Elsie is a familiar face in a sea of sterile corporate logos and is essential to the simple, honest image Borden wants to project in the '80s." The exec said Borden intends to lead the dairy industry out of flat sales by capitalizing on emerging growth markets.

The jovial vp for the Houston-based marketer said that the smiling cow will debut in an in-store promotion touting Borden dairy products as the products of the U.S. Olympic team. The effort includes an offer of t-shirts and sweat shirts printed with the flag of the buyer's choice. Profits from the offer will be donated to the U.S. Olympic Committee. Advertising is slated for 20 markets this winter.

■ Mr. Hagerty told ADVERTISING AGE that the promotion effort will be used as a "springboard" for a much larger corporate campaign to break later in 1980, also using Elsie as the central character. "Elsie's going to be right there in the middle of it all," Mr. Hagerty said. Though Borden and its agency, Della Femina, Travisano & Partners, would not be specific about ad plans, they did say that the 1980 corporate effort would be similar in theme to the current Pepsi and Coca-Cola commercials.

Speaking of Borden's advertising budget, Mr. Hagerty said the dairy division is reversing its history of limited spending. Ad expenditures in 1978 were a fraction of what they were in 1950 ... "something that will definitely change in 1980," he indicated. The dairy division's current ad budget is pegged at $5,000,000.

The division's milk, ice cream, cream and fruit beverages accounted for about 28% of Borden's $3.8 billion in sales last year, or about the same as the company's foods division. Borden's chemical division and international division account for 24% and 20% of sales, respectively.

The real Elsie

Mr. Hagerty cited the growth of the youth market and the health market as major reasons for the new advertising and promotion thrusts. "By getting involved with the Olympics we are going to attract the attention of the youthful and the healthful," Mr. Hagerty said. "There are big markets out there that we want to get to, markets that have been dominated by soft drink manufacturers for too long." He added, "By the time the 1984 Olympics roll around, we plan to be a force among the young."

Mr. Hagerty also pointed to the need for leadership in the dairy industry as a primary reason for Borden's coming marketing efforts. "Sales in the dairy industry were pretty flat last year. Not bad, but not great. On the whole the

Advertisers say 'Oui' to the new look, Hef not sure

Playboy one-shots may yield new books

By JACQUES NEHER

CHICAGO—Playboy Enterprises is planning to publish up to six new one-shot special interest magazines in the next two years that founder Hugh Hefner said could be eventually converted into monthlies.

The first special interest entry, tentatively titled *Playboy's Guide to Electronic Entertainment*, will be published next June, ADVERTISING AGE learned.

It will be 128 pages and contain editorial on stereo hi-fi, home computers, videotape recorders, videodisc and other state-of-the-art home entertainment gadgetry. The issue, which coincides with the Consumer Electronics Show, will be mailed free to Playboy's 2,200,000 home subscribers. Another 200,000 to 300,000 copies will be printed for newsstand sales, with cover prices to be tested at $1.50, $2 and $2.50.

The second special interest book, *Playboy's Guide to Fashion*, will be published next October. Two other guides, on photography and automotive, are being planned for the spring of 1981, while the company is more tentative about books concentrating on travel and food and drink.

"We're looking at these as one-shot spin-offs in areas where [*Playboy's*] ad support has been particularly strong," said Mr. Hefner at the company's annual shareholders meeting here last week. "They may well end up being repeated the following year, and then maybe quarterly or perhaps even monthly. It seems the sensible way to go."

Ad director Henry Marks later told AA the special interest books were originally conceived as an additional service to *Playboy* subscribers because "there just wasn't space in *Playboy*" for the service-oriented editorial the magazine wanted to provide.

But now Mr. Marks sees the possibility of the spin-offs soon becoming leading books in their fields because of a circulation that automatically tops long-established books. "Nothing comes even close in circulation. In the automotive field,

DeLorean shopping for agency

By LOUIS A. FANELLI

NEW YORK—Attention, small agencies with strong creative credentials: An estimated $10,000,000 car account will be yours if you can convince maverick auto builder John Z. DeLorean that your creativity can sell his new sports car.

Mr. DeLorean indicated his advertising needs last week during a press conference at the DeLorean Motor Co. offices here, where he spent approximately two hours discussing a new book he collaborated on and then withheld permission to print (AA, Nov. 12).

The book, "On a Clear Day You Can See General Motors. John Z. DeLorean's Look Inside the Automotive Giant," written by free lance writer J. Patrick Wright, purportedly takes a behind-the-scenes look at GM and its top execs. Mr. DeLorean spent 17 years with the automotive giant before leaving his $650,000 a year job as head of the Pontiac division.

■ As president and chairman of DMC, he is looking for an agency to handle the advertising for his new $16,000 sports car. Half of the ad budget, he said, will come from the company, while the remaining half will be put up by the British government as part of its industrial development campaign.

To date, DMC has been contacted by approximately six agencies but it has not yet begun a review and will not be in a position to select an agency until the beginning of the year.

According to Bill Haddad, DMC's vp-planning, "We are looking for a good, small, talented agency that will spend time with us. We want one small enough so that we won't be a cog in a wheel."

Because of the car's price—

last minute news

Miller Brewing shifts two brands to Ayer

MILWAUKEE—Miller Brewing Co. has reassigned two brands, one believed to be Oktoberfest (AA, Sept. 10), previously handled by Marschalk Co., to N W Ayer ABH. Earlier, rumors abounded that Philip Morris Inc. planned to drop Ayer from the Seven-Up business and switch it to Backer & Spielvogel, which handles other Miller business. The brewer declined comment and Ayer chairman Louis Hagopian added, "I have nothing to say," when asked for confirmation.

Paper-Mate conducting review for Flair

BOSTON—Gillette Co.'s Paper-Mate division is conducting a review for its estimate[illegible]00,000 Flair line account currently at BBDO. The incumbent reportedly is competing against McCann-Erickson, which has Paper-Mate's Eraser Mate pen, as well as another Interpublic shop, Marschalk. The three have prepared commericals that will be tested to decide the winner.

'N.Y. News' clings to No. 1 spot

By LEAH ROZEN

NEW YORK—Dow Jones & Co. employes get to keep their $200 bonuses, even though it now appears that the company's *Wall Street Journal* still trails the *New York Daily News* as the nation's largest circulation newspaper.

Dow Jones mailed out $200 checks (minus tax withholdings) to nearly 2,600 employes two weeks ago, along with a letter from chairman Warren Phillips and president Ray Shaw. The letter said the checks were their way of saying "thanks for all you have done to enable the *Journal* to excel in so many ways."

The celebrating was due to a statement of ownership and circulation which all papers are required to file by law. Published in the Oct. 3 issue, the *Journal* statement said its circulation for the preceding 12 months had averaged 1,616,860 daily and that on Sept. 28, the date nearest to filing, circulation was 1,709,754. In its comparable statement, the *Daily News* could muster only 1,576,118 daily for the year and 1,660,997 for the date nearest filing.

■ However, when the Audit Bureau of Circulations came out this month with its figures for the six months ending Sept. 31, the *News* was still on top with 1,607,040 average daily circulation to the *Journal's* 1,599,559 (putting the *News* ahead by 7,481 papers).

The *Journal's* top executives said the paper's second place finish "reflects our drop in circulation each summer as college subscriptions are suspended." Their assertion was backed up by the pattern in the *Journal's* ABC figures for the three preceding six-month periods: 1,636,254 as of March, 31, 1979; 1,493,387 as of Sept. 30, 1978, and 1,519,805 as of March 31, 1978.

The *News'* hanging-by-its-fingernails hold on the top spot makes it clear that the circulation slippage troubling the Tribune Co.'s tabloid has yet to be either halted or reversed. The latest (Sept. 30) ABC figures give the *News* a 1,607,040 daily circulation, down 2% (that's 29,214 papers) from the six-month period ending March 31. Just a scant year-and-a-half ago, the *News* showed daily circulation of 1,824,836 for the period ending March 31, 1978, which is 12% higher than current figures. (The Sept. 30, 1978, ABC figures were not used for comparative purposes for New York papers in this story; they were based on publisher's estimates due to the pressmen's strike that shut down New York's three major dailies for most of August, September and October in 1978.)

■ Even more worrisome to *News* execs is Sunday circulation, which is sinking faster than daily circulation. The latest ABC figures put the *News'* Sunday circulation at 2,238,344, a 4% drop from 2,328,479 last March and 15.7% lower than March, 1978.

A *Journal* spokesman said the

INSIDETRACK™
Pollenex
INSIDE TRACK
Computerized Fitness Machine

"It's the end of every excuse for not being fit," claims commercial for the Pollenex Inside Track computerized fitness machine. Introduced at the housewares show last summer (AA, July 16), the machine retails for about $250, and is getting its first ad drive beginning Nov. 26. The machine records time spent running or walking, distance and calories burned with digital readouts. McCann-Erickson, Chicago, is the agency.

Nevin sees slow Firestone rebound

By JACQUES NEHER

CHICAGO—It's going to take a lot more than clever advertising to brighten Firestone Tire & Rubber Co.'s badly tarnished image, according to the company's new president, John J. Nevin.

"Image tends to come from people's own experiences with your product, not necessarily from what people read about you. The process of putting out products that perform well is the ultimate answer to improving that image." Mr. Nevin told ADVERTISING AGE in a phone interview from his home in Winnetka, Ill.

The-quality-goes-in-before-the-name-goes-on philosophy is a natural for Mr. Nevin, who quit as chairman of Zenith Radio Corp. last month (AA, Oct. 29) to take the second-highest position for the world's second-largest tire maker. He is heir-apparent to the position of chairman when Richard A. Riley retires in 16 months.

While acknowledging that "advertising is one of the very useful ways to communicate the features of your product and stimulate confidence," Mr. Nevin predicted it would take years of producing quality tires for the company to fully recover from its long drawn-out battle with the National Highway Traffic Safety Administration, which last year ended with the "voluntary" recall of all Firestone 500 radial tires—the largest and costliest ($234,000,000) recall in history. Last July, Firestone president Mario DiFederico took early retirement.

J. Nevin

Mr. Nevin, who moves into his new Akron office Dec. 1, admitted that he doesn't know much about the rubber industry, but noted: "With my automotive and marketing background I might be able to learn fast." Before Zenith, Mr. Nevin spent 17 years in planning and marketing with Ford Motor.

"I don't have a set of plans or attitudes or positions that I'm carrying into the job. It'll take some period of time to understand what is being done by hearing out the current management," he said.

The 52-year-old executive said he was "under the impression" that Firestone had suffered "no significant loss" of market share since the recall controversy, and emphasized therefore that the "highest priority" will be given to improving the company's profits.

However, according to industry sources, Firestone's share of the passenger replacement market decreased from 11.8% to 10.1% last year and Firestone is expected to register a similar percentage in 1979. Based on a total replacement market of about 135,000,000 tires, that loss translates into 2,295,000 tires, a good part of which is going to the rapidly expanding Michelin Tire Corp. Michelin's share of market increased from 4.4% to 5% last year and the French tire maker's share is expected to advance at least another percentage point in 1979.

Firestone's problems, however, did not adversely affect its business in the 53,000,000-unit original equipment market, where its share increased slightly to 23.5% last year. Goodyear Tire & Rubber Co.'s share of the market, on the other hand, dropped from 34% to 31.5%, although it still had a solid hold on the top spot. #

Magnavision disc player rolls

By BOB MARICH

UNIVERSAL CITY, CAL.—The Magnavision Optical Videodisc Player will stick to its test theme, "Magnavision. The world on a silver platter," for its planned national rollout next year.

The only consumer disc unit currently sold in the U.S. is now available in only two markets.

Besides movies, software will include sports and educational programs that consumers "don't see in commercial broadcasting," programing that can exploit Magnavision's slow motion and freeze frame capabilities, said an executive.

The Fort Wayne, Ind., unit of North American Philips, New York, produces the player while MCA Inc., the entertainment conglomerate here, is acquiring programing and manufacturing discs. Magnavox vp-advertising and pr Rita Hutner said the player, with a retail price tag of $775, will be in all major markets by the end of 1980, but she declined to specify the rollout pattern.

Retailers in New York and Chicago contacted by ADVERTISING AGE said that Magnavox promised delivery in January, but some expressed skepticism that the target date would be met. Los Angeles and San Francisco retailers are expecting the players around April.

If Magnavision does make its planned introduction date, it is likely to be a step ahead of RCA's SelectaVision videodisc system—whose marketing plans will be announced in early December. The RCA player, which has a stylus-in-groove pickup like a record player, is not compatable with the Magnavision system, which uses a laser beam to "read" discs. (Neither system has a record capability but both are expected to be less expensive than videocassette recorder systems.)

■ Magnavox's agency, William Esty Co., New York, created the "silver platter" campaign which Ms. Hutner said was "very effective" in Atlanta and Seattle tests. Although Magnavox is conducting an agency review, expected to be concluded by February, Ms. Hutner said that "you can't just stop all activity" and intends to proceed with the rollout. The review involves all Magnavox product lines.

While declining to discuss ad expenditures or sales projections, Ms. Hutner said that local print and local tv is planned to back market-by-market introduction "because of the newness of the product, I feel a visualization [in print or tv] is necessary," she said.

MCA software—discs marketed under the consumer trade name of DiscoVision—will be sold simultaneously with the players because "one is no good without the other,"

Vcr device that deletes ads now on the market

VASHON, WASH.—A small electronics company here has started marketing a device called The Editor that it says automatically deletes most tv commercials from home videocassette recordings.

"Eliminate commercials automatically with The Editor," says print advertising in video enthusiast magazines.

The company, Shelton Video Editors, has sold about 1,000 devices in two months, priced at $250 each, and plans to boost production to 3,000 units per month, according to Keith Hodson, vp. Mr. Hodson said there are no plans to expand the in-house-created print campaign to general publications because the product is receiving much publicity in the press.

Shelton offers a one-year warranty and 14-day money back terms on mail order sales for The Editor, which also is sold over-the-counter.

- The device, which Mr. Hodson said "is approximately 95% effective," is triggered by the screen fading to black with no audio, which occurs before a commercial break. About half the size of a cigar box, The Editor restarts recording once it determines that commercials have ended.

"One of the drawbacks is that once the commercials end, there is up to a 30-second delay before the machine starts recording again," Mr. Hobson said. "So some programing is deleted."

He added that the device reads advertisements by "hunting for certain perimeters which commercials fall into" such as standard lengths of 10, 30 and 60 seconds.

- Mr. Hobson also said that "it is very close to impossible" for a fade to black and no audio in the middle of programs to trip the device because of refinements made in testing. The "principle" of The Editor has been patented and at least one imitator has been stopped through legal action from nearly duplicating the device, Mr. Hobson added. #

Okla. Publishing forms film, tv production unit

Oklahoma Publishing Co., Oklahoma City, whose holdings include newspapers, magazines and the Gaylord group of tv and radio stations, has established a Los Angeles-based motion picture and tv production company. Gaylord Productions plans to develop feature films, tv movies, miniseries, pilots and specials and syndicated tv programs under Elmo Williams, exec vp in charge of production. Edward L. Gaylord, president and chairman, Oklahoma Publishing, is chairman-ceo of the production company while James Terrell, exec vp, Gaylord Broadcasting, is president.

Survey finds third-party card use up

NEW YORK—Retailers, especially specialty stores, experienced an increase in third-party credit card transactions in 1978, according to a National Retail Merchants Assn. survey of its 35,000 members.

In all department stores with sales more than $1,000,000, 3.08% of 1978 sales—compared with 2.14% in 1977—were made via non-private label credit cards, such as Visa and Master Charge. Department stores with sales between $1,000,000 and $2,000,000 had the largest percentage of third party transactions—18.15%.

Specialty stores with sales more than $1,000,000 increased such transactions from 8.3% of total sales in 1977 to 9.96% of total sales in 1978. Specialty stores with more than a $5,000,000 volume attributed 10% of their sales to these cards. #

A cookieful of
Nestlé
COOKIE MIX
SUGAR
PEANUT BUTTER

The first campaign for Nestle Co.'s cookie mixes by N W Ayer ABH positions the line as "a cookieful of taste." Tv spots aimed at mothers show children singing the praises of the four different cookie varieties—sugar, oatmeal, chocolate chip and peanut butter.

Reynolds holds its lead

NEW YORK—R. J. Reynolds Industries continued its streak as the leading magazine advertiser in September, a month when ad expenditures rose 9% and ad pages climbed 1%.

Reynolds, which upped its magazine budget 103% to almost $12,000,000, has held the top spot for seven of the preceding nine months. In April, Reynolds relinquished the lead to General Motors and in June to Seagram Co. In both those months it held second place.

Philip Morris Inc., which had been the third or fourth largest magazine spender every month this year, advanced to second place, with a 58% budget hike. In August, it had been No. 3.

Seagram slipped to the No. 3 spot, though the liquor marketer increased its magazine advertising budget 10%. Loews Corp., parent company of cigaret maker Lorillard, moved up two spaces to the fourth slot with a 92% increase, a percentage increase matched by B.A.T. Industries, which held fifth place. B.A.T. owns Brown & Williamson Tobacco.

- Procter & Gamble slid two notches to sixth place, although the nation's leading advertiser increased its magazine expenditures by 15%. With a similar increase (16%), General Foods Corp. moved from the eighth to seventh slot.

Time Inc. raised its magazine expenditures 19% over last year to advance one position to ninth place.

Oddly, American Broadcasting Cos. and CBS Inc., the eighth and 10th leading magazine advertisers, respectively, were the only advertisers of the top 10 to trim their magazine budgets: ABC by 14%; CBS by 10%. Both were absent from the August top 10 list. In joining the biggest advertisers in September, they force American Brands and General Motors Corp. off the list.

Cigarets & tobacco was the top product category once again, as well as having the greatest percentage hike—77%. Toiletries & cosmetics remained the second largest category after spending 28% more in magazines this September than the category had spent in September, 1978. Beer, wine & liquor spent 24% more and were the third largest product category again.

- The automotive group, which had the largest magazine advertisers in March, April and May, tumbled from fourth to last place in September. The car dealers and manufacturers also cut their magazine spending 34% from September, 1978.

Eighth-place retailers & direct marketers also cut back 4%, while fifth-place publishing & media trimmed magazine advertising by 9% and sixth-place food & food products cut back by 11%.

Data in the accompanying chart was compiled by the Leading National Advertisers for the Publishers Information Bureau and ADVERTISING AGE. #

AN ORGANIZATION THAT TEACHES YOUNG MEN HOW TO FULFILL THEIR DREAMS

That's the Jaycees, a young men's leadership training organization.

Over the last 60 years, millions of young men have learned how to dream in the Jaycees, then translate those dreams into action. Men such as Gerald Ford, Charles Lindbergh, Warren Burger, Hubert Humphrey . . .

Today there are 385,000 of those "dreamers" realizing their potential in 9,200 communities around the country. They are philanthropists for the young and aged. They are opinion-leaders for the progressives and conservatives. They are fundraisers for the retarded and handicapped. They are social benchmarks for the Joneses and the folks next door.

Here's how these pragmatic leaders stack up:
$21,027 Mean Income
28.8 Average Age
27% Self-employed
47% Contact Government Officials

Sedate years

(Continued from Page S-51)

owners who are not as solidly based," says Jay Smith, business manager of the *Dayton Journal Herald* and *Daily News*, both owned by Cox Enterprises, Atlanta. "Chain ownership gives editors more strength against advertiser pressure, and thus a more stable base on which to stand."

Some feel as Donald Dwight, publisher of the *Minneapolis Star* and *Tribune*, does when he says: "The jury is still out."

Mr. Dwight, who confesses to having some "negative" feelings about more concentration, says he worries about the bottom line of the balance sheet mitigating against community concerns. On the other hand, he believes group ownership enhances newspapers' abilities to compete with other media.

▪ To Gordon Phillips, director of promotion and public relations of the *Los Angeles Times*, it is difficult to make generalizations. "In some cases, large companies can and do substantially improve the newspapers they acquire," he says. "In other instances, this is not true."

Mr. Phillips' view reflects the content of a lengthy article run last year in his paper and written by the *Times'* media reporter, David Shaw, about the effect chains have had on individual newspapers.

However they feel about acquisitions, newspaper execs do agree on one thing: There will be more of them.

One other thing they agreed on—and with less hesitancy—is the ability of computer technology to gobble up more and more functions of the newsroom, production and circulation. Even the tv show "Lou Grant" has switched from clacking typewriters to beeping computer terminals.

The technology basically comes in two parts. One is in the composing and press rooms, where newspaper execs see the possibility of having a story or ad go from its source virtually directly onto a page. Some of this would involve direct transmission of ads, via satellite, from the advertiser or agency to the newspaper.

▪ The other part is the advent of transmission of news and ads directly to the consumer through home computer terminals or tv sets, an idea that has gone past early experimental stages.

The spinoffs of these developments, of course, would be far reaching. Innovations in composition and production would improve speed and reproduction qualities, making newspapers a more attractive buy for advertisers. Press room capabilities would enable the newspaper to be circulated with more demographic precision. A paper's ad staff would be able to use computer analysis to improve their sales pitches.

▪ The specter of over-reliance on technology, possibly creating fundamental problems in the relations between the various operations of a newspaper, is of lesser concern. "I feel the emphasis," says William Keating, president and publisher of the *Cincinnati Enquirer*, "will be switched to use computers as a management tool rather than a production machine." Computer technology, indeed, may already be showing its financial value through the much revered efficiency it produces.

Yet there are problems today that cut deeply into the industry's heart. One of them—certainly one widely discussed within the industry—is the slipping clutch newspapers have had on national advertising dollars. Measuring about 7.7% of the total in 1978, the rate is hardly where many marketing execs at newspapers would like it to be, 10% and above.

▪ Retail advertising, of course, has been the backbone of the industry, but more national ad dollars would help secure a better position newspapers have *vis a vis* other media, especially tv. One problem here, however, has been the inability of newspapers, with their various sizes and ad structures, to agree on the best way to meet the problem.

Newsplan, a method of offering discounted rates to national advertisers who run a block of ads, is emerging as a promising solution. Newspaper marketing execs are looking at it with guarded optimism, underscoring their hope that newspapers and advertisers and agencies can work out their differences.

Mr. Phillips of the *Los Angeles Times* is particularly high on the plan. "The publicity [it has received] is very richly deserved," he says, "because nearly 900 newspapers have changed their national advertising price structures in an effort to make themselves more uniform and attractive to the national advertiser. Never before have newspapers been able to act in such a widespread uniform manner."

Mr. Dwight of the Minneapolis papers believes that the key is the need for the newspaper industry to "standardize and simplify national ad buying." And, as many of these execs intimate, Newsplan is just a start with which they will meet the new decade.

▪ What that decade promises to deliver is somewhat discernible by the developments of the last few years of the '70s. The business end of newspapers has been through much—much more advertising, much more plant and equipment investment and much more concentration of financial power.

This, it seems, is where the action is today. It is perhaps more than coincidental that of all sections of newspaper editorial coverage the one that has grown the most, especially among bigger papers, is the business section. Not only have newspapers been expanding their coverage of the business world, but also their involvement in that world itself has grown. #

QUICK-NAME THE SOUTH'S FASTEST GROWING MARKET.
WRONG!

If you named any place but Charlotte, North Carolina, you made a big mistake.

In a recent poll of the region's 34 largest SMSAs conducted by South magazine, Charlotte was ranked #1 in growth.

From November, 1977, to November, 1978, Charlotte gained:
6429 new jobs
280 new plants or expansions
$305 million invested
$38 million in added payroll.

And to reach the south's fastest growing market, we've got the media answer — The Charlotte News and The Charlotte Observer. 90.7% penetration in Mecklenburg County with a 66.8% penetration for the metro area.

It's the perfect combination — the south's fastest growing market and the market's largest morning and afternoon papers.

For more information, contact Gene Williams, Vice President and Advertising Director, at 704/374-7087 or contact your local Knight Ridder representative.

Now, when someone asks you where the action is in the southeast...try not to look too smug.

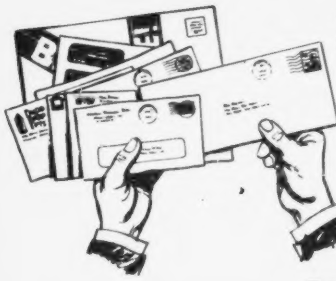
If you know your prospects' names . . .

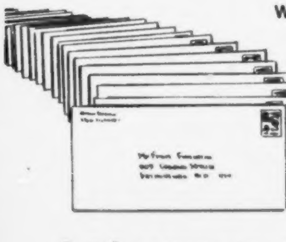
send them personal letters!



There's no other form of marketing communication that works as well. Your message comes across on a one-to-one level. One identified person talking to another. That's probably the way you communicate now with a select few prospects and customers. Wouldn't it be great if you could send a *personally typed* letter to everyone on your mailing lists?

Dear Ms. Sterling:
Tha

Now you can use this powerful communications tool to reach hundreds . . . thousands . . . of your prospects. Wordex makes it possible. We're not talking about computer letters, offset letters, chesire labels . . . or anything else with the obvious mass-produced look that gets lowest priority for reading time. We produce individually typed, addressed and signed letters on your letterhead. Every one looks exactly as if your secretary typed it and you signed it.



Wordex can do everything . . . including affixing stamps and mailing. And we'll maintain your lists, track performance and handle follow-up. All for significantly less than it would cost you to do it yourself.

Personalized communication commands attention . . . and gets response. Wordex will personalize your communications to all your lists, whatever the size. Call or write for complete information on Wordex services.

Let WORDEX work for you.

THE 2-BILLION DOLLAR WOMAN.

DIARIO LAS A
Ejecutad
5 Al

She's alive and well and living in the Greater Miami Latin Market

That' right! She's Latin.
And she's affluent. As a matter of fact, she's worth $2-billion each and every year.

$2.2-billion, to be exact*. For that is the aggregate annual income of the more than half-million Spanish-speaking people making up the Greater Miami Latin Market.

Being affluent, this 2-billion dollar woman spends a lot of money. On food. On fashion. On jewelry. On cosmetics. On decoration. On her home. On her kids. On her husband. On her whole family.

Oh!, yes, she's very much family-oriented. Her activities revolve around her whole family. And it's a large family, averaging 3.4 members per household*

But for you--the advertising decision-maker-- the most important aspect of this 2-billion dollar woman is that she speaks and reads in Spanish. Not only does she speak and read it, but she lives, breathes and thinks in Spanish. Therefore, she makes her buying decisions in Spanish.

And the place she goes to every day to get help in making those buying decisions is DIARIO LAS AMERICAS. The No. 1 Spanish-language daily newspaper. Particularly oriented to her and her family.

Make sure you get your fair share of this 2-billion dollar woman. Reach her by advertising in DIARIO LAS AMERICAS

Syracuse.

If it plays here, it'll play everywhere.

The old stars of vaudeville used to make an observation you'll appreciate:

"If it plays in Syracuse, it'll play everywhere."

That's the show business way of saying the Syracuse market is full of critical, discerning consumers who correlate to the national profile.

In short, it's the perfect test market.

Manageable size. A strong, stable economy. Two strong daily papers, morning and evening, and a powerhouse Sunday edition — a combination that delivers 87% penetration of the SMSA. TV affiliates for all three networks. And 19 AM and FM radio stations in the metro area. There is excellent media balance and isolation with no spill-in and very little waste. From a media buyer's viewpoint, Syracuse is ideal.

In addition, you'll find demographics that are easily projectable to the national average. And a median household income only $874 above the national average.

Ask any of the nation's top food marketers. They've made Syracuse the #13 market in the country for total food lineage.

Or ask any old vaudevillian. We'll do everything we can to help you have a successful test. Just ask. Call The Syracuse Newspapers at 315/473-7765.

HEADLINES

"GOOD MORNINGS"
ARE BRIGHTEST IN OAKLAND

EASTBAY TODAY is the new sunrise edition of the Oakland Tribune . . . an innovative product that boasts the latest news deadline of any morning paper in the area.

It offers the Bay Area comprehensive world, national and regional news reports presented in an orderly and well-anchored manner day-after-day. Separate peach-colored Sports and Business sections round out the package giving readers a bright start to each new day.

With strong morning distribution to commuters, EASTBAY TODAY taps the cream of the Eastbay market: executive and professional workers, men and women in the prime 25 to 49 year age group with above average discretionary income. In short, the Eastbay's best sales prospects.

EASTBAY TODAY and the OAKLAND TRIBUNE offer advertisers a powerful one-two punch for reaching Northern California's biggest and best markets.

And best of all, both morning and evening editions are included at The Trib's regular daily rate.

Suddenly, "Good Mornings" are brighter . . . TODAY.

For more information, call Bill Lavine at (415) 645-2521 or contact any Gannett Newspaper Advertising Sales regional office.

An industrywide problem

Shortage of newsprint creates a drag

BY BARBARA BONHAM

CHICAGO—The current tight paper supply is a fact of life for newsprint-hungry publishers throughout the U.S. The shortage is the combined result of an increased demand for newsprint caused by a strong growth in advertising pages, a number of pulp and paper mill strikes in the western U.S. and eastern Canada and the lagging pace of new plant capacity coming on-stream to meet demand.

Most industry analysts agree that the current newsprint crunch will continue through next year and ease off in the early '80s as several new paper mills reach top production capacity.

- Statistics from the American Newspaper Publisher's Assn., Washington, indicate that the average newspaper's inventory for the first half of 1979 amounted to only a 27-day supply, with another seven-day supply in transit. Last year, most papers had a 38-day supply available.

Nick Nocella of ANPA said, "The newsprint is there, but you can't always get at it."

The Canadian paper industry makes about two-thirds of the newsprint used in the U.S. Recently, Canadian supplies have been crimped by a strike at a mill in New Brunswick and by short strike-enforced closings in British Columbia.

These labor problems have forced many publishers to dip into overseas newsprint, especially paper from Sweden, Finland and Japan. The *Wall Street Journal* said that 1979 was the first year of significant buying from overseas suppliers since 1976.

Newsprint from Japan has been unloaded on docks in Los Angeles, and newsprint from Finland has been delivered to both San Francisco and Los Angeles. According to the U.S. Census Bureau, Charleston, New Orleans, Houston and San Diego have also received newsprint from overseas.

Newspaper publishers are paying high prices for overseas paper. Although purchasers won't disclose the actual costs, estimates run as high as $550 per ton, almost $200 more than the estimated going rate.

With U.S. newspapers posting strong gains in advertising linage, analysts forecast more buying from overseas. The amount may reach 100,000 tons in 1979, and it is convincing evidence of a seller's market. If the 100,000-ton level is reached, it will be the biggest year for foreign newsprint makers since 1974, when 213,000 tons came to the U.S. from suppliers other than Canada.

- In addition to buying from overseas, publishers are purchasing newsprint from each other, when possible, and paper mills are digging into their rapidly depleting inventories to meet customer demands.

A major result of the newsprint shortage is the rising cost of newsprint from North American suppliers. On Nov. 1, Canada's Abitibi Paper Co., one of the world's largest producers of newsprint,, raised prices from $345 to $375 per ton. On Oct. 1, Consolidated Bathurst Ltd. announced that a similar price increase went into effect, and on the same day, Great Northern Nekoosa imposed an 8% price increase on most major products. Industry analysts predict similar newsprint cost increases will spread throughout the country.

A case study in inflation is the *Chicago Tribune's* history of newsprint purchasing. In 1974, the *Tribune* paid $203 per ton of newsprint. The price rose to $259 in 1975 and $285 in 1976. Today the paper pays about $375 per ton.

Prices may continue to soar, but the problem of newsprint availability should level off. New mills are being started in a number of states, including Georgia and Washington. Because of the new mills, newsprint production in the U.S. and Canada is expected to climb 3.9% in 1980, 4.5% in 1981 and 5.6% in 1982. The American Paper Institute, New York, predicts that the annual demand for newsprint is expected to rise by only 2.5% in the same time period.

- Most newspaper publishers seem resigned to coping with the shortage. Robert M. Hunt, president and publisher of the *New York Daily News*, emphasized that the paper shortage is affecting all publications, and both coated and uncoated stocks. "It is forcing management to find ways to creatively reduce waste," he said.

Smaller newspapers are also feeling the crunch. John Dewy of the purchasing department of Gannett Newspapers in Rochester, N.Y., sees the shortage as something newspapers will just have to live with

Dick Suthers, *Chicago Sun-Times* newsprint manager, believes the blame for the shortage isn't completely in the mills' hands. "Some publishers played a hand in their current shortage by reducing their inventories in 1977 in an attempt to reduce their cash flow and be cost conscious," Mr. Suthers said. He predicted that the shortage will ease around July.

Currently, the *Sun-Times*, like most other major publications, is trying to be economical mechanically. The paper is also making sure that no space is wasted between columns and that newsprint-saving policies are enforced in the pressroom.

- The *Los Angeles Times* feels the shortage only moderately because the paper owns mills, which provide 75% of the newspaper's annual paper supply. However, one official said the *Times* is also trying to control waste carefully and eliminate nonpaid subscriptions.

Ironically, the current economic slowdown probably won't help ease the paper shortage. There are few signs of a slowdown in demand for newsprint, and most paper mills are running at full capacity. Demand for newsprint is still far greater than the available supply. It will probably take several new mills and a couple of years before the situation clears. #

Winston's drop to No. 2 doomed DFS

By JOHN J. O'CONNOR

NEW YORK—Despite Dancer Fitzgerald Sample's expressions of "shock and surprise" at having been fired as the agency for Winston cigarets, a source close to R. J. Reynolds Tobacco said that "Dancer would have to be blind not to realize it was in trouble."

"It was a business decision," William D. Hobbs, RJR Tobacco chairman, said of the announced Jan. 1 move of Winston to William Esty Co.

In gaining Winston, a $40,000,000-plus account, Esty yielded the Camel cigaret line, billing more than $30,000,000 this year, to Batten, Barton, Durstine & Osborn. But Esty keeps Salem, the second largest brand behind Winston in the stable of the nation's No. 1 cigaret company.

- "It was shabby and shoddy," Stuart B. Upson, DFS chairman, said of the Reynolds' action. "It's sad that a big company would act in such a manner."

In his internal memo, Mr. Upson said, "I am particularly incredulous because we are doing exceptionally good work on Winston. Our new advertising has tested extremely well. Our Reynolds account, creative and media people have done a superb job under the constant heavy pressure inherent in the cigaret business. We do not take a back seat to any Reynolds agency, in any way. On the record, I believe we have outperformed all the rest."

Mr. Upson was referring to the new Winston ads for Winston and Winston Lights that broke in recent months. The agency apparently felt RJR, based in Winston-Salem, N.C., was well satisfied by the efforts.

- Execs at other Reynolds agencies took turns shooting down some of Mr. Upson's remarks. "Look at the record," said one. "Winston was No. 1 in sales when Dancer succeeded Esty on the brand in 1974. Winston is now No. 2 (behind Philip Morris' Marlboro) and continues to decline. Dancer had five years on Winston. Who have they

Life Savers, Chicle ready for candy roll market clash

By SAM HARPER

NEW YORK—Life Savers Inc., traditionally the aggressor in pitting its products against those of American Chicle, is leaving comparative advertising to its archcompetitor this time as the two gum and candy marketers gear up for a head-on marketing collision in the sugar-free, fruit-flavored roll candy segment.

Life Savers' Sweet Nothings, tested late last year in Green Bay, Peoria and Tucson, and introduced nationally two months ago, will be the subject of a major advertising effort that will steer clear of comparisons and focus on taste, according to Jerry Pulley, exec vp at the Squibb Corp. subsidiary.

Introductory commercials for the fruit, cherry, assorted and mint-flavored candies will begin this week with larger ad schedules slated for January.

American Chicle, on the other hand, will use commercials comparing its new sugarless Trident Candy Fruits with Life Savers' 70-year-old roll candy containing sugar. The new product from the Warner-Lambert unit was launched in Omaha earlier this month, but a source at Ted Bates & Co. confirmed that a national rollout is due soon. The candies come in grape, cherry and assorted flavors.

- "We expected Chicle to follow us into this category," Mr. Pulley said. "We've been the innovator behind other products, and Chicle always is right behind us." He added, "Now we're coming out with an innovative hard candy and, sure enough, here comes Chicle."

While Chicle did follow Life Savers' Bubble Yum into the soft

What can be conceived can be created
Ferrari

Shifting into advertising, Ferrari North America, a division of Turin, Italy-based Fiat, kicked off its first U.S. campaign with an ad in the *Wall Street Journal*. The company will spend approximately $500,000 through 1980 to promote its $40,000 sports car. Ads are in *WSJ* and upscale magazines. Hank Forssberg Inc., Hackensack, N.J., handles.

'Time' working on way to offer readers a talkie

By JACQUES NEHER

KANSAS CITY—*Time* soon may be making waves. Sound waves.

Time Inc. now is sewing up a licensing agreement that will give it the technology to produce the first talking magazine—an innovation that could add the dimension of sound to both editorial and advertising in *Time* within a year.

"We have a talking magazine . . . we are working on one right now," Malcolm Ochs, research director, *Time*, told a stunned audience of media buyers and planners at ADVERTISING AGE's Media Workshop here last week.

"There is technology available right now that can imprint grooves right on the page of the magazine," Mr. Ochs explained. "You then have a little box—a scanner—that goes over these grooves and can actually pick up the voice that's impregnated in them."

- Mr. Ochs said the development could allow readers to hear segments of speeches or other quotations reported on the printed page.

"This adds sound to the sight," he added. "If you did something like that with an advertisement and could get another minute's worth of copy onto your printed page, you could do a lot more with your ad than just the regular color or black and white layout."

Because the recording would be a part of the page, Mr. Ochs said, the magazine would be able to "get around" postal regulations that prohibit the inclusion of separate sound recordings for mailings at the regular second class rate.

Mr. Ochs and Time Inc. refused

P&G, GM pare tv? Nets say no

By JAMES P. FORKAN

NEW YORK—Reports that major spenders like Procter & Gamble and General Motors' Chevrolet division are slashing ad budgets, especially in network tv, prompted quick denials from the nets, who maintain that their sales climates are healthy into 1980.

P&G is said to be chopping up to $30,000,000 off its total ad expenditures, and allegedly tv—chiefly NBC daytime—would be the big loser. In Cincinnati, P&G's only official comment was that it has no plans to cut back on its NBC soap opera, "Another World."

- According to reports, part of the $30,000,000 will be moving into a broadening of P&G's magazine list beyond the women s service books. P&G began putting more of its money into magazines in 1974 and since then has tripled actual magazine dollars to perhaps $40,000,000 or more this year.

Chevrolet, which has decided not to renew basketball and golf packages, said its move was "absolutely not a budget cutback."

NBC execs professed surprise at the speculation about a P&G reduction in daytime or any other daypart. "They're very strong with us. There's nothing like that [major cuts] happening." Indeed, one said, "P&G just made a couple of new buys in the last month."

- Despite the P&G silence and NBC denial, some agency buyers steadfastly maintained that P&G's cuts take effect in the remaining weeks of the final quarter and stretch at least into January. These sources added that they themselves have bought some of that vacated time at bargain rates. They could not explain the rationale behind the P&G move.

One NBC exec suggested the cutback reports may have been triggered in part by published reports that P&G's "Shirley" prime time series was on its last legs. That series has not been canceled, he said, and looks "secure" since it has built, hitting a satisfactory 29 share in the Nielsens for the week ended Nov. 25.

Some rival network salesmen, too, said they were unaware of any big P&G reduction. The latest P&G drama special due in "Seizure" (subtitled "The Story of Kathy Morris") which will fill two CBS prime time hours on Jan. 9.

- There also was some confusion surrounding Chevrolet's decision

FTC 'restructuring' power survives Senate test

WASHINGTON—The Senate commerce committee Friday balked at acting on a proposal to strip FTC of its power to "restructure" industries as commission staffers have proposed in cases against the oil and ready-to-eat cereal industries. Earlier support for the proposal (AA, Nov. 26) evaporated as all seven committee Republicans said they opposed the plan.

M-H decides against starting 'Muse'

NEW YORK—McGraw-Hill Publications Co. has decided not to publish *Muse*. Its first consumer monthly magazine had been slated to bow in April. M-H Publications president Paul McPherson noted that reaction from potential readers and advertisers was favorable but "circulation test results do not jusfity continuing this project." A pilot issue came out in October.

CBS 'looking good'; ABC looking ahead

By COLBY COATES

NEW YORK—On the 28th and final night of the November local ratings sweeps, CBS-TV was "looking good."

In the latest twist to a prime time tv season that's already produced one startling development after another, CBS captured the sweeps with a 20 rating, according to Arbitron, and a 20.1 rating as measured by Nielsen.

ABC-TV, the winner of every November and February sweeps since 1975, finished second in both polls with 19.6 (Arbitron) and 19.7 (Nielsen) ratings with NBC-TV in third place with a 17.7 from both.

In general, sources attributed CBS' win to the blockbuster performance of a half-dozen series throughout the month, as well as the substantial numbers generated by theatrical and made-for-tv releases over the last two weeks.

Although some sources tended to hang a "brilliant strategy" tag on CBS, others thought the larger issue was the continuing decline of ABC. Subpar numbers for the three-part "French Atlantic Affair," "The Birth of the Beatles," "When She Was Bad," as well as a number of specials run in to fill other weak links, also were thought to have aided CBS.

Moreover, since NBC made the decision to unleash some of its blockbuster theatricals and made-for-tv movies early in the season to insure a quick ratings getaway, the network's November arsenal wasn't as meaty as NBC would have liked. For the long haul, however, observers generally think NBC's strategy was the right one.

Some preliminary results from the sweeps suggests that CBS was the only network to post a gain in share of audience this year vs. last. And, in terms of ratings, CBS was the sole network to post any substantive ratings gain. While NBC was about unchanged from a year ago, ABC was a ratings loser.

ABC is betting, however, that its newly devised second season schedule and Winter Olympics coverage in February will reverse that trend.

For the second season, ABC will introduce seven new programs—a mix of hour shows and half-hour

Crain plots 'Collector-Investor'

THE
COLLECTOR
INVESTOR
THE INTERNATIONAL MAGAZINE OF ALTERNATIVE INVESTMENT

Something for investors

The realm of tangible investments including antiques, coins and fine stamps will be explored in the new monthly magazine, *The Collector-Investor.*

CHICAGO—A new monthly magazine aimed at the fast-growing market of institutional and individual collectors will be launched this spring by Crain Communications Inc., publisher of ADVERTISING AGE and 14 other publications.

The Collector-Investor, printed on glossy paper in an 8½x11-in. format, will concentrate on investment aspects of the top end of the collecting world. Major categories for editorial coverage will include fine art, antiques, Oriental carpets, coins, jewelry, stamps and classic model automobiles, as well as the newer investment-grade "collectibles."

"The magazine will report on all aspects of these tangible forms of investment, ranging from advice about prime investing areas within the total collecting market, to detailed tips about insuring and caring for your Dresden china and precious jewelry," said publisher Steven Yahn. "Of course, since these markets are international, we'll be covering our beats on an international basis, with correspondents around the world."

- To target the magazine at key investment decision makers in the U.S. and overseas, *C-I* will have an initial controlled circulation of 20,000 top corporate executives and investment advisers. This includes about 10,000 U.S. corporate chief executives and high-level financial officials, and about 10,000 investment advisers at banks and other institutions in the U.S. and overseas.

A b&w page will cost $2,500, and a four-color page $2,950. Subscription price is $20 per year; newsstand price is $2. The magazine is scheduled for introduction in late March with an April cover date.

Among a roster of regular features will be an in-depth examination of one market—in the premiere issue Oriental rugs will be highlighted. Other regular features include "Auction Block," an analysis of action at the big and small auction houses, and "Counting House," a section devoted to charting the investment performance of a variety of alternative investments.

"With the difficulties in traditional investment markets in the last 10 years, we're sure that top investment pros around the country will have professional—not to mention personal—reasons for carefully watching the burgeoning alternative investment markets," noted Rance Crain, editorial director and president of Crain Communications.

Mr. Crain added that *The*

COSTS OF CIGARET ADVERTISING 1978-1972 89

Vol. 50, No. 51—Advertising Age (ISSN-0001-8899) is published weekly except semiweekly the second week in March, the first week in September and the third week in December at 740 N. Rush St., Chicago, Il. 60611. Second class postage paid at additional mailing offices.

CBS sells 5 minutes to Carter team

WASHINGTON—Candidate Jimmy Carter will have the network tv launch this week that his reelection strategists have been counting on, but it will be a 5-minute program at 8:55 p.m. (EST) this Tuesday, and not the half-hour program his aides have been battling to buy from the networks.

The Carter team bought the Tuesday slot from CBS late last week after the three nets had gone to federal court to fight a Federal Communications Commission order that a bigger prime time slot had to be made available this month for Presidential campaign commercials.

- The Carter campaign also bought 5-minute prime time segments on independent tv stations in Atlanta, Chicago, New York, Los Angeles and Washington.

CBS has previously sold 5-minute segments to Republican candidates John Connally and Ronald Reagan, and had offered the Carter campaign 5 minutes at 10:55 p.m. this Saturday. Carter ad chief Gerald Rafshoon had rejected that

Court ruling revives case against 15% commission

By BERNICE KANNER

NEW YORK—The advertising industry faces a new court challenge revolving around the question of whether the 15% agency commission system discriminates against direct advertisers.

The new challenge arose a month ago when a U.S. court of appeals upheld a lower court dismissal of a much broader, class-action attack on the commission system. But it told the lower court it should hold a trial on charges against Time Inc. and the *New York Times* as individual defendants. Last week these defendants petitioned the appeals court for a rehearing, a request rarely granted. A rehearing was also sought by the plaintiff, the now-defunct Ambook Enterprises book club.

In its original action, seven years ago, Ambook had named J. Walter Thompson; Young & Rubicam; BBDO and the American Assn. of Advertising Agencies as members of a class. The appeals court reaffirmed the denial of the class action, while reversing the dismissal of Time and the *Times*.

- The private antitrust action charges that ad agencies and publications acted illegally in granting a 15% discount from the card rate to agency-placed orders, with no discount available for ads placed directly by the advertiser.

Ambook, also known as the American Book Club, named Ted Bates & Co. as another defendant when the case first surfaced in federal district court for eastern Pennsylvania in June, 1972. In early 1978, Bates settled out of court for $25,000.

Ambook discontinued operations shortly after filing its suit, but the Pennsylvania partnership is legally entitled to wind up its affairs, including litigation, with no time limit. L-Club Corp., a New York investment company and Ambook's partner in the American Book Club,

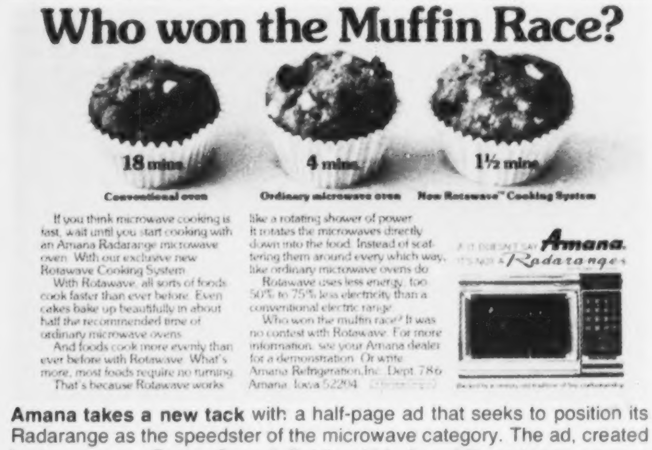
MOULIN-AIR
moulinex
MOULIN-AIR convection oven

This is the $1,000,000 week for Moulinex (AA, July 16) as it launches a tv blitz for its Moulin-Air oven and La Machine. AC&R Advertising, New York, handles.



Who won the Muffin Race?

18 mins. Conventional oven

4 mins. Ordinary microwave oven

1½ mins. New Rotawave™ Cooking System

If you think microwave cooking is fast, wait until you start cooking with an Amana Radarange microwave oven. With our exclusive new Rotawave Cooking System.

With Rotawave, all sorts of foods cook faster than ever before. Even cakes bake up beautifully in about half the recommended time of ordinary microwave ovens.

And foods cook more evenly than ever before with Rotawave. What's more, most foods require no turning. That's because Rotawave works like a rotating shower of power. It rotates the microwaves directly down into the food. Instead of scattering them around every which way, like ordinary microwave ovens do.

Rotawave uses less energy, too. 50% to 75% less electricity than a conventional electric range.

Who won the muffin race? It was no contest with Rotawave. For more information, see your Amana dealer for a demonstration. Or write Amana Refrigeration, Inc., Dept. 786, Amana, Iowa 52204.

IF IT DOESN'T SAY Amana. IT'S NOT A Radarange

Amana takes a new tack with a half-page ad that seeks to position its Radarange as the speedster of the microwave category. The ad, created by new agency Foote, Cone & Belding (AA, Aug. 27), portends a "more single-minded approach" in Amana's upcoming national campaign, due next spring. The ad above will run in Dec. 10 issues of *Sports Illustrated* and *Us*.

Seguela charts select expansion

Out to spread 'Latin' style

By PAUL ZAHN

BRUSSELS—On the occasion of the official opening of the Roux, Seguela, Cayzac & Goudard affiliate in Brussels, Messrs. Cayzac and Goudard affirmed to ADVERTISING AGE the company's intention to expand to a "European dimension" and export worldwide a distinctly "Latin" approach to advertising and communications.

They confirmed that RSC&G aims to become the first truly "European" agency, with affiliates scheduled to open in Britain, West Germany and "possibly the U.S." in 1980.

The Paris-based parent always will hold a majority share, with the minority holders always being active nationals in the affiliate. The choice of these "active nationals" will not be easy because, according to Messrs. Cayzac and Goudard, the goal is not simply expansion. Mr. Goudard notes "We are only interested in working with individuals who share our ideals and believe in our philosophy of communications."

That philosophy is described as resting on "the star system," Mr. Goudard elaborated. "A brand or product must be a star to have durability and longevity on the market. We must always aim to create a distinct personality for the brand or product composed of three factors. First, the physical—the product itself, often a 'me-too' product. Second, a style—a distinct imagery and way of presentation. Third, a character—every product or brand must be endowed with a distinctive character, a special imaginary universe of its own that sets it uniquely apart."

- Messrs. Cayzac and Goudard further explain, "The Marlboro cowboy and the Volkswagen campaigns have these three qualities, and when a product or brand has them all the campaign cannot be copied or emulated without the consumer identifying with the original product or brand because the imaginary universe is absolute and exclusive."

The RSC&G approach means, according to Mr. Cayzac, cutting the umbilical cord of the standard Anglo-Saxon approach to advertising. "The objective of advertising in the marketing mix is not always, or at least not exclusively, concrete, quantifiable, and measurable. Human beings have a dimension of spirit and fantasy. Communications built entirely to conform to the concrete, quantifiable and measurable fail to appeal to this dimension and lose any hope of achieving any lasting impact."

Putting this vital dimension into advertising and communications means developing what Jacques Seguela calls the "Latin cultural mode of expression" and moving away from what Mr. Goudard calls "The Stagnant Anglo-Saxon model." It also means, according to

Carter gives $50 million energy ad nod

By RICHARD L. GORDON

WASHINGTON—President Carter has signaled the Energy Department to look beyond an initially modest government energy conservation ad campaign and plan a $50,000,000 nationwide drive that could be launched next fall.

ADVERTISING AGE learned last week that White House budget planners told Energy Department execs that the President will seek an immediate $7,000,000 for the ad project and an additional $50,000,000 budget for the fiscal year starting next Oct. 1.

The push to do something quickly, however, has energy ad planners scrambling to review their options for how the first hunk of ad cash might be spent.

Both White House aides and department officials declare they intend to have a wide open competition to select not only the ad agency to run the campaign, but also a market researcher to do consumer research.

But energy ad planner Joan Michello was reluctant last week to speculate when the assignment would be open for bids. And Presidential aide Anne Wexler complained it could take "six months" or more to complete the required cumbersome government contracting procedures.

This time frame does not fit with the administration's sense of urgency about the real threat of energy shortages, particularly if the Middle East situation takes a drastic turn for the worse.

"We need to create a conservation ethic in this country, and do it quickly, or face possible brownouts," Ms. Wexler said.

As interim measures to crank out an early ad campaign, energy execs have the option of creating the initial ads in-house or turning to two small ad agencies currently handling other department assignments.

Denver agency Evans & Bartholomew winds up a $1,000,000 test of paid energy conservation ads in New England this month. Minneapolis-based Vanguard Advertising, a minority-owned agency, is running another $1,000,000 test of paid ads for the department urging homeowners in six states to modify their oil burning furnaces to use less oil.

Officials of both agencies said the department has had informal discussions with them about the possibility of additional assignments in 1980.

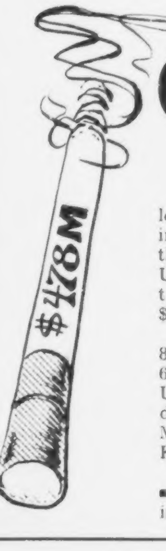
Cigaret ad budgets up 15.4% in '78



By SAM HARPER

NEW YORK—The nation's six leading cigaret companies last year invested $478,332,300 to advertise the 20 best-selling cigarets on the U.S. market. The companies' 1978 total was 15.4% above their $404,304.000 outlay in 1977.

The 20 top brands accounted for 89.5% (551.2 billion units) of the 605.5 billion cigarets smoked in the U.S. last year, according to sales data compiled by analyst John C. Maxwell Jr. of Lehman Bros./-Kuhn Loeb.

- In an effort to capitalize on an increasingly health conscious public that is moving away from higher tar cigarets to the low-tar segment, cigaret manufacturers continued to add low-tar products to their brand rosters in 1978. The low-tar segment, which includes all cigarets under 15mgs tar, and the burgeoning ultralow-tar segment presently account for more than 40% of the cigarets smoked, up from about 30% in 1978.

Although R. J. Reynolds Tobacco's Vantage, Philip Morris' Merit and Lorillard's Golden Lights were in the limelight last year as a result of sales growth, American Brands' Carlton has become this year's rising star because it's currently the fastest growing brand in the top 20.

Introduced in 1962, Carlton's sales spiral began only in recent years. The advance of the low and ultralow segments' popularity pushed Carlton from the 20th spot on the brand roster in 1977 to 16th in 1978, when unit sales reached 10.09 billion units, or nearly 2% of the total market. Carlton's ad budget of $23,847,700 was slightly higher than the $22,477,100 American Tobacco invested for brand advertising in 1977.

Perhaps more significantly, Carlton sales this year are expected to be 50% higher than in 1978. Carlton is threatening to break into the top 10 best-selling brands, a first for an untralow-tar brand.

Pitted against Carlton in the ultralow-tar segment are Lorillard's 3mg Kent III, presently Carlton's stiffest competition with 0.8% of the total market; RJR's 2mg Now, currently battling Carlton in a comparative advertising effort, and 3mg Triumph, also from Lorillard.

With 80% of its output dedicated to the low-tar and ultralow-tar segments and two new product introductions, Lorillard was the most aggressive of the low-tar cigaret marketers in 1978, gaining more than a 1% market share. (A 1% share of the market translates to

(Continued on Page 88)

Cigaret ad costs rise

(Continued from Page 3)

about $100,000,000 at the manufacturers level.)

Despite a $44,149,000 ad outlay by Philip Morris on behalf of Merit, RJR's Vantage remained the leading low-tar in 1978. Since January, however, Merit has surged ahead of Vantage with the support of what sources say is a monumental advertising investment. RJR spent $30,786,300 on advertising for Vantage in 1978, good for eighth position in the rankings and 18.5 billion unit sales.

Unable to make significant inroads in a Merit/Vantage dominated low-tar segment, Brown & Williamson Tobacco discontinued its 14mg Fact brand, putting its advertising muscle behind 9mg Arctic Lights and the burgeoning 9mg Viceroy Rich Lights brand.

- Despite sizable ad outlays, RJR's flagship brand, Winston, continued to decline in sales from 88.1 billion units in 1977 to 84.7 billion units in 1978. Ad spending dropped from $44,290,900 to $41,912,000.

At the same time, PM's *Marlboro, the leading cigaret in the* U.S. as well as the world, saw its domestic share rise in 1978 to 101.25 billion units, up 4.3% over the previous year. Marlboro's ad budget also rose 4.5% to $43,681,500 in 1978.

As for 1978 market shares, Reynolds remained the leader with 32.9%, according to Maxwell data. RJR was followed by Philip Morris, 27.8%; Brown & Williamson, 15.2%; American Brands, 11.7%; Lorillard, 9.1%, and Liggett & *Myers Tobacco*, 3.3%.

The two newcomers to the top 20, Newport and Golden Lights, forced Lucky Strike and Parliament out of the standings. Lucky Strike and Parliament had held 18th and 19th positions, respectively, in 1977. Golden Lights became a separate brand in 1978 and is now the 11th best-selling brand.

Merit was the least efficient among the top 20 brands, with a 52.2¢ per carton advertising outlay. Pall Mall was the most efficient brand with a 5.1¢ per carton ad investment. #

Costs of cigaret advertising: 1978-1972

Per carton and per million cigarets sold

Copyright 1979 by Crain Communications Inc.

The top 20 cigaret brands based on 1978 sales, related to the amount invested for each brand in general magazines, newspapers (including Sunday sections), network tv, spot tv, network radio, spot radio and outdoor. The figures are not offered as complete records of expenditures; tobacco companies spend large sums for point of purchase materials and in other nonmeasured media. Sales figures for this study were taken from the 1978 Maxwell Report. Advertising expenditures were compiled from figures supplied by Broadcast Advertisers Reports; Institute of Outdoor Advertising; Leading National Advertisers; Radio Advertising Bureau; Radio Expenditure Reports, and Television Bureau of Advertising. Newspaper expenditures for 1975, 1976, 1977 and 1978 were supplied by sources in the tobacco industry; newspaper totals for the years previous to 1975 were compiled from figures supplied by the Newspaper Advertising Bureau (compiled by Media Records).

adbeat Coke vaults into an Olympic effort

COCA-COLA CO., Atlanta, in conjunction with the U.S. Olympic Committee, is establishing an Olympic Hall of Fame and Museum in Colorado Springs. Once an exhibit is put together, it will be available for tour by Coca-Cola bottlers across the country. In an unrelated promotion, Coke is offering a portable radio in the shape of its 6½-oz. bottle. Ads by McCann-Erickson that will run in several media note, "Turn on a smile with a bottle radio from Coca-Cola. Your ears are going to love it." Prices of the radio vary by market . . .

"OUR TOWN" will go into syndication in March and September under partial AT&T sponsorship via Syndicast Services, New York, which is offering half the 22-minute commercial load for local station sales. Originally shown on NBC in 1977 under full AT&T backing, "Our Town" will be bartered in March and again in September as a 2½-hour special . . .

THE PR CALENDAR is the title of a new weekly publication that lists all of the week's coming press conferences, meetings, openings, receptions and pr events. The calendar also contains information concerning available speakers for events, changes in media personnel and general news items. Subscription cost: $100 per year. For subscriptions and information write to The PR Calendar, Suite 4055, Time & Life Bldg., Rockefeller Center, New York 10022 . . .

"INTERBANG" is the name of a pilot for a comedy series satirizing the world of commercial tv in the style of "Saturday Night Live" and "The Groove Tube." The producer/packager, Azure Media Group, New York, says it's prepared to seek cable, pay cable or videocassette distribution should it fail to interest commercial broadcasters . . .

NBC-TV'S SATURDAY morning kiddie lineup has been changed to combine "Godzilla" and "Super Globetrotters" into "The Godzilla/Globetrotters Adventure Hour" and to merge "The New Shmoo" with Barney and Fred Flintstone, to get "Fred and Barney Meet the Shmoo." Formerly, the latter was titled "Fred & Barney Meet The Thing." These changes, and the shifting of three other series to new time slots, take effect on Dec. 8 . . .

"BENJI'S VERY OWN CHRISTMAS STORY" will air on ABC-TV under the sponsorship of General Foods' Cycle dog food (Y&R) on Dec. 21 at 8 p.m. (EST) . . .

THE CENSUS BUREAU has released 1978 median income figures showing white family income of $18,370, up 2% in real terms from the previous year; Hispanic family income of $12,570, basically unchanged from 1977 in real buying power, and black family income of $10,880, up 6% in real terms. By regions: The median family income in the West was $18,410, up 4% in real terms over 1977; up 3% in North Central states to $18,600, and unchanged from 1977 in the Northeast, $18,900, and the South, $15,940 . . .

SUN SIGNS: Regent Box Co., Philadelphia, is marketing Sunbrero, a sun shade that can be imprinted with a company or brand name for use as a promotion item. Because of flexible vinyl construction, Sunbrero can be bound into a magazine as a page ad, rolled into a tennis can or merchandised with picnic foods . . .

INTERNATIONAL HARVESTER'S first program sponsorship in 25 years will be three one-hour tv specials about the weather, developed by Playback Associates. The first special, due in January, is "Weather Report '80: The Almost, Not Quite, Sure Thing." Playback execs said each station will be able to insert its own local weathercaster segment. George Back & Associates, headed by the former president of Hughes Television Network, is handling clearances . . .

THE NEXT BARBARA WALTERS interview special sponsored by General Electric (BBDO) on ABC-TV will feature Suzanne Somers, Sylvester Stallone and Stevie Wonder. It will air Dec. 5 at 10 p.m. (EST) . . .

Hanna-Barbera Productions

HANNA-BARBERA PRODUCTIONS' new star logo is beginning to show up tagging its 1979-80 tv programs and in entertainment trade advertising. It also may be used on the four theme parks of the cartoon company's parent, Taft Broadcasting, Cincinnati. Saul Bass/Herb Yager & Associates, Los Angeles, created the design . . .

TO QUIET RUMORS THAT *Playgirl's* readership is heavily male, the Santa Monica-based magazine conducted research charting new subscription trends. According to the research, via Media Selection Corp., San Diego, *Playgirl* has received 17,773 new subscriptions in the last two months, 84.38% of which were female. Less than 10% were male and the rest were unidentified, the magazine said . . .

CREDIT UNION NATIONAL ASSN., Madison, Wis., which was the first sponsor to sign for ABC-TV's 1980 Winter Olympics, also will present an "Olympic Preview" special in early January prime time. CUNA also is selling "Dorothy Hamill's Guide to Enjoying the 1980 Winter Olympics on TV" at credit unions, with Ms. Hamill promoting the booklet in a 30-second spot due in the January special. The agency is Garrison, Jasper, Rose & Co., Indianapolis . . .

SLAMMER HAMMER, a lightweight noisemaker and whistle shaped like a gavel, is being distributed in the U.S. by Hana-Bob Ltd., New York, an importer of plastic toys and novelties from Israel. About 2,000,000 of the hammers, which give off a musical sound when rapped on a surface, have been sold in Israel. New Year's revelers at New York's Waldorf-Astoria will have Slammer Hammers as noisemakers when the Guy Lombardo Orchestra isn't playing. The agency is Francis Kane Associates, New York . . .

WILLIAM McCAFFREY INC., New York, has created and produced two radio commercials for Fieldcrest and St. Mary's automatic blankets. Both spots use celebrity endorsers, one featuring Doc Severinsen and Della Reese and the other, comedians Bob & Ray. Cost and energy savings are the focus of both spots . . .

LAST CHRISTMAS SEASON, teen girls shelled out an all-time high of $2 billion on gifts, about 75% more than they spent during yuletide five years ago. The girls spent more than $1 billion on their families, including an average $30 on gifts for their mothers. The three most popular choices were perfumes, sweaters and blouses respectively, according to a *Seventeen* survey. The girls spent an average of $25 to buy dad a shirt or cologne . . .

METROMEDIA PRODUCERS CORP., Los Angeles, will support the late January telecast of the "Wild Times" miniseries with four-color spreads in *Good Housekeeping, McCall's, Woman's Day* and regional *Newsweek* issues via Pearlman/Rowe, New York. So far, 44 stations have cleared (33 affiliates) for the two-part, four-hour show; stations will sell commercial time locally . . .

LUNCHEON IS SERVED, Tucson, a sampling medium that puts on luncheons and dinners for fund-raising groups for a small fee, now reaches an estimated 800,000 consumers each year. Advertisers pay to have their products served and/or displayed, and the groups are given tickets to sell. The group keeps all funds raised except for a service fee. Luncheon Is Served is part of Adia, a Swiss-based temporary employment agency . . .

NOT SURPRISINGLY, Miles David, president of Radio Advertising Bureau, advised the National Assn. of Realtors at a session in New Orleans that radio is the best way to sell homes and apartments. Radio, he argued, can reach the young, two-income families better than newspapers, which working women may not have time to read, and do it with updated reports countering negative economic reports . . .

TED VAN DYK, vp-communications at Weyerhaeuser Co., Tacoma, Wash., has taken a leave of absence to join the Presidential campaign staff of Sen. Edward Kennedy (D., Mass.) His first assignment will be preparation for the Carter-Kennedy debate in January. Mr. Van Dyk previously worked in the Presidential campaigns of Hubert Humphrey, George McGovern and President Carter.

Farmland Industries

Co-op effort binds farmers

BY CYNTHIA E. HARDIE

KANSAS CITY—The red and blue CO-OP signs are sprinkled throughout midwestern farmlands atop grain elevators, on petroleum tanks, hopper cars and animal feeders. They make a friendly impression and conjure images of farmers working together in small rural areas for their common good.

This is true, but co-ops are sophisticated businesses today, as is farming.

Farm co-ops began in the 1920s. For the most part they were formed to market grain. But as farmers shifted from horses to tractors, other needs became apparent, such as obtaining petroleum products.

In 1929, six cooperatives formed what was called Union Oil Co. (Cooperative), predecessor of Farmland Industries, today the largest farm co-op in the nation with 2,300 member co-ops, about 500,000 farmers and ranchers in 15 midwestern states and annual sales exceeding $3 billion.

The essence of the co-op, even a giant such as Farmland, is that it is owned by the membership.

▪ Farmland was begun to save farmers money through mass purchasing of agricultural "inputs." It continues to save farmers money, but now mass purchasing has given way to mass production. Today Farmland makes most of the products it sells and its savings are mainly at the manufacturing level.

The cooperative not only guarantees producers a source of fuel, fertilizer, feed and other supplies, it helps them market their products. Company earnings are also returned to the farmers and ranchers through their local member cooperatives through what are called "patronage refunds."

Farm co-ops had a stormy beginning because they were seen as socialist by some. Although the Sherman-Clayton Antitrust Act recognized the cooperative form of business, the Capper-Volstead Act in 1922 made it possible for farmers to join and market their products without violating antitrust law so long as their actions did not "unduly enhance" prices.

Because of the growth and success of co-ops today and certain special privileges, co-ops have been under scrutiny by government agencies as well as under fire from industry groups that say private enterprise will be squeezed out of agribusiness.

▪ Randall E. Torgerson, writing in the "Annals of the American Academy of Political and Social Scientists" in January, 1977, said, "Cooperatives came of age in the past decade in their capacity to serve farmers' and ranchers' needs for farm supplies, credit, marketing and related services. Capability to meet these needs was not possible until co-ops developed into large-scale efficient operations with a high degree of sophistication."

Mr. Torgerson also points out that co-ops differ from most corporations because the co-op is oriented to needs of users not investors.

Also, co-ops enjoy a considerable tax break because they do not pay federal income tax on profits returned to their owners (farmers). The owners pay personal income tax on these refunds.

The General Accounting Office recently completed a two-year study of farm cooperatives undertaken because it said most of the legislation affecting cooperatives was enacted many years ago.

The GAO wants a set of conduct principles in addition to the laws that already govern the co-op and believes "undue price enhancement" needs a more precise definition than it is given in the Capper-Volstead Act.

Farmland Industries is a success story not many outside the Midwest know about. Its first office was in a two-car garage in North Kansas City and it is now the largest corporation based here. Farmland is governed by a board of 22 directors, a majority of which must be farmers/producers. This means that the board knows problems of its membership first hand.

Farmland's service to farmers was made clear in the early '70s, the 1978 annual report stated, "when fuel and fertilizer shortages tested the skill and dedication of Farmland and member cooperatives. As scarcity and higher prices for fuel and fertilizer spread across the Midwest, farmers complained bitterly that local noncooperative fertilizer dealers were selling outside their area, sometimes overseas for higher profits.

▪ "Farmland and the locals shared the problem of allocating their fertilizer equitably, and co-op members were able to get most of the supplies they needed. Thousands of midwestern farmers realized, some for the first time, that Farmland and their local associations stood between them and disastrous shortages of farm inputs."

The giant co-op manufactures almost everything farmers need (except heavy equipment) including petroleum products, feed, fertilizer, agricultural chemicals, seed, paints, tires, batteries and steel buildings.

It is also a processor and marketer of beef and pork products; it is a grain exporter, and an operator of feed mills and grain elevators.

Although the farmer may be a co-op member, he is not compelled to buy co-op products nor does he receive a discount because he is a member. All products are sold at retail price.

The focus of Farmland's 1980 campaign, which began in September, is the testimonial ad using co-op members. The heaviest concentration of the campaign comes in spring, although advertising does continue throughout the winter.

Jim Rathbun, director of agency relations for Farmland, said a combination of tv in rural markets, 96 radio stations and about 15 farm publications are being used. The media budget, he said, is $2,000,000.

For the testimonial campaign, co-op members from all over the Midwest are participating. This allows a producer from each radio market to speak to his fellow producers in the area about Farmland products. For tv and print, not as many spokesmen are used because of production costs, Mr. Rathbun said.

▪ The farmer is paid only the courtesy $1 release consideration unless his work day is totally disrupted by the making of the commercials, Mr. Rathbun said. There are no reduced prices or free products for appearing in the ads.

He said the farmers view the testimonial ads as an advantage for themselves as well as the co-op. This is because the more products sold through a member co-op, the greater the patronage refunds will be for that co-op.

Barickman Advertising, Kansas City, is Farmland's agency. #

Cynthia Hardie is a Cincinnati-based free lance writer who writes frequently for Section 2.

Twin benefit ads work

Crest gets an Aqua-fresh cavity

By NANCY GIGES

NEW YORK—For the first time in six years, a new toothpaste—Aqua-fresh—appears to be capturing a respectable share of the $650,000,000 dentifrice market. In so doing, it has eaten a hole in the share of perennial leader Crest.

Performing even better nationally than in test market (AA, July 30), Beecham Inc.'s white paste with blue gel stripes brought in a 12% market share in one recent two-month period, thus moving into the No. 3 spot behind Procter & Gamble's Crest (now under 35%) and Colgate-Palmolive's Colgate toothpaste (16%).

The question industry observers are now asking is what P&G will do to regain the close to five share points it has lost. Most of this business has come from Crest; P&G's Gleem has lost less than a share point. Earlier this year, prior to this decline to the lowest share Crest has seen in recent years—under 35%—P&G's bellwether brand had seen shares of over 40% of the market.

■ Aqua-fresh is performing so well here that Beecham has followed its U.S. rollout with national expansion in Canada, where the dentifrice market situation is similar in some ways to the U.S.

Although it is understandable that the top two brands in the U.S. have contributed the most to the newcomer's share, it is considered surprising that the two gel entries on the market, Lever Bros.' Close-up and Aim, have so far escaped serious damage, each with a share loss of under a point.

The positioning that propelled Aqua-fresh to the No. 3 slot is one of "double-protection," offering both cavity-fighting and breath-freshening benefits. Tv spots show various situations in which two people argue over whether to buy a breath-freshener or cavity-fighting dentifice. Aqua-fresh satisfies both. Grey Advertising

(Continued on Page 70)

"As long as I'm paying
your dental bills,
you're using a fluoride toothpaste."
Aqua-fresh
New double-protection Aqua-fresh
fights cavities and freshens breath.

Double protection is the theme for Aqua-fresh in tv and print—fluoride plus breath freshener.

Arco takes on convenience stores

If you could stock
only one convection oven,
it should be Rival's.
RIVAL Convection Oven

The latest entry into the burgeoning convection oven field is from Rival Mfg. Co., Kansas City. Trade ads introduce the $175 oven; consumer magazine ads start in April. Barickman Advertising is the agency.

By JOSH LEVINE

NEW YORK—The first sproutings of a convenience store network at Atlantic Richfield gas station sites may represent the oil industry's next cash crop as Arco Co. and its colleagues look for a more stable and more profitable harvest than gas alone can provide.

Arco has converted some 300 service stations to new 24-hour entities called AM/PM Minimarkets, but the real thrust against Southland's 7-Eleven chain—the direct target of Arco's move—will be launched next month. It is then that Arco will open up AM/PM to franchisees from its jobber and distributor network, and back the new venture with an extensive campaign. Arco markets are concentrated on both coasts and in the Great Lakes region.

Foote, Cone & Belding handles Arco ads; Landor Associates created the name and marketing concept.

The converted and newly built stores these franchisees will occupy will be promoted by the theme, "Just around the corner, all around the clock." Commercials for the $2,500,000 to $3,500,000 effort use the music of Bill Haley's classic, "Rock around the clock," with the new lyrics, "Shop around the clock."

■ And while shoppers are bopping, other oil companies and the nation's 33,000 convenience stores will be looking either expectantly or nervously at AM/PM's success. Gulf Oil is experimenting with several convenience store Gulf stations in Atlanta and Houston, and Sun Oil and Mobil recently bought convenience store chains which are currently run independent of their service station networks.

"It's clearly beneficial to find other ways of developing a return on gas stations," said Jim Gordon, Gulf's gasoline advertising manager. "Gas is an uncontrollable variable—anything could happen to it, so it's a good idea to supplement that with a more dependable business."

Gas stations have traditionally relied on what is known as their "bay business," the parts and repair operation in their garage bays, to supplement gas retailing. The profitability of that bay business is being drained, however. Parts outlets and specialty repair shops like Midas Muffler have cut into bay business profits, along with a growing trend among drivers to work on their own cars.

At the same time, the volatility in supply that oil companies hope to cushion has made the convenience store the perfect tenant for underutilized bays. In the wake of last summer's gas shortage, Benton & Bowles conducted a study of developing retail patterns. The study found that neighborhood stores will grow in importance as drivers seek to limit the radius of their shopping trips.

That trend will accelerate, the study found, even if conservation or increased production bulldoze the peaks and valleys of gasoline availability and assure more dependable supplies. It is the shopper's perception, not the gauge at the pump, that is feeding widespread anxiety, said the study.

■ The ability to sell food at high margins also gives the convenience store a flexibility on gas pricing that it wouldn't have if gas were its only product. "It's a synergistic effect," said Edward Reilly, vp-retail marketing, Arco, explaining that low-price gas can lead a customer straight to the counter for high-

last minute news

GF consolidating cereals at Grey, O&M

NEW YORK—General Foods has moved $20,000,000 in breakfast cereal billings from Benton & Bowles. Moving to Grey are Honeycombs and Grape Nuts, worth about $15,000,000, to O&M is Alpha Bits, $5,000,000. GF said the move, unrelated to its search for a fifth agency, is in the interest of narrowing its cereal agencies from three to two. GF said it will make a "major" assignment to B&B in the spring. B&B continues with GF's pet foods and dessert product assignments.

U.S. wins more time to attack NAB code

WASHINGTON—Federal judge Harold Greene, on the verge of quashing the antitrust case against NAB's tv code, has given Justice Department 45 days to find more evidence supporting its claim that the code keeps tv ad prices up. NAB had moved to kill the case.

NAD rules AmEx ads misleading despite revisions

NEW YORK—National Advertising Division has ruled that ads for American Express Travelers Cheques were misleading, despite modifications made after competitors' objections. AmEx disagreed, but said the ads

New York p.m. daily on the way

By LEAH ROZEN

NEW YORK—East side, west side, all around the town, New Yorkers will be able to buy a new daily newspaper soon.

Scheduled to begin publication sometime during the first quarter of 1980, the planned afternoon tabloid is tentatively being titled the *Wall Street Final*. It will cost 25¢, be sold only on Manhattan newsstands and appear Mondays through Fridays.

■ The paper is the creation of Michael Goldstein, the 41-year-old founder and former publisher of the *Soho Weekly News*. He sold the Manhattan weekly to the London-based Associated Newspapers earlier this year.

"I intend to prove that there is a place and a need and a way for an afternoon newspaper to survive and be effective," Mr. Goldstein said in revealing his plans for the newspaper. The *New York Post* is now the city's only general circulation afternoon daily.

■ In recent years, afternoon newspapers have suffered declining circulation, particularly in big cities. Between 1960 and 1978, the number of afternoon dailies decreased by 29, while morning dailies increased by 48 during the same period.

Mr. Goldstein says that "he is going to succeed where others have failed[most recently the short-lived *Trib* in early 1978] because he is going to be publishing a specific package aimed at a specific audience."

That package is scheduled to include short international, national and local news reports, business stories and a "heard on the street" column covering Wall Street doings, the 3 p.m. and closing stock tables, and sports news and odds information.

The package is being aimed at businessmen and women heading home from the office. The paper will be sold at 100 newsstands, primarily downtown and midtown lo-

U.S. bid in early stage: Saatchi

LONDON—The Saatchi & Saatchi Co. last week earned a round of stock market applause with its latest year-end results showing pretax profits up 30% at £2,440,000 ($5,368,000) on turnover of £71,500,000 ($153,700,000).

But while the agency holding company was basking in its good fortune—just one more profitable year tacked on to many which have combined to catapult Saatchi into the front ranks of London agencies—the company was at pains to dampen speculation about a reported tie-up with Cunningham & Walsh (AA, Dec. 10).

According to a company spokesman, "We have been consistently saying the same thing for several months—that we are exploring the U.S. market by talking to a number of agencies and advertisers, but that our plans are still at an early stage."

However, Saatchi is clearly in a

Cigaret makers ready for low-tar dogfight in '80s

By SAM HARPER

NEW YORK—As expected, the nation's leading cigaret marketers are going at each other's throats with comparative advertising campaigns.

That cigaret companies would be coming with ad strategies and marketing tacks designed to "take it away from the other guy" was predicted by a cigaret exec several weeks ago (AA, Nov. 12).

Supporting the conclusion that the '80s will be a low-tar dogfight among R. J. Reynolds Tobacco, Philip Morris U.S.A., Lorillard and American Tobacco are recent ads for brands like Merit, Now, Triumph and Carlton.

- "Comparative advertising is not new in the cigaret industry," an industry source explained. "But we're definitely going to see more of it in 1980." He added that no one company has cornered the low-tar segment, which now claims 42% of total cigaret sales.

Marketers also have been using banner headlines in ads emphasizing the findings of research and tests. As a result, most of the major marketers have created campaigns for their low-tar products that are reminiscent of the front pages of some New York tabloids.

As one agency exec explained, "The louder one yells, the better chance one has of attracting attention. Headlines excite people but you've got to have the facts to back up the headlines."

Lorillard, a company that has billed itself as the "most aggressive of the low-tar marketers," with more than 80% of its volume concentrated in the low-tar segment, is showing no signs of altering its tough marketing stance in that segment.

Lorillard's year-old Triumph brand has close to a 0.4% market share and is the subject of a new comparative campaign appearing in newspapers and magazines nationwide. The campaign uses the theme, "Triumph at 3mg tar scores in the same taste league with Merit, Vantage and Winston Lights." The three brands contain tar levels of 8mgs, 11mgs and 12mgs, respectively.

Though the ads do not explain what research was conducted to reach that claim, nor how high Triumph scored in the "taste league," Lorillard said it has not received any complaints from RJR or Philip Morris, marketers of the brands in question.

A spokesman at Lorillard said Triumph was in need of a stronger message following its "Good taste at only 3mgs tar" introductory campaign. The spokesman also said Lorillard would stick with the campaign through 1980.

- Meanwhile, Lorillard continues its comparative strategy in advertising for its Golden Lights brand,

FIGHT BACK AGAINST SO-CALLED PLANNED OBSOLESCENCE.

SCOUT INTRODUCES THE LONGEST AND BEST WARRANTY PACKAGE IN AUTOMOTIVE HISTORY.

FIGHT BACK WITH SCOUT.
Anything less is just a car.

22
24
INTERNATIONAL HARVESTER

Aware that its 1,700 dealers are "hard to find," International Harvester's Scout is including a toll-free number in its 1980 magazine and tv advertising. Dealers will be notified by headquarters of the call so they can follow through with direct mail.

Scout hot on trail of Detroit

By JACQUES NEHER

CHICAGO—Jolted by a three-year loss in market share, International Harvester is preparing to mount a battle against its competitors in Detroit with an ad campaign that invites buyers of conventional cars to "fight back with Scout" against Detroit's "planned obsolescence."

"It seems like clockwork," begins the copy in a magazine ad scheduled to run in up to 32 publications beginning in mid-January. "Just when the repair bills start rolling in, you discover your car's warranty has run out. Call it planned obsolescence. Call it anything you want. At International Harvester, we call it disgraceful."

The campaign for the 1980 Scout line gets its initial kickoff with a "newsy" ad in the *Wall Street Journal* Dec. 21 that introduces the company's free five-year, 100,000-mile engine and rust-through warranties (AA, Dec. 3).

- Tv spots touting the bold warranties—one pictures the Scout at the foreground of a towering auto junkyard—begin Dec. 26 and will peak in February and March with up to 125 grps per week on network tv.

"We're not trying to wage war

Even without pressure from Scout, Detroit is having its sales woes. See Page 68.

Testimony shows P&G's hoarding ways

By LOUIS A. FANELLI

NEW YORK—Procter & Gamble Co. apparently hoards trademarks the way some people collect Picassos.

The multi-billion-dollar, Cincinnati-based company has established a bank of trademarked words for possible use as brand names for products not yet on the market.

While it is not uncommon for companies to trademark names for future use, P&G is currently suing Johnson & Johnson in order to protect its marks.

The year-old suit centers around J&J's decision to market Assure deodorant tampons and to begin testing Sure & Natural feminine napkins. P&G lawyers are arguing that the use of the two names infringes on the company's "Sure" trademark (AA, Nov. 12).

Further, P&G claims it has marketed Sure tampons since 1964 and also has its own Assure mouthwash and shampoo.

- J&J, however, argues that, in fact, P&G does not market Sure tampons or Assure mouthwash and shampoo, but only brings them out when it is necessary to keep the trademark in force.

According to J&J lawyers, P&G invoices show that since 1964 it "made a total of 95 shipments" of Sure tampons resulting in gross revenues of only $836.70. The lawyers also pointed out that the tampon P&G was selling under the "Sure" name was actually a Tampax Inc. tampon.

In testimony given before federal district court judge Pierre Leval, J&J lawyer Thomas Morrison said P&G currently holds tampon trademarks for Soft Shape, Merit, Always, Soft & Certain and Sure.

In addition, Mr. Morrison said, P&G holds shampoo trademarks for Assure, Extend, Abound, Ample, Shasta, Wondra, Rejoice, Drene, Calico, Pace, Cova, Inspire and Ivory. He also noted seven mouthwash names are owned by P&G. They are Assure, Therex, Helix, Counter, Confide, Extend and Share.

In order for a product name to be trademarked it must first be sold at the retail level for a period of time. According to Mr. Morrison, P&G was able to obtain its shampoo trademarks by putting Prell sham-

Miller nod quenches Y&R thirst

MILWAUKEE—Miller Brewing Co. has named Young & Rubicam to handle a new product assignment believed to be a superpremium brew with estimated multi-million-dollar billings.

The appointment came a mere 65 days after Y&R was dumped by Pabst Brewing Co., when that brewer opted for McCann-Erickson once McCann had lost its Miller business to Backer & Spielvogel.

According to an internal memo from Alexander Kroll, president of Y&R's USA division and exec vp of Y&R Inc., the Miller assignment is "the class and envy of the beer industry."

- The business will be handled out of Y&R's Chicago office; New York talent is expected to help. Although the new product assigned to Y&R is not known, Miller has filed for trademarks on the names of La Guerita, Debut, Zephyr, Lido and Tandy.

Two known Miller new products—Clipper dark light beer and Oktoberfest, an import now in test, are being handled by N W Ayer ABH (AA, Nov. 19). Clipper was recently pulled out of test for further development.

- For Y&R's Chicago office, Christmas has come early this year. The Miller assignment is the agency's third in less than three weeks. At the end of November, the shop picked up the $5,000,000 to $6,000,000 West Bend account, and less than a week later added another $2,000,000 piece of business—Jenn-Air Convection ovens (AA, Dec. 3). #

Changing tides and Four A's FTC stand

WASHINGTON—"The Bill, S 1991, proposes strong measures that would significantly harness the activity of the FTC."

A cry of alarm from the Consumer Federation of America? A warning from FTC chairman Mike Pertschuk that the ax is chopping into bone?

Guess again.

This is a sentence from the first paragraph of a news release that tells why the American Assn. of Advertising Agencies endorses Sen. Wendell Ford's bill revamping FTC.

It is not often that a special interest is so candid about what it expects to get from pending legislation. So it will be interesting to see if this statement affects the fate of the bill.

Will it bring the brigades storming from the trenches with bayonets fixed to win the field? Or will it trigger a counterattack by FTC's supporters?

Are there congressmen who were ready to go along on a tough anti-FTC bill who will become skittish about voting for a bill that has been publicly proclaimed as tailored to the goals of the people the commission is supposed to regulate? Does the threat of a Presidential veto become more plausible?

▪ Aside from its role in the immediate fight, what does this statement tell the world about the attitudes of the advertising business and its principal association? Most sophisticated special interests try to polish self interest with a public interest gloss. Does this Four A's candor represent amateurism? Or arrogance?

In an important sense, the posture of a trade association gives the public clues to the concepts of citizenship that guide the behavior of an industry. In recent years, for example, the Four A's worked hard to enhance the credibility of advertising by doing things that positioned the industry and its top executives in good company.

▪ It was a policy of outreach. Of seminars at universities and brainstorming sessions at famous think tanks. Of distinguished scholars commissioned to do important studies casting new light on the role of advertising. Of dialog with the industry's critics.

Consumerism was running rampant, and the rejuvenated FTC was pounding the big advertisers. But the hallmark of Four A's was a low profile. Under the leadership of the late John Crichton, the industry was encouraged to see its own daily hassles in the context of the world's more serious concerns.

Issues were selected with care, and they were attacked in an orderly and professional manner—always in a way that cultivated the image of an industry that accepts a vision of social responsibility grounded in the principle that those things that are good for society are good for advertising.

In retrospect, this deliberate effort to associate advertising with scholarship and responsible citizenship paid off. Advertising's standing with opinion makers was enhanced. It emerged from the era better and more effective than ever, with all its essential freedom intact.

Two years have passed since the Four A's was deprived of the leadership of John Crichton. Now there are different priorities and a different style.

▪ The association continues its "outreach" activities, but it also is involved in an intense effort to "harness" its regulator.

It is expected, of course, that an advertising organization would want to regain legislative ground lost to consumerists. But nothing is without its price. If the industry gives up the high ground it so carefully cultivated in the recent past, it ought to be able to show that an urgent need has been met.

It should be able to show, for example, that stifling rules have survived the FTC hearing process or that outrageous procedures were beyond the reach of the court system.

▪ There are times when it is necessary to fight. But those who have a decent regard for their fellow beings couch their fight in understandable principle.

If John Crichton found it necessary to fight for legislation to curb FTC, it would have been his style to ride into the fray flanked by law school deans and economists of unimpeachable reputation. I can't picture him bringing the ad agencies into battle shoulder to shoulder with used car dealers and funeral directors. #

Radio spending up 15.9%

WASHINGTON—The government says advertisers increased radio spending 15.9% to $2,911,200,000 last year, a percentage boost apparently not in the cards for radio in 1979.

The Federal Communications Commission figures, released last week, are almost identical to the radio industry's own 1978 sales estimate of $2,953,000,000, which was issued earlier.

The comparable figure for television advertising sales made by FCC last year was $8,056,500,000 (AA, July 30).

▪ Radio will finish up this year with perhaps a 10% gain over 1978, according to unofficial industry estimates. Much will depend on fourth-quarter sales, an industry observer cautioned last week.

Highlights of 1978, according to the FCC, include:

- Local ad sales of $2,192,700,000, up 17.1% from 1977.
- National and regional spot sales of $592,100,000, up 13.6%.
- Network ad sales of $126,400,000, up 7%.

▪ These figures include commissions paid by advertisers to agencies and state reps, but do not include what advertisers paid to produce commercials or programing for radio. #

Brady

(Continued from Page 38)

Shah. One or two rather surly cynics recounted their own experience with the authorities in similar occurrences in which the police had chuckled benignly and said, "Listen, Mac, just be grateful that was all you lost."

Personally, I am backing Mr. Stein's and the official police version. As I believe wholeheartedly in that little man who's been out there on the raft since 1912.

▪ There will always be those who turn a blind eye to revealed truth, callous cynics who refuse to believe anything. I feel sorry for them, really I do.

Why, people like that are so skeptical about the inherent decency of America and its great institutions that they are insisting all over again there's a fleet of oil tankers just over the horizon waiting for OPEC to raise its prices again before they berth in New Jersey! #

Mr. Brady's current novel is "Nielsen's Children," all about the cynical and the innocent in network television.

Cigaret sales up a little in 1979

By JOHN C. MAXWELL JR.

The cigaret industry should end this year on an up-tick, with a volume gain of some 1%. However, there is one extra working day in the fourth quarter and some pipelining: thus we feel that the actual increase will be more modest.

For 1980, at best we look for the industry to be up modestly, and there is a possibility that it may be slightly down.

The success story of 1979 in the cigaret industry is American Brands' Carlton, which has increased its volume almost 50% and is the fastest growing brand we have seen in many a year. At least part of this gain relates to a pronouncement about 18 months ago by Dr. Gio Gori, a scientist working with the Health, Education & Welfare Department, who implied that Carltons were not all that bad, and one could smoke 10 or more to one of the more popular brands, such as Marlboro, Winston or Kool.

We believe the Gori statement has helped to accelerate the trend toward low-tar cigarets, which now constitute more than 42% of total volume. Further, a good portion of the action seems to be in the 5mg-and-under area, with the introduction of Reynolds' Doral II, and Lorillard's Kent III and Triumph this year.

▪ Some industry observers seem encouraged by this movement toward low-tar, as they consider tar to be the main factor contributing to disease in smokers. In fact, there are some who feel that the industry had done such a good job of moving to low-tar that antismoking forces would no longer need to be quite as adamant as in the past.

It is interesting to recall that in the congressional hearings of 1957, there was a discussion and general agreement that a "safe" tar level for cigarets would be 20mg, but that would be virtually impossible to obtain. Today, well over 90% of the cigarets sold in the U.S. have less than 20mg.

So far as the individual companies are concerned, Philip Morris registered the best absolute gain in 1979 as it did in 1978, increasing 4.5% in units and one percentage point in market share. Lorillard had the best percentage gain (8.6%) and increased its market share by 0.7. American Brands showed its first gain in more than a decade, a modest increase due primarily to the success of Carlton. #

Mr. Maxwell is with Lehman Brothers Kuhn Loeb Research, New York.

Discover Camel Lights satisfaction.

One of the brands that showed impressive sales increases last year was Camel spin-off Camel Lights.

Green questions function of ABC

NEW YORK—Proposed changes in the reports of the Audit Bureau of Circulations have been taken a step further by George Green, president of *The New Yorker*.

In an address to the Fulfillment Managers Assn. here, Mr. Green said the magazine publishing industry is faced with a "crisis of confidence" among advertisers and agencies concerning syndicated research. The crisis, he continued, sets up "a need to go back to basics. In the magazine business, going back to basics is as simple as ABC."

Discouraged that most publishing people "don't know the difference between a pink sheet and a white sheet," Mr. Green wondered "what function is ABC providing" if no one asks anything more than the average paid circulation for a six-month period.

The bureau, he charged, has set up "a lofty goal" of reporting "facts—facts without opinion." Though this objective can be achieved, "it isn't being reached today," he said. "Over the last 25 years, instead of reporting more facts, publishers' statements have been reporting fewer," and this in a time when computerized fulfillment and newsstand processing can "spit out more data with the press of a button."

▪ Mr. Green pointed out the irony of the increase in available data to the publisher "with a decrease in its availability to the decision makers at agencies and advertisers who need it more than ever." A publisher's statement a quarter century ago listed 28 lines of information; today there are 12, he said.

Mr. Green noted that *Time Z's* demographics may be "*New Yorker*-like" as their ads contend, but that "there's nothing "*New Yorker*-like about that magazine's publisher's statement." He also chided ABC for "permitting itself to serve as the issuer of a new kind of validating pink sheet that puts the ABC imprint on claims of economic identity and social status for subscriptions that are not submitted to validation by the standards of subscription sales for which magazine publishers and advertisers and agencies established ABC in the first place."

▪ He added that advertisers and agencies "ought to" demand complete pink sheets for demographic editions and know about the sources and length of subscriptions, and how they are paid for, as well. They also ought to urge publishers "to give them more information so they can make better advertising decisions," Mr. Green added. #

S-H to buy 2 stations

Scripps-Howard Broadcasting Co. has agreed to purchase Phoenix radio stations KMEO (am, fm) from B&D Broadcasting for about $4,000,000, subject to Federal Communications Commission approval. The company currently is awaiting FCC approval to purchase two other stations in Baltimore.

CPM opens N.Y. outlet

CPM Inc., a Chicago-based media management service, has opened a New York office at 122 E. 42nd St., 10017. Ray Bentley, who owns a sports syndication service, was named vp-general manager of CPM/East, while CPM exec vp Michael Willner becomes president of the division.

Campbell Soup homes in on microwave users with lines

CAMDEN, N.J.—Aiming to become a leader in marketing convenience foods that can be prepared in microwave ovens, Campbell Soup is introducing a premium-price line of Swanson frozen entrees next month and has repackaged its frozen economy dinners.

The new line includes macaroni and cheese, turkey with gravy and dressing, steak and green peppers, lasagna with meat, salisbury steak and chicken in white wine sauce. The paper tray packaging used for this line, as well as for main courses and Swanson breakfasts, can be used in both microwave and conventional ovens.

To support the new items, Campbell plans to invest $10,000,000 in a multimedia effort throughout the year. Ogilvy & Mather is the agency.

▪ According to James R. Emshoff, Campbell vp-marketing and development, the microwave oven offers the potential of a whole new world of convenience because of a dramatic decrease in cooking time. He predicted that once consumers find ways of using the new ovens to replace traditional ones, microwave ovens will saturate American households much like color tvs. Today microwave ovens have about 15% penetration and are used primarily to defrost foods and reheat leftovers. #

Owners swap stations

Multimedia Broadcasting Co. has traded its Knoxville, Tenn., stations, WBIR (am, fm) for Stoner Broadcasting System's Louisville station, WVEZ-FM. Multimedia is also paying Stoner $1,500,000.

Vitamins Find Healthy Audience

"We broke a lot of new ground in the marketing of vitamins," reports Bob Brandt, vice-president and account supervisor at Carrafiello-Diehl & Associates, advertising agency for Lederle Labs' multivitamin, Stresstabs. "Conventional wisdom said you sell vitamins to women. We decided to sell to men. Conventional wisdom said you sell vitamins on television. We decided to make print our dominant medium. Well," Brandt continues, "having made those two unconventional decisions—men and print—we then made a very obvious decision. We made PLAYBOY one of the dominant magazines on our schedule."

ENERGETIC AUDIENCE

"We are looking for constantly active, upscale men from 25 to 34 and through middle age. PLAYBOY was at the top of that younger half. Their men were right on our target. And very much tuned in to today's interest in looking good and feeling good.

"PLAYBOY was and is strategically very important to us. We've been placing full-page ads with them consistently every year for the last four years. Print in general, and PLAYBOY in particular, is an integral part of our success and will stay that way."

ENERGETIC SALES

"What's our success been? From a virtually unknown product just about four years ago, Stresstabs today is virtually tied for number one in dollar sales in the pharmacy."

From nowhere to the top. With PLAYBOY as a key ingredient. Because in PLAYBOY you reach more than 16 million men every month. Men with a lust for life, men with a keen interest in their own physical enhancement—their health, their appearance, the grooming products they use, the clothes they wear.

You too can advertise in PLAYBOY and reach more men for less money than you can in Time, Newsweek or Sports Illustrated.

And give your sales a healthy boost.

In search of the bird

RCA Satcom III lost? Wasn't that new $50,000,000 bird supposed to supersede four-year-old Satcom I as the principal carrier for basic and pay cable programing?

The sad answer, as of this writing, is yes—to both questions.

Long since sold out to Home Box Office, Showtime, ESPN, superstation distributors and other major catv programers for an expected spring start, the RCA Astro-Electronics-built 1-ton craft had moved into temporary looping orbit after being launched by a Delta rocket at Cape Canaveral Dec. 6. Then, four days later, the satellite vanished after controllers at RCA's tracking station at Vernon Valley, N.J., tried to put it into stationary orbit 22,300 miles above the Equator between Hawaii and California.

Since RCA Americom reportedly carried at least $70,000,000 in insurance (probably a Lloyd's of London package) on Satcom III, money at the moment is not the main concern. The key issue is what can be done promptly to minimize disruption in the burgeoning $1.5 billion cable industry.

- Satcom III was overbooked before it went up. Now, most of those customers will stay on Satcom I, but new services such as Ted Turner's Cable News Network will have to look for other means of distribution. There are three working Westars and Comstars up in space, too, but so far RCA, with two functioning satellites, has handled nearly all the cable business, and most of the catv earth stations are set to receive from Satcoms.

RCA Americom president Andrew Inglis and his staff were getting lots of sympathy when I checked out the tv and satellite community for reaction. "The question is, how fast can they regroup and put up another bird if this one is lost," said Julius Barnathan, president of ABC Engineering. That, he emphasized, will depend partly on the availability of launching vehicles.

"We may be competitors, but not at a time like this," Hale Montgomery, director of public affairs at Comsat General, said. "So we've put one of our earth stations at South Berry, Conn., into the search," he added.

Satelliting, he noted, is a very high risk business; millions—at least $30,000,000 per bird—ride on every launch. All six Comsat General satellites, launched in 1976, were successful, but parent Communications Satellite Corp., which operates Intelsats in cooperation with 134 foreign entities, has been less fortunate.

For the Intelsats, there have been seven failures in 27 launches. Put another way, there have been 20 successes, which the Comsat folks think is pretty good.

In July, 1970, one of the Intelsat III series of birds disappeared after a mishap that sounds very much like RCA's. As recalled by Comsat public affairs officer Bill Brobst, it "just vanished" after the apogee motor that was to have put the bird into permanent orbit malfunctioned.

- That precedent is of no help to RCA's technicians as they search for their missing craft; the Comsat engineers have no idea what went wrong, according to Mr. Brobst.

"Unfortunately, there is always a potential for an accident," said an AT&T spokesman when asked how RCA's difficulties might impact on the use of satellites for transmitting cable and tv shows. "Our three satellites [a reference to the Comstars which AT&T leased from Comsat General] were launched successfully. We intend to continue with our satellite program."

Though such an attitude is rare for me, I wouldn't mind if this column is out of date by the time you read it. How nice if RCA's wayward space vehicle reappeared and began to function smoothly. #

Reynolds keeps top spot in magazine ad spending

NEW YORK—R. J. Reynolds Industries held the lead as the biggest magazine advertiser in October, a month when ad expenditures grew 8% and ad pages declined 2%.

This is the first time in more than 45 months that ad pages registered a drop.

Reynolds, which has an .800 batting average for holding the top spot, this year increased its magazine expenditures 82% to almost $12,000,000. General Motors, absent from the top 10 in September, took second place, though it sliced its magazine spending by 32% vs. a year ago.

Seagram Co. Ltd., which held the No. 3 slot, increased magazine spending by a modest 9% while Philip Morris Inc., which fell from second to fourth place, boosted spending by 24%. Fifth-ranked Ford Motor Co., also not on the list last month, upped magazine advertising 31% while Loews Corp., which slipped from fourth to sixth place, hiked its magazine allowance 48%.

B.A.T. Industries Ltd. hefted its magazine budget 74% and took seventh place; last month, it ranked as the fifth largest magazine spender. General Foods Corp. sliced its magazine advertising 13% and slipped a notch from seventh to eighth place. General Electric joined the top 10 in ninth place with a 30% increase in magazine spending, and Time Inc. dropped one place with a 3% hike in magazine allowances.

Procter & Gamble, American Broadcasting Cos. and CBS ranked in the top 10 in September, but were absent in October.

Cigarets and tobacco remained the biggest product category for magazine advertising, increasing spending by 47%. The beer, wine and liquor category advanced one spot to second place with a 25% spending hike. Automotive advertising vaulted from 10th place to third place but registered the sharpest cut, slicing its magazine spending by 20% from the October, 1978, figure. Retail and direct mail marketers, travel hotels and resorts and apparel and footwear categories all reduced magazine spending.

Data in the accompanying chart was compiled by Leading National Advertisers Inc. for Publishers Information Bureau and ADVERTISING AGE. #

the advertising market place

MEDIA DIRECTOR

A $10 million Midwest Advertising Agency seeks an individual with 3 or more years experience with an agency, media buying service or the client to head Media-Department. Candidate should have exposure to electronic and print media in consumer, agricultural, and industrial fields and be able to develop media plan from concept through execution of campaign.

Changing life styles, high consumption boost growth

BY ALFRED HONG
Managing Director
Marketing Economics Institute

NEW YORK—During the past few years, the administration's fiscal policy of continuous deficit spending under conditions of high economic activity has given consumers the opportunity to demonstrate their capacity to consume.

Judging from the succession of retail sales records that have been broken, they really have been exerting themselves. Retail sales in all major U.S. markets have enjoyed significant gains from this largess, and foreign and American businesses alike who have helped promote the cause have realized very favorable results.

The administration's pursuit of this beneficent policy has enabled the American economic system, already famed for its achievements in mass production and in mass consumption, to develop an ultra-high-consumption life style.

As a result, the volume of retail transactions has reached such a level that it will be a difficult pace to maintain and a challenge to surpass as the economy enters the threshold of the '80s.

- As marketers formulate their plans to scale the peaks that loom ahead, they will profit by examining some of the significant developments that have transformed the dimensions of the nation's markets.

Of course, not all of the credit for fostering high consumption belongs to the administration and the marketing professionals. The financial services community provides a considerable boost with its rapid development and broad distribution of new credit instruments. Each new variety of credit enhanced the purchasing power of consumers.

The mainstay of this elevated life style is the NOW generation, spearheaded by the veterans who emerged from the social and political struggles of the Vietnam controversy. They are ushering in a new era, one that will fill America with boundless activity and excitement. They comprise 40% of the populace, each with his own widely diversified interests but uniformly directed toward the enjoyment of life to the fullest.

- The restless youth of America are well prepared for this development. They have the self-assurance and the self-orientation to make

(Continued on Page 72)

Helping attract Louisville residents back to the center city is Belgravia Court, a green oasis in the old town south of downtown.

Profiles of top 100 markets in U.S: Population, income, growth trends

In this special section, ADVERTISING AGE presents a retrospective report on significant developments in each of 100 top Standard Metropolitan Statistical Areas in 1979, together with indications of some of the probabilities for 1980. The SMSAs covered in this report were the 100 leaders in the most recent census estimates. The profiles have been grouped according to nine official regions and arranged alphabetically within those regions.

Each profile is preceded by four items of information: The official Census Bureau population estimate for July 1, 1978; rank; total personal income for 1977 as estimated by the Bureau of Economic Analysis of the Department of Commerce, and the per cent of change in total personal income for 1977 compared with 1976 according to the same source.

Other sometimes more recent unofficial statistics used in some profiles are normally attributed to local sources. Also included in the report is a table based on Department of Commerce statistics showing per capita personal income growth for each SMSA and two tables using estimates by Marketing Economics Institute Ltd.—one estimating population for Jan. 1, 1979, the other giving 1978 estimates of disposable income, per household income and retail sales.

ADVERTISING AGE acknowledges the cooperation of many hundreds of individuals, including local and regional planning officers, chamber of commerce personnel and media research experts who cooperated with our reporters; the Bureau of Economic Analysis of the Department of Commerce, and the Bureau of the Census.

We particularly acknowledge the cooperation of Marketing Economics Institute Ltd., which made available its important projections of population and retail data not otherwise available.

New England

Boston

Population 3,887,800
Rank 6th
Personal income $29,585,000,000
Income '77 vs. '76 .... 9.59%

Boston is entering its 350th year with a phenomenal wave of growth. In spite of the city's 14,000,000 sq. ft. of prime office space constructed in the '70s, less than 1.7% of the Class A space is vacant.

And it's not about to stop. Some 4,400,000 sq. ft. of privately financed office space and an additional 1,500,000 sq. ft. of federal office space are planned for the next four years.

This not only signifies what's going on in Boston, it directly applies to an estimated 10,000 construction jobs leading to some 30,000 permanent positions.

The job market in Boston has been unique since the post WW II manufacturing and shipping slump forced the industry focus to high-grade service activities. The service industry growth has tacked on 60,000 new jobs since 1960, replacing the 34,000 manufacturing jobs lost. More recently, some 4,000 manufacturing jobs were created or added in 1976-77.

■ That year brought more than jobs. It brought tourism. The tourist boom fell off slightly during '79 due to fuel shortages, but seems to be surging back, with the city an active convention center in addition to a high-technology terminal.

Only hotel space is wanting, and currently 25 hotel proposals await the city's approval, with an estimated 10 beginning construction in the next four years.

In addition to a new proposed hotel and convention center in downtown Boston, the city hopes to double the existing John B. Hynes Auditorium for even more convention space.

Conventioneers and assorted other tourists spend lots of money in Boston, not just in hotels, but in the stores and market areas.

■ Downtown Crossing, a mall-like treatment of Washington St. past such retail landmarks as Jordan Marsh, Filene's and Barnes & Noble, is finished, and retailers in the area have already noted rising sales. Faneuil Hall and its neighboring waterfront continues to prosper, with the new North Building enjoying full occupancy.

But the waterfront is not the only place to be restored. The Boston theater district and adjacent Tufts/New England Medical Center, is having a facelift. And theater and medicine are vital parts of the city's economic development. Some $20,000,000 in revenues are generated by theater in Boston, and one in six jobs is related to the combined fields of medicine and education.

The theater district restored the old Savoy into the new home of the Boston Opera Co. (Sarah Caldwell *et. al.*) and the revitalized Music Hall will open in '80 as a performing arts center. Some estimate that as much as $100,000,000 of public and private investment will be poured into the theater district in the upcoming decade.

And Boston's medical expansion is not far behind. Massachusetts General Hospital plans a $25,000,000 ambulatory care facility, and Tufts/New England slated $40,000,000 for a pediatric wing, in addition to a National Nutrition Center jointly being developed by the medical center (Tufts/New England) and the U.S. Department of Agriculture.

The new JFK Library is a potentially important stop for tourists as well as scholars, but the location, near the University of Massachusetts, in the racially tense Columbia Point area, presents a problem. In time the site may prosper but right now it is far from the beaten tourist paths, and is reachable only by bus, trolley, or a $5-plus cab ride from downtown.

■ Condo conversion continues to cut into the already tight supply of rental housing. During the past five years, rehabilitation has been particularly active along the waterfront in the South End. In the immediate future, new condo conversions are likely to involve sites currently used for warehouses in the Fort Point Channel district.

The media mix took a new twist during the year when Universal Subscription Television began offering scrambled-signal tv on channel 68.

Boston watches with mixed feeling the efforts to open Georges Bank, the area's richest fishing territory (18% of the nation's fish) for oil exploration. The threat to fishing is a major matter of concern. But so is the shortage of heating oil, and the rapidly escalating price of available supplies.

■ Many area residents fear that Lt. Gov. Tom O'Neill's endorsement of Ted Kennedy as a Presidential nominee will cost the Bay State President Carter's support on issues which could ease the heating oil problem. In November, with gasoline allocations down 11%, odd-even rules seemed to be on the way back.

Air deregulation has brought nine new airlines to Logan International, including six commuter lines. With passenger traffic up

Flanking Yale University is New Haven's Church on the Green.

16%, 1,000 new jobs have been created at the airport.

Nearby Lowell has had an increase of several thousand jobs this year, reflecting new industries and the expansion of many that were already established there. Retail sales in Lowell have been running 12% to 15% ahead of last year.

Bridgeport-Stamford-Norwalk-Danbury, Conn.

Population	808,400
Rank	47th
Personal income	$7,809,000,000
Income '77 vs. '76	+11.08%

The corporate exodus from Manhattan to Fairfield County, under way for the past 10 years, shows no signs of slowing down. Just how important the county has become in corporate relocation thinking is demonstrated by the intense competition for media outlets.

Ten companies—among them a subsidiary of Cox Broadcasting, Cablevision of Connecticut (partly owned by Scripps-Howard Broadcasting) and Fairfield County Cable Communications (80% owned by Storer Broadcasting)—applied to the Connecticut division of public utility control for the catv franchise to serve 120,000 homes in Darien, Easton, Greenwich, New Canaan, Norwalk, Stamford, Weston, Westport and Wilton. Catv industry representatives call the region one of the best franchise territories left in the country.

Along with the new home office influx have come huge shopping centers (currently in the works is an 800,000-sq.-ft. regional development in Stamford, to contain Macy and J.C. Penney outlets) and large-scale housing (middle-management people are hard put to find suitable dwellings at figures they can handle).

The county's—and the state's—largest city, Bridgeport, has not been caught in the expansion backwash. The past two years have seen a continuing influx of new industry into metropolitan Bridgeport—50 plants in the city itself, 40 in the suburbs.

"Definite gains" in city/area employment figures are cited by the chamber of commerce, with retail sales holding "about even." Meanwhile, Bridgeport boosters are stepping up civic awareness of world-famed Shakespeare Theatre, suburban Stratford and the in-town Cabaret Theatre.

- Fiore Francis D'Addario, who controls a conglomerate of 20 companies (principally in construction and home heating oil), is competing with a group of women for Federal Communications Commission approval to operate the long-dormant Channel 43 in Bridgeport.

The latter applicants, incorporated under the title of Bridgeways Communications Corp., are the first group of women in the country to file for a tv license. BCC president is Laurel Vlock of Woodbridge, presently with a Sunday talk show on WTNH-TV, the Capital Cities Communications ABC New Haven affiliate.

Mindful of the enormous money potential input for the civic centers in New Haven and Hartford, Bridgeport Mayor Joseph Mandanici's administration has long-range plans for a similar facility.

While Stamford basks in the development limelight—principally because of the home office presence of Xerox, General Signal, Singer, Kennecott, Combustion Engineering, General Signal and others—Danbury and Norwalk are cultivating both corporate structures and manufacturing facilities.

Biggest office complex under way in the county presently is the $250,000,000 Merritt 7, near the Wilton/Norwalk town line. On completion, 10 buildings will have a total of 2,500,000 sq. ft.

- To the north, in Danbury, Union Carbide Corp. is to occupy by year's end or early 1980 a 1,300,000 sq. ft., worldwide headquarters building, with capacity for 3,500 employes. Company officials said they decided to move out of New York to the 550-acre site off Interstate 84 after problems developed in trying to persuade employes to relocate to New York.

Long-entrenched in the county, Stratford's Sikorsky division of United Technologies Corp. is banking on a burgeoning civilian market for helicopters; the company is a major supplier of military helicopters.

Marketed for nonmilitary use is the medium-size, 12-passenger S-76, selling for $1,100,000.

Existing industry is in an expansion mood, too. Acco (American Chain & Cable Co.), long situated on Bridgeport's Connecticut Ave., announced plans for a new $2,000,000 headquarters building in Trumbull. The manufacturing operations will continue in Bridgeport, however.

Area planners and business officials asked the state legislature to authorize $50,000 for an in-depth study of the county's housing situation, particularly as it applies to people with respectable incomes who are unable to buy a house.

The Southwestern Area Commerce & Industry Assn. (based in Stamford) already has a survey indicating fewer than 20% of the region's families could afford to buy a new home. The commerce association's position paper asserted: "If we do not produce workable solutions to the issue of housing availability and housing affordability in Fairfield County, then the continued economic growth of the region and the state of Connecticut will be seriously affected."

Hartford-New Britain-Bristol, Conn.

Population	1,045,300
Rank	36th
Personal income	$8,148,000,000
Income '77 vs. '76	+9.66%

In just a few more weeks, Hartford's Civic Center Coliseum will be back in operation, and the whole community will be feeling better.

After the spectacular accident in January, 1978, when the roof collapsed in the midst of an ice storm, a temporary pall descended on local boosters who saw the Civic Center as a symbol of downtown revitalization. But enthusiasm was rekindled when businessmen joined in "The best of Hartford goes on" promotional effort to repair the damage, and it now seems likely that a busier-than-ever Civic Center Coliseum will be back in action in February.

Downtown Hartford continues its facelift. Accord has been reached on a skywalk and a three-story glass and steel "mixmaster" covering Temple St., and joining a number of new buildings (thanks to a $1,890,000 federal grant). Private developers are picking up the tab for two pedestrian bridges connecting the "mixmaster" with such structures as the new $25,000,000 Chase office tower, going up atop the Church St. municipal garage.

The Richardson building off Main St. (the former Brown-Thomson department store), now being remodeled to include 120 luxury apartments, ties into the skyway web, and Sage-Allen is investing "several hundred thousand dollars" on renovations in sections of its downtown department stores which also connect to the "mixmaster."

- Specialists, like Farley & Co., a major real estate company, continue to see a tight office space outlook in downtown Hartford, so office construction continues.

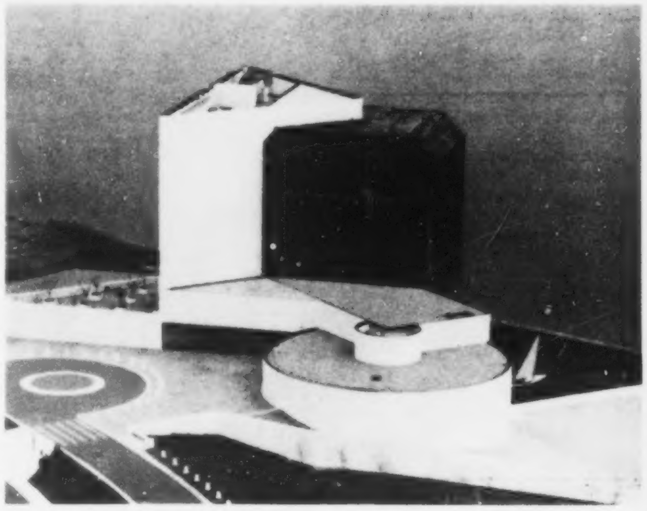
In addition to his project atop the municipal garage, David Chase is planning a $50,000,000 office tower, with hotels or apartments, in the block bounded by Trumbell, Church and Pratt Sts., facing the civic center. One block south, Allen Hartensky proceeds with development of 700 sq. ft. of rentable space.

Hartford's downtown Union railroad station will be renovated into a multipurpose transportation center, thanks to a $4,500,000 federal grant covering 85% of the cost. On the northern edge of downtown Hartford, nine acres of land and freight yards were recently acquired by West Hartford's Freight House Market Associates for development as a marketplace for foods, restaurants and commercial activity similar to Boston's highly successful Quincy marketplace.

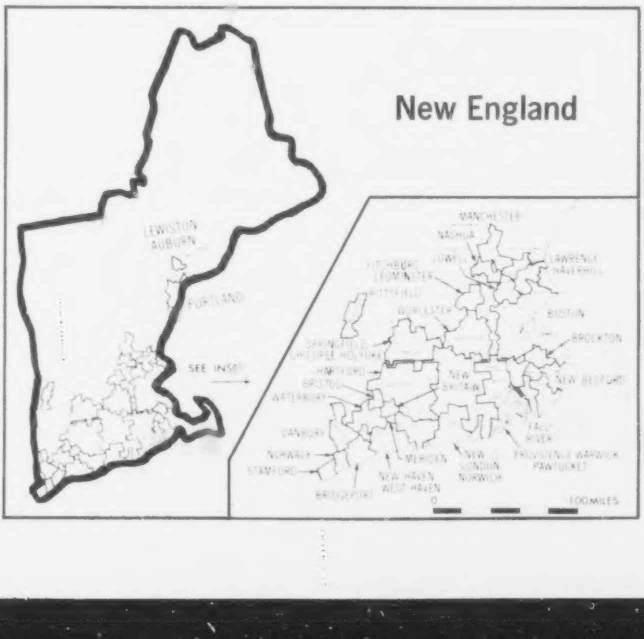
On the West Hartford/-Farmington town line, the five-year-old Westfarms Mall, the largest enclosed mall in Connecticut, will be expanding, with Lord & Taylor shifting from downtown West Hartford to become its fourth anchor store.

The newly built Loehmann's Plaza, with Loehmann's as its anchor, has just opened off Farmington Ave., Farmington, just across the street from the University of Connecticut Health Center.

- The two other new malls are in the development stage in Farmington. One, by developer Richard Bronson, between Farmington Ave., and Middle and South Rds., would contain such high-fashion outlets as Bloomingdales and Saks Fifth Avenue, not now represented in metropolitan Hartford.



New addition to the Boston skyline is the John Fitzgerald Kennedy Memorial Library, dedicated in 1979.



With Quarterback Roger Staubach and center line backer Richard F. Breunig of the Dallas Cowboys as partners, Richard Gordon began formulating plans for Farms Springs Office Park near I-84 in Farmington, abutting New Britain and Bristol.

- In Manchester, the development focus is on a proposal for a $100,000,000 complex in the Buckland section, which would include residences and a mall roughly three-quarters the size of Westfarm. A $20,000,000 J.C. Penney catalog warehouse, originally scheduled for May, 1980, completion, has been set back to the summer of 1981 by environmental lawsuits.

In New Britain, the much-heralded Newbrite Marketplace, largest indoor flea market in the state, is occupying 80,000 sq. ft. in Newbrite Plaza, off E. Main St. Plans are proceeding for conversion of New Britain's former main post office building off W. Main St. into a Cradle of Industry Museum.

Donald J. Wallace & Associates have taken over the former Howard Johnson's restaurant and hotel off Columbus Blvd., and renamed it the New Britain Holiday Inn. Fafair Bearing Co. is back into production after a five month labor dispute.

- Barnes Group has opened a new $3,000,000 international headquarters in downtown Bristol, and King's discount store has taken over the Farmington Ave. space, formerly occupied by Mammoth Mart (following merger of the two organizations).

The Bristol Red Six, a Boston Red Sox farm team, remains in town after signing with the park commission to use the town-owned Muzzy field.

State officials have announced plans to use $55,000,000 of bond issue revenues, plus a roughly equal sum from the federal government, to speed up renovation of Bradley International Airport, halfway between Hartford and Springfield, Mass. Airlines and others who lease space are also expected to absorb some of the cost.

- Some local boosters say the bright outlook here is symbolized by the decision of the Times Mirror Co., Los Angeles, to pay $105,600,000 for *The Hartford Courant*, but smaller local media were less gracious, and some of them did their best to throw antitrust sand into the purchase machinery.

For the community as a whole, the biggest shocker of the year was the municipal scandal involving charges that ranking police, fire and civil service officials took bribes from city workers seeking jobs or promotion.

New Bedford-Fall River, Mass.

Population	472,100
Rank	82nd
Personal income	$2,913,000,000
Income '77 vs. '76	+9.43%

New Bedford has nearly rounded the corner in its vast urban development program, and sister-city, Fall River, isn't too far behind.

While Fall River's waterfront restoration is beginning to materialize from the drawing board, where it was born as early as 1959, New Bedford's waterfront is fast becoming prosperous and quaint.

In restoring its downtown area and waterfront, New Bedford has capitalized on its past glory of being a whaling capital and early stronghold of American wealth. The fishing fleet grew in the last year by 20 vessels, but it was the ferry service from the area to Martha's Vineyard that offered the biggest outside boost to the economy.

- The New Bedford ferry is fed by the local transit service with a 25¢ ride from the municipal garage, which charges under $2 a day for parking.

The area's architecture has been nicely adapted to meet current needs. Freestones, a restaurant in the gas lamp decorated downtown section, is in a former bank, with dining rooms in the tellers' area and in the board room.

A block away, the Vault offers fare in, of course, an old bank vault, combining stately architecture with more contemporary trappings.

- The biggest disappointment in the downtown growth was the expected Howard Johnson motor lodge/hotel, which recently was shelved. The old New Bedford Hotel has been converted into elderly housing, and the area is looking for a hotel—something the Howard Johnson would have solved. But the local chamber of commerce is accepting bids and offers from other chains.

Other construction in the area meanwhile, is thriving. The New Bedford Industrial Park added an 18,000 sq. ft. marine supply facility called Edson. The Polaroid Corp. plant in the park expanded to the tune of $1,000,000. At Southeastern Massachusetts University, there's a new 99,000 sq. ft., $5,530,000 art department building.

Unemployment dropped a re-

cord 2.9%, the fourth sharpest decline in the U.S. And area personal income rose a staggering 12.5% from '77 to '78. In June, 1978, the average weekly pay check in New Bedford was $191.58. By June this year, that check rose to $213.07, translating to an hourly wage increase from $4.58 to $5.34.

The municipal airport is served exclusively by Air New England, and the Alameida Bus line has gone out of business, making the area slightly more dependent on motor transport.

Fall River is just on the dawn of restoration and urban improvement with the aid of the Durfee Trust capitalization and long-awaited approval on municipal plans.

New Haven-Waterbury-Meriden, Conn.

Population	**754,600**
Rank	**54th**
Personal income	**$5,625,000,000**
Income '77 vs. '76	**+9.86%**

Although New Haven is still known by its sobriquet "Elm City," most of those elms were lost to a virulent blight some years ago. The once-flourishing 1,800-seat Shubert Theatre, for decades a key pre-Broadway tryout house, has been closed since 1976.

These descriptions might easily conjure images of a dying city. Actually, New Haven is in the grip of commercial growth on a scale never anticipated by city boosters generations back.

The closed Shubert Theatre is presently the focus of an ambitious regional arts center plan. Next door, the prestigious Hotel Taft is being converted into apartments. The federal transportation department is authorizing an additional $20,000,000 to upgrade the rail commuter route from New Haven to New York.

If current planning is brought to completion, the New Haven parking authority, now operating some 5,100 spaces—most of them in structured garages in the central business district—will nearly double the size of its facilities in the next four to five years.

And the city council's community development committee approved a proposal to study the expansion of the Veterans' Memorial Coliseum as a potential convention center.

- A city consultant recommended construction of a new downtown shopping mall, a 165-room hotel and the creation of special renovation, shopping and entertainment districts.

Halcyon Ltd. of Hartford warned that development is heading to the suburbs and will continue to do so unless the city begins an immediate and vigorous development effort.

The Halcyon report said the proposed mall would boost downtown retail sales from $89,500,000 in 1977 to $120,000,000 by 1985. The report added that New Haven could use two new office buildings with up to 125,000-sq.-ft. each, but warned "suburban competition will not only continue but is expected to intensify."

There was overwhelming agreement in the business community to the Halcyon findings that private enterprise, more than ever, must take the lead in preserving cities. Mayor Frank Logue announced the creation of an economic development task force, and pledged $250,000 in seed money for a banking consortium to help provide mortgages at less than the "going" rates for areas where such financing has been difficult to obtain.

The former Midtown Motor Inn, on Chapel between Park and York Sts., reopened with a new name and a new policy under a 10-man investment team. Now the Colony Inn, this downtown landmark which had been closed for five years, features French gourmet food in its LaRotisserie Normande restaurant.

- Yale University capped a five-year fund-raising campaign, which brought in more than $367,000,000 in cash and pledges. Yale said the campaign brought in some $65,000,000 more than any university had ever achieved before in a single attempt. Some 80% came from alumni.

Construction started on a $65,500,000 replacement facility at the Yale-New Haven hospital to replace the New Haven unit. The new building, fronting on Davenport Ave. and York St., is scheduled for completion in December, 1981.

State transportation department officials say that if all goes well, New Haven can have "a total transportation center" on the site of the former Union railroad station by late 1982. A figure of $21,000,000 is mentioned to incorporate rail, bus and taxi service into such a facility.

Adjacent space would accommodate offices or stores. Availability of federal funding is the key factor. The Washington share would be $13,600,000; the state's, $4,500,000, and the city's, $2,800,000.

- More malls are in the development stage outside New Haven, but it isn't always clear sailing. S. Rudy Gatto, who opened a 40-store mall in Southbury a few months ago, ran into trouble with his proposed regional project for Branford. He is scaling down the original plan which visualized six anchor stores and 400 smaller outlets and is expected to offer the revised plan in January.

Developers Fiore Francis D'Addario and Arnold Prayer are proposing a $65,000,000 mall for Milford. Hamden is considering a $100,000,000 "Magic Mile" mall, with private funding, occupying two levels atop the existing Hamden Plaza and the Hamden Mart. A prospective $150,000,000 mall in North Haven, just a few miles from downtown New Haven, worries New Haven Mayor Frank Logue.

To the north, in Meriden, posing the greatest economic promise for the immediate area over the next decade, is Med-Way, now in its early development phase, planned by F.I.P. Corp. of Farmington.

It consists of 800 acres (300 in Meriden, 500 in Wallingford), with buildings to contain 3,700,000 sq. ft. of floor space with an envisioned work force of 11,000. Major housing, to contain 2,956 units of various types, is also in the planning stages by Carabetta Enterprises of Meriden for Summitwood, a 345-acre tract just east of the Chamberlain highway.

- Federal, state and local officials formally announced takeover of the Chase Brass & Copper factory complex, Waterbury, centerpiece of the proposed economic revitalization of the Naugatuck Valley.

The takeover of the plant complex releases $7,500,000 in federal/-state economic development funds to turn it into an upgraded industrial complex. Officials estimate that renovations at the nearly vacant brass operation could generate as many as 3,500 jobs.

The Cincinnati Reds will locate their Class AA minor league franchise in Waterbury next season.

Providence, R.i.

Population	**852,800**
Rank	**43rd**
Personal income	**$5,836,000,000**
Income '77 vs. '76	**+9.29%**

Downtown Providence continues to receive an intensive facelift. The Outlet complex is completed. The locally based Gilbane Construction Co. is handling a $2,500,000 renovation of the Arcade Bldg. City Hall is benefiting from

(Continued from Page 4)

$2,000,000 worth of improvement. And the state court house, said to be in line last year for an estimated $15,000,000 worth of work, now is getting a $22,000,000 restoration treatment. A reported $100,000,000 is being spent in downtown Providence in building, with an unspecified $10,000,000 in assorted rehabilitation sites, according to Robert Freeman of the Providence Foundation.

The new construction involves a 40-story hotel/banquet/convention/meeting facility near the civic center; a $55,000,000 federal office building and $48,000,000 in railroad relocation.

The railroad venture involves moving the tracks from their central location near the recently renovated Biltmore Hotel to a new site near the State House, vacating about 30 acres and 3,500,000 sq. ft. of office and commercial space.

The Ocean State Theater for the Performing Arts also has been revitalized at a cost of $1,000,000 and includes an enclosed $100,000 acoustical shell.

- Properties set aside for nuclear power installations in Rhode Island have been declared federal excess and redistributed to the town of Charleston and the Department of Interior. The search for offshore oil continues, with leases issued for exploration near George's Bank. The Baltimore Canyon exploration brought in some $250,000,000 in lease sales and Ocean State residents would like to realize similar revenue from its ocean rights.

The Rhode Island Transit Authority (RIPTA) noted marked increases in its service when gas prices took off, but business leveled off as prices stabilized.

The Port of Providence has bolstered its potential with a new $2,000,000 crane to unload container traffic recently assigned to the port. And the recently expanded Green State airport is awaiting service by TWA and Pan American (if it combines with National) to join the existing American, Eastern and U.S. Air service (formerly Alleghany).

The Electric Boat Works, employing 4,500, is still the area's largest single employer, though Nabisco and Pepsi-Cola have both expanded their local operations. A positive indicator is provided by the state treasury, which showed a $48,000,000 surplus, mostly from sales taxes, for 1979.

Springfield-Holyoke-Chicopee, Mass.

Population	587,200
Rank	68th
Personal income	$3,858,000,000
Income '77 vs. '76	+9.95%

Just how important downtown revitalization is to older, medium-sized cities is being dramatically demonstrated in this western Massachusetts shopping-commercial center.

Syndicated columist Michael J. McManus has labeled the official Downtown Master Plan—prepared by Springfield Central, a spin-off of the chamber of commerce and city hall—"perhaps the most extraordinary political, economic and promotional document published by any city in decades. For it shows the private sector can take the lead in rebuilding cities."

An initial $17,000,000 has been put into a "pooled" mortgage fund from two insurance companies and 11 banks, with $11,000,000 more pledged through the continuing efforts of Springfield Central, co-chaired by David Starr, publisher of the Newhouse's Springfield Newspapers, and James Martin, chairman of Massachusetts Mutual Life Insurance Co., the country's 10th largest insurance company.

One immediate result is the largest shopping mall in western Massachusetts—the $25,000,000 Holyoke Mall at Ingleside, a development of the Pyramid Cos., DeWitt N.Y.

- The projct contains 130 stores and service units and an eight-screen cinema house to rival the well-established Showcase Cinemas eight-screen complex in West Springfield. Other results include the new Crossroads Industrial Park and a large-scale face-lift under way in downtown Holyoke proper.

Still further north, the Hampshire Mall, containing 70 stores and 20 restaurants, opened in Hadley between Northampton and Amherst.

In another project, a $3,200,000 federal grant, which helped clear a block of main street, opened the way for construction, now under way, at Springfield's long awaited Market Place office-retail mall.

The 10,000 sq. ft. of office space leased to Aetna Life & Casualty Insurance Co. is scheduled to be ready for occupancy by mid-February. The entire $6,000,000 project, symbolizing downtown revitalization in Springfield, is to be completed within a year.

- Elsewhere, Chase Manhattan Bank agreed to sell the long-shuttered Forbes & Wallace department store building in downtown Springfield to Commercial Investment Group, whose principals include Leo T. McDonnell and Jeffrey B. Carrington.

The development plan envisions use of the basement, first and second floors for retail space, the fourth through sixth floor offices and upper two levels for a health club.

Another bank, Springfield Institution for Savings, is also undertaking a project. John McP. Collins, chairman, indicated that the bank would know by year's end whether previously announced plans to build a 12-story $18,000,000 office tower over a two-story skylit retail mall will be a "go" or "no go" proposition. The complex would be second in size and scope to downtown Springfield's Baystate West.

- At the once dormant Westover Air Force base in Chicopee, meanwhile, the Westover Metropolitan Development Corp. has recruited Quabbin Industries to occupy two former hangars as the first tenant. Other available land at the Air Base may be used for greyhound racing.

Also in Chicopee, the first Rodeway Inn in New England made its formal bow with a franchise operated by Axelrod International, which is spending more than $1,000,000 for renovation and modernization of the former Treadway Inn.

Springfield's civic center has booked numerous big attractions, including the Hartford Whaler's hockey team, which would otherwise have gone to Hartford if that city's civic center were back in operation. That bonanza is due to end in early 1980.

In a move to improve the efficiency of its bookings procedures, Springfield is turning the civic center into a private, nonprofit corporation and consolidating the civic center management and the management of Symphony Hall, Storrowton Theater, the once flourishing summer music tent on the Eastern States Exposition grounds, West Springfield and debt ridden for the past two years, failed to open in 1979.

Worcester, Mass.

Population	645,100
Rank	60th
Personal income	$4,338,000,000
Income '7* vs. '76	+9.19%

Worcester, the largest municipality in central Massachusetts, smarted for generations under the entertainment/cultural "supremacy" of similarly sized cities across the six-state New England region.

Construction on the long-awaited, 13,400-seat Worcester Civic Center finally got under way after voters, in 1977, narrowly approved a $7,900,000 bond issue as Worcester's share of the total $14,900,000 in city/federal/private financing.

The bond issue passed only after the state supreme judicial court upheld a 119-vote margin and after two referendums, both containing strong arguments and renewed debate over the center's potential contribution to downtown revival.

Civic Center Commission chairman Edward C. Maher promises that the facility will "actively compete," in booking, with centers in Boston, Providence, Springfield, Mass., and Hartford, Conn.

- The center's actual in-construction status has given city boosters much to crow about. And development of such large-scale projects as the 170-acre Worcester airport industrial park and a 150-room downtown Marriott hotel has served to convince even the most die-hard cynics that Worcester can no longer be written off as "just another town" on the way to Boston.

While unemployment rolls may be an issue elsewhere, Worcester's past year's track record is slightly improved over 1978's encouraging figures; unemployment is presently at 4.2%, as opposed to last year's 4.7%.

Industrial revenue bonds (with interest running from 6% to 9%) have totaled $35,000,000 since 1974, outpacing many cities for miles around.

The city also aggressively sought to assist home-grown businesses through a small business assistant fund. "We're becoming known as 'the city of start-ups'," say Worcester area chamber of commerce economic development manager James Donoghue.

"Existing industry here is constantly encouraged to expand and to develop supplementary products through available government/private funding. This pattern reassures industry that it's not necessary to go elsewhere for, say, tool-and-die service."

- The airport industrial park's first signed tenant is European American Knitting Wear, a newcomer from West Germany, initially occupying 30,000 sq. ft. The main marketing emphasis for the park is planned for the spring, initially in the immediate region, then statewide, and, finally, nationally.

Downtown Worcester's ongoing upgrading started 1971 with the development of the Worcester Center, a major redevelopment project. The center recently lost a tenant, (a Kennedy's branch store), but the space was quickly filled by Filene's.

The labor pinch is expected to be alleviated with completion of Hwy. I-190, which will reduce commuting time from Fitchburg, 19 miles to the north, from an hour to just over 20 minutes.

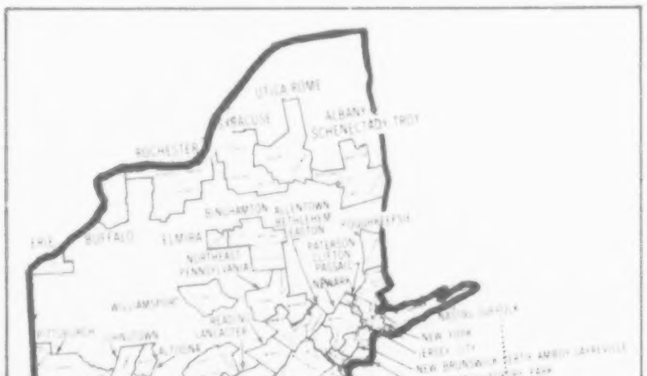
Also contributing to the bouyant mood are area-wide increases in retail sales and housing over 1978.

Energy is something else. Over and above the continuing jump in area supply prices, the energy situation is significantly boosting the value of inner city residential properties. Worcester is in the middle of heating-oil country and consumers will be hard hit by increasing oil prices.

- However, the municipal energy committee is not sitting back. An advisory committee of gasoline-station owners and distributors was formed to better coordinate retail gasoline supply/sales. The municipal administration has urged caution on the part of consumers and business alike.

City manager Francis J. McGrath started detailed planning months ago in anticipation of heating-oil problems this winter. "The major impact so far in the Worcester area," Mr. McGrath emphasizes, "has been one of cost rather than supply, and the city's efforts are primarily directed at conservation and alternative strategies."

Middle Atlantic



Albany-Schenectady-Troy

Population	792,300
Rank	49th
Personal income	$5,470,000,000
Income '77 vs. '76	+7.89%

Downtown development continued to move ahead in the Albany-Schenectady-Troy market during 1979, marked by the completion of some projects begun in 1978 and the posting of new plans for 1980.

After several months delay, construction of the $16,000,000 Hilton hotel is under way on the site of the former TenEyck hotel. Plans for the hotel, first announced in 1978, call for the creation of 400 rooms, which may enhance the city's bid for conventions.

In another effort to accommodate visitors in the Albany area, expansion of the airport's runways and terminal is being considered. The desire for improved facilities to handle traffic, baggage and ticket sales comes at a time when Eastern and Braniff airlines are adding the Albany route to their schedules and TWA is considering the same.

Complementing the activity at the airport is what Jim Grant, manager of community development, describes as "perhaps the biggest news in this district: The Port of Albany." Cibro Inc. just completed a $20,000,000 cracking plant at the port for the refining of crude oil, which will increase the volume of petroleum products moving through the port.

- Also under way at the port is the restoration of the original draft of the Hudson River channel, which will include rebuilding the dock on the Rensselaer side, destroyed by fire 10 years ago.

Two other developments in the area are the proposed $50,000,000 Crossgates shopping center, now being reviewed at state level, and the purchase of the New York Eagles soccer team from the city of Mount Vernon.

Although Crossgates still is far from final approval, the Eagles now have one full season and a lot of notoriety behind them. Businessman and realtor Prenk Curanaj bought the American Soccer League franchise two years ago, but, as one local sportsman put it, "got off on the wrong foot."

In its first full season at Albany, the team had a financial loss of over $400,000, which team management defends as being down from the preceding season's loss of $650,000.

Average attendance at last year's games was only 2,000, but Albany fans aren't blamed for the lackluster showing. Its ad agencies dropped the Eagles two weeks before the first game, reportedly for nonpayment.

Other snafus, according to the local papers, included failure of management to print opening day tickets until the night before the game and tardiness in paying some team members, who consequently jumped ship. Still, the Eagles are expected back this year as, all evidence not withstanding, Mr. Curanaj's problems do not include lack of cash.

- Troy's downtown's Atrium shopping mall, completed last fall, is 80% occupied. At the time of completion, the Atrium was expected to be 95% occupied by March, 1979. Likewise, the Atrium's connecting sister center, the Bazaar, was expected to be 100% occupied by this fall. Instead, the Bazaar now contains only one fully renovated floor (out of five) and houses only two stores out of a potential 30.

Renovation is going ahead on the Bazaar now. It is believed that neither the Bazaar nor the Atrium have lacked applicants for space, but that the stores applying have not met with developer Carl Grimm's requirements. Mr. Grimm is looking for stores that would compliment those already in the center rather than duplicate or detract from them.

- Ardex is a shopping center being built outside Troy's downtown area. Three to four miles away on Pawling Ave., Ardex is a neighborhood center with food and drug stores rather than specialty boutiques and department stores.

CBS Sports Inc., a Bennington, Vt., manufacturer and retailer of sports apparel, is adding a plant in nearby Cohoes. The facility is expected to employ over 100 and will

(Continued on Page 10)

100 MARKETS

(Continued from Page 8)

be located in a renovated textile plant.

Rensselaer Polytechnic Institute captured its share of local notice in 1979 with the completion of a new computer center, part of Project 2000, a long range development program for the school.

■ In Schenectady, retailing and entertainment played an important role in 1979. In addition to the 400 Block development, which is a multi-million-dollar revamping of retail in the downtown section of the city, another project called Center City is being proposed.

Center City's usage would be twofold. Part of the project would be for public gatherings (with facilities for conventions, concerts, skating) with the other part for private business.

Already finished within the 400 Block for entertainment is Proctor's Theater, renovated to accommodate touring symphonies, ballet companies and touring Broadway shows.

Allentown-Bethlehem-Easton

Population	625,000
Rank	63rd
Personal income	$3,148,000,000
Income '77 vs. '76	+9.72%

In the Lehigh Valley, steel, concrete, slate and agricultural products, as well as brewing, are the economic nucleus of the Allentown-Bethlehem-Easton (A-B-E) market on the eastern edge of Pennsylvania.

■ The state Department of Labor and Industry reports that in mid-year, 1979, the A-B-E labor market chalked up a seaonally adjusted unemployment ratio of 6.2% compared to 6.9% a year earlier. Tourism suffered here less than in many areas because the region is within a one-tank-round-trip of New York City and Philadelphia.

Retail merchants in the three cities are pleased with sales in the downtown areas, but there reportedly is a softening in the suburban malls due to the gasoline crunch. But over-all, they say, the energy problem has "not really" affected the area. A national housing mortgage insurance company has rated A-B-E one of the top 10 markets in the U.S.

On the horizon, the International Minerals & Chemical Corp., Northbrook, Ill., is planning a $7,000,000 formaldehyde plant at Seiple, a community near Allentown.

The area is world headquarters for Bethlehem Steel, Mack Trucks and Air Products & Chemicals. Schaefer beer claims the world's most modern brewery in a rural setting in the western part of A-B-E territory.

■ In downtown Allentown, a $15,000,000 hotel and convention center was scheduled for ground breaking in November, 1979, with Philip I. Berman, board chairman of the Hess' department store chain, as the chief promoter. Hess', a 17-unit merchandising business, is being purchased by the Crown American Corp., masterminded by Frank Pasquerilly, a rags-to-riches dynamo, with headquarters in Johnstown, Pa.

Mr. Berman, long a leader in development of the Allentown area, plans to stay in his job and guide further expansion of the Hess' chain with the enlarged financial base of Crown American.

■ Also in Allentown's future is a 14-story, $6,500,000 office tower planned for construction near the Hamilton Mall downtown. The Devonshire Towers Downtown will provide 130,000 sq. ft. of space, most of which will be occupied by an unidentified corporation moving its national headquarters to the Lehigh Valley.

Some 500 new jobs for the area are in the forecast. Developer John H. Van Hooten is handling the project, which will include two parking decks (for 855 cars) to be built by the city. Construction is slated to start in the spring of 1980 with occupancy scheduled for April, 1981. In the wings, a middle-income apartment complex for downtown is still pending action.

■ The thriving downtown area revolves around Hamilton Mall, a four-block shopping/theater/-business district with Hess' department store as the lodestone. An urban renewal project is under way in the South Second St. area.

In the field of education, the Carbon-Lehigh Intermediate Unit, a public school agency, is planning construction of a $1,800,000 administration center on the grounds of the Lehigh County Community College.

In sports, the Pennsylvania Stoners introduced area residents to soccer, completing their first season in the professional American Soccer League.

Bethlehem, "the Christmas City"—with more than 60 events each December—and its Moravian heritage, has picked up economically along with its No. 1 tenant—the Bethlehem Steel Co., which has been adding employes in recent months. The city's apparel business, grown considerably in recent years as the soft-goods side of its economy expands, is highlighted by $10,200,000 expansion at Phoenix Clothes, whose new facility reportedly will accommodate some 1,200 workers, including 200 new employes.

A 10-story office tower for downtown Bethlehem is on the drawing boards, with Mellon-Stuart of Pittsburgh as developer. Center city has its own shopping mall (80% full), an historic restoration of two blocks of Main St. and the Hotel Bethlehem, considered one of the finest remaining center-city hotels in the state.

■ The expanding Lehigh Valley industrial park in Bethlehem has filled its existing space and broken ground for another expansion. Also, Mosser Industries, a valve manufacturer, plans a $7,500,000 expansion expected to provide 225 additional jobs.

Easton, on the west bank of the Delaware River, has expanded merchandising activities with new K mart and Weis stores, accounting for about 225 new jobs. The Easton Hospital has added a new wing with 96 patient beds and expanded operating facilities. A new 10,000,000-gallon sewage treatment plant is under construction.

The largest employer of city residents is Ingersoll-Rand, across the river in Phillipsburg, N.J., which provides jobs for some 3,200 workers.

A healthy outlook for the Easton area is reflected in the decision of the city's daily newspaper, the *Easton Express*, to inaugurate a Sunday edition which was to debut Oct. 14.

Asbury Park-Long Beach

Population	499,900
Rank	76th
Personal income	$3,866,000,000
Income '77 vs. '76	+9.09%

The flashiest project announced last year by Long Branch-Asbury Park—the $66,700,000 civic-convention center—is still on paper but it has moved closer to reality. Designed by Urban Resort Development Corp., the complex blueprinted for beachfront blocks was upheld in a feasibility study turned in recently by Harris, Kerr & Forrester, New York.

The venture, to center around the famous old Convention Hall-Paramount Theater Bldg., would have as its first piece of construction a 500-room hotel. Other hotels (with some store space), a sports arena, performing arts theater, cafes and park areas, and underground parking facilities also are planned for the Atlantic Ocean-front revamping in the years ahead.

The existing Berkely-Carteret hotel, moreover, would be renovated and expanded as part of the project. One of the hotel sites was penciled in a year ago after voters vetoed a jai alai fronton proposal.

Actual completion of this lavish center may be four or five years away. The cost/feasibility study was only the initial step, to be followed by financing arrangements, via a mixture of public and private sources.

■ The other major program under way in Asbury Park is the downtown revitalization, studied by Raymond, Parrish, Pine & Weiner of Princeton. Now being implemented is a "turn of the century" look, complete with red brick paving, period lighting fixtures and appropriate facade alterations.

In other activity, a vacant theater/office building is being converted into a video production studio; more than 60 single-family homes have been approved for spring 1980; seven acres of lakefront (Wesley Lake) property are being prepared for medium and high-density residential development, and 210 new high-rise units are destined for completion early next year.

Long Branch, meanwhile, continues expansion of its facelifted beachfront amusement center in the area around Ric-Cic Corp.'s heavily promoted Haunted Mansion and Water Slide attractions, including an 800-ft. extension of the boardwalk.

As in Asbury Park, there was a noticeable drop in June and July tourist volume, but an improved gas allocation picture and better weather enabled Long Branch to exceed 1978 figures.

■ Special allocations from the New Jersey Department of Energy were credited by Asbury Park officials with turning things around to give this Monmouth County resort city (and others along the New Jersey shoreline) a successful summer '79 season after all. Supplies from central New Jersey refineries are likely to remain "stable" henceforth, these officials added.

Events attracting both tourists and residents of Asbury Park included the Jersey Coast Boat Show at the convention hall and the civic ballet and New Jersey State Orchestra performances at the Paramount Theater.

Long Branch highlights included a Spanish fiesta, senior citizen festival, "art at noon" concerts at various sites and the 100th anniversary of the local fire department at the annual July Fireman's Fair.

Widening the main Long Branch intersections along Broadway has been completed, with paving slated for spring. This market hopes that action will ease local traffic and parking congestion caused by the summertime surge of vacationers. The city fathers also are considering transforming part of downtown Broadway into a pedestrian mall.

■ In other developments, some 40 stores have been renovating their fronts since spring and the parks department has built three new park areas, three new beachfront comfort stations and two baseball diamonds, as well as a bike path at Elberon Park. Two of the city's most serious fires in years destroyed Vogels department store and North End beach club.

Long Branch's $12,000,000 Ocean Blvd. project, calling for construction of a six-lane highway linking this resort city with Monmouth Beach and Deal (with its new 20-store Deal Mall) is under way and scheduled for completion in 1983.

A proposed convention and cultural arts center on lower Broadway, on the other hand, has been shelved temporarily "while the funding picture clears," a Long Branch official said.

Buffalo

Population	1,303,000
Rank	29th
Personal income	$9,164,000,000
Income '77 vs. '76	9.02%

A year ago, major industries in industry-oriented Buffalo were laying off workers right and left and unemployment was up almost one point from 1977's 8.3%. Many thought the city fathers' optimism was misplaced when they coined "The Renaissance" as the keynote for the city's future.

But now it appears that maybe the optimism wasn't just officialdom's nearsighted hype. New hotels, commercial and residential developments, shopping plazas and transportation services are popping up all over Erie and Niagara Counties. Even Bethlehem Steel, which last year laid off 3,000 workers, has hired them all back—plus a few hundred more—to reach an all-time employment high of some 9,000.

Unemployment is down to a re-

spectable 6.6%. A local business leader sees that less as a function of the recovery of steel and other large industry than as a sign of a general broadening of the city's economic base.

"I wouldn't assign too much importance to steel," he says. "It's just not as important as it used to be, and that's a good thing for Buffalo."

■ The momentum of downtown revival, which began a few years ago and was spurred by initiation of the $490,000,000 Buffalo light rail rapid transit system, was given added momentum by announced plans for a $60,000,000 hotel, retail mall and office building complex on Main St. from Genesee St. to Chippewa St.

A 400-room Hyatt hotel at one end of the complex, and a 21-story, 350,000-sq.-ft. office tower at the other, would be linked by a shopping mall and plaza built over an 800-car parking ramp. It would adjoin the city's new $20,000,000 convention center, which opened in October, 1978, and neighbor a $13,000,000, 500-room Hilton Inn, under construction off Main St. on the Lake Erie waterfront.

Another large project, expected to get under way soon, is Waterfront Village, also on the Erie waterfront. It will include 16 and eight-floor condominium buildings, 219 townhouses, a 200-room hotel and office and retail space, including three restaurants.

Going up nearby is a $10,000,000 office building complex, the Pioneer Pyramid, a twin five-story project that will connect to the Hilton.

The city purchased some 36 acres to expand the William St. industrial park complex, which opened in 1965 and has 16 tenants. And it plans a $1,800,000 high technology center at the Elm-Oak Arterial, with space to be leased to companies engaged in such fields as electronics and the manufacture of medical and pharmaceutical equipment.

It's all part of the city's plan to stress light manufacturing and high technology, in a shift away from heavy industry that is more vulnerable to slumps in the economy.

■ Of course, heavy industry is not yet moribund in the area; until an early fall slump, steel production was up. And ICX Aviation hopes to lease 1,000,000 sq. ft. at the Bell aerospace division of Textron, in the Niagara Falls suburb of Wheatfield. Bell, which produces helicopters and military and space hardware, had slumped from a work force of 5,000 in recent years to about 2,000.

ICX plans to employ 1,200 workers—increasing to 5,000 in five years—to build a tri-engine commercial jet plane, although it is having some problems with federal aid for the project.

In other suburban growth, ground has been broken for a $13,000,000, 10-story Marriott Inn, adjacent to the University of Buffalo's Amherst campus; completion is expected in the summer of 1980.

The excavation of three holes, 35 ft. in diameter, marked the beginning of construction on Buffalo's rapid transit line. The 6.4-mile elevated and subway line—with some tunnels going through solid rock 90 ft. deep—will link the base of Main St. with the Main St. campus of the University of Buffalo.

City fathers hope it will provide a shot in the arm for downtown business, much as the Metro system has done in Washington, D.C.

■ Greater Buffalo International Airport plans a $5,900,000 expansion, including three additional gates at its west terminal. And Amtrak opened its Exchange St. station to serve east-west passengers, providing the first downtown train station in Buffalo in 16 years.

About the only sour note in the economy was caused by a downturn in automobile sales late in the year. Early fall layoffs hit the Ford stamping plant, plants turning out Chevrolet axles and engines and Harris Radiator, which manufactures air conditioning units for General Motors.

Tourism suffered at Niagara Falls because of the spring gasoline crisis, although gasoline lines in the area were virtually nonexistent, possibly because the area has two oil refineries.

■ But the energy crisis may be a blessing in disguise for Buffalo. The area, which produces its electricity almost exclusively from coal-fired furnaces and hydroelectric power, is not at the mercy of OPEC. And Buffalo serves as a receiving port for low-sulfur Western coal; federal energy officials are talking about relaxing environmental standards to allow utilities in the Northeast to switch from oil to coal.

"Everyone's talking about switching back to coal," says an industry representative. "We never switched out of it. If the utilities do change to coal, we will become a major trans-shipment port."

The city already is considering a plan to construct additional port facilities to receive coal shipped across the Great Lakes and to transfer that coal to the railroads for delivery to the East Coast.

Harrisburg, Pa.

Population	**429,800**
Rank	**91st**
Personal income	**$3,148,000,000**
Income '77 vs. '76	**+9.72%**

The hydrogen bubble of Three Mile Island cast a $2,000,000 shadow of fear over Harrisburg in the wake of the March 28 nuclear power plant accident, including $500,000 lost when the National Hardware Dealers Assn. quickly switched its convention site to Nashville. Tourism in the area took a nosedive.

The $2,000,000 in lost business, an estimate of the state commerce department for the 30-day period following the incident, was the result of the closing of shops, stores and industries when employes and customers fled the area to escape radiation uncertainties of the nation's worst nuclear plant accident. The state has applied to the Federal Economic Development Administration for a $50,000 grant to help polish the area's tarnished image.

■ But area businessmen are more hopeful than the bureaucrats, and with good reason: In the first seven months of 1979, construction contracts were up 22% over the previous year for a total of $68,300,000 residential and $21,900,000 nonresidential; the unemployment figure at midyear dropped to 4.4%, down 1.1 percentage points; real estate dealers say Three Mile Island has had no impact on their market; British American Tobacco Industries has mounted a $30,000,000 expansion at its Appleton Papers plant in nearby Lower Allen Township for production of finished paper rolls and sheets, with completion slated for December, 1980; Island Seafood Corp., an area industry since 1959, is undergoing a $5,000,000 expansion to double its plant operations and storage space.

And two new motor inns, Marriott and Sheraton, are under construction to provide 600 additional hotel rooms—300 each—for the area next year. A $2,000,000 high-rise apartment complex for the elderly is under construction near the downtown area. Several other multi-million-dollar housing projects for the aged are being planned.

The new motor inns have their eyes on government and business rather than tourism, hard hit—down 25% to 30% in 1979—by a deadly combination of Three Mile Island, the gasoline crunch and a summer outbreak of polio in the nearby Amish country. At Three Mile Island, however, a visitors' observation center attracted more than 25,000 sightseers July 7 through mid-September.

Harristown, the $500,000,000, 12-year urban redevelopment project in downtown Harrisburg, entered Phase II in mid-1979 after the completion of three downtown office towers and two multilevel parking garages. When state agencies complete moving into the tower at 333 Market St. by Jan. 1, 1980, the center city work force will have expanded by 7,000 during the past year.

A retail mall in Strawberry Square, the heart of Harristown, comprised of two office towers on Walnut St., between Third and Fourth Sts., became operational in September with the opening of the first shop. Deals were in the works for most of the other spaces in a two-level, 100,000 sq. ft. merchandising area, which will be connected with another 120,000 sq. ft. of shopping space in the adjoining Pomeroy's department store.

Restaurants and night spots are in the making, including the Great International Food Works with nine ethnic restaurant areas. Formal opening of the mall is set for March, 1980.

Additional construction on Harristown's Phase II, slated to begin in mid-1980, is scheduled to include a $30,000,000 hotel and convention center, a $70,000,900 state office building, a $15,000,000 private office building and two facilities for the city government to cost about $12,000,000.

■ There have been some minuses in downtown Harrisburg this year. Two merchandising landmarks left the scene. Doutrichs men's store, a 70-year-old downtown tenant, closed down to put all its eggs in two existing suburban mall outlets, and the E. G. Hoover Co., a quality jeweler in business since 1891, also fled to the suburbs.

Jimmy's Forum, a popular watering hole for politicians, "didn't have the heart to go on" after the death of proprietor "Big Jim" Laskaris.

In the area of public works, a $20,000,000 water treatment plant is in a holding pattern, as is an $80,000,000 flood control project. The city also plans to convert an uptown slum area into an industrial park and to construct two parking garages near the capitol to discourage the demolition of downtown buildings for surface parking.

A continuing problem businesses face is the Conrail freight car shortage, but in highway transportation the area continues to thrive as a crossroads and as a warehouse and distribution center. Two additional lanes of traffic are being added to Harrisburg's South Bridge, and the Susquehanna River bridge at Clarks Ferry, north of the city, is being widened.

The state allocated $6,000,000 for improvements at the state-owned Harrisburg International Airport in the next five or six years, including the design of a much needed new terminal building.

This fall, TWA will begin operating the first same-plane flight between Harrisburg, Miami, and other Florida cities, via Pittsburgh. Another airline has expressed interest in direct north-south flights when new terminal facilities are available.

In rail passenger service, the city was due to lose the New York-Kansas City National Limited, one of its two Amtrak trains, on Oct. 1, with only the New York-Chicago Broadway Limited remaining.

Jersey City, N.J.

Population	**554,000**
Rank	**71st**
Personal income	**$4,235,000,000**
Income '77 vs. '76	**+7.6%**

With capital investment commitments exceeding $100,000,000 for the first time in a decade, Jersey City, N.J., the largest municipality in Hudson County, is calling 1979 a banner year.

A number of projects in the area, hard hit in the past decade by industrial deterioration, moved forward, and unemployment continued to decline to 11.2% last July from 11.7% a year earlier.

Indicating the improvement in the area's outlook is the renovation in Jersey City of old brownstones by middle level professionals for their personal residences. At least 400 are presently under renovation.

One building, dating from 1690, in the heart of Jersey City's downtown Journal Square, has been restored and turned into a restaurant by history buffs. Called Summit House, it offers American colonial food. Another old building, the Majestic Theater, originally a burlesque house, may be revived for a repertory theater company.

■ Liberty State Park, just several hundred yards across the water from the Statue of Liberty, has become one of the most frequented parks in the state, with ferry service to the statue and to Ellis Island, once the principal immigration point into the U.S.

The Jersey City Cultural Arts Council sponsors free concerts in the park every summer. Entertainment has included the New Jersey Symphony, Lionel Hampton and Buddy Rich.

Retail sales in the county were expected to improve with the November opening of the K mart Shopping Plaza, a $11,400,000 project that includes a Pathmark supermarket, Roy Rogers restaurant, Trust Co. of New Jersey bank branch and eight small stores in addition to K mart.

■ Jersey City has been successful in finding tenants for several previously unoccupied buildings. The American Industrial Center has been established in a 1,150-sq.-ft. building formerly owned by American Can. Described as a vertical industrial park, it now houses 28 companies and provides jobs for 1,100 people.

A building vacated by Bali Corp. three years ago has been expanded to 325,000 sq. ft. and is expected to be completely occupied by clothing manufacturers soon. An old W. T. Grant building of 300,000 sq. ft. is now occupied by Nelson Resources, a labeler and distributor of garments, and provides 400 jobs.

Under a new federal program providing funds to urban areas, Jersey City has received $12,000,000 during the past 18 months. Some $3,200,000 of the total is going toward a $17,200,000 project on 52 acres of land that is designed to become a major trucking turnaround spot for the metropolitan area. It will include a truck stop, motel/hotel and restaurants.

■ Another $7,000,000 is earmarked for the $32,000,000 Montgomery St. Gateway Project that involves rehabilitation and construction of moderate income housing on a 100-acre site. Just completed in another project are two of four buildings for senior citizen housing that will provide 564 new units when the whole project is finished next year.

Jersey City has also heard public comment on a proposal for 1,100 units of high income housing on 70 acres of land near Roosevelt Stadium. Hartz Mountain Industries is one developer that has expressed interest in the project.

A number of other projects are progressing slowly. A 187-acre area known as the Greenville Yards has been selected by the Port Authority of New York and New Jersey as the site for a $1 billion industrial park.

When fully developed in 10 or 12 years, the project will contribute 7,000 new jobs and a payroll of $78,000,000 in 1977 dollars. During construction, an estimated 1,000 new jobs will be created. The project will require an investment of an estimated $269,000,000. The 33-acre Montgomery St. Industrial Park is expected to create 500 to 600 new jobs.

Also moving forward are plans for a $170,000,000 regional food distribution center on a 442-acre site. The center would create about 4,000 jobs. The city's hope for a jai alai fronton was dashed when state voters failed to allow the sport in the state. Now, the Jersey City mayor is proposing that a major theme park be developed in that same area near Caven Point.

The city continues to offer tax incentives to businesses to attract them to the area. It claims that the cost of operation is 22% less than in New York.

With a 96% occupancy rate of office space, Jersey City is conducting a study to determine the feasibility of adding more office buildings. In a move to help local brokerage houses, the municipality battled the Federal Communications Commission and won the right to finance its own communication network to New York to avoid higher telephone rates between the two states.

Nassau-Suffolk

Population	**2,690,000**
Rank	**10th**
Personal income	**$23,154,000,000**
Income '77 vs. '76	**+8.0%**

The two suburban Long Island counties, Nassau and Suffolk, are more than peaceful residential areas on the outskirts of New York. Comprising a 150-mile strip of land reaching out into the Atlantic Ocean, both counties continue to grow as the movement of small businesses from city to county increases.

The Long Island unemployment rate continued to fall this year, dropping 0.3% below last year's figures to 6.9%. This improvement has been attributed to a rise in employment in the retail and wholesale trades.

Nassau and Suffolk traditionally have felt the strain of the city's fiscal uncertainties, with many county residents losing their city jobs. However the influx of city businesses into the counties, coupled with the federal aid the city is now receiving, is expected to relieve some of these pressures.

■ In 1978, 81 new plants opened in the counties, 44 fewer than in 1977 and 79 fewer than in 1969, with many of these plants coming from the city. Sources at Long Island Lighting Co., Mineola, N.Y., said city businesses were attracted to the counties because energy costs were significantly lower.

In addition to new and relocated plants, there were 243 plant expansions in 1978, a record number for Nassau-Suffolk. The majority of

(Continued on Page 16)

100 MARKETS

(Continued from Page 12)

the plant expansions and relocations occurred in Long Island's easternmost county, businesses preferring Suffolk's less-congested expanses. Ground was broken for 58 new plants in Suffolk in 1978, while Nassau attracted 23.

Among the new companies that have moved into the area are Ullman Co. in Happaugue, with 140 new jobs; Glamour House Products, Bayshore, with 65 new jobs; Arlen Industries, Amityville, with 40 new jobs, and National Patent Development Corp., Woodbury, with 30 new jobs.

Business-stimulating developments continued last year with one of the biggest projects being the University of New York's new hospital complex on the Stonybrook campus. The 20-story project will open early next year, supplying jobs for about 1,000 doctors and nurses and training for Stonybrook interns.

■ The Garden City hotel and the Mitchell Field industrial park hotel will provide almost 2,000 rooms when they open late this year.

Mitchell Field is a converted Air Force base that, when completed, will house a number of light industries and research companies in about 1,000,000 sq. ft. of office space. It also will provide about 3,000 jobs. In addition, 300 condominiums have been approved for 1980 construction on the site.

Project Isabelle, the brainchild of the Brookhaven National Laboratory of Energy Research in Suffolk, continues multi-billion-dollar construction of the world's largest accelerator designed specifically for high energy research. When the project is complete in five to seven years, Isabelle will employ a regular staff of 200.

At $22,330 annually, the median personal income in the SMSA is the fifth highest nationally, down from second in 1977. Total retail sales rose more than 10% to $10.2 billion. With 174 stores and occupying more than 2,000,000 sq. ft., Roosevelt Field remains the largest of Long Island's 20 shopping malls and ranks among the biggest in the nation.

■ Tourism remains a factor in the economic growth of the two-county region. Concentrated in the summer months, the tourist trade brought in an estimated $1.4 billion in 1978, up from $1.2 billion in 1977.

The biggest convention of the year in Nassau-Suffolk was the second annual "Long Island loves business" (LILB) exposition called Expo '79. The three-day affair was created to attract business to Long Island and familiarize local businesses with their competitors.

Held in the Nassau Coliseum, this year's exposition attracted more than 300 businesses and about 20,000 visitors. LILB estimates that local businesses paid about $50,000 to display their exhibits and attend Expo functions.

Fishing enthusiasts convene in the waters off Long Island for fishing tournies and other events that attract anglers from all over the East Coast. The Annual Shark Tag Tournament attracted 700 participants in about 150 boats eager to tag blue fins and makos.

Newark

Population	1,951,300
Rank	16th
Personal income	$16,998,000,000
Income '77 vs. '76	+9.12%

Newark is still afflicted with what its residents delicately refer to as "the image problem"—the tendency of Newark's name to summon up visions of urban decay and race riots, both of which brought Newark national attention in the 1960s.

As Newark heads into the 1980s, its citizens tell you that such problems are no longer as dire. They contend that race and poverty problems affected, and continue to affect, not just Newark, but all big cities.

Interviews with Newark city planners, developers, business executives and community workers reveal a sense of optimism about the city's future. Much of this is based on a feeling that Newark has survived the worst and now is climbing back.

Part of that optimism is due to energy concerns: Newark, with its first-rate mass transportation system, views itself as being in a better position for the energy-conscious 1980s than its automobile-dependent suburban neighbors.

■ Symbolic of this is the Public Service Electric Gas Co.'s decision to remain headquartered in downtown Newark, as it has for the past 75 years. The PSE&G had considered moving to the suburbs, but changed its mind after considering energy and transportation demands.

Among the deciding factors was a study that showed that almost two-thirds of the company's work force commuted to the job by public transportation. Had PSE&G moved, nearly 2,000 employes would have had to drive cars to work. Upon deciding to remain in Newark, the company undertook construction of a new 26-story office building alongside its present facility.

Also viewed positively as a sign of Newark's comeback is the building of three new shopping malls in the city, a reversal of the suburban shopping mall trend.

The three new malls are The 60,000 sq. ft. Ivy Plaza, which opened last year; the 57,000 sq. ft. Ironbound Plaza, which is under construction; and the 44,800 sq. ft. mall at West Market and 12th Sts.

■ As with many other older cities, Newark is experiencing "gentrification," the influx of young professionals who buy up and renovate inner-city housing. In Newark, most of this renovation is taking place in the James St. Commons-Lincoln Park area, a 20-block, 65-acre section of Newark that contains the city's largest concentration of Victorian townhouses. It has been declared a federal historic district.

Among those going the restoration route is Wayne Braffman, business manager of Newark's Symphony Hall Corp. (the Symphony Hall building itself was restored in 1977). He bought a three-story brownstone one block from his job on Lincoln Park two years ago for $11,500.

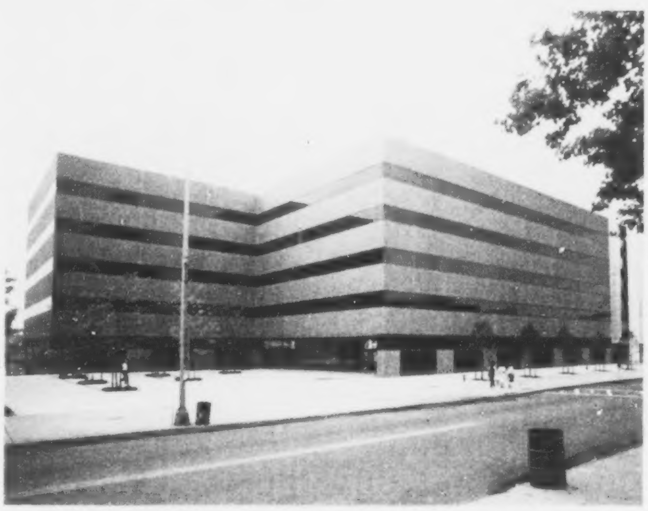
In the intervening two years, he has spent $26,000 on renovations and is ecstatic about the house. "It has oak floors, enormous fireplaces, everything you could want," he says.

Another sign that the whole Lincoln Park area is picking up was the opening of a new disco there, the Paradisio, earlier this fall. The Paradisio is located in the former Continental Ballroom; renovations cost $500,000.

■ Other indications of Newark's more hopeful spirit include the chamber of commerce's Project Pride, an antivandalism program, begun in 1977. At that time, vandalism was costing the city nearly $500,000 per year. It has now been cut in half.

Project Pride, which incorporated this year, is designed to combat vandalism in the schools and housing projects by educating school children on vandalism's costs and involving them in clean-up programs.

Newark also took pride in having the distinction of sponsoring 1979's only major university-level volleyball tournament on the eastern seaboard. Participants included Ohio State, USC, UCLA and the hometown favorite, Rutgers.



Architect's sketch dramatizes the planned College of Medicine & Dentistry/Rutgers Medical School in New Brunswick, scheduled for completion in 1980.

UCLA, the nation's top team, won the tournament, which attracted capacity crowds of 2,000 to the Rutgers gym. "It was world class volleyball," according to one of the organizers.

New Brunswick-Perth Amboy-Sayreville, N.J.

Population	591,100
Rank	67th
Personal income	$4,744,000,000
Income '77 vs. '76	+9.33%

When the crowds of New Brunswick revelers gather on the campus of Rutgers University Dec. 31, 1980, they will be celebrating three events—the new year, the city's 300th anniversary and the completion of many community redevelopment projects.

The year 1980 will see completion of Johnson & Johnson's new international headquarters on Route 18, a $50,000,000 undertaking.

At the same time, the $38,000,000 Middlesex General Hospital expansion and a $12,000,000 medical education building of the hospital will be completed. The expansion will make the hospital the primary teaching facility for the Rutgers Medical School of the College of Medicine and Dentistry of New Jersey.

According to Dolores M. Carlucci, executive director of the New Brunswick Chamber of Commerce, the J&J headquarters and the hospital expansion will contribute greatly to the major rehabilitation which is taking place in what residents have dubbed "the city on the move."

■ The influx of new students and doctors, she continued, also will serve to heighten further New Brunswick's image as a college town.

As the home of Rutgers, the state university of New Jersey, and Douglass College, New Brunswick already experiences the annual fall arrival of 14,000 new students to those campuses.

And while the population of New Brunswick officially is 43,000, workers and students increase the figure to more than 100,000 during the daytime.

The New Brunswick Development Corp., with the support of J&J, the city's largest employer, and other businesses, this year completed Plaza II, a complex of four office buildings which recently won a design award.

The corporation also has broken ground on a 300-room Hyatt hotel and conference center on Route 18 near three Rutgers dormitories. Groundbreaking also has begun for Plaza III, an office building complex involving twin towers.

■ Dolores Carlucci envisions New Brunswick being as bustling a city at night as it currently is during the day. She has begun to see signs such a goal is within the city's grasp. Younger families are rehabilitating older housing in the city; condominiums are being created out of old buildings—one of which had been a needle factory years ago.

The city, the county seat of Middlesex County, also boasts many restaurants—Alfredo's, Christopher's Pub and the Golden Spike are among the most popular.

The city's efforts to clean up pollution in surrounding waters each year includes a "Festival of Blueberries" an event which draws several thousand people to hear entertainment by water conservationist Pete Seeger and board the Clearwater sloop.

The effort is beginning to pay off, according to Fred Mazurek, community development director, who noted that fish—including 14 to 20-lb. bluefish—are once again being caught along Perth Amboy shorefront for the first time in years.

■ Bayside Villa, a complex of patio homes, is under construction a block from city hall. The unattached houses, priced from $97,000 to $135,000, are similar to those in an earlier Bayside Terrace complex.

Although the costs of such houses have jumped $12,000 from their originally listed price, 15 or 25 units have been sold, with some to be occupied by the beginning of next year.

Although lacking a company like J&J to help underwrite its community development efforts, the city of Perth Amboy has been buoyed by the $100,000,000 invested by Canadian-based Co-Steel in transforming the site of an old Anaconda plant into its new Raritan River Steel plant.

The plant, currently starting to hire some of the 500 workers it will need, will begin operating shortly, and expects to be fully operational by next fall.

Known as the Bay City because it is bounded by the Raritan River and the Arthur Kill, Perth Amboy remains optimistic that the search for oil in the Atlantic Ocean's Baltimore Canyon area could eventually bring an economic boom should the city be chosen as a receiving and distribution point by the oil companies.

■ In the meantime, industrial growth continues via an industrial park which has been developed on a site once occupied by a National Lead plant. The park currently has 14 tenants and could accommodate as many more, depending upon their size.

Community pride can be seen in the facelifting the downtown area is undergoing. Curb cuts have been installed at all intersections mainly to aid senior citizens and the handicapped.

Five Corners, the city's major section, is getting a plaza complete with benches and banners. Eventually city banners will be affixed to all street lights. The triangular banner bears a seagull design.

"We're old, but very progressive," says community development director Anthony Travisano in discussing Sayreville, a 16-sq.-mi. borough across the Raritan River to the south of Perth Amboy.

■ The progressive attitude of the borough of 36,000 residents is manifested in Sayreville's self-insurance program which has amounted to nearly $200,000 in savings to taxpayers since it was instituted in 1977.

The self-insurance program, covering workmen's compensation and borough property insurance, was made possible by funds originally set aside in 1962.

Improvements in the quality of life in the borough whose population is comprised mainly of residents of Polish, Italian and Irish extraction, range across the recent expansion of the borough library, the ongoing construction of a new $4,000,000 complex which will house Sayreville's 80-member police force and a $2,000,000 improvement program under way at Kennedy Park.

When completed, Kennedy Park will feature new ballfields, six additional tennis courts (there currently are six) and picnic areas.

Sayreville also is looking to the completion next year of Sayrebrook, a privately developed complex which will feature one and two-family townhouses, a shopping complex and office space.

The area has seen an increase in the number of residents who commute to New York due to residential construction principally off Route 9, one of three major state arteries which cut through the borough.

New York

Population	9,221,800
Rank	1st
Personal income	$76,077,000,000
Income '77 vs. '76	+7.38%

Bustling, cosmopolitan New York continues to be a headquarters city and international capital that attracts 20,000,000 visitors annually. They are drawn not only by business but by its museums—more than any other city in the world—art galleries, clubs, dance and concert halls, libraries, movies, ballet companies, symphonies, retail stores, restaurants, parks and sporting events.

The city has its problems. New York shoulders an enormous welfare burden. As a melting pot for people of different backgrounds and life styles, it is often a field of battle, an arena where differences are aired, a point demonstrated by the gay community's protest of the filming of the movie "Cruising."

As a headquarters for banks (whose names fill 10 Yellow Pages of the Manhattan telephone direc-

(Continued on Page 20)

(Continued from Page 16)

tory,) it's a prime target for robberies, and there were no shortages of them in 1979. And as the largest municipal employer in the country—paychecks for some 250,000 union workers come out of the city coffers—it faces perennial fiscal problems.

▪ But the picture is looking rosier for the city. Lately, it looks as if New York can pull itself out of the financial rut it staggered into. Since the last recession, the city has trimmed the fat from its budgets, become more competitive in luring business here and more aggressive in attempting to stem the exodus.

And now, after gloomy years of cutbacks and retrenchments, its municipal government, finance and construction sectors are rallying. (From 1969 to 77, the city lost some 625,000 jobs, 16.5% of its total employment.)

One need only walk through midtown for testament to the vitality of construction. Some of the construction is being done on hotels and the results—the Palace Hotel, Harley Hotel, New York Hilton Hotel, a new Hyatt Regency, Helmsley Hotel and Nassau Hotel—should help alleviate the ordeal of finding a vacant room.

The city's hotels have thrived, some at near full occupancy year round, and others at an average of over 80% occupancy.

It isn't just visitors who are attracted to New York. After years of losing more and more of its middle class to the surrounding suburbs, New York has finally turned the tide; its people, tired of commuting, are returning.

▪ To make living space for them, manufacturing lofts in Greenwich Village and Soho have been converted to residences and new apartment buildings have been erected, seemingly overnight.

Some neighborhoods, previously considered unredeemable, have begun to show signs of reclamation. The rundown West 42nd St. area now houses the sleek, well designed Manhattan Plaza and supporting complex of stores and theaters.

Other neighborhoods which had been sliding downhill, such as the Upper West Side and Chelsea, are now looking more spruced up. And previously exclusively work neighborhoods, such as the financial district, are now luring patrons to build a round-the-clock community.

Ex-New Yorkers aren't the only ones flooding into the city, pushing rental rates to dizzying heights. (Many apartment seekers would consider a studio in a clean, well maintained building at $450 a month a bargain; they would also snap up a one-bedroom at $600.)

The city has also attracted swarms of foreign investors, eager to convert their far-reaching marks, yen, francs, pounds and other currencies into New York co-ops, condominiums and brownstones.

▪ Foreign investment buoys more than just the home real estate market. New York City is headquarters for 73 foreign bank branches with 97 offices, 60 international financial houses, and 136 offices of 26 international banks and trust investment companies.

Foreign companies have also bought into the New York retail scene. They now own Gimbels, Saks Fifth Avenue, Korvettes, A & S, Orbach's and F.A.O. Schwarz toy store. The city also has 131 large international law firms.

The city's future looks brighter as a result of the energy crisis than many other markets. According to New York's outspoken mayor Edward I. Koch, "The city is naturally energy efficient because of its heavy use of mass transit and its concentration of multifamily dwellings.

"We were not surprised to learn that—unlike their suburban counterparts—businesses in the city did not report any increased absenteeism among employes or need to change business hours. Over 60% of the working city residents walk or use mass transit to get to their jobs.

"Sales in the city's major department stores have continued to rise this summer and were apparently unaffected by the shortages of gasoline. In addition, New York City's tourism is having its best year ever. You don't need a car to get to New York, and you don't need one to get around the city once you're here."

Northeast Pennsylvania

Population	629,200
Rank	61st
Personal income	$3,936,000,000
Income '77 vs. '76	+8.85%

As with the fable about the blind men attempting to describe an elephant, pinning down the economic health of the Northeast Pennsylvania SMSA depends upon whom one talks to.

"Prosperity isn't around the corner. It's here," says a Wilkes-Barre newspaper business editor, who cites scores of new and expanded industries.

But around that corner—or rather 24 miles to the northeast in Scranton—things are a good deal more subdued.

"I'd say maybe we're on the upgrade, ever so slightly," says a cautious chamber of commerce official. Employment is up, she says, but so is unemployment—to more than 10%.

That's the apparent result of more women entering the job market. And that in turn is the apparent result of families needing a second paycheck to pay utility bills and to meet other inflationary costs, she says

▪ To the south of Wilkes-Barre, in Hazleton, modest but steady growth goes on. But there is the prospect that the beds of anthracite coal upon which Hazelton rests, and which extend south to Harrisburg, may once again mean boomtown days for the southern Luzerne County area.

To the east, rural Monroe County is beginning to stir with some new development, but the gasoline shortage this spring hurt its resort areas.

In short, it's far from a homogenous economic picture in Lackawanna, Luzerne and Monroe Counties, the three components of the Northeast Pennsylvania SMSA.

Wilkes-Barre officials happily note industrial growth in the city and the surrounding area in 1979:

- Frye Boot, a subsidiary of Alberto-Culver, opened a plant in Hanover Township. At full production, it will employ some 300 leatherworkers, with an annual payroll of about $3,000,000.
- Schott Optical Glass, a German-based company that has its only U.S. plant in Duryea, will construct a new research and development facility at the plant, adding some 80 employes to its present work force of 600. The facility will develop and produce a prototype laser glass for laser fusion experiments.
- Owens-Illinois' Pittston plant, which manufactures television screens for major electronics companies, has rehired workers it previously laid off, as well as adding some 50 new employes.
- The General Services Administration announced plans to locate a new facility in Wilkes-Barre, consolidating 12 federal agencies housed in three older buildings in the city. The federal government will lease the building from the developer.
- Savin Corp. has confirmed that it is considering building a 500,000-sq.-ft. plant that could eventually employ 3,000 people. The plant would house Magnetic Laboratories, a new subsidiary of Savin, which manufactures office equipment and copying machines.
- Allied Services, a Scranton-based company that provides rehabilitation service for the handicapped, is building a $12,000,000 facility on Mundy St. in Wilkes-Barre. It will accommodate 86 persons and provide 300 new jobs.
- Completion is expected in late 1980 or early 1981 for the Pennsylvania Power & Light Co.'s Susquehanna steam and electric plant, a nuclear facility at Beach Haven. Some 2,000 workers are completing the first of two units; the second is to be completed in 1983.
- An $11,000,000, two-wing expansion of the Wilkes-Barre General Hospital is to be ready for occupancy by early 1980.

▪ Meanwhile, in Scranton and Lackawanna County, public transportation is being improved with the purchase of 41-passenger buses and the addition of bus shelters and maintenance equipment.

In Simpson, a suburb of Scranton, a 50,000-sq.-ft. expansion is under way at the main plant of Gentex Corp., which manufactures cord, twine, medical and surgical instruments and other materials. The expansion will add 500 employes, more than doubling the present work force.

Chrysler Corp.'s Scranton Defense Plant is being renovated to manufacture components of the new XM-1 main battle tank. But, according to Chrysler, no employes are being added, because the plant will phase out the manufacture of components of the present M-60 tank.

In the borough of Olyphant, a 500-acre tract is being prepared as the site of the Mid-Valley Industrial Park, near the virtually full Keystone Industrial Park.

▪ Scranton business leaders, while worried about their high unemployment rate, said they are beginning to feel the impact of the completion last year of the Interchange of Int. Hwys. 84, 380 and 81 in the suburb of Dunmore. A number of distributing and warehouse companies are expressing interest in locating in the area, which provides easy access to New England, New York and points south.

And Pocono Airlines, an arm of USAir (formerly Allegheny Airlines), has purchased two new aircrafts and will increase its commuter service to Williamsport, Philadelphia, Newark and New York beginning in May.

In Hazleton, ground was broken in September for a $4,700,000 coal gasification plant, which will be operated by Can Do Inc., a nonprofit industrial development arm of the chamber of commerce. It will serve the 1,400-acre Humboldt Industrial Park in Hazel Township.

Paterson-Clifton-Passaic, N.J.

Population	444,700
Rank	86th
Personal income	$3,438,000,000
Income	+9.21%

Though tied together for census and marketing considerations, Paterson-Clifton-Passaic, N.J., are as diverse as three neighborhoods in New York, under whose shadow these New Jersey communities stand.

Paterson is the most urban of the three, Clifton the most suburban, with Passaic in the middle, trying to blend the best attributes of both. In the massive jobs exodus of a few years back, Passaic came closest to being devastated so its rebound from the economic pits has been the slowest and toughest.

Area employment is still depressed. The average unemployment rate is approximately 12% with the job shortfalls concentrated in the Hispanic and black communities. Dozens of major companies left the region in the mid-1970s.

While many fled south for warmer climes, lower taxes and a cheaper job force, a number were thwarted when they didn't have the room to expand. Other businesses were simply phased out after being acquired.

The past year, nevertheless, has raised hopes for a brighter employment picture. Some light industry and service organizations, for example, are still relocating from decaying parts of New York and Newark to the area. In Clifton, more than 1,500,000 sq. ft. of vacant industrial space just three years ago has been trimmed to fewer than 200,000 this year.

Some of the most substantive steps toward reducing unemployment are being taken in Paterson under the auspices of the chamber of commerce.

Earlier this year, the chamber started a school to train machinists, one job category where supply has not kept pace with area demand.

In addition, the first chamber-sponsored, three-month weavers school is about to start, and the anticipated 60 or so graduates of the first class have already been assured jobs with one of the local textile mills, still the area's single largest category employer. The KalkStein Silk Mills alone will hire 35% of the new workers.

Another major Paterson employer, Sun Chemical Co., added 40,000,000 sq. ft. of production line space this year and plans to add a similar amount in the near future.

▪ Though Clifton lost heavily in the early '20s economic downturn, major branches of giants like Georgia Pacific, Du Pont and ITT remain, as does the region's biggest single employer, Hoffmann-LaRoche, which signs the paychecks of some 7,000 residents.

To promote interest in the area, both the Clifton and Paterson Chambers of Commerce have had promotional campaigns for the past few years.

Both consumers and industry are urged to discover the two cities' prime locations, ease of access to other major cities via a multitude of transportation links and the area's bright future, stemming in part from a steady stream of federal funds for a variety of projects.

Proving that there's usually a silver lining in even the darkest of clouds, the 1979 gas crisis had an extremely positive effect on Paterson, the most urban community of the trio.

▪ For example, while retail sales in some of the mammoth area shopping centers in Wayne and Paramus were down as much as 50%, center city sales not only held up but even posted modest gains.

For the first time in the decade, there was no available space in the downtown shopping district; moreover, the Paterson Chamber of Commerce says it has a sizable waiting list of businesses ready to move in the moment a store becomes vacant. This situation, in turn, has prompted a significant rise in some property values while the tax base remains stable.

Paterson's retail sales were in the $350,000,000 range in 1977 and more than $411,000,000 in 1978. Town fathers look for 1979 figures to at least maintain that rate of growth.

So striking has Paterson's recent growth been that even the Lower Main St. Mall project has been revived through transfusion of some $800,000 in urban renewal funds. So far, more than $1,000,000 has been spent on the project, which consists mainly of small specialty shops, boutiques and restaurants.

This section, in turn, is part of the major Great Falls project, which has substantially reshaped the city's inner core, highlighting the city's past glory as the locomotive manufacturing capital of the world. Moreover, there has been a flurry of housing projects in the past year.

▪ One is a 159-unit project of INCCA, the Inner City Committee for Action, and another, the Jackson-Slater St. project, being funded by the Catholic archdiocese.

Within the horseshoe-shaped Clifton limits is Passaic. More than a third of the local work force lives in the city, and an even higher number uses public transportation. A major attraction downtown is three of the largest hospitals in the area.

For several years, Passaic has been building a new civic center and police station. A $5,000,000 parking mall was completed and includes a variety of retail outlets.

The city's major effort to attract more industry involves the vacant Botany Mills 50-acre industrial site. Town fathers are carving the industrial park into smaller units suitable for smaller scale businesses.

Philadelphia

Population	4,770,400
Rank	4th
Personal income	$35,648,000,000
Income '77 vs. '76	+8.5%

Philadelphia is a city in transformation. Once a sluggish center of transportation and manufacturing, the city is in the midst of a growth economy largely due to a rapid influx of service industries.

Office building and hotel construction is booming. Downtown retail districts are blossoming. The city is aggressively attracting tourists. Philadelphians are watching changes taking place almost overnight and, for the first time in almost 100 years, there is optimism about an expanding business future.

▪ Business leaders are calling it "The New Philadelphia Story." Between 1960 and 1975, about 10,000,000 sq. ft. of office space rose in glittering steel and glass above this historic city. Nine center city office projects were in the works in 1979 and by the end of the '80s ten more will be completed, adding another 10,000,000 sq. ft.

Scheduled for completion in 1980 are Franklin Town Plaza, an $87,000,000 complex that will contain a 30-story, 800-room hotel operated by Canadian Pacific Hotels Ltd., a 24-story office tower to become headquarters for SmithKline Corp., a convention center and exhibition hall and a two-level underground garage.

Based on the early success of the Gallery, a multitiered shopping arcade that represented a progressive move by developers and financers to bring the shopping mall concept to the heart of an urban area, construction is also under way on Gallery II. Only blocks from city Hall, the Gallery II site is adjacent to the existing Gallery and will in-

(Continued on Page 24)

100 MARKETS

(Continued from Page 20)

clude a J. C. Penney department store and two 440,000 sq. ft. office towers.

- Faith in continued growth also is evidenced in the major refurbishing of Philadelphia's grand old luxury hotels. First-class travelers can now find elegantly appointed accommodations at a number of locations in the city.

The new Fairmont Hotel is a good example. The old Bellevue Stratford closed in 1976 and, $25,000,000 later, opened in September, 1979, as the Fairmont Hotel with 565 luxury rooms.

Restaurants have been cropping up all over the city, too. More than 150 restaurants have opened in the past two years. Dining out is now an important part of the Philadelphia life style. Local chefs approach celebrity status.

When *Philadelphia* magazine publishes its annual dining guide in a regular monthly issue, newsstands sell out so fast that the publisher reprints 15,000 copies of the guide and makes it available under a separate cover. According to *Food & Wine* and a number of other important publications, Philadelphia has gained an international reputation for fine dining.

- The proliferation of classy dining spots and the rebirth of posh hotels is expected to make Philadelphia a more attractive tourist destination. For the first time, tourism dollars are a priority in Philadelphia, and the city has alloted $3,000,000 to be spent over a three-year period to promote tourism and economic development in an international advertising campaign. The theme is "Surprising Philadelphia."

Not so surprisingly, the year-old campaign is working. Eugene Hosmer, head of the city's convention and tourism bureau, says the number of visitors to the tourism center is up 18%. The ad campaign is handled by Philadelphia's Kalish & Rice.

While visitors in Philadelphia still have to suffer what three separate studies indicate as "the worst level of taxi service of any major city in the nation," local travelers soon will benefit from a $360,000,000 underground tunnel that will link the area's two commuter train lines.

Construction on the 1.7 mile tunnel began in 1979 and when it is completed, over 500 miles of track will be joined in a new complex in the center of the city's commercial district.

"We're making the downtown area more accessible and convenient than ever before," says Thacher Longstreth, president of the Greater Philadelphia Chamber of Commerce. "A lot of people who used to work in town and shop at home in the suburbs will now find it much more practical to do their shopping in the city."

Mr. Longstreth says the commuter tunnel and other changes in the city's rapid transit system will have a profound affect on future growth.

- In the future, conventioneers and airport travelers will be brought swiftly to center city by a high-speed rail system to be completed in 1982. Already under construction, the new rapid transit line will drastically reduce traveling time from Philadelphia International airport in the south and the civic center in the west to the shops, restaurants and hotels downtown.

Getting in and out of town is becoming less of a problem for more and more people who work in Philadelphia. While the city has always been exceptionally approachable for commuters, rising home prices in the suburbs and skyrocketing costs for gasoline are turning many folks away from life in the country and bringing them into the city.

The renovation of charming historic townhouses that started here years ago in Society Hill is happening all over the city. "People are quietly buying houses in the city, fixing them up and staying here," says Mr. Longstreth.

Mr. Longstreth says the influx of young middle-class professionals into the city's neighborhoods is balancing the urban population picture and strengthening the tax base.

- Another surprise, even to most Philadelphians, is the business generated by the city's seaport. On the basis of combined tonnage, it is probably the biggest port in the country. Most of it is bulk cargo—oil, coal and iron ore—but 134,000,000 tons are transported through Philadelphia's port each year.

To compete with New York for general cargo, $54,000,000 was spent over the last 15 years to modernize Philadelphia's container terminal facilities. This year, 5,000,000 tons of general cargo passed through the city's ports, just a third of the 15,000,000 tons that went to New York.

At the Naval Base south of the city, Philadelphia's ship has finally come in. In October, the USS Lexington arrived in the Naval Shipyard for a seven-month $34,000,000 overhaul. Work on the 900-ft. carrier created 1,000 jobs for the city. In October, 1980, a sister ship, the USS Saratoga, is slated to berth in Philadelphia for a $500,000,000 overhaul.

- Progress on Philadelphia's goal of becoming an "international city" has been slow, but encouraging. The music director of the internationally acclaimed Philadelphia Orchestra, Eugene Ormandy, retires this year after his 44th season and the orchestra's board of directors has been shuffled to boost the institution's income in the face of steeply rising costs.

In the last year, three international companies moved into Philadelphia. The most notable is Mitsubishi International Corp., a Japanese-owned general trading company with holdings in over 20,000 diversified commodities.

Pittsburgh

Population	2,277,300
Rank	13th
Personal income	$17,179,000,000
Income '77 vs. '76	9.72%

If the nation caught an economic cold 25 years ago, Pittsburgh caught pneumonia.

That's when Pittsburgh was "Steel City." In 1955, for example, the steel industry employed nearly a fifth of the city's total work force, according to a Mellon Bank study. Private services and trade accounted for 43% of the city's employment. Any dips in consumer or capital spending quickly sent Pittsburgh into panic.

And, in addition to being an industrial hub, Pittsburgh looked like one. "Some people still think of Pittsburgh as the city where the rivers run brown and you can't see across the street," says Jay Aldridge, exec director of Penn's Southwest Assn., a local economic development group responsible for luring Volkswagen and its assembly plant to New Stanton, 30 miles east of the city. "When I hear those comments, all I can do is laugh."

- Mr. Aldridge can afford to laugh now. Pittsburgh is no longer the sickly city it once was. It's still an industrial center, of course with headquarters of such corporate kingpins as U.S. Steel, Gulf Oil, Westinghouse, Rockwell International, Alcoa, National Steel and PPG Industries. (Pittsburgh is second only to New York in its control of invested capital.) But the cyclical slumps have finally evened out.

Pittsburgh stadium attracts hundreds of thousands to sporting events throughout the year.

"The region has undergone some tremendous structural change," says Norm Robertson, Mellon Bank's chief economist. "Segments of the economy that deal in the service sectors have really grown. There's no question that Pittsburgh's economy is much more diversified now."

As of last year, services and trade employment was up to 54% of the work force. And area steel firms now account for a tenth of the city's jobs—a figure expected to drop to 8% by 1990.

"For many years, the region suffered from an inferiority complex," adds Mr. Aldridge. "It's just recently, with a little help from the Steelers and the Pirates, that people have begun to believe in the city and themselves."

- Despite some signs of an economic slowdown in Pittsburgh, cautious optimism seems to prevail. Retail sales, housing and employment remain surprisingly strong, although real estate execs fear that the Federal Reserve Board's tight money policy might slice demand for residential construction.

Downtown commercial construction in the "Golden Triangle"—the confluence of the Allegheny, Monongahela and Ohio Rivers—continues to be robust, promising to ease the current shortage of prime office space. Construction was started earlier this year on a new $100,000,000 PPG Industries office building, scheduled for completion in 1984.

Other major downtown projects in the planning or construction stages included the David Lawrence Exposition Hall, a new convention center scheduled to open early next year, a $200,000,000 office development backed by U.S. Steel, and a twin 40-story office tower complex. In addition, Saks Fifth Avenue opened its first downtown store this year.

"There was no downtown development in the four or five years prior to these projects," says Ed Lewis, general partner in the Oxford Development Co., owner and operator of the two largest malls in the Pittsburgh area.

- Pittsburgh's largest restaurant, seating more than 500 people, also opened this year in Station Square, a railroad yard renovation project on the city's south side. City officials expect this unique shopping mall to attract more than 100 specialty shops by early 1980.

The city stengthened its financial standing this year with the addition of five foreign banks from Canada, England and the Netherlands. And 55 of the area's 122 foreign owned companies have come to the region within the last three years— a statistic that greatly encourages local businessmen.

"We've been able to attract some high technology companies from Europe," says Mr. Aldridge. "Diversification is one of the key words in Pittsburgh's development. They do a great deal of research in new products that bring the area prestige."

"If optimism can be measured by regional investment," adds Evan Stoddard, economic development planner of the city's planning department, "then optimism is high." Regional investment by such electronics firms as Motorola Corp. has soared, thanks to Carnegie Mellon University's highly respected graduate electronics and engineering programs.

And Volkswagen plans to pump more money into the area. Now that diesels are rolling off the New Stanton assembly line, VW says it intends to expand facilities and employment at the plant by 25%.

Like most old industrial centers, Pittsburgh has its share of problems. Transportation, always a sore spot, remains an obstacle. The city has committed funds to the construction of a limited downtown subway system connecting with the South Hills. Expansion of express bus systems and reconstruction of most of the downtown road network are planned for the next five years.

Labor unrest and steel imports still concern Pittsburgh's business community but, over-all, optimism prevails. "A drop in steel production will hurt the city, but not as much as it once did," says Mr. Robertson, the Mellon bank economist. "I'm optimistic that the 1980 recession will have much less impact on Pittsburgh than on other manufacturing areas in the U.S."

Rochester, N.Y.

Population	969,800
Rank	38th
Personal income	$7,520,000,000
Income '77 vs. '76	8.36%

Its area and population give Rochester, N.Y., a small-city flavor, but its numerous colleges and large industrial complexes have the effect of converting it into a thriving metropolis.

Rochester is presently enjoying low unemployment—below 5% in September—and, compared to many cities, it enjoys a relatively high standard of living, with a median household income of $17,500.

The city attributes much of its current well-being to the companies residing there. Approximately 40% of the more than 256,000 residents are employed by fewer than a dozen companies. Eastman Kodak Co., the worldwide film and photographic manufacturer, alone employs over 50,000.

Industry throughout the city is growing. According to the Rochester Chamber of Commerce, "some 30 to 40 small local firms have announced plans for expansion within the last year."

In addition, a technical high school just opened its doors and a $53,000,000 recycling plant is scheduled to open Jan. 1, 1980. Also, builders in nearby Henrietta are awaiting word on permits in order to begin construction of a 1,000,000 sq. ft. shopping mall. Permits to begin building are expected to be approved by mid-November.

- Rochester officials, however, have voiced concern over the building of the mall, to be called The Market Place. They fear the mall will seriously hurt retail sales in the inner city.

The recent growth in industry has also brought an improvement in housing starts. "While housing starts are up from last year," a Chamber of Commerce official said, "it does not reflect how bad it was in 1976-77."

In 1977, building permits in the Rochester area were down by 25%. The cost of building a new home in the area is approximately $50,000.

So far, Rochester has not experienced a severe energy problem. "The utilities have more than enough gas and electricity," for the city and the surrounding counties, the chamber of commerce said, adding that the additional gas and electric power was being sold to other cities within the state.

The energy surplus was in part due to the power produced from a nearby nuclear power plant, which has been in operation for 10 years.

- The city and surrounding counties house nine colleges and universities, the most notable being the University of Rochester, which includes the Eastman School of Music.

Culturally, the city offers a philharmonic orchestra and computerized planetarium. The Genessee Country Museum in Mumford is one of the Rochester area's most popular tourist attractions. The Margaret Strong Memorial Museum, expected to be completed by 1981, will house a collection of dolls and Victorian artifacts.

Syracuse, N.Y.

Population	649,600
Rank	58th
Personal income	$4,218,000,000
Income '77 vs. '76	9.36%

It was an upbeat year for Syracuse, with employment and retail sales both gaining 5% and housing maintaining a stable rate.

The momentum came from activities in the cultural, sports and educational fields, as well as in the business community. Part of the optimism stems from the relatively low unemployment rate of 5.1% (as of June '79), compared with 6.9% statewide. Unemployment also has been running below the national level.

Looking toward the '80s, some sources noted the city has the built-in advantage of a comfortable mix of manufacturing and nonmanufacturing payrolls

- Carl J. Borning, associate director of economic development, Greater Syracuse Chamber of Commerce, pointed out that business expansion in general was brisk in 1979. Although no single move had been as large as Chrysler Corp.'s which added about 1,900 jobs this year, smaller companies have grown "beyond expectations."

As an example, he cited the Onondaga County Industrial Development Agency's $36,000,000 bond issue for 19 companies that should provide 2,000 new positions by mid-1980.

tral business district. The chamber of commerce and the city are collaborating on the latter project.

There is also a new Syracuse State Theater to attract playgoers, and the Syracuse Symphony has augmented its schedule to the delight of music lovers.

- When questioned about the outlook for the '80s, Dorothy Newer, business editor of the *Syracuse Post Standard*, one of two Newhouse papers in the city, was a little concerned about the uncertainties at Chrysler Corp. and what that might mean for Syracuse's economy.

The Chrysler plant, she pointed out, makes transfer boxes for American Motors Corp. as well as for Chrysler; those components are sure to be needed regardless of what happens to the Detroit auto maker.

Other sizable employers in the market include Niagara-Mohawk Power Corp., General Motors Corp., General Electric Co. and Crouse-Hinds Co. Another standby for workers in this area is Carrier Corp., from which even greater things are expected since it became a part of United Technologies.

The $100,000,000 brewery built by Schlitz only three years ago is to shut down for the present, but will reopen under new management. Schlitz decided to close because of lack of demand. Anheuser-Busch, which sees the prospects differently, is taking over, but a year-long hiatus is anticipated before the Bud flows.

Sycracuse gets most of its energy from natural gas and hydro and nuclear-powered electricity. As a result, it has not suffered any great disruptions because of energy shortages and price increases. Anticipated growth, of course, could be curtailed if there is another national oil crisis.

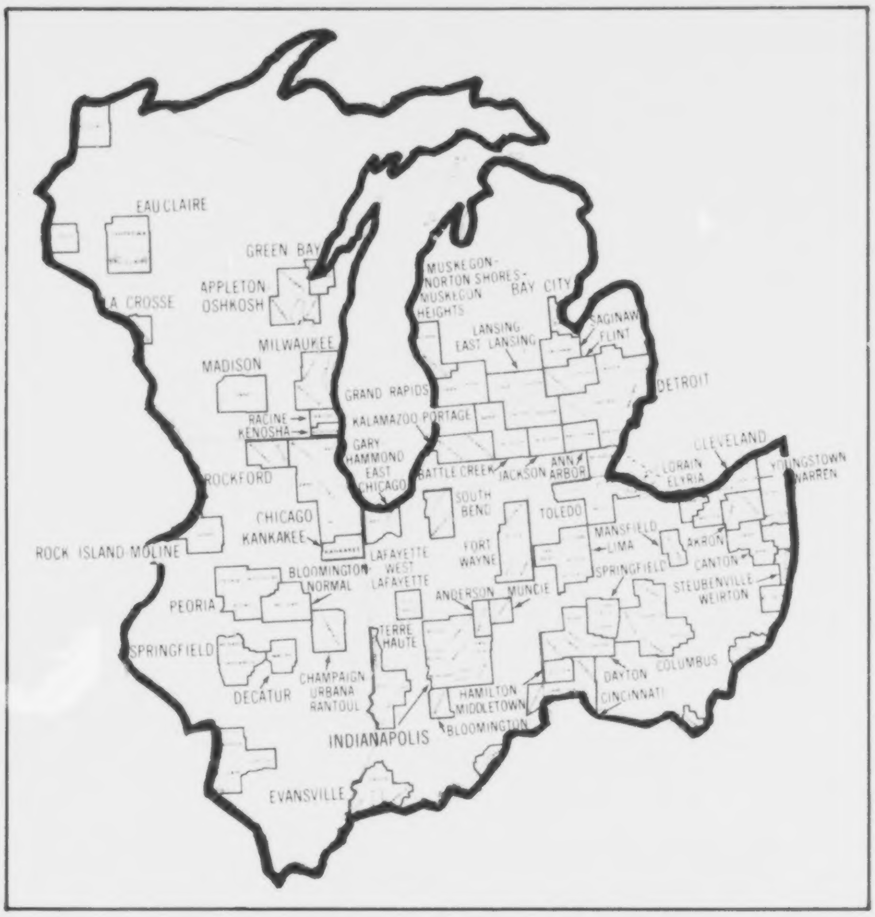
Whatever the national or international gyrations, the No. 1 employer will continue to be Syracuse University, whose enrollment totals 24,000. Its business school is being enlarged, and LeMoyne College is building a new library.

A domed $26,000,000 stadium under construction should attract more collegiate events. The Syracuse invitational hockey tournament is back on the schedule after a year's interruption, and the Carrier Classic, a college basketball tournment, continues.

Elsewhere on the sports scene, Syracuse is returning to professional hockey with the Syracuse Firebirds of the American League and the annual collegiate rowing regatta keeps right on rowing along.

The mountain and lake surroundings have helped to make Syracuse popular with conventioneers and vacationers. In 1979, the city played host to 200 conventions attended by 115,000 people. Even more people—725,000—were lured to the New York State Fair. Another big attraction—Agway Inc., a farmer's cooperative, reportedly grosses about $2 billion in sales annually.

Local historians point out that the area's first convention of sorts was held in 1570 on the shores of Lake Onondaga with representatives of the Cayuga, Mohawk, Oneida, Seneca and Onondaga Indian tribes in attendance. The corn dance festivities of the Onondagas, whose central leaders live near Syracuse, are staged each year at the state fair.



East North Central

Akron

Population	657,000
Rank	57th
Personal income	$4,583,000,000
Income '77 vs. '76	+11.94%

Will the renovation of the old Quaker Oats silos into a luxury hotel help the fledgling Akron convention industry begin to feel its oats?

Will the Akron economy be able to bounce back from the blow dealt it by the troubled rubber industry?

Will the city be able to cope with the dislocations certain to arise as a result of changing from a blue to a white-collar labor force?

Will the new national park being developed nearby enable Akron to change its image from that of the World's Tire Capital to one of an area replete with outdoor recreational opportunities?

- These are but a few of the questions facing the Akron community as it attempts to cope with fundamental changes in its economy. After a quarter century during which the city saw its rubber industry employment drop from 50,000 to a bit more than 10,000, the major tire companies gave indications that the long slide in employment may have begun to reverse itself in 1979.

Goodyear Tire & Rubber Co. has committed itself to building a $75,000,000 Technical Center near downtown Akron and has announced plans for a $2,000,000 renovation of its Akron aerospace operations. General Tire & Rubber Co. has decided to locate its new world headquarters in the Akron area, and B.F. Goodrich Co. plans to spend $25,000,000 renovating its existing facilities.

None of these developments may be of much direct help to those who lost their manufacturing jobs, but the plans will certainly increase the number of white-collar research and management positions available in the area.

Other efforts to bolster the city's economy are also under way, including the Hilton Hotels project to turn old oats silos into a 260-room hotel.

Hilton is hoping to duplicate the success enjoyed by the Quaker Square shopping center, a much-lauded renovation project that converted other former Quaker facilities into a shopping center that has attracted retail trade from throughout northeastern Ohio.

The hotel's construction fits perfectly with the preliminary findings of a study done for the city by American Cities Corp. According to the study, one of the keys to reviving the city's central business district is to increase convention trade, which will require an increase in the number of hotel rooms in the city.

City officials also hope that a planned network of pedestrian "skyways" linking various downtown buildings will create a mall-like atmosphere and draw visitors downtown, and the possibility of creating a festive farmers' market and cluster of boutiques along the city's riverfront is also being examined.

In addition, the city hopes to be able to increase the number of people residing in the downtown area but, aside from some housing for senior citizens, the trend toward in-city living that has helped downtowns in many other cities has not hit Akron yet.

Another source of optimism is the continued progress on the 30,000-acre national park under development between Akron and Cleveland. Though skeptics say that the park will never be anything more than a recreational facility serving central Ohio, Akron boosters are quick to point out that the park is within a day's drive of 60% of the nation's population and that the rising cost of gasoline makes this proximity an important drawing card.

Though the city has not allocated funds to spread word of Akron's riches to other parts of the nation, attempts are being made to persuade the city's major corporations to mention Akron in their national advertising.

Canton

Population	403,700
Rank	94th
Personal income	$2,688,000,000
Income '77 vs. '76	+10.3%

Betting blue chips on the near future, four Canton area companies are planning expansions and improvements totaling almost $250,000,000. The Timken Co., maker of roller bearings and other high-grade steel products, is the area's major employer with 10,000 on the Timken payroll.

Timken will spend $30,000,000 to increase its steel bar, shipping and development facilities. Plans also include doubling its research staff and expanding medical services for its workers.

Republic Steel Corp., with 7,500 employes, the area's second largest employer, recently completed a waste-water treatment plant that cost $10,000,000. Now, Republic plans a larger bar steel mill, at a cost of $200,000,000, to replace a mill in Canton and one in nearby Massillon.

Jones & Laughlin Steel plans to spend $14,000,000 to enlarge a rolling mill and the Portec Co., which forges steel for railroad cars, plans to spend $3,000,000 to expand.

- Approximately 450 persons lost their jobs at Perkins Diesel Corp. in October when this Massey-Ferguson division closed its Canton plant and transferred that operation to plants in Iowa and Michigan.

Nonetheless, employment rose to 162,900 in August, up almost 4% in a year.

Three financial concerns — the Citizens Savings Assn., the Harter Bank & Trust Co. and the United National Bank & Trust — enlarged their facilities and operations this year.

A fourth, the Columbus-based BancOhio, said it will open a downtown Canton office and three branches.

- Canton's languishing downtown area is scheduled next spring for a $97,000,000 rejuvenation to be financed 50-50 by public and private funds. A four-year project called New Market would revitalize eight deteriorating downtown blocks adjacent to Stern & Mann's, the only department store left downtown.

In the first phase of the program, six structures are due to rise — a new terminal for Canton's Regional Transit Authority; a 1,500-car parking structure; a $15,000,000 hotel containing 308 guest rooms and 32 condominium units, a conference center linked to the hotel to attract regional and statewide business groups; an office tower with 234,000 sq. ft. to be leased by local and state government offices, perhaps courtrooms and a police headquarters, too, and a tower providing 255,000 sq. ft. of private office space. Specialty shops will be offered 35,000 sq. ft.

The private money reportedly is ready and the enterprise now hinges upon public money, including $14,000,000 in federal urban development and urban mass transit grants.

The second phase, to be completed before 1985, would include two additional office buildings, another 1,500 parking facility, and 100,000 sq. ft. more of retail space.

Meanwhile, an historic Victorian house, once favored by Canton's own President William McKinley, is being restored to serve as a 260-seat restaurant and focal point for the urban revival.

Proponents of New Market say it will not lure department stores to return downtown, nor will it challenge the commercial developments burgeoning on Canton's rim. There, five miles north of town, beside Interstate Highway 77, the nine-year-old, 75-acre Belden Village with its enclosed mall of 68 stores, awaits a new next-door neighbor — Belpar.

Belpar's 150 acres are being laid out to hold an 18-acre shopping plaza of colonial motif called Belpar Square, an $8,000,000, 185-room Hilton Hotel, a tower of office suites, a medical center, convention center, bank buildings and apartments.

It is estimated that Belpar will cost $100,000,000 by the time it is completed in 1982.

Chicago

Population	7,029,600
Rank	3rd
Personal income	$59,800,000,000
Income '77 vs. '76	+9.04%

It was the winter of discontent for Chicago. Not only did Chicago business lose an estimated billion dollars worth of business as a result of 80 inches of snow, but Chicago also elected a new, and unexpected, mayor.
